The portraits of Kjerulf represent him with a mild and pensive face, with traces of pain in the expression. He had indeed suffered for long from extreme delicacy in the chest, and death overtook him when he had withdrawn to a retreat at Grefsen, near Christiania, in August 1868. A wave of deep emotion and sympathy, the fervour of which would have astonished the composer himself, passed over the country he had loved and served so well.

The value of Kjerulf's stirring quartets and choruses for men's voices, as reflecting the national sentiment in the way most acceptable to his countrymen, has already been commented on. As absolute music they are of slight interest, but by their vigour and their straightforward simplicity they may be said to possess all the virtue which belongs to complete appropriateness to the subject. His few pianoforte pieces fully maintain the highly artistic standard to which Kjerulf was always faithful.

Consideration of the purely musical side of Kjerulf's songs shows the perfect genuineness of their inspiration, and also the limits of that inspiration in intellectual depth and power. The stream of melody, generally written with due effect for the voice, and with a varied and sometimes elaborate pianoforte accompaniment, in fact, with considerable instinct of just proportions, is saved from actual commonplace by the fresh fragrance and the refinement which make his music distinguished though not important. Its sadness never becomes morbid, but is stamped with the resignation of a noble nature. Among the Northern ballads and lyrics are to be found some really characteristic and quaintly fascinating ditties. Such are Björnson's 'Synnöve's Song,' 'Ingrid's Song,' 'Young Venevil,' 'Evening Song,' and the Scotch 'Taylor's Song,' Munch's 'Night on the Fjord,' Theodor Kjerulf's 'Longing.' Several songs that spring from Kjerulf's sojourn at Leipzig most eloquently recall the influence of Schumann, while his treatment of some English poems is almost startling. The polished verses of Moore are made the vehicle of outpourings in which the gentle Kjerulf is seen in his most impassioned mood—for instance, 'Love thee, dearest, love thee.' 'My heart and lute,' on the other hand, has inspired the composer with an intensity of dreamy melancholy. Unfortunately a certain amount of license has been taken in the settings, and where the poem as a whole gains by the suggestiveness of the music, the lines and words now and then suffer from false accentuation. This is especially the case with some familiar verses by the late Lord Houghton. It would be impossible to enumerate all that is worthy of note in the collection of more than one hundred songs by Kjerulf; but notice must be taken of the successful colouring of some Spanish subjects, and of the pleasing settings of Victor Hugo's Romances. Many of the songs are familiar to English amateurs through the compilation by T. Marzials, published by Messrs. Stanley Lucas, Weber & Co. Kjerulf's name has been included in Mr. Carl Armbruster's lectures on 'Modern Composers of Classical Song.' Further testimony to the value of the Norwegian composer's work can be read in the 'Musikalisches Wochenblatt' of Jan. 24, 1879, in an article from the pen of Edward Grieg. [L.M.M.]

KLEINMICHEL, RICHARD, born at Posen Dec. 31, 1846, received his first instruction from

[1] Mendel and other German authorities give wrong dates.

[2] For a full account of Kjerulf as the representative of his country, and for extracts from his letters and details of his private life, the reader may be referred to the articles 'Halfdan Kjerulf,' by Henrik Sundt, in the 'Musical World' of October 1, 8, and 15, 1887.

his father, and at an early age appeared in public as a pianist. He afterwards completed his studies at the Leipzig Conservatorium, and settled at Hamburg, where he published many works of some importance, mostly for his own instrument. His second orchestral symphony was given at the Gewandhaus at Leipzig with success. In that town he held for some time the position of Capellmeister at the Stadttheater, and subsequently held similar posts at Danzig and Magdeburg, where he now resides. His first opera, 'Manon,' was successfully produced at the last two places as well as at Hamburg. He has lately completed another opera, 'Der Pfeifer von Dusenbach.' He has also made 'simplified' arrangements of the pianoforte scores of Wagner's later works. [M.]

KLEMM. Add that C. B. Klemm died Jan. 3, 1888, leaving the business to his two sons.

KLENGEL, A. A. Correct date of birth to Jan. 27, 1783.

KLINDWORTH. P. 64 *b*, l. 3, *add* they were called the 'Musical Art-union.'

KLINGEMANN. Line 18 of article *add* for Mendelssohn's opera 'Die Hochzeit des Camacho'; also.

KNECHT, J. H. P. 66 *a*, l. 2, *for* Dec. 11 *read* Dec. 1.

KNELLER HALL. P. 66 *b*, l. 22 from bottom, *after* Forces *add* H. Schallehn was resident musical director till April 1859. Colonel Whitmore was appointed Aug. 15, 1863. He was succeeded, May 1, 1880, by Colonel Robert T. Thompson, who still (Jan. 1, 1888) holds the post of Commandant; Charles Cousins (appointed Nov. 1, 1874) being musical director. [G.]

KNIGHT, Rev. J. P. Add that his last composition was a setting of Byron's 'Jephthah's Daughter,' and that he died at Yarmouth June 1, 1887.

KOCH, Heinrich Christoph, born at Rudolstadt Oct. 10, 1749, the son of a member of the ducal orchestra there. In 1768 he was admitted into the band as a violinist, having received instruction from Göpfert of Weimar, and in 1777 obtained the title of 'Kammermusiker.' He composed various pieces of small importance for the court, but his fame rests upon his contributions to musical literature. His 'Versuch einer Anleitung zur Composition' appeared in three parts between the years 1782 and 1793; and his 'Musikalisches Lexicon' in 1802. This was republished in a condensed form in 1807 and 1828, but its complete revision dates from 1865, and is the work of Arrey von Dommer. [See Dommer in Appendix, vol. iv. p. 617.] He wrote several other works of less importance on harmony and other subjects connected with the art, and died March 12, 1816. [M.]

KÖHLER, Louis. See vol. ii. p. 733 *a*, and add date of death, Feb. 16, 1886.

KOLLMANN, August Friedrich Karl. Line 9 of article, *for* about 1782 *read* April 9, 1784. Line 12, *for* Nov. 1824 *read* Easter Day, 1829.

KONTSKI, DE. Correct date of birth of Charles to 1815, and add date of death, Aug. 27, 1867. Correct date of birth of Apollinaire to 1826, and add date of death, June 29, 1879. (Partially corrected in late editions.)

KOZELUCH. Leopold. As to the date of death the authorities are at variance, the date 1814 being supported by Dlabacz and Wurzbach, as well as by the less trustworthy evidence of Fétis and Mendel. The testimony of the first is especially weighty, since his dictionary was begun in 1815, when the date of so important a musician's death must have been well known. Almost all the authorities give May 8 as the day: Dlabacz's May 3 is probably a misprint for 8. It should be added that he arranged some Scotch songs for Thomson of Edinburgh, in allusion to which, Beethoven, in a letter of Feb. 29, 1812 (Thayer, iii. 449), whether inspired with disgust at Kozeluch's underselling him, or with a genuine contempt for his music, says, 'Moi je m'estime encore une fois plus supérieur en ce genre que Monsieur Kozeluch (miserabilis).' He again calls him 'miserabilis' (Thayer, iii. 200).

KRAUSS, Marie Gabrielle, born March 23, 1842, at Vienna, received instruction at the Conservatorium in pianoforte playing and harmony, and in singing from Mme. Marchesi. She made her début at the Opera there as Mathilde ('Tell'), July 20, 1860, and played immediately after, Anna ('Dame Blanche') and Valentine. She became a favourite, and remained there for some years, until about 1867. Her parts included both Donna Anna and Elvira, Fidelio, Euryanthe, Senta, Camille ('Zampa'), Amelia Ankarstroem ('Gustavus III.'), Lalla Rookh, and Maria (in Rubinstein's 'Kinder der Haide'), Feb. 23, 1861, and Hélène ('Häusliche Krieg'), Oct. 6, 1861. She made her début at the Italiens, Paris, as Leonora ('Trovatore'), April 6, 1867, and Lucrezia; became very successful, and was engaged there every season until the war of 1870. She gained great applause by her performance of Donna Anna, Fidelio, Norma, Lucia, Semiramide, Gilda, etc, and in a new opera of Mme. de Grandval's, 'Piccolino,' in Jan. 1869. She sang with great success at Naples in Petrella's 'Manfredo' (1871) and 'Bianca Orsini' (1874), also as Aïda; with less success at Milan as Elsa on the production there of 'Lohengrin,' and in Gomes's 'Fosca,' Feb. 16, 1873. She returned to the Italiens for a short time in the autumn of 1873, accepted the offer of an engagement for the Académie, previous to which she played at St. Petersburg in 1874. She made her début at the Académie at the inauguration of the new house as Rachel in 'La Juive' (first two acts), Jan. 5, 1875, and in the same opera in its entirety Jan. 8. She has played there ever since until the present time, and has maintained her position as the principal dramatic soprano of that company. She has played the heroines of Meyerbeer, also Donna Anna and Agatha, and in operas produced there for the first time as the heroine (Mermet's 'Jeanne

d'Arc'), April 5, 1876; Pauline (Gounod's 'Polyeucte'), Oct. 7, 1878; Aïda, March 22, 1880; Hermosa (Gounod's 'Tribut de Zamora'), April 1, 1881; Katharine of Arragon (Saint-Saëns's 'Henry VIII.'), March 5, 1883; the heroine on revival of Gounod's 'Sappho,' April 2, 1884; Gilda ('Rigoletto'), March 2, 1885, and Dolores (Paladilhe's 'Patrie'), Dec. 20, 1886. 'The talent of Mlle. Krauss is the more remarkable, because the instrument at her disposal is far from being perfect, and always in response to her efforts. The voice, . . . although not wanting in brilliancy and power, is sometimes wanting in tone and character; in certain parts of the scale its resonance is dull, and it is only in the high part that it acquires its best qualities. The style is pure to perfection, her phrasing is masterly, and her musical delivery, in recitative especially, attains in the highest degree to grandeur and beauty. If one adds to these purely musical qualities the wonderful fire, . . . the pathetic feeling, the passionate expression, her great intelligence, and the incontestable power of her dramatic accent, one can understand the sway such an artist exercises over the public, and one can guess the secret of the success which has made her career remarkable. Mlle. Krauss is certainly one of the greatest singers that contemporary art can boast of.' (Pougin.) [A.C.]

KREBS. Add date of death of KARL AUGUST, May 16, 1880. Line 23 of article, *for* MICHAELSI *read* MICHALESI.

KREISLERIANA. Line 4 of article, *for* musical papers *read* 'Fantasiestücke in Callots Manier.'

KRETSCHMER, EDMUND. Add that 'Heinrich der Löwe' was produced at Leipzig in 1877, and another opera, 'Der Flüchtling' at Ulm in 1881. His most recent production is 'Schön Rohtraut,' an opera in 4 acts, produced at Dresden Nov. 5, 1887. 'Sieg im Gesang,' a cantata, was lately performed at Dresden.

KREUTZER, CONRADIN. Line 2 of article, *for* 1782 *read* 1780. P. 72 *a*, l. 6, *for* in 1843 conducted the 43rd festival, *read* in 1841 conducted the 23rd festival.

KREUTZER, RODOLPHE. P. 72 *a*, note, *add* We need not complain of this, for in the advertisements of Ernst's concert in the London papers of 1884 it is given as 'Greitzer'! See 'Mus. World,' June 20, 1844, p. 209 *c*.

KROLL, FRANZ. Line 9 of article, *for* Variations *read* various readings. Line 12, add reference to English edition of Spitta's Bach, ii. 166.

KROMMER, FRANZ. Add day of birth, Dec. 5.

KRUMPHOLZ, WENZEL. Line 12 from end of article, *for* seems to have intended writing a sonata, *read* wrote a sonata in one movement, given under MANDOLINE, vol. ii. p. 205.

KÜCKEN, F. W. Add date of death, April 3, 1882.

KUFFERATH, H. F. Add date of death, March 2, 1882.

KUHE, WILHELM, born Dec. 10, 1823, at Prague, was taught music by Tomaschek, with Schulhoff as a fellow student. He made a concert tour with great success in 1844–45 at Linz, Salzburg, Innsbruck, Augsburg, Munich, and Stuttgart. He visited London with Pischek in 1845, and played with success at the Musical Union in Mayseder's trio, op. 52, May 13. He has lived in England ever since, dividing his time between London and Brighton since 1847, at which last place he has attained popularity as a teacher and performer, and as a promoter of concerts. In the last capacity Mr. Kuhe showed great enterprise by the annual festival held by him from 1870 to 1882, wherein he encouraged native talent by the new works composed at his instance and produced by him, viz. Virginia Gabriel's 'Evangeline' in 1873; Barnett's cantata, 'The Good Shepherd,' in 1876; Clay's 'Lalla Rookh' in 1877 and 1878; Cowen's 'Deluge,' and Cellier's 'Suite Symphonique' in 1878; Walter Macfarren's overture, 'Hero and Leander,' Gadsby's 'Lord of the Isles,' Wingham's Concert Overture in A, and Sloper's suite in 1879; Leslie's cantata, 'First Christmas Morn,' A. H. Jackson's 'Ballet Suite' and W. Macfarren's Symphony in B♭ in 1880; W. Macfarren's Concertstück in B♭, played by Miss Kuhe, in 1881; Corder's orchestral Nocturne in 1882, etc., in addition to 'The Woman of Samaria,' 'The Martyr of Antioch,' etc., under the respective direction of their composers. He has occasionally appeared in London, where he has given an annual concert since 1846. He was appointed a Professor of the Royal Academy of Music in 1886. His numerous compositions include many drawing-room pieces, fantasias, and studies, viz. 'Lieder ohne Worte,' op. 12; 'Le Carillon,' op. 13; 'Chanson d'Amour'; 'Romance sans Paroles,' op. 17; 'Le Feu Follet,' op. 38; 'Victoria Fantasia on National Anthem'; 'Fantasia on Austrian Anthem'; operatic fantasias, etc. [A.C.]

KUHLAU, FRIEDRICH. For day of birth *read* Sept. 11, and for the place and day of death *read* Copenhagen, March 12. It is curious that the canon by Beethoven is on the name 'Bach,' whether by accident or design cannot of course be asserted. The last two lines of the article should run—Compositions, of which a few for flute and a few for piano, are still much esteemed. (Corrected in late editions.) Under FLUTE, vol. i. p. 538, a list of his most prominent compositions is given, to which may be added an excellent trio for two flutes and piano, op. 119, seven sonatas for flute and piano, and four sonatas for violin and piano.

KUHNAU, JOHANN. Line 10 from bottom of page, *for* then *read* in 1701. Line 8 from bottom, the date of death should probably be June 25, as given by Riemann and Paloschi.

KULLAK, THEODOR. Line 12 of article, *for* 1851 *read* 1850, and add date of death, March 1, 1882.

L.

LABITZKY, Josef. Add date of death, Aug. 19, 1881.

LACHNER. Add date of death of Theodor, May 22, 1877. P. 81 *b*, l. 3 from bottom, *for* death *read* retirement.

LACHNITH, L. W. P. 82 *b*, l. 6, *for* Aug. 20 *read* Aug. 23. Add date of death, Oct. 3, 1820.

LACOMBE, Louis. See vol. ii. p. 732 *b*, and add date of death, 1884.

LAFONT, C. P. Add day of birth, Dec. 1. Line 15 from bottom of page, *for* 1812 *read* 1816. Line 9 from bottom, add day of death, Aug. 23.

LAGUERRE, Jean. Add that in 1737 he sang in Capt. Breval's 'Rape of Helen' the part of Mercury, and that his name was correctly spelt in the cast.

LAHEE, Henry, born at Chelsea in April, 1826, held the post of organist at Holy Trinity Church, Brompton, from 1847 to 1874, and is well known also as a professor and composer. His music is thoroughly English in character, and is influenced by the traditions of our old part-song writers. Mr. Lahee has been the victor in various prize competitions for glees and madrigals: in 1869 with 'Hark, how the birds' (Bristol); in 1878, with 'Hence, loathed Melancholy' (Manchester); in 1879, with 'Away to the hunt' (Glasgow); and in 1880 and 1884, with 'Love in my bosom' and 'Ah! woe is me' (London Madrigal Society). Equally good work can be seen in his other choral songs, such as 'The Unfaithful Shepherdess,' 'Love me little, love me long,' and the popular 'Bells,' and in his anthems no less than in his various songs and instrumental pieces.

Good taste is shown by this composer in the choice of his words, and he has found Longfellow congenial with his musical style. The cantata 'The Building of the Ship' was written in 1869 for the late Rev. John Curwen, who desired a work of moderate difficulty for the use of Tonic-Sol-faists. It was performed on a large scale in the Hanover Square Rooms, has since attained considerable popularity in the provinces, and has even made its way to Africa and America. The subject of another cantata, Tennyson's 'The Sleeping Beauty,' afforded Mr. Lahee scope for a greater variety of treatment, and contains some graceful writing for female voices. It has been heard on the continent and in America. [L.M.M.]

LAHOUSSAYE, Pierre. See vol. iv. p. 293 *a*.

LALANDE, Henriette Clementine Meric. Add that she died in Paris, Sept. 7, 1867.

LALANDE, Michel Richard de, Surintendant de la Musique under Louis XIV. and XV., the cleverest composer of church music of his day, was born in Paris, Dec. 15, 1657, and died in the same city, June 18, 1726, having spent 45 years in the service of the court. He was the fifteenth child of a tailor, and was at first a chorister of St. Germain l'Auxerrois, where he studied music under Chaperon, and learnt, almost entirely by himself, to play the violin, bass viol, and harpsichord. When, on the breaking of his voice at the age of 15, he was obliged to leave the maîtrise, he bethought himself of turning his violin-playing to account, and applied for admission into Lulli's orchestra. He was refused, and swore out of pique never to touch the violin again. He gave himself up to the organ, and made such progress that he was soon appointed organist in four different churches in Paris—St. Gervais, St. Jean, Petit St. Antoine, and at the church of the Jesuits, who confided to him the composition of symphonies and choruses for several of the tragedies performed at their college. He soon afterwards applied for the post of organist to the King, but though Lulli pronounced him to be the best of the competitors, he was refused on account of his youth. He was recommended by the Maréchal de Noailles, to whose daughters he taught music, to Louis XIV., and the King chose him to superintend the musical education of the princesses, afterwards the Duchesse d'Orléans and Madame la Duchesse. Lalande was so successful in this capacity that the King appointed him master of his chamber music; and in 1683, on the retirement of Dumont and Robert from the superintendence of the chapelle, he obtained one of the appointments, for it was decided to appoint four officers to serve for three months by turns. Eventually the offices were united in the person of Lalande, who had now received several pensions and the *cordon* of the order of St. Michel. In 1684 the King had given him a wife, Anne Rebel, said to be the best singer of the court, had paid the expenses of the wedding, and given a dowry to the bride. In 1722, having lost his wife, and two gifted daughters, who died of smallpox in the same year as the Dauphin (1711), Lalande begged the King to allow him to remit three-quarters of his salary, thus returning to the original arrangement. He presented as his substitutes and assistants Campra, Bernier, and Gervais. As a reward for his disinterested conduct the Regent granted him a pension of 3000 livres. In the following year he married again, Mlle. de Cury, daughter of one of the Princesse de Conti's surgeons, and died three years later at the age of 68. Lalande, though infinitely superior to the

composers of church music of his time—Goupillet, Minoret, etc.—cannot of course be compared to Handel and Bach, who were almost his contemporaries. The cause of his superiority over his immediate rivals was that he knew how to adapt to French tastes the forms of concerted church music hitherto confined to the Italian school, and his compositions, besides possessing real imagination, show that, like the musicians of Lulli's school, he gave special attention to declamation and to the proper agreement between words and music. He wrote no less than 60 motets for chorus and orchestra for the chapel at Versailles, which were published most luxuriously at the King's expense. They are contained in 20 books, and are usually found bound in 10 volumes. He did not contribute so much as is generally supposed to the the ballet of 'Les Éléments,' by Destouches (Tuileries, Dec. 31, 1721; Académie de Musique, May 29, 1725), his portion being confined to a few pieces in the prologue. He wrote music for the heroic pastoral 'Mélicerte,' begun by Molière and altered by Guérin. He composed various works for the court theatres:—the 'Ballet de la Jeunesse' (Versailles, 1686), 'L'Amour fléchi par la Constance' (Fontainebleau, 1697), 'Les Folies de Cardenio' (Tuileries, 1720). Fétis is of opinion that Lalande worked at several operas without allowing anything to be represented under his own name, and gives as his authority Titon du Tillet, to whom we owe the biographical details of Lalande; but du Tillet does not mention it in his article on Lalande in the 'Parnasse Français.' [A.J.]

LALLA ROOKH. P. 86 *a*, *add* 2. 'Lalla Rukh,' a dramatic piece by Spontini, produced Jan. 27, 1821, at the Royal Palace, Berlin. [See vol. iii. p. 673.] *Change* 2, 3, 4, 5, *to* 3, 4, 5, 6. *Add* 7. 'Paradise and the Peri,' Cantata, John F. Barnett, Birmingham, 1870. For other musical compositions based on the poem see CLAY, vol. i. 369 *b*; PARADISE AND THE PERI, vol. ii. 648 *b*; and STANFORD, vol. iii. 689.

LALO, EDOUARD VICTOR ANTOINE, born at Lille, Jan. 27, 1823,[1] studied the violin at the Conservatoire of that town under an excellent German professor named Baumann. When he came to Paris he played the viola in the Armingaud-Jacquard quartet, and began to compose with activity. He competed at the concours at the Théâtre Lyrique in 1867 with an opera, 'Fiesque,' which took a third place, and has since been printed and partly performed at the Concert National, 1873. The ballet music from this work, under the title of a Divertissement, was given with great success at the Concert Populaire, Dec. 8, 1872. Lalo next composed a violin concerto in F, played by Sarasate at the Concert National, Jan. 18, 1874, and a Symphonie Espagnole, for violin and orchestra, played by the same artist at the Concert Populaire, Feb. 7, 1875. It was produced in England at the Crystal Palace, March 30, 1878. After these two great successes, which gave Lalo a first-class position as a composer for the concert-room, he produced an Allegro Symphonique, the overture to his opera, 'Le Roi d'Ys,' a violoncello concerto, played by Fischer, a scherzo for orchestra (all performed in Paris), a Serenade and a Fantaisie Norvégienne for violin and orchestra, first given in Berlin. His 'Rhapsodie Norvégienne' and his 'Concerto Russe,' played by Marsick, were the last important works for the concert-room written before his grand ballet, 'Namouna,' performed at the Opera, March 6, 1882. This work has something of a symphonic style, and is orchestrated in a manner far superior to that of many more popular ballets, but it was coldly received by the public. 'Namouna' was only given 15 times, but when transferred to the concert-room in the form of a grand Orchestral Suite in five movements, it achieved the success it deserved. An andantino, and two other movements from the same, arranged for violin and orchestra, were also received with favour at the Concerts Modernes, and a serenade, arranged for four stringed instruments, was also successful. After this reparation for his former failure, Lalo again set to work and orchestrated the whole of his 'Roi d'Ys,' of which the general plan had been sketched some five or six years before, and wrote a Symphony in G minor, performed at the Concert Lamoureux, Feb. 13, 1887, which was much praised by musicians. The opera was produced at the Opéra Comique, May 7, 1888, with well deserved success. Thus far we have only spoken of Lalo's orchestral compositions. An allegro for piano and violoncello, a sonata for the same, a serenade and chanson villageoise for violin and piano, a sonata in three movements for the same, a trio in A minor for piano and strings (given at Hallé's recital, June 15, 1888), a string quartet in E♭, a 'Fantaisie Ballet' for violin and orchestra (unpublished), and more than 20 songs, complete the list of works by one who has gained a reputation both in Germany and France, though his dramatic work has received but tardy recognition. His talent is of an extremely individual kind, and has been formed, not by the discipline of the Conservatoire, nor by the influence of professors, but by the direct study of such masters as Beethoven, Schubert, and Schumann, for whom he has a special predilection. His chief characteristics are the expressive grace of certain ideas, the piquancy of some of his themes, and, above all, the richness and skill of his orchestration. Lalo is one of the most distinguished of French composers, and has fully deserved the decoration of the Légion d'Honneur conferred upon him in July 1880. (Died Apr. 23, 1892.) [A.J.]

[1] Date verified by the register of birth.

LAMBERT, G.J. Correct date of birth to Nov. 16, 1794, and add date of death, Jan. 24, 1880.

LAMBETH, HENRY ALBERT, born at Hardway, near Gosport. Jan. 16, 1822, studied for some time under Thomas Adams, came to Glasgow about 1853 as city organist, on the recom-

mendation of Henry Smart, and in 1859 was appointed conductor of the Glasgow Choral Union. This post he held till 1880. About 1872 he formed a choir of from twenty to thirty selected voices, and in the department of Scotch music their concerts met with a very creditable degree of success. Mr. Lambeth has harmonized several of the best Scottish melodies in a most effective manner. He is the composer of several songs and pianoforte pieces, also of settings of Psalms 86 and 137, both of which were performed by the Glasgow Choral Union. He has acted as organist and choir-master in Park (Established) Church since about 1870. [W.He.]

LAMOUREUX, CHARLES, born at Bordeaux, Sept. 21, 1834, began his violin studies under Beaudoin, and was then sent to the Paris Conservatoire, where he was in Girard's class. He obtained in 1852 a second *accessit* for the violin, the second prize in the following year, and the first in 1854. He also studied harmony under Tolbecque, and attended the counterpoint course of Leborne at the Conservatoire, where he finished his theoretical studies under the famous organist Alexis Chauvet. He was solo violinist in the Gymnase orchestra (1850), and afterwards joined that of the Opéra, where he played for many years. He was admitted a member of the Société des Concerts du Conservatoire, and, like all the members of these orchestras, gave private lessons. But these insignificant posts were not sufficient for the activity of Lamoureux, who dreamt of great undertakings in the musical art of France. Together with Colonne, Adam, and A. Pilet, he founded in 1860 a society for chamber music of a severe character, in which he showed a taste for new works by producing compositions hitherto unnoticed. He had also the honour of first performing in France Brahms's sextets. He was not content with this, for having travelled in Germany and England, he was anxious to organize performances on a large scale, such as he had heard under Hiller and Costa, of the masterpieces of Handel, Bach, and Mendelssohn. After several preliminary trials at the Salle Pleyel, where he performed among other things the 'Streit zwischen Phöbus und Pan' of Bach, he succeeded by his own energy and resources in founding the 'Société de l'Harmonie sacrée' on the model of the Sacred Harmonic Society of London. The first festival was given at the Cirque des Champs Elysées, Dec. 19, 1873. The success of an admirable performance of 'The Messiah' was such that amateurs came in crowds to the following performances. Lamoureux then produced Bach's Matthew Passion, March 31, 1874, and 'Judas Maccabæus,' Nov. 19, 1874. Not content with confining himself to well-known masterpieces, he produced Massenet's 'Eve,' then unpublished, March 18, 1875. These great performances showed that Lamoureux was a conductor of great merit, who succeeded in obtaining from his orchestra a matchless precision of attack and regard to expression. When Carvalho became director of the Opéra Comique in 1876, he offered Lamoureux the post of conductor, but in less than a year the latter resigned, owing to some difficulties arising out of the rehearsal of Chaumet's 'Bathyle' in May, 1877. In December of the same year Lamoureux was appointed conductor of the Opéra by Vaucorbeil, and gave up the subconductorship of the Concerts du Conservatoire, which he had held since 1872. In 1878 he was decorated with the Légion d'Honneur, and in the following year he resigned his post at the Opéra on account of a dispute with Vaucorbeil as to the tempo of one of the movements in 'Don Juan.' From that time he determined to be self-dependent, and after having carefully prepared the undertaking, he founded on Oct. 23, 1881, the Nouveaux Concerts, called the Concerts Lamoureux, which were held for some years in the theatre of the Château d'Eau, and afterwards at the Eden Théâtre (1885) and the Cirque des Champs Elysées (1887), where their success is constantly on the increase. Not only has Lamoureux developed as a conductor a precision and firmness, a care for the perfection of the smallest details, without excluding passion and warmth of expression; he has also given a welcome to the works of French composers of the new school, such as Reyer, Lalo, d'Indy, and Chabrier, and has succeeded in placing himself at the head of the Wagnerian movement in France. He gave excellent renderings of selections from Wagner's operas to a public that had been too long deprived of these fine compositions. The first Act of 'Lohengrin,' Acts 1 and 2 of 'Tristan,' and Act 1 of 'Die Walküre' have been given in their entirety, and excerpts from the other works have been heard. Encouraged by the warmth of the applause and the moral support of his audience, Lamoureux decided to give a performance in a Paris theatre of 'Lohengrin,' a work unknown in France, less by reason of patriotic susceptibilities than of commercial intrigues. After a whole year of preparation a perfect performance was given at the Eden Théâtre (May 3, 1887), which was not repeated. It is true that it took place at a time of unfortunate political relations; but if Lamoureux had to give in, it was because he received no support from the ministry with which he believed himself to be in perfect agreement. Those who protested against Wagner used the word patriotism as a pretext. The violent manifestations were, however, directed by unseen agents, and governed by far meaner motives, among which the love of money was supreme. [A.J.]

LAMPERTI, F. Add day of birth, March 11.

* LANG, BENJAMIN JOHNSON, a well-known pianist, organist, teacher, and conductor at Boston, U.S., was born at Salem, Massachusetts, in 1840. His father was his first teacher, and Lang's advancement was so rapid that when but 11 years of age he was appointed organist at a church in his native city. Among his teachers were Alfred Jaell and Gustav Satter. Lang became a resident of Boston while a young man, and his home has ever since been in that city. He has been organist to the Handel and Haydn

• Copyright 1889 by F. H. JENKS.

Society since 1859, with the exception of a season when he was abroad, he has conducted the Apollo and Cecilia Clubs since their formation, and he was organist at the South Congregational Church (Unitarian) for many years until Jan. 1888, when he was appointed organist at the King's Chapel. His pupils on the pianoforte and organ have been many, and several of them have become distinguished as teachers and players. Lang has brought out for the first time in Boston many cantatas, etc., as Mendelssohn's 'Walpurgisnacht,' 'Loreley,' and 'Hymn of Praise,' Haydn's 'Seasons,' Schumann's 'Paradise and the Peri,' and Berlioz's 'Faust.' The concerts were his own ventures, as were also several series of orchestral and chamber-music concerts given by him, at which important novelties were presented. The same earnestness to make his hearers acquainted with unfamiliar works, in old as well as new schools, has also been exhibited on his appearances as a pianist or organist in concerts. Lang was an influential member of the concert committee of the Harvard Musical Association so long as that organization gave symphony concerts. His compositions are not many. The best known are songs for single voices and part-songs, performed at concerts of the Apollo Club. None have been published. Lang has on several occasions played in Germany, generally at concerts on his own account. [F.H.J.]

LANG, JOSEPHINE. P. 90*a*, l. 9, *add* She died, as Frau Köstlin, at Tübingen, in Dec. 1880.

LANGE. P. 90*a*, correct statement as to Mozart having written certain songs for Aloysia Weber by a reference to vol. iv. p. 429 *b*.

LANIERE, NICHOLAS. Recent investigations have brought to light several important facts concerning this musician and his family, which was of English, not Italian, origin. The two following entries from the registers of Holy Trinity, Minories, establish the approximate date of his birth, and the fact that his father and maternal grandfather were court musicians: —'1585. Oct. 12. John Lannyer of East Greenwich, Musician to the Queen's Majtie, & Frances Galliardello, daur. of the late decd. Mr. Mark Anthony Galliardello, also an ancient Musician to sundrie Most Noble Princes as King Henry the 8, Edward the 6, Queen Mary, and now to our Noble Queen Eliz:—were married.' '1588. Sept. 10. Nicholas son of John Lannyer Musician to Her Majesty. bapt.' In the Visitation of Kent, 1663, his name, spelt Lanier, with those of several of his descendants, appears as 'of Greenwich,' and in the Greenwich registers, under date Feb. 24, 1665–6, the entry is found: 'Mr. Nicholas Laniere buried away' (*i. e.* elsewhere). (Information from A. S. Gatty, Esq., York Herald.)

LANZETTI, SALVATORE. See vol. iv. p. 299 *b*.

LARGO. Line 13 of article, *after* expression *read* Mendelssohn uses the term for broad in the andante of his Quartet in Eb, op. 12.

LASSALLE, JEAN, was taught singing at the Paris Conservatoire. He made his début at Brussels as De Nevers, Sept. 5, 1871, and during the season also played Ashton ('Lucia'), Nelusko, Telramund, Count of Moravia in Julius Beer's 'Elizabeth of Hungary,' etc. He made a successful début at the French Opera as Tell, June 7, 1872. With the exception of visits to London, Vienna, etc., M. Lassalle has been engaged there ever since, where he is now the principal baritone singer. His parts include Don Juan, played by him at the centenary performance Oct. 26, 1887, Pietro ('Masaniello'), Lusignan ('Reine de Chypre'), Rigoletto, Hamlet, and in new operas Vasile (Membrée's 'Esclave'), July 17, 1874; Scindia ('Roi de Lahore'), April 27, 1877; Sévère ('Polyeucte'), Oct. 7, 1878; Ben Saïd ('Tribut de Zamora'), April 1, 1881; Lanciotto Malatesta ('Françoise de Rimini'), April 14, 1882; Henry VIII., March 5, 1883; Gunther ('Sigurd'), June 12, 1885; De Rysoor ('Patrie'), Dec. 20, 1886. On leave of absence he played at the Lyrique as the Count de Lusace in Joncières' 'Dimitri,' May 5, 1876. He made his début in Italian at Covent Garden as Nelusko, June 14, 1879, on the occasion of Patti's first performance of Selika. He played there for three seasons with the greatest success. His other parts new to the Italian stage were Scindia ('Roi de Lahore'), June 28, 1879, and the Demon in Rubinstein's opera, June 21, 1881. He visited England again in 1888, appearing at Covent Garden in several of his best parts. [A.C.]

LASSEN, EDUARD. Add that he still leads an active life at Weimar, as Hofcapellmeister at the Opera, where his influence tends to the encouragement of modern musicians; as composer; and also occasionally as a pianist at the Chamber Music Concerts. His popularity is evident from the warm demonstrations accorded to him by the public when in 1883 he celebrated the 25th year of his service at Weimar, and again, in 1885, on his return to the conductor's desk after a serious illness. The degree of Ph.D. has been conferred upon Lassen by the University of Jena, and the King of the Belgians decorated him (1881) with the Order of Leopold.

Lassen's 'Faust' still keeps the stage, and he has lately contributed the music to Devrient's version of Calderon's 'Circe'—'Ueber allen Zaubern Liebe,' op. 73; and to Goethe's 'Pandora,' op. 86, produced at Weimar in 1886. His second symphony in C, op. 78, was preceded and followed by a host of songs, including 'Aus der Frühlingszeit,' op. 82, and several sets of 6 up to op. 85. A Violin Concerto is the latest work from Lassen's pen. [L.M.M.]

LASSUS. P. 98 *a*, l. 21 from bottom, *for* 1871 *read* 1571. P 100 *a*, last line, after August add 1576. P. 100 *b*, l. 2, *for* 13 *read* 10. Line 2 of third paragraph in same column, *for* 1598 *read* 1589.

LATROBE. Correct date of birth of Rev. J. A. Latrobe to 1799.

LAUDA SION. Line 6 of article, *for* 1261 *read* 1264. P. 104 *a*, l. 14, *for* PROSE *read* SEQUENTIA.

LAURENT DE RILLÉ, François Anatole, the composer of an enormous number of part-songs and other small choral works, born at Orleans in 1828. He was at first intended to be a painter, but altered his purpose and studied music under an Italian named Comoghio, and subsequently under Elwart. His compositions, of which a list of the most important is given in the supplement to Fétis, have enjoyed a lasting popularity with 'orphéoniste' societies, and although they contain few if any characteristics which would recommend them to the attention of earnest musicians, they have that kind of vigorous effectiveness which is exactly suited to their purpose. A large number of operettas of very slight construction have from time to time been produced in Paris, and the composer has made various more or less successful essays in the department of church music. [M.]

LAWROWSKA, Mlle. See Zeretelew, Princess, vol. iv. p. 506 *a*.

LAZARUS, Henry. Add date of birth, 1815. (Died March, 1895.)

LEACH, James. Line 1 of article, *for* Rochdale, Yorkshire, *read* Wardle, near Rochdale, Lancashire; and for last sentence *read* Leach died from a stage coach accident, Feb. 8, 1798.

LÉCLAIR, J. M. Line 4 of article, *for* Lyons in 1697 *read* Paris, Nov. 23, 1687.

LECOCQ. Line 1 of article, *for* Charles *read* Alexandre Charles. (Corrected in late editions). P. 111 *a*, l. 4, add that 'Les Ondines au Champagne' was produced at the Folly Theatre, London, in Sept. 1877. Line 6, add that 'Fleur de Thé' was given by the Variétés company at the Lyceum, on June 12, 1871, and in English at the Criterion, Oct. 9, 1875. Line 10, add that 'Le Rajah de Mysore' was given in English at the Park Theatre, Feb. 15, 1875. Line 11, add that 'Le beau Dunois' was given at the Lyceum by the French company, May 25, 1871. Line 15, add that versions of 'Les cent Vierges' were given at the Britannia Theatre, May 25, 1874, and at the Gaiety, Sept. 14 of the same year. Line 16, add that 'La Fille de Mme. Angot' was produced in another English version, at the Gaiety, Nov. 10, 1873. The date of the original production of this work is Dec. 4, 1872. This, the 'Cent Vierges,' and 'Giroflé-Girofla' were all produced first in Brussels, where the composer resided from 1870 to 1873. Line 20, add that 'La petite Mariée' was given in French at the Opera Comique, London, May 7, 1876, and (line below) that 'La Marjolaine' was produced at the Royalty in English, Oct. 11, 1877. A version of 'Le petit Duc' was given at the Philharmonic Theatre on April 27, 1878. 'La petite Mademoiselle' was produced at the Alhambra, Oct. 6, 1879. The following works, written since the publication of the article in vol. ii., are to be added:—'La jolie Persane,' 1879; 'Le Grand Casimir,' 1879 (in English at the Gaiety, Sept. 27 of that year); 'Le Jour et la Nuit,' 1881 (in English at the Strand, as 'Manola,' Feb. 11, 1882); 'Le Cœur et la Main,' 1882; 'La Princesse aux Canaries,' 1883 (in English as 'Pepita', Liverpool. Dec. 30, 1886, and at Toole's Theatre, London, Aug. 30, 1888). A recent attempt at a higher class of music, 'Plutus,' produced at the Opéra Comique, Paris, March 31, 1886, failed and was withdrawn after eight representations, but another essay in the same direction, 'Ali Baba,' produced at the Alhambra, Brussels, Nov. 11, 1887, was more successful. [A.C.]

LEE, George Alexander. Line 12 of article, add that he became conductor of the Haymarket in 1827. His secession from the lesseeship of the Tottenham Street Theatre was on account of the heavy penalties incurred by the management through their infringement of the 'patent theatres'' rights. Line 3 from end of article, correct date of Mrs. Lee's death to April 26, 1851. [A.C.]

LEEDS MUSICAL FESTIVAL. Add that from 1880 till the present time the festivals have been conducted by Sir Arthur Sullivan, whose 'Martyr of Antioch' was, together with Barnett's 'Building of the Ship,' the chief attraction of that year's festival (Oct. 13–17). In 1883 (Oct. 10–13) the novelties were Raff's 'End of the World,' Macfarren's 'David,' Cellier's 'Gray's Elegy,' and Barnby's 'The Lord is King.' In 1886 (Oct. 13–17), Dvořák's 'St. Ludmila,' Sullivan's 'Golden Legend,' Stanford's 'Revenge,' and Mackenzie's 'Story of Sayid' were the new works, and a splendid performance was given of Bach's B minor Mass. [M.]

LEGRENZI, Giovanni. P. 113 *b*, last line but one, *for* in July *read* May 26.

LEHMANN, Lilli, born 1848 at Wurzburg, was taught singing by her mother, Marie Lehmann (born 1807), formerly a harp-player and prima donna at Cassel under Spohr, and the original heroine of some of the operas of that master. The daughter made her début at Prague as the First Boy ('Zauberflöte'), and was engaged successively at Dantzig in 1868 and at Leipzig in 1870. She made her début at Berlin as Vielka (Meyerbeer's 'Feldlager in Schlesien'), Aug. 19, 1870, with such success that she was engaged there as a light soprano. She obtained a life engagement there in 1876, and was appointed Imperial chamber singer. The same year she played Woglinde and Helmwige, and sang the 'Bird' music in Wagner's trilogy at Bayreuth. She made a successful début at Her Majesty's as Violetta June 3, as Philine ('Mignon') June 15, 1880, and sang there for two seasons. She appeared at Covent Garden in German with great success as Isolde, July 2, 1884. In passing through England to America, where she has been engaged for the winter in German opera for the last three seasons, she gave a concert with Franz Rummel at the Steinway Hall Oct. 22, 1885. She reappeared at Her Majesty's as Fidelio in Italian June 1887. [A.C.]

LEIDESDORF, Max Josef. Correct date of death to 1840. In reference at end of article add vol. i., and also that he was one of Schubert's early publishers. (Corrected in late editions.)

LEIPZIG. In the list of cantors given on p. 115, omit the name of Joh. Rosenmüller, and between those of Weinlig and Hauptmann, insert that of Christoph August Pohlenz, who held the post only from March to September 1842. At end of list add the name of Wilhelm Rust, who has been Cantor since 1879. Other additions to the article will be found under THOMASSCHULE, vol. iv. p. 198.

LEITMOTIF. Among other instances of the use of what is practically a 'leading motive' apart from the advanced school of composers, should be mentioned 'La Clochette' of Hérold, in which the melody 'Me voilà' allotted to Lucifer, appears at every entrance of the character. See Rev. et Gazette Mus., for 1880, p. 227.

LEMMENS, N. J. Add date of death, Jan. 30, 1881. The work referred to on p. 120 *a*, l. 18 from bottom, was edited by J. Duclos, after the author's death, and published at Ghent in 1886. Four volumes of 'Œuvres inédites' have lately been published by Breitkopf & Härtel. P. 120 *a*, last line, correct date of Mme. Sherrington's first appearance on the English stage to 1860, and that of her début on the Italian stage to 1866.

LENEPVEU, CHARLES FERDINAND, born at Rouen, Oct. 4, 1840. After finishing his classical studies at his native place, he came to Paris by his father's desire to study law, and at the same time he learnt solfeggio from Savard, a professor at the Conservatoire. His first essay as a composer was a cantata composed for the centenary of the Société d'Agriculture et de Commerce of Caen, which was crowned and performed July 29, 1862. After this success he resolved to follow the musical profession, and through the intervention of Savard he entered the Conservatoire and joined Ambroise Thomas's class. He carried off the Prix de Rome in 1865 as the first competitor, and his cantata, 'Renaud dans les jardins d'Armide,' was performed at the opening of the restored Salle du Conservatoire, Jan. 3, 1866. It was thought at the time that this work showed promise of a great future, but opinions have since undergone modification, for Lenepveu has never risen above the crowd of estimable musicians. When he was at Rome he took part in the competition instituted by the Minister of Fine Arts in 1867, and his score of 'Le Florentin,' written on a poem by St. Georges, was accepted from among 62 compositions, without hesitation on the part of the judges, or murmurs on the part of the rival competitors. The prize work was to have been given at the Opéra Comique, but political events and the war delayed the fulfilment of the promise, and Lenepveu, instead of composing for the Concerts Populaires, which were always ready to receive new works, made the mistake of holding aloof, resting on his laurels, while his companions, Massenet, Dubois, Guiraud, Bizet, etc., all of whom were waiting for admittance into the theatres, devoted themselves to symphonic music, and thereby acquired skill in orchestration, as well as the recognition of the public. Lenepveu, who on his return from Rome had resumed his contrapuntal studies with the celebrated organist Chauvet (born June 7, 1837, died Jan. 28, 1871), while waiting for the production of 'Le Florentin,' brought forward nothing except a funeral march for Henri Régnault, played under Pasdeloup, Jan. 21, 1872. In the preceding year he had produced a Requiem at Bordeaux for the benefit of the widows and orphans of those killed in the war, May 20, 1871; fragments of these works given at the Concerts du Conservatoire, March 29, 1872, and at the Concerts Populaires, April 11, 1873, showed an unfortunate tendency in the composer to obtain as much noise as possible. At length, after long delays and repeated applications, 'Le Florentin' was given at the Opéra Comique, Feb. 26, 1874, and was wholly unsuccessful. Since then Lenepveu has never been able to get any work represented in France. Having completed a grand opera, 'Velléda' (on the subject of Chateaubriand's 'Martyrs'), he determined to produce it in London, where it was performed in Italian, with Mme. Patti in the principal part (Covent Garden, July 4, 1882). The only portion of the work known in Paris is the scene of the conspiracy, which has been heard at various concerts. Besides a number of songs and pieces for the piano, Lenepveu has only produced one important work, a 'drame lyrique,' 'Jeanne d'Arc,' performed in the Cathedral at Rouen (June 1, 1886). His music, which is naturally noisy, is also wanting in originality, and his style is influenced by composers of the most opposite schools. He cannot be too much blamed for having avoided concerts in the attempt to prove that a man of his temperament ought at once to succeed on the stage. The artist is now entirely sunk in the professor. Since Nov. 1880 he has taken a harmony class for women at the Conservatoire in the place of Guiraud, now professor of advanced composition. In this capacity Lenepveu was decorated with the Légion d'Honneur on Aug. 4, 1887. [A.J.]

LENZ, WILHELM VON. Add date of death, Feb. 1883.

LÉONARD, HUBERT, famous violinist, born in 1819 at Bellaire in Belgium, entered the Paris Conservatoire in 1836, and studied under Habeneck. He established his reputation as a brilliant player by a tour through Germany in 1844, and was the first to play Mendelssohn's Violin Concerto in Berlin, under the immediate direction of the composer. In 1847 he succeeded de Bériot as first professor of the violin at the Brussels Conservatoire. Since 1870 he has lived in Paris. He is an eminently successful teacher, and counts among his pupils many of the best modern Belgian, German, and French violinists. Léonard is a brilliant virtuoso, excelling especially in arpeggios and staccatos.

Madame Léonard, one of the Garcia family, gained much distinction in concert singing, and is now a successful teacher of singing in Paris.

LEONORA. Mr. Nottebohm's researches in the sketch-books have made it clear that for the revival of the opera in 1814, Beethoven's first intention was to recast the Prague Overture No. 3 (op. 138), changing the key to E. Of this various drafts exist, and some are given in 'Beethoveniana,' p. 74. Had this intention been carried out the overture would have borne the same relation to op. 138 that 'Leonora No. 3' does to 'Leonora No. 2,' and we might then have possessed five overtures to the opera! [G.]

LEONORE PROHASKA. The four pieces, as given in the article, have been published by Breitkopfs in the supplemental volume to their complete edition of Beethoven. The march from op. 26 is transposed into B minor, and scored for Flutes, Clarinets in A, Bassoons, 2 Horns in D and 2 in E, Drums, Violins 1 and 2, Viola, Cello and Bass. [G.]

LESCHETITZKY, Theodor. At end of article add that in 1880 he married his pupil, Mme. Essipoff. Also that an opera by him, 'Die erste Falte' was given at Prague in 1867.

LESLIE, Henry David. Add that in 1880 his choir was broken up; it was subsequently reorganized under Signor Randegger, and in 1885–1887 Mr. Leslie resumed its management. P. 123 *b*, l. 18, *for* 1853 *read* 1854. (Died Feb. 4, 1896.)

LESUEUR, J. F. Correct date of birth to Feb. 15, 1760.

LEVASSEUR, Nicholas Prosper, was born March 9, 1791, at Bresles, Oise, the son of a labourer. He entered the Paris Conservatoire in 1807, and became a member of Garat's singing class Feb. 5, 1811. He made his débuts at the Académie as Osman Pacha (Grétry's 'Caravane') Oct. 5, 1813, and as Œdipus (Sacchini's 'Œdipe à Colonos') Oct. 15, and was engaged there. According to Fétis he was successful only as the Pacha; the repertory was either too high for his voice, or unfavourable to the Italian method which he had acquired. He made his début at the King's Theatre in Simon Mayer's 'Adelasia ed Alderano,' Jan. 10, 1815, and played there two seasons with success in 'La Clemenza di Tito,' in 'Gli Orazi,' as Pluto (Winter's 'Ratto di Proserpina') at Mme. Vestris's début July 20, 1815; in Paer's 'Griselda,' Farinelli's 'Rite d'Efeso,' Ferrari's 'Heroine di Raab,' and Portogallo's 'Regina di Lidia.' He reappeared there with some success in 1829, and again in French as Bertram on production of 'Robert,' June 11, 1832. He reappeared at the Académie about 1816, and remained there as an under-study, but obtained much reputation in concerts with his friend Ponchard. He made his début at the Italiens as Figaro, Oct. 5, 1819, and remained there until about 1827, where he sang in new operas, Rossini's, Meyerbeer's 'Crociato,' and Vaccaj's 'Romeo.' He sang at Milan on the production of Meyerbeer's 'Margherita d'Anjou,' Nov. 14, 1820. He reappeared at the Académie as Moses on the production of Rossini's opera there, March 26, 1827, a part which he had previously played at the Italiens Oct. 20, 1822; returned there permanently the next year, and remained until his retirement Oct. 29, 1853. He created the part of Zacharie in the 'Prophète' at the request of Meyerbeer, who admired his talent as much as his noble character. He was appointed head of a lyric class at the Conservatoire June 1, 1841, and on his retirement in 1869 was appointed a Chevalier of the Legion of Honour. He died at Paris Dec. 5, 1871, having become blind a short time before his death. 'It was in the production of "Robert" that Levasseur created a class of characters . . . in which he has had innumerable imitators, but not one single artist with his peculiar physiognomy, his exceptionally toned voice, his imposing presence and intellectual grasp. His Bertram was a veritable creation. . . . Next to Bertram must rank his delineation of Marcel and Zachariah.'[1] [A.C.]

LEVERIDGE, Richard. Add that about 1708 he wrote new music for Act. ii. of Macbeth. In the last sentence of article, *for* engraved portrait *read* mezzotint, and *for* Fryer *read* Frye.

LEVEY, William Charles, born April 25, 1837, at Dublin, was taught music by his father, Richard Michael Levey, leader of the Dublin theatre orchestra. He afterwards studied at Paris under Auber, Thalberg, and Prudent, and was elected a member of the Société des Auteurs et Compositeurs. He was conductor at Drury Lane from 1868 to 1874, and has held the same post at Covent Garden, Adelphi, Princess's, Avenue, and Grecian Theatres, etc. His compositions include two operettas, 'Fanchette,' Covent Garden, Jan. 2, 1864; 'Punchinello,' Her Majesty's, Dec. 28, 1864; 'The Girls of the Period,' musical burletta, libretto by Burnand, March, 1869; incidental music to 'Antony and Cleopatra,' 1873; music to the dramas 'King o' Scots,' 'Amy Robsart,' 'Lady of the Lake,' 'Rebecca,' and 'Esmeralda,' and to several pantomimes; 'Robin Hood,' cantata for boys' voices; Saraband for piano on a motif written by Henry VIII.; several drawing-room pieces and many songs, one of which, 'Esmeralda,' originally sung by the late Miss Furtado at the Adelphi in the drama of that name, and in the concert-room by Mme. Bodda-Pyne, obtained considerable popularity. [A.C.]

LEVI, Hermann, born Nov. 7, 1839, at Giessen, studied with Vincenz Lachner from 1852 to 1855, and for three years from that time at the Leipzig Conservatorium. His first engagement as a conductor was at Saarbrücken in 1859; in 1861 he became director of the German Opera at Rotterdam, in 1864 Hofkapellmeister at Carlsruhe, and finally in 1872 was appointed to his present post at the Court Theatre of Munich. He attained to a prominent place among Wagnerian conductors, and to him fell the honour of directing the first performance of Parsifal at Bayreuth, on July 28, 1882. [M.]

LEWIS, Thomas C., originally an architect, commenced business as an organ-builder in Lon-

[1] Athenæum, Dec. 16, 1871.

don about the year 1861. He built the organs of the Protestant and Catholic Cathedrals, Newcastle-on-Tyne, and in London those of St. Peter's, Eaton Square, and Holy Trinity, Paddington. But his largest work is the organ of St. Andrew's Hall, Glasgow. The firm is now Lewis & Co., Limited. [V. de P.]

LICENZA. Used by Mozart for the first movement of a vocal piece (no. 70), and last movement of another ditto (no. 36). (B. & H.'s List of new editions.) [G.]

LICHNOWSKY. P. 132 *b*, l. 7 from end of article, *for* Stammer *read* Stummer. (Corrected in late editions.)

LIFE LET US CHERISH. A favourite German song, commencing 'Freut euch des Lebens,' the author of which is Martin Usteri of Zurich; first published in the 'Göttinger Musenalmanach' for 1796 without the author's name. The music was written in 1793 by Hans Georg Nägeli. It is used as subject for the elaborate variations which form the last movement of Woelfl's celebrated sonata called 'Non plus ultra.' [R.M.]

LIMPUS, R. In reference at end of article, *add* in Appendix.

LINCKE, Joseph. In the musical example, the sign 𝄋 should be over the third bar of the canon.

LINCOLN, Henry Cephas, born 1789 and died 1864, was an organ-builder in London. He built the organ in the Pavilion, Brighton, which is now in Buckingham Palace. [V. de P.]

LIND, Jenny. P. 140 *b*, l. 25, *for* she obtained a hearing *read* she was to have appeared. Line 16 from bottom, *for* Dec. 6 *read* Dec. 4. P. 141 *b*, after the cadences, *add* See a cadence of hers in the Musical Union Record, 1849, p. 8. Add that from Easter 1883 to Easter 1886 she was professor of singing at the Royal College of Music, and that she died at Wynd's Point, Malvern, on Nov. 2, 1887.

LINDBLAD, A. F. Line 7 of article, *for* in August *read* Aug. 23.

LINDPAINTNER, P. J. von. Add that in 1854 he conducted several of the New Philharmonic Concerts.

LINLEY, Francis. Add date of purchase of Bland's business, 1796; and for day of death, read Sept. 15.

LINLEY, George, born 1798, wrote a large number of songs, ballads, and other pieces, very popular in their day. He also wrote and composed music for an operetta, 'The Toymaker,' produced at Covent Garden, Nov. 20, 1861. He died at Kensington, Sept. 10, 1865. [W.H.H.]

LINLEY, Thomas. The correct date of birth is probably 1732, since he was said at the time of his death to be 63 years old.

LISZT, Franz or Ferencz. P. 146 *a*, to his appearances at the Philharmonic add June 14, 1841 (Hummel's Septet). Add the following supplementary notice:—

The last concert given by Franz Liszt for his own benefit was that at Elisabethgrad towards the end of 1847,[1] since when his artistic activity was exclusively devoted to the benefit of others. No more striking evidence of the nobility of Liszt's purpose and of the gracious manner in which he fulfilled it could be wished for than that contained in the recently published correspondence between Liszt and Wagner.[2] The two volumes cover the Weimar period, but by no means represent the extent of the friendship between these two great men, which was only interrupted by death. Liszt's character as here revealed calls for nothing less than reverence. His solicitude is so tender, so fatherly, so untainted with selfishness, and, above all, so wise! The letters tell the story of a struggle and of a victory for his friend, but they are silent upon the incidents of his own life. On being asked one day the reason of his abstention from creative work, Liszt replied by another question, 'Can you not guess?' To Wagner himself, who urged him to compose a German opera on his (Wagner's) tragedy of 'Wieland der Schmidt,' Liszt answered that he felt no vocation for such a task; he thought it more likely that he might give his first dramatic work a trial in Paris or in London. So he continued a life of self-abnegation, and died faithful to the last to the claims of friendship and of genius, many young composers besides the titanic Wagner owing their first successes in life to his generous sympathy and penetrating judgment. He made Weimar, during the twelve years of his residence, the centre of musical life in Germany. 'I had dreamed for Weimar a new Art period,' wrote Liszt in 1860, 'similar to that of Karl August, in which Wagner and I would have been the leaders as formerly Goethe and Schiller, but unfavourable circumstances brought these dreams to nothing.' Though Liszt did not accomplish all he wished for Weimar, the little city still ranks high among German art-centres, and in some degree carries on the work of advancement so firmly established between the years 1844 and 1861.

The resignation of the Weimar Kapellmeistership in 1861 was followed by what Liszt called his *vie trifurquée*, divided between Budapest, Weimar, and Rome. The Hungarian Government, in order to ensure Liszt's presence in Budapest during part of the year, invented for him (1870) the post of president of an institution which at the moment did not exist, but which soon afterwards rose as the Academy of Music. Impressive scenes occurred when the Magyars publicly fêted their compatriot,[3] and hero-worship was at its height on such occasions as the jubilee of the master's career in 1873, when 'Christus' was performed at the Hungarian capital.

The aspect of Liszt's every-day life at Weimar has become known through the accounts of some of the host of aspiring pianists and music lovers who gathered around him there. Liszt's teaching

1 Ramann's 'F. Liszt als Künstler und Mensch,' vol. ii. Breitkopf & Härtel.
2 'Briefwechsel zwischen Wagner und Liszt.' Breitkopf & Härtel.
3 Janka Wohl's 'François Liszt.'

had already borne fruit in the wonderful achievements of his most distinguished pupils—Von Bülow, Geza Zichy, D'Albert, the lamented Tausig, and others, and no wonder that the music room which the generous artist had thrown open to all comers was thronged by a number of more or less gifted young people in search of inspiration—no other word so well describes the ideal character of the instruction they were privileged to receive.

Liszt held his classes in the afternoon, during which several of the pupils would play their piece in the presence of the rest—some dozen or more, perhaps—all being expected to attend the séance. At times the master would seat himself at the piano and play, but this supreme pleasure could never be counted upon. It was noticeable that this most unselfish of geniuses was never more strict or more terrible than when a Beethoven sonata was brought to him, whereas he would listen to the execution of his own compositions with indulgent patience—a characteristic trait. Yet Liszt's thoughts often dwelt upon his great choral works, and he was heard to declare that sacred music had become to him the only thing worth living for.

A lively description of Liszt's professorial life has been given by an American lady who visited Weimar in 1873.[1] Again, the unique qualities of Liszt's genius and his regal position among all sorts and conditions of men were recognized as unimpaired ten years later by Mr. Francis Hueffer,[2] who had the opportunity of forming a judgment upon these things when visiting Bayreuth in 1884, thus affording another link in the chain of historical criticism.

In Rome again Liszt found himself the centre of an artistic circle of which Herr von Keudell and Sgambati were the moving spirits. The significance, however, of his residence in the Eternal City lies rather in the view he took of it as his *années de recueillement*, which ultimately led to his binding himself as closely as he could to the Church of Rome. He who in his youth, with the thirst for knowledge upon him, had enjoyed the writings of freethinkers and atheists (without being convinced by them), was now content with his breviary and book of hours; the impetuous artist who had felt the fascination of St. Simonianism[3] before he had thoroughly understood its *raison d'être*, who had been carried away by the currents of the revolution, and had even in 1841 joined the Freemasons,[4] became in 1856 or 58 a tertiary of St. Francis of Assisi. In 1879 he was permitted to receive the tonsure and the four minor orders (doorkeeper, reader, exorcist, and acolyth), and an honorary canonry. The Abbé Liszt, who as a boy had wished to enter the priesthood, but was dissuaded therefrom by his parents and his confessor, now rejoiced in the public avowal of his creed as conveyed by his priestly garb, although he was indeed no priest, could neither say mass nor hear a confession, and was at liberty to discard his cassock, and even to marry if he chose, without causing scandal. Thus, in the struggle with the world which the youth of sixteen had so much dreaded, his religious fervour was destined to carry the day. Extracts from Liszt's private papers throwing further light on his inmost thoughts have been published,[5] but can be only referred to in this place.

Liszt's former triumphs in England were destined to be eclipsed by the enthusiasm of the reception which awaited him when he was prevailed upon to return in 1886. In 1824 George IV. had given the sign to the aristocracy of homage to the child-prodigy; and his visits in the following year and in 1827 were successful enough. In 1840–41[6] the Queen's favour was accorded to him, and he shared with Thalberg a reputation as a skilful pianist in fashionable circles. But it was not until 1886 that the vast popularity which had hitherto been withheld from him, owing to the conditions of musical life in our country, was meted out to him in full measure. 'There is no doubt,' says a musical critic,[7] 'that much of this enthusiasm proceeded from genuine admiration of his music, mixed with a feeling that that music, for a number of years, had been shamefully neglected in this country, and that now, at last, the time had come to make amends to a great and famous man, fortunately still living. It is equally certain that a great many people who were carried away by the current of enthusiasm—including the very cabmen in the streets, who gave three cheers for the "Habby Liszt"—had never heard a note of his music, or would have appreciated it much if they had. The spell to which they submitted was a purely personal one; it was the same fascination which Liszt exercised over almost every man and woman who came into contact with him.'

Liszt paused awhile in Paris on his way, and received much attention, his musical friends and followers gathering to meet him at the concerts of Colonne, Lamoureux, and Pasdeloup. At length on April 3, the Abbé Liszt reached our shores, and on the same evening three or four hundred people met at Mr. Littleton's house at Sydenham to do honour to the great artist, and a programme consisting entirely of his compositions was gone through by Mr. Walter Bache and others. The gracious and venerable appearance of the distinguished guest, and his kindly interest in all that went forward, won the hearts of those who witnessed the scene; all recognized the presence in their midst of a marvellous personality such as is rarely met with. On the following day Liszt played part of his E♭ Concerto before a few friends. On the Monday he attended the rehearsal of his oratorio 'St. Elisabeth' in St. James's Hall; and in the

[6] His project of conducting German opera in London in 1842 came to nothing.
[7] Fortnightly Review, September 1886.

evening of the same day he astonished his host and a circle of friends by an improvisation on some of the themes. The 6th April was the date of the concert, and when the composer walked into the hall he received such ovations as had probably never been offered to an artist in England before. Even before he entered his arrival was announced by the shouts of the crowd outside, who hailed him as if he were a king returning to his kingdom. During the afternoon Liszt had been entertained at the Royal Academy of Music, where the Liszt Scholarship, raised with so much zeal by Mr. Walter Bache, was presented by him to the master. A short programme was performed, Messrs. Shakespeare and Mackenzie conducting, and when Liszt rose from his seat and moved towards the piano, the excitement of the students and of the rest of the audience knew no bounds. A visit to Windsor, where he played to Her Majesty a reminiscence of the Rose Miracle scene from 'St. Elisabeth,' filled up most of the following day (April 8), on the evening of which Mr. Walter Bache's Grosvenor Gallery Reception took place. The brilliant scene of Saturday was here repeated, with the very important additional feature of a solo from Liszt himself. [See BACHE, vol. iv. p. 529.] The events which followed in the course of the great man's visit included a performance of 'St. Elisabeth' at the Crystal Palace on the 17th. On the 22nd, a week later than he intended, Liszt left England, pleased with his reception, and promising to repeat his visit. No wonder that his death was felt by English people as the loss of a personal friend. The last music he wrote was a bar or two of Mackenzie's 'Troubadour,' upon which he had intended to write a fantasia.

The remaining incidents in the life of Liszt may only be briefly touched upon. Paris gave him a performance of 'St. Elisabeth' at the Trocadéro. The master left Paris in May, and visited in turn Antwerp, Jena, and Sondershausen. He attended the summer festival here while suffering from weakness and cold. 'On m'a mis les bottes pour le grand voyage,' he said, excusing himself to a friend for remaining seated. His last appearance upon a concert platform was on July 19, when, accompanied by M. and Mme. Munkácsy, he attended a concert of the Musical Society of Luxemburg. At the end of the concert he was prevailed upon to seat himself at the piano. He played a fantasia, and a 'Soirée de Vienne.' It need not be said that the audience, touched and delighted by the unlooked-for favour, applauded the master with frenzy. In the pages of Janka Wohl's 'François Liszt' there is an account of a scene during Liszt's stay at the Munkácsys' house, according to the writer a record of the last time the greatest master of the pianoforte touched his instrument. A flying visit had been paid to Bayreuth on the marriage of Daniela von Bülow —Liszt's granddaughter—with Herr von Thode on July 4. Liszt returned again for the performance of 'Parsifal' on the 23rd. He was suffering from a bronchial attack, but the cough for a day or two became less troublesome, and he ventured to attend another play, an exceptionally fine performance of 'Tristan,' during which the face of Liszt shone full of life and happiness, though his weakness was so great that he had been almost carried to and from the carriage and Mme. Wagner's box. This memorable performance of 'Tristan,' in which the singers (Sucher, Vogl, etc.) and players surpassed themselves, lingered in Liszt's mind until his death. When he returned home he was prostrate, and those surrounding him feared the worst. The patient was confined to his bed and kept perfectly quiet. The case was from the first hopeless, the immediate cause of death being general weakness rather than the severe cold and inflammation of the lungs which supervened on July 31. His death that night was absolutely painless.

Since the funeral in the Bayreuth cemetery on Aug. 3, Liszt's ashes have not been disturbed, although Weimar and Budapest each asserted a claim to the body of the illustrious dead. Cardinal Haynauld and the Princess Wittgenstein (heiress and executrix under his will) gave way before the wishes of Liszt's sole surviving daughter, Cosima Wagner, supported as they were by public opinion and the known views of Liszt himself, who had not looked with favour on the removal of the remains of Beethoven and Schubert, and had expressed a hope that it might not also be his fate to 'herumfahren.' These towns, as well as others, have therefore raised a monument to the genius who was associated with them. The memory of Liszt has been honoured in a practical way in many places. Liszt societies existed during the master's lifetime, and they have now been multiplied. Immediately after the funeral a meeting of the leading musicians was held at Bayreuth, at which Richter made a speech and urged that all the living forces of the artistic world should unite to preserve the memory of the master by perfect renderings of his own and other modern works. The Grand Duke of Weimar, Liszt's friend and protector, sent the intendant of the theatre to Bayreuth to confer with Richter upon the best means of perpetuating Liszt's intentions. He proposed a Liszt foundation after the manner of the Mozarteum at Salzburg. A Liszt museum was to be established in the house where he lived at Weimar, and scholarships were to be offered to promising young musicians, and on similar lines scholarships have been instituted elsewhere.

An outcome of this project is the Fondation-Liszt, instituted by his firm friend the Duke of Weimar after his death, to continue instruction on the basis he had laid.

The first competition for the Liszt Royal Academy scholarship took place in April 1887.[1] The scholarship is open for competition by male and female candidates, natives of any country, between 14 and 20 years of age, and may be awarded to the one who may be judged to evince the greatest merit in pianoforte playing or in composition. All candidates have to pass

[1] For this England is indebted to the exertions of the late Mr. Walter Bache (who raised upwards of 1100*l.* for the purpose).

an examination in general education before entering the musical contest. The holder is entitled to three years' free instruction in the Academy, and after that to a yearly sum for continental study.

Among portraits of the master, the bust executed by Boehm, and exhibited at the Grosvenor Gallery in 1886, will have great interest for English people, as Liszt sat for it during his visit to Sydenham in the same year. Plaster casts of this bust have since been issued by Novellos. The head of Liszt upon his death-bed has been successfully represented in a plaster cast by Messrs. Weissbrod & Schnappauf of Bayreuth. On pp. 149 and 219 of Janka Wohl's volume a detailed account and list of portraits and paintings may be found.

The task of collecting Liszt's posthumous works has not been an easy one, the composer having distributed his MSS. amongst his friends and pupils. There have already been published during the last ten years, by Táborszky & Parsch, Budapest:—

'Ungarisches Königslied,' for male voices or mixed chorus with orchestral accompaniment; the same in PF. score, and in arrangements for baritone solo, and for 4 hands and 2 hands on the PF.
'Ungarn's Gott,' for baritone solo and ad lib. chorus of male voices. Also for PF., 2 hands; also for PF., left hand; also for organ or harmonium; also for cymbal.
Csárdás for PF., 2 hands.
Csárdás obstiné. Do.
Dem Andenken Petöfi's for PF., 2 and 4 hands.
16th Hungarian Rhapsody (Munkácsy), 2 hands; also 4 hands. 17th do. (Aus dem Figaro Album). 18th do. (Für das Album der Budapester Ausstellung). 19th do. (nach C. Abrányi's 'Csárdás nobles').

Published by Kahnt's Nachfolger:—
'Christus,' PF. arrangements, 2 and 4 hands.
Antiphon for St. Cecilia's Day, contralto solo and 5-part mixed choir, and orchestral accompaniment. Also PF. or vocal score.
'Le Crucifix,' for contralto solo, with harmonium or PF. accompaniment.
Missa pro Organo.
Sacred Choruses. No. X, Anima Christi; No. XI, Tu es Petrus; No. XII, Dominus conservet eum.
'Salve Regina' (Gregorian), for harmonium or organ.
Songs: 'Verlassen,' 'Ich verlor die Kraft.'
Duet: 'O Meer im Abendstrahl.'
'Sonnenhymnus.' Baritone solo, male voice chorus, organ and orchestra. Also vocal score.
'Stanislaus,' oratorio. Full score. Vocal score. Single numbers.
'Salve Polonia,' Interludium. Full score. Also arrangement for PF.
'De Profundis,' Ps. cxxix, bass or alto solo, with PF. or organ.
'Le barde aveugle,' ballade for PF.
Collected Songs.

By Various Publishers:—
'Von der Wiege bis zum Grabe,' symphonic poem, after a drawing by Michael Zichy.
Varianten und Zusätze to 'Festklänge.'
'Le triomphe funèbre de Tasse,' epilogue to 'Tasso.'
Two new Mephisto-Walzer, orch. and PF., 2 or 4 hands (Fürstner).
'Crux,' Hymne des Marins, chorus and accompaniment *ad lib.*
'Pax Vobiscum,' motet, 4 male voices.
'Natus est Christus,' 4 male voices.
'Qui Mariam absolvisti,' baritone solo and chorus.
'O heilige Nacht,' tenor solo and 3-part female chorus (Fürstner).
'Nun danket Alle Gott,' chorus, organ, trumpets, trombones, and drums.
Antiphon for St. Cecilia's Day, contralto solo and 5-part female chorus.

Original, for Pianoforte:—
Années de Pélérinage. Troisième Année: No. 1. Angelus (also for string quartet). No. 2. Aux Cyprès de la Villa d'Este. No. 3. Do. No. 4. Les Jeux d'Eaux à la Villa d'Este. No. 5. 'Sunt lacrymae rerum' en mode hongrois. No. 6. Marche funèbre. No. 7. 'Sursum corda' (also for solo voices, Schott), 'Abschied,' russisches Volkslied. 'Die Trauer-Gondel' (Fritzsch). 3 Valses oubliées; Valse Élégiaque (Bote & Bock); Étude in C; Andante maestoso (Rosavölgy). 'Weihnachtsbaum,' 12 pieces, 2 or 4 hands (Fürstner). Grosses Concert-Fantasia über Spanische Weisen (Licht). Twelve books of Technical Studies, with more to follow (Schuberth).

Transcriptions:—
Processional March from 'Parsifal' (Schott). Other Wagner transcriptions (Schott, and B. & H.) Berlioz's 'Harold' Symphony (Leuckart). Verdi's 'Aïda' and 'Requiem,' Lassen's 'Hagen und Kriemhilde,' 'Faust,' and Intermezzo from 'Ueber allen Zaubern Liebe' (Bote & Bock). Liebesscene and Fortuna's Kugel from Goldschmidt's 'Die sieben Todsünden.' Rubinstein's 'Gelb rollt' and 'Der Asra' (Kistner). Schumann's 'Provençalisches Minnelied' (Fürstner). Forty-two Lieder by Beethoven, Franz, Schumann, and Mendelssohn (B. & H.). Paraphrase of themes from Handel's 'Almira.' Paraphrase of themes from modern Russian works. Wilhorsky's 'Romance.' Arrangements of Fest-Cantata for 4 hands; nocturne, 4 hands. Schubert's Marches, 4 hands. Beethoven's Concertos, 2 PFs.

Liszt had completed, or is said to have partly written:—New symphonic poem for organ, on lines by Herder, 'The Organ'; 'Lo sposalizio' (org.); Romance oubliée (violin); Mephisto Polka; new edition 'Soirées de Vienne'; score of Zarembski's duets; 'Die Macht der Musik,' song; Fantasia for orch. and PF. on Schubert's 'Der Wanderer'; 'Die Nebensonnen' and 'Aufenthalt' (Schubert) for PF.; 'Weihelied' to Leo XIII; 'Der ewige Jude,' for PF. with declaimed poem (Schubart).

The discovery of a concerto entitled 'Malédiction,' and of a choral work, 'The Creation,' has been reported.[1] [L.M.M.]

LITOLFF, H. C. Add that his opera 'Les Templiers' was produced at Brussels in January, 1886.

LIVERPOOL MUSICAL FESTIVALS. No festival has been held since 1874. Add that Sir Julius Benedict was succeeded as conductor of the Liverpool Philharmonic Society in 1880 by Herr Max Bruch, since whose retirement in 1882 the post has been filled by Mr. Charles Hallé.

LLOYD, CHARLES HARFORD, born Oct. 16, 1849, at Thornbury, Gloucestershire, son of Edmund Lloyd, a solicitor, was educated at Thornbury Grammar School and Rossall School. From the latter he went to Magdalen Hall (now Hertford College), Oxford, in Oct. 1868 as the holder of an open classical scholarship. He graduated Mus.B. 1871, B.A. 1872, M.A. 1875, taking a second class in the Final Theological School. While an undergraduate he was instrumental in establishing the Oxford University Musical Club, and was elected its first president. This society (see vol. iv. p. 206) has done a great deal for the advancement of classical music in the University. It still flourishes, and up to June 1887 over 380 performances of chamber music had been given. Mr. Lloyd was appointed organist of Gloucester Cathedral in June 1876 as successor to Dr. S. S. Wesley. In this capacity he conducted the Festivals of the Three Choirs in 1877 and 1880. In Sept. 1882 he succeeded Dr. C. W. Corfe as organist of Christ Church Cathedral, Oxford, and in the same year became conductor of the Choral Society in succession to Mr. Parratt. His works, though few in number, have obtained well-deserved success. His themes are original and beautiful, and their treatment shows much experience and knowledge of effect. His part-writing is excellent, and in the structure of his compositions he displays a moderation and self-restraint which

[1] All posthumous MSS. were handed over to the Allg. Deutsche Musikverein by the Princess Hohenlohe, the daughter of Liszt's faithful friend and testatrix, the Princess Wittgenstein, who died in 1887.

cannot be too highly commended. His published works are as follows :—

Cantatas.—'Hero and Leander,' for soli, chorus and orchestra (Worcester Festival, 1884) : 'Song of Balder,' for soprano solo and chorus (Hereford Festival, 1885) : 'Andromeda,' for soli, chorus and orchestra (Gloucester Festival, 1886) : 'The Longbeards' Saga,' male chorus and PF. acct., 1887.

Choruses and incidental music to Alcestis (see GREEK PLAYS in Appendix), for male chorus, flutes, clarinets and harp, 1887. 'The Gleaner's Harvest' for female chorus.

Services in E♭ (full Cathedral), in F and G (Parochial). Magnificat and Nunc Dimittis in F, soli, chorus and orchestra (Gloucester Festival, 1880).

Anthems.—'Art thou weary?' 8 voices unaccompanied. 'Blessed is he,' with full orchestral accompaniment (Gloucester Festival, 1883). 'Fear not, O land,' and 'Give the Lord the honour.'

Duo concertante for clarinet and piano.

Organ.—Sonata in D minor, and two other pieces.

Madrigal, 5 parts, 'When at Corinna's eyes.' Part-songs, among which 'Allen-a-dale' and 'The Rosy Dawn' (8 parts) are accompanied, and several songs. [M.]

LOESCHHORN, ALBERT, was born June 27, 1819, in Berlin, where he still resides. He was a pupil of Ludwig Berger, and subsequently studied at the Royal Institute for Church Music in Berlin, where since 1851 he has been teacher of the pianoforte. The title of Royal Professor was conferred upon him in 1868. For many years he carried on concerts of chamber music at Berlin with eminent success. He has done great service for the advancement of classical music, and by his conscientious and thorough discipline as a teacher many of his pupils have also distinguished themselves. He is most widely known through his numerous studies for the pianoforte, although he has published a long list of other worthy compositions. [C.E.]

LONDON. For additions to article on vol. ii. p. 163 *a*, see DEGREES in Appendix.

LONDON MUSICAL SOCIETY, THE. This society was formed in 1878 by Mr. Heathcote Long and other prominent amateurs. Its objects are stated in its second rule—a canon unimpeachable in spirit, if not in grammar—to be 'the practice and performance of the works of composers which are not generally known to the musical public.' Mr. Barnby was appointed musical director, and Mr. Long and Mr. A. Littleton honorary secretaries. An efficient choir was formed, and the first concert was given on June 27, 1879, in St. James's Hall, although, strictly speaking, the occasion was a private one. Goetz's Psalm cxxxvii. was introduced to London at that concert, the solos being sung, as on many subsequent occasions, by efficient amateurs. From 1884 until the last season of the society's existence, Mr. Heathcote Long was alone in the honorary secretaryship. After the season of 1886, Mr. Barnby was succeeded as conductor by Mr. A. C. Mackenzie, who conducted the final concert on May 24, 1887. In the course of that year the society was disbanded, and a sum of £100 was handed over from its funds to the Royal College of Music. During the nine years of its existence the institution performed the following works for the first time in England, besides others which had been heard before, though not frequently. Mr. Stanford's 'Three Holy Children,' for instance, was given for the first time in London, though not for the first time in England, by the London Musical Society :—

CHORAL WORKS.

Beethoven. Cantata on the death of the Emperor Joseph the Second.
Brahms. Vier Gesänge, op. 17.
Dvořák. 'Stabat Mater.'
Goetz. Psalm cxxxvii. and 'Noenia.'
Gounod. Troisième Messe (selections).
Grieg. 'Klosterthor.'
Hiller. 'O weep for those.'
Hofmann, Heinrich. 'Cinderella.'
Jensen. 'Feast of Adonis.'
Rheinberger. 'Christoforus.'
Silas, E. Magnificat.
Schumann. 'The King's Son,' 'The Minstrel's Curse,' and 'Spanische Liebeslieder.'

ORCHESTRAL WORKS.

Bach. Toccata in F, arranged.
David, Ferd. Violin Concerto in E minor (Miss Shinner).
Dvořák. Legenden.
Schubert. Overture, 'Des Teufel's Lustschloss.' [M.]

LOOSEMORE, HENRY. Line 6 of article, *for* anthems *read* an anthem. Line 10, *for* in 1667 *read* after Michaelmas 1670. Concerning the Exeter organ, built by his son, see vol. ii. p. 592.

LOVER, SAMUEL, born at Dublin in 1797, began his career as an artist and miniature painter, was elected a member of the Royal Hibernian Society of Arts in 1828, and afterwards became its secretary. He wrote a number of successful novels, dramas, and poems, and composed both words and music of many songs and ballads. He also appeared as a singer in a musical entertainment, 'The Irishman's Carpet Bag.' His compositions include the music and songs to his dramas and burlettas produced at the London theatres and rendered popular by Mme. Vestris, Tyrone Power, and others, viz. 'Rory O'More,' Adelphi, Sept. 29, 1837; 'White Horse of the Peppers,' Haymarket, 1838; 'Happy Man,' Haymarket, May 20, 1839; 'Greek Boy,' Covent Garden, Sept. 26, 1840; 'Il Paddy Whack in Italia,' English Opera House (Lyceum), April, 1841; 'MacCarthy More,' Lyceum, April 1, 1861, and many detached songs, principally Irish, both humorous and pathetic. Many of these were very effective, as, for instance, his 'What will you do, love?' 'Angel's Whisper,' 'Molly Bawn,' and 'The low-backed Car.' An evening entertainment which he attempted met with some success in England and America. He died July 6, 1868. [A.C.]

LUCAS, CHARLES. Add that in 1840–3 he occasionally conducted at the Ancient Concerts.

LUCCA, PAULINE. Add date of birth, April 26, 1841, and that her parents were Italian. P. 171 *a*, l. 22, *for* In July *read* On July 22. Add that in the Italian seasons of 1882–4, at Covent Garden, Mme. Lucca appeared in the parts of Selica, Cherubino, Carmen, etc., and was announced to appear in 'Colomba,' but that opera was not produced. In the last line of the article, *for* Rahder *read* Rahden. (Corrected in late editions.)

LUISA MILLER. Line 4 of article, *for* December *read* Dec. 8.

LUMBYE, H. C. Correct date of birth to May 2, 1810.

LUSTIGE WEIBER VON WINDSOR. Line 4 of article, *for* in May *read* March 9. (Corrected in late editions.)

LUTE. P. 176 *a*, l. 8 from bottom, omit the clause between the commas, as the lute is not furnished with a soundpost. P. 176 *b*, l. 13, the single-necked lute had, about A.D. 1600, open strings or diapasons as well as the theorbo, but always in pairs of strings. For 'luth téorbé,' or 'liuto attiorbato' see THEORBO, vol. iv. p. 100 *b*. P. 177 *a*, ll. 40, 54, 59, for the modernizing of the Laux Maler lute figured on p. 176, the use made of old lutes to repair other instruments, the attribution of the surname Luther, the true date for Maler, and the anecdote told by Mace concerning King Charles and Goothiere (Gaultier), see THEORBO, vol. iv. p. 100 *b*. [A.J.H.]

LUTENIST. The date given on p. 178 *a*, l. 4, is corrected in the article SHORE, vol. iii. 488 *b*, where the death of Shore is given as 1750. 1752 is probably the correct date.

LUTHERAN CHAPEL. The last sentence of the article should run:—The organists since 1784 have been Augustus Friedrich Karl Kollmann, died Easter Day, 1829, etc.

LWOFF, ALEXIS. Add date of birth, May 25.

LYCEUM THEATRE. P. 181 *a*, l. 20, *for* July 22 *read* July 23. Line 11 from end of article, *for* 71 *read* 41.

M.

MAAS, JOSEPH, born Jan. 30, 1847, at Dartford; began his career as a chorister at Rochester Cathedral, and was taught singing by J. L. Hopkins, the organist, and later by Mme. Bodda-Pyne. He was for some time a clerk in Chatham dockyard, but went to Milan in 1869, and studied under San Giovanni. He made his début at one of Leslie's concerts, Feb. 26, 1871, and sang 'Annabell Lee' in the place of Sims Reeves, with great success, 'inasmuch as he was not only compelled by unanimous desire to repeat it, but there was a strong attempt to induce him to sing it a third time, which, however, he had the good sense to resist.' He played the hero in 'Babil and Bijou' at Covent Garden, Aug. 29, 1872; he then went to America, and played in Miss Kellogg's English Opera Company. He reappeared in England at the Adelphi under Carl Rosa, as Gontrau on the production of Brüll's 'Golden Cross,' March 2, 1878, and was engaged by Rosa for three years as his principal tenor both at Her Majesty's and in the provinces. His principal parts were Rienzi on its production at Her Majesty's, Jan. 27, 1879; Raoul, Feb. 12, 1879; Wilhelm Meister on the production in English of 'Mignon,' Jan. 12, 1880; Radames on the production in English of 'Aïda,' Feb. 19, 1880; also Faust, Thaddeus, Don César, etc., He played at Her Majesty's in Italian in 1880, and at Covent Garden (as Lohengrin) in 1883. He played under Rosa at Drury Lane in 1883–85, his new parts being Edgar of Ravenswood, April 19, 1884, and the Chevalier des Grieux on production in London of 'Manon,' May 7, 1885. He was very popular on the stage, more on account of his very fine voice, which was said to resemble Giuglini's in character, rather than for his dramatic gift, since he was a very indifferent actor. He was equally popular in the concert-room, where he appeared first at the Sacred Harmonic, in the 'Messiah' April 4, 1879,

and at the Philharmonic, May 21, 1879. He sang at all the principal concerts, and at the various Handel and provincial festivals. He sang also in Paris at Pasdeloup's concerts, April 6, 1884, and at Brussels at the Bach and Handel Festival of 1885. His last important engagement was at the Birmingham Festival of 1885, where he sang in Dvořák's 'Spectre's Bride,' Aug. 27, and Stanford's 'Three Holy Children,' Aug. 28, on the production of those works. At the Norwich Festival of the previous year he had introduced 'Apollo's Invocation,' a scena written for him by Massenet. He died Jan. 16, 1886, from a complication of disorders, rheumatic fever, bronchitis, congestion of the lungs, brought on from a cold taken while fishing. Maas's 'greatest triumphs were gained in the concert room rather than on the stage. For several years he has stood in the very first rank of tenor singers, not only by reason of his magnificent voice, but of his thoroughly finished and artistic style.... By his amiable personal character the deceased artist won the esteem and affection of all who had the privilege of his friendship.'[1] [A.C.]

MAATSCHAPPIJ TOT BEVORDERING DER TOONKUNST. See vol. iv. p. 255.

MACBETH. Line 7 of article, *read* March 17.

MACBETH, Allan, born in Greenock, March 13, 1856, and received his musical education chiefly in Germany. In 1880 he was appointed conductor to the Glasgow Choral Union, but resigned the post in 1887. He is organist of St. George's-in-the-Fields Established Church. Mr. Macbeth, in spite of much occupation of his time in teaching (pianoforte and singing), has found leisure for composition, for which he has a decided gift. He has written a number of pleasing pianoforte pieces, besides two or three orchestral movements played at the Choral Union Concerts, and since transcribed for piano. As a song writer Mr. Macbeth has generally been very successful, and he has besides ably arranged for voices several Scotch melodies, as well as written some original part-songs. He has an operetta in MS., 'The Duke's Doctor.' [W.He.]

MACFARREN, Sir G. A. Add that his oratorio 'King David' was produced at the Leeds Festival, 1883, and that in the same year he received the honour of knighthood. He died Oct. 31, 1887, his last published work being an Andante and Rondo in E for violin and organ, contained in the 'Organist's Quarterly Journal' for Oct. 1887. A cantata for female voices 'Around the Hearth,' was published posthumously. As Principal of the Royal Academy of Music, Sir G. A. Macfarren was succeeded in 1888 by Dr. A. C. Mackenzie, and as Professor of Music at Cambridge, by Dr. C. Villiers Stanford. [M.]

McGUCKIN, Barton, born July 28, 1852, at Dublin, began his career as a chorister at Armagh Cathedral. He received instruction from the late R. Turle, then organist there, in singing, organ, violin, and pianoforte. He became first tenor at St. Patrick's Cathedral, Dublin, in 1871, and was for a time a pupil of Joseph Robinson. He sang at one of the Philharmonic concerts in Dublin in 1874, and in the following year made his début at the Crystal Palace Concerts July 5, 1875, after which he went to Milan and studied under Trevulsi. He reappeared with success at the same concerts Oct. 28, 1876, where he also made his début as an oratorio singer in the 'Lobgesang,' Nov. 3, 1877. He made his début on the stage as Thaddeus under Carl Rosa at Birmingham Sept. 10, 1880; at Dublin as Wilhelm Meister May 9, 1881; in the same part at Her Majesty's Jan. 20, 1882, and as Moro on the production in England of 'The Painter of Antwerp,' an English version of Balfe's Italian opera 'Pittore e Duca,' Jan. 28, 1882. He remained in Rosa's company both in London and the provinces until the summer of 1887, and has become a great favourite both as a singer and actor. His most important parts are Lohengrin, Faust, and Don José; in new operas he has created at Drury Lane the parts of Phœbus ('Esmeralda'), March 26, 1883; Orso ('Colomba'), April 9, 1883; Waldemar ('Nadeshda'), April 16, 1885; Guillem de Cabestanh ('Troubadour'), June 8, 1886; Oscar ('Nordisa'), May 4, 1887; at Edinburgh, Renzo on the production in English of Ponchielli's 'Promessi Sposi,' and at Liverpool, Des Grieux ('Manon'), Jan. 17, 1885. Mr. McGuckin is extremely popular in the concert-room, and has sung at the Philharmonic, the Popular and Oratorio Concerts, and at the Handel and provincial festivals. His last important engagement was at the Norwich Festival of 1887, where he sang the tenor music in Mancinelli's 'Isaias.' He went to America as the principal tenor of the National Opera Company, and has lately returned. [A.C.]

MACKENZIE, A. C. To list of works add the following: — Operas. 'Colomba,' op. 28 (Drury Lane, April 5, 1883); 'The Troubadour' (ibid. June 8, 1886), the words of both by Francis Hueffer. Oratorio: 'The Rose of Sharon' (Norwich Festival, 1884), words by Joseph Bennett. Cantatas: 'Jason' (Bristol Festival, 1882), and 'The Bride'; 'The Story of Sayid' (Leeds Festival, 1886). Orchestral: 'La Belle Dame sans Merci,' op. 29; two Scotch Rhapsodies, op. 21 and 24; overture, 'Twelfth Night,' op. 40; concerto for violin and orchestra, op. 32, played by Señor Sarasate at the Birmingham Festival, 1885. Piano, ops. 15, 20, and 23, six pieces for violin and piano, op. 37, besides songs, part-songs, and three organ pieces. His most important recent compositions are his 'Jubilee Ode,' words by Joseph Bennett (Crystal Palace, June 22, 1887, and Norwich Festival of same year), and an ode, 'The New Covenant,' composed for the opening of the Glasgow Exhibition of 1888. The composer received the honorary degree of Mus. D. from the University of St. Andrew's in 1886. He was elected principal of the Royal Academy of Music in Feb. 1888. Knighted, 1895. [M.]

MADRIGAL SOCIETY. P. 193 *b*. l. 30, add that since 1882 the meetings have been held

[1] Athenæum, Jan. 23, 1886.

in Willis's Rooms. Line 12 from bottom, *for* 1752 *read* 1757. P. 194 *a*, l. 25, *for* it is now vacant *read* in 1878 the Right Hon. Earl Beauchamp was appointed. Line 33, add that in 1887 Dr. Stainer was succeeded as director of the music by Dr. J. F. Bridge and Mr. Eaton Faning. Since 1881 two prizes of £10 and £5 respectively, have been awarded annually for the two best madrigals. From the list of present members all names except those of Drs. Stainer and Bridge, and Mr. Otto Goldschmidt, are to be omitted.

MÄNNERGESANGVEREIN. Add that the Cologne Choral Union gave a set of ten concerts in St. James's Hall in June, 1883.

MAGNIFICAT. Add to references at end of article, ISRAEL IN EGYPT, vol. ii. p. 25, ORATORIO, vol. ii. p. 546, and HANDEL, vol. iv. p. 664.

MAHILLON, CHARLES & Co., wind-instrument makers. This firm was founded at Brussels by C. Mahillon (born 1813, died 1887), in 1836. Three of his sons are now in the business, Victor (see below), Joseph, who conducts the Brussels business, and Fernand who manages the London branch established in 1884, in Leicester Square, and removed in 1887 to Oxford Street.

MAHILLON, VICTOR, of the firm of wind-instrument makers, above mentioned, a writer of important works on acoustics and musical instruments, and the honorary and zealous custodian of the Museum of the Brussels Conservatoire, was born in that city, March 10, 1841. After studying music under some of the best professors there, he applied himself to the practical study of wind-instrument manufacture and was taken into his father's business in 1865. He started a musical journal 'L'Écho Musical' in 1869 and continued it until 1886, when his time became too much occupied to attend to its direction. In 1876 he became the honorary curator of the museum of the Conservatoire, which, begun with Fétis's collection of 78 instruments, has been, through his special knowledge and untiring energy increased (1888) to upwards of 1500! An important contribution to it, of Indian instruments, has been a division of the fine collection of the Rajah Sir Sourindro Mohun Tagore, between the Brussels Conservatoire and the Royal College of Music, London. Mr. Victor Mahillon has published two very important works, besides three synoptical tables of harmony, voices and instruments. The first is 'Les Éléments d'Acoustique musicale et instrumentale,' an octavo volume published in 1874, which gained for him at Paris in 1878 the distinction of a silver medal. The other is the catalogue of the Conservatoire, which has appeared in volumes annually from 1877, and is of the highest interest. As well as these noteworthy works he has contributed to the 9th edition of the Encyclopædia Britannica several historical and technical articles of great value upon wind instruments, both wood and brass. As soon as Mr. Victor Mahillon could introduce a workshop into the Conservatoire he did so, and he has there had reproductions made of many rare instruments which, through their antiquity, or the neglect of former owners, had become too much deteriorated for purposes of study. Among these reproductions the Roman Lituus and Buccina in the Music Loan Collection at Kensington, in 1885, will be remembered as prominent objects of interest in the fine selection contributed under Mr. Mahillon's auspices by the Brussels Conservatoire. He intends to reproduce from authentic sources, if he has not already fulfilled that intention, the complete families of wind-instruments that were in use in the 16th and 17th centuries.

Mr. Victor Mahillon's services to the Inventions Exhibition of 1885, in the above-named contribution of instruments to the Loan Collection, and the historical concerts under his direction performed by professors and students of the Brussels Conservatoire, at which several rare instruments were actually played upon in contemporary compositions, were so highly appreciated by the Executive Council of that Exhibition that a gold medal was awarded to him. [A.J.H.]

MALBROUGH. Last line but one of article, *for* Dec. 15 *read* Dec. 13.

MALLINGER, MATHILDE, born Feb. 17, 1847, at Agram, Croatia, was first taught singing there by her father, a professor of music, and Professor Lichtenegger, later by Gordigiani and Vogl at the Prague Conservatorium from 1863–66, and finally by Richard Lewy at Vienna. On the recommendation of Franz Lachner she was engaged at Munich, where she made her début as Norma, Oct. 4, 1866. She was the original Eva in the 'Meistersinger,' June 21, 1868. She made her débuts at Berlin as Elsa, April 6, and Norma, April 9, 1869. She was an excellent actress and a great favourite, married the Baron Schimmelpfennig von der Oye at Berlin, and remained there during her whole musical career. On leave of absence she played with success at Vienna, Munich, etc., and in Italian opera at St. Petersburg and Moscow, but with indifferent success. Her parts included Donna Anna, Fidelio, Jessonda, Valentine, Leonora ('Trovatore'), Iphigenia, Euryanthe, Susanna, Zerlina, Mrs. Ford, etc. About 1871 a certain section of the Berlin public tried to establish her claim as leading singer as against Pauline Lucca, the then reigning favourite. Endless quarrels ensued on their account, which culminated at a performance of the 'Nozze,' Jan. 27, 1872, where they were both playing. On Lucca's entry as Cherubino she was hissed—in consequence of which she broke her contract in the following autumn and left for America. It is rumoured that Mme. Mallinger having lost her voice has become a 'dramatic' actress, and will appear shortly at the Königstädter Theatre, Berlin. [A.C.]

MALTEN, THÉRÈSE, born at Insterburg, Eastern Prussia, was taught singing by Gustav

Engel of Berlin. She made her début as Pamina and Agatha at Dresden in 1873, where she has been engaged ever since. Her parts also include Armida, Iphigenia, Fidelio, Jessonda, Genoveva, Leonora ('Trovatore'), Margaret; the heroines of Wagner; the Queen of Sheba in Goldmark's opera of that name; the Princess Marie in Kretschmer's 'Folkunger' on its production in 1874; Fulvia on the production of Hofmann's 'Arminius' in 1877, etc. On leave of absence she has played in London, Berlin, Vienna, etc. In August 1882 she appeared at Bayreuth as Kundry, at the instance of Wagner, who had a very high opinion of her ability, again in 1884, and at Munich, where she played the same part in private before the late King, from whom she received the gold medal of Arts and Science.

She made a great impression on her début at Drury Lane under Richter as Fidelio, May 24, 1882, and during the season as Elsa, May 27; Elizabeth, June 3, and Eva, June 7. She reappeared in England at the Albert Hall on the production of 'Parsifal,' Nov. 10 and 15, 1884.

She possesses a voice of extraordinary compass, with deep and powerful notes in the lower register. She is an admirable actress, being especially successful in Wagner's operas. She was appointed chamber singer to the King of Saxony in 1880, and was also chosen by Wagner to play Isolde at Bayreuth in 1883, though the performance did not take place owing to the death of the composer. [A.C.]

MANCINELLI, Luigi, born at Orvieto, Feb. 5, 1848. He was six years old when he began to study the piano under the direction of his father, a distinguished amateur. At the age of 12 he went to Florence to be a pupil of Professor Sbolci, one of the most talented Italian violoncellists. The boy showed great aptitude for the cello, and his progress was very rapid. While studying with Sbolci, he had a short course on harmony and counterpoint from Mabellini. These were the only lessons he ever had; he has acquired his knowledge of composition from the study of the works of the great masters without any guide.

Mancinelli's professional career began in Florence, where he was for a time one of the first cello players in the orchestra of La Pergola. He was engaged in the same capacity at the Apollo in Rome in 1874, when this theatre, by unexpected circumstances, was left without a conductor. The impresario Jacovacci, a popular and energetic manager, in order not to stop the performances, thought of trying the ability of his first cello player, of whom he had heard favourable reports; and so Mancinelli was suddenly raised from the ranks to appear as a conductor. 'Aida' was the first opera conducted by him, and, as everything went off satisfactorily, from that performance there was a new conductor in Italy.

Thanks to his first successful attempt, in the following year Mancinelli was engaged to be the musical director at Jesi during the fêtes of Spontini's centenary. On this occasion he revived the opera 'La Vestale,' and the admirable execution of this grand work reflected on the conductor, who was re-engaged for the direction of the orchestra of the Apollo. In 1876 Mancinelli had his first success as a composer with his 'Intermezzi' to 'Messalina,' a drama by Pietro Cossa. The following year he wrote 'Intermezzi' to the 'Cleopatra' of the same author.

Mancinelli left Rome in 1881 for Bologna, where he was engaged to be the Principal of the Liceo Musicale, and at the same time the conductor of the Teatro Comunale, and the Maestro di Cappella of San Petronio, the old basilica of the famous university town. During his stay there he composed two Masses and many other sacred pieces, introduced several improvements in the Liceo, organized a symphony and quartet society, and was the first to acquaint the Bolognese with vocal and instrumental music by foreign composers. In 1884 he gave the first performance of his opera 'Isora di Provenza,' which was received with great applause.

After five years he left Bologna, attracted perhaps to other countries by the prospect of pecuniary improvement in his position. During the season of 1886 he visited London, and gave a concert, in which he conducted classical works and some of his own compositions. The success of this concert brought him an invitation to write an oratorio for the next Norwich Festival, and the engagement to conduct the Italian Opera during the Jubilee season at Drury Lane. His powers as a conductor received full recognition; and his oratorio 'Isaias,' executed at Norwich in October, 1887, was unanimously praised. He was re-engaged by Mr. Augustus Harris as conductor for the season of 1888 at Covent Garden.

For the last two years Mancinelli has held the place of musical director and conductor at the Theatre Royal of Madrid. He is now at work on a Requiem Mass which will very probably be performed in London, and he has already been asked to compose a second oratorio. [F.Rz.]

MANDOLINE. P. 206, *add* the Sonatine, also an Adagio in E♭ for the Mandoline and Cembalo are given in the supplemental volume for Beethoven's works (B. & H. 1887).

MANERIA. A term, applied, in the early middle ages, to certain systematic arrangements of the Scale, analogous to the Mixed Modes of a somewhat later period. The roots of the several systems comprised in the series corresponded with the Finals of the Modes; each system comprehending one Authentic, and one Plagal Mode: consequently, the number of the Maneria was only half that of the Modes themselves. They were named and numbered in a barbarous mixture of Greek and Latin, thus:—Modes I and II were called Authentus et Plaga, Proti; III and IV, Authentus et Plaga, Deuteri; V and VI, Authentus et Plaga, Triti; and VII and VIII, Authentus et Plaga, Tetarti: *i.e.* the Authentic and Plagal, of the First, Second, Third, and Fourth Maneria. When the number of Modes was increased, the

pedantic faction affected to regard the Maneria of A and C as duplicates of the First and Second, at a different pitch; and hence originated the confusion mentioned in DODECACHORDON. Afterwards, the necessary existence of six Maneria for the Twelve Modes was freely acknowledged. [W.S.R.]

MANNS, AUGUST. Add that at the Handel Festival of 1883 he undertook the duties of conductor at very short notice, in place of Sir Michael Costa, who had just been taken ill. The Festivals of 1885 and 1888 were also conducted by Mr. Manns.

MARA. P. 210 *a*, l. 10, *for* 1766 *read* 1786.

MARBECK. See MERBECKE.

MARCHAND, MARGUERITE. See DANZI.

MARCHISIO, THE SISTERS, both born at Turin—Barbara Dec. 12, 1834, Carlotta Dec. 6, 1836—were taught singing there by Luigi Fabbrica, and both made their débuts as Adalgisa, the elder (who afterwards became a contralto) at Vienna in 1856, the younger at Madrid. They played at Turin in 1857–58, and made great success there as Arsace and Semiramide; also on a tour through Italy, and at the Paris Opera on the production of 'Semiramis' July 9, 1860. They first appeared in England with great success at Mr. Land's concerts, St. James's Hall, Jan. 2 and 4, 1862, in duets of Rossini and Gabussi, and made a concert tour through the provinces with Mr. Willert Beale. They also made a success in 'Semiramide' at Her Majesty's, May 1, 1860, on account of their excellent duet singing, though separately their voices were coarse and harsh, their appearance insignificant, and they were indifferent actresses. Carlotta played the same season Isabella in 'Robert,' June 14, and Donna Anna July 9. They sang also at the Crystal Palace, twice at the New Philharmonic, at the Monday Popular, etc. They sang together for some time abroad. Carlotta married a Viennese singer, Eugen Kuh (1835–75), who sang with her in concerts, and at Her Majesty's in 1862 under the name of Coselli, and who afterwards became a pianoforte manufacturer at Venice. She died at Turin June 28, 1872. Barbara, we believe, retired from public life on her marriage. [A.C.]

MARIANI, ANGELO, born at Ravenna, Oct. 11, 1822, began to study the violin when quite young, under Pietro Casolini; later on he had instruction in harmony and composition from a monk named Levrini, of Rimini, who was a celebrated contrapuntist. He was still in his teens when he left home to see the world, and for a certain time he continued to appear as a soloist in concerts and as a first violin player in orchestras. It was in 1844, at Messina, that he assumed the *bâton*,—which after all was only the bow of his violin, for at that time the conductor of an Italian orchestra was named *Primo Violino, direttore dell' orchestra*.

After several engagements in different theatres in Italy, Mariani was appointed, in 1847, conductor of the Court Theatre at Copenhagen. While there he wrote a Requiem Mass for the funeral of Christian VIII. At the beginning of 1848 he left Denmark and went to Italy to fight in the ranks of the volunteers for the freedom of his country. At the end of the war he was called to Constantinople, where his ability won him the admiration of the Sultan, who made him many valuable presents; and Mariani, as a mark of gratitude, composed a hymn which he dedicated to him. In Constantinople also he wrote two grand cantatas, 'La Fidanzata del guerriero' and 'Gli Esuli,' both works reflecting the aspirations and attempts of the Italian movement. He returned to Italy in 1852, landing at Genoa, where he was at once invited to be the conductor of the Carlo Felice. In a short time he reorganized that orchestra so as to make it the first in Italy. His fame soon filled the country and spread abroad; he had offers of engagements from London, St. Petersburg and Paris, but he would never accept them; he had fixed his headquarters in Genoa, and only absented himself for short periods at a time, to conduct at Bologna, at Venice, and other important Italian towns. Mariani exercised an extraordinary personal fascination on all those who were under his direction. He was esteemed and loved by all who knew him. For him, no matter the name of the composer, the music he conducted at the moment was always the most beautiful, and he threw himself into it with all his soul. Great masters as well as young composers were happy to receive his advice, and he gave it in the interest of art and for the improvement of the work. At rehearsal nothing escaped him in the orchestra or on the stage.

In 1864 Mariani was the director of the grand fêtes celebrated at Pesaro in honour of Rossini, and was himself greeted enthusiastically by the public, which was in great part composed of the most eminent musicians of the world. Throughout Italy are still heard the praises of the interpretation given by him to the masterpieces of the Italian and foreign schools. The writer has often heard celebrated singers say that music which they had sung under other directors showed new beauties when conducted by Mariani. On Nov. 1, 1871, he introduced 'Lohengrin' at the Comunale of Bologna, and, thanks to his efforts, the opera was such a success that it was performed through the season several times a week—and he had only *nine* orchestral rehearsals for it! On this occasion Richard Wagner sent him a large photograph of himself, under which he wrote *Evviva Mariani*.

A cruel illness terminated the life of this great musician on Oct. 13, 1873, at Genoa, the town which he loved so much, and which had seen the first dawn of his world-wide celebrity. The day of Mariani's funeral was a day of mourning for the whole of Genoa. His body was transported to Ravenna at the request of the latter city. The Genoese municipality ordered a bust of him to be placed in the vestibule of the Carlo Felice; all the letters written to

him by the leading composers and literary men of the day to be preserved in the town library; the portrait sent by Wagner hung in one of the rooms of the Palazzo Civico; and his last *bâton* placed by the side of Paganini's violin in the civic museum.

Besides the works already named, and other orchestral pieces, he published several collections of songs, all of which are charmingly melodious: —'Rimembranze del Bosforo,' 'Il Trovatore nella Liguria,' 'Liete e tristi rimembranze,' 'Otto pezzi vocali,' 'Nuovo Album vocale.'

Mariani was the prince of Italian conductors; out of Italy he might have found his equal, but not his superior. [F.Rz.]

MARIMON, Marie, born in 1839 at Liège, was taught singing by Duprez, and made her début at the Lyrique as Hélène on the production of Semet's 'Demoiselle d'Honneur,' Dec. 30, 1857; as Zora in 'La Perle du Brésil,' and Fatima in 'Abu Hassan,' May 11, 1859. She next played at the Opéra Comique Maïma in Offenbach's unsuccessful 'Barkouf,' Dec. 24, 1860; Zerline in 'La Sirène' with Roger, Nov. 4, 1861, and Giralda in 1862. She returned to the Lyrique, and afterwards played at Brussels. On her return to Paris in 1869 she made a very great success at the Athénée in French versions of Ricci's 'Follia a Roma' and 'Crispino,' and Verdi's 'Masnadieri,' Feb. 3, 1870. She played, at Drury Lane in Italian in 1871–72, and at Covent Garden in the autumn of the first year, Amina, wherein she made her début May 4, 1871, Maria ('La Figlia'), Rosina, Norina, and Astrifiammante. She made at first a great success solely on account of her beautiful rich round voice, her brilliant execution and certainty of intonation. She did not maintain the hopes excited at her début, since it was discovered that she was a very mechanical actress and totally devoid of charm. The only part she really played well was Maria. Nevertheless she became a very useful singer at Covent Garden 1874–77 in all the above parts, Donna Elvira, Margaret of Valois, etc.; at Her Majesty's in 1878 and 1880, in Dinorah, etc.; at the Lyceum in 1881. She sang with success in the English provinces, Holland, Russia, America, and elsewhere. She reappeared in Paris at the Lyrique as Giralda, Oct. 21, 1876; as Suzanne in Gautier's unsuccessful 'La Clé d'Or,' Sept. 14, 1877, and Martha, and at the Italian Opera in the last part Jan. 3, 1884. Second line of musical example on next page, the last note should be a quaver, not a crotchet. In sentence at end of article, add that another instance of Schumann's use of the tune, though in a disguised form, occurs in the 'Faschingsschwank aus Wien.'

MARSHALL, William, Mus. D. Line 6 of article, *for* 1823 *read* 1825.

MARTIN, George Clement, born Sept. 11, 1844, at Lambourne, Berks, received instruction in organ-playing from Mr. J. Pearson and Dr. Stainer, also in composition from the latter during the time he was organist there at the parish church. He was appointed private organist to the Duke of Buccleuch, at Dalkeith, in 1871; Master of the Charities, St. Paul's Cathedral, in 1874, deputy organist at the same on the death of Mr. George Cooper in 1876, and organist on the resignation of Dr. Stainer in 1888. He received the degrees of Mus. Bac., Oxon, in 1869, Fellow of the College of Organists in 1875, and Mus. Doc. (degree conferred by the Archbishop of Canterbury) in 1883, and was appointed the same year teacher of the organ at the Royal College of Music, which post he has since resigned. His compositions include Morning and Evening Communion and Evening Service in C for voices and orchestra; Magnificat and Nunc Dimittis in A, for the same; the same in B♭ for voices, organ, and military band; the same in G for voices and orchestra; 7 anthems; also a variety of compositions for parochial use; songs, part songs, etc. Knighted, Easter, 1898. [A.C.]

MARTIN, G. W. Correct date of birth to 1828, and add that he died in great poverty, April 16, 1881, at Bolingbroke House Hospital, Wandsworth. [W.H.H.]

MARTIN Y SOLAR, Vicente, born at Valencia in 1754 (whence he was known in Italy as 'Lo Spagnuolo'), was a choir-boy in the cathedral of his native town, and afterwards organist at Alicante. On the advice of an Italian singer, named Giuglietti, he went to Florence, where he was commissioned to write an opera for the next Carnival. His 'Iphigenia in Aulide' was accordingly brought out in 1781. Soon after this he produced a new opera, 'Astartea,' in Lucca, as well as a ballet, 'La Regina di Golconda.' In 1783 'La Donna festeggiata' and 'L'accorta cameriera' were brought out at Turin, and in the following year 'Ipermnestra' at Rome. In 1785 he went to Vienna, where he became acquainted with Da Ponte, who wrote for him the libretto of 'Il burbero di buon cuore,' produced Jan. 4, 1786. Here as elsewhere he speedily became the fashion, his operas, 'La capricciosa corretta,' 'L'arbore di Diana,' and 'La cosa rara' following one another in quick succession. This last work, produced Nov. 11, 1786,

for a time threw 'Figaro' (produced six months before) into the shade. [See vol. ii. p. 391 *a*. Mozart's opinion of his rival's powers is given on p. 396 of the same volume.] In the autumn of the following year 'Don Juan' appeared, and Martin unwittingly obtained immortality at the hands of his rival, since a theme from 'La Cosa rara' makes its appearance in the second finale of Mozart's masterpiece. (See also Köchel's Catalogue, 582, 583.) In 1788 Martin was appointed director of the Italian Opera at St. Petersburg, where he brought out 'Gli sposi in contrasto,' and a cantata 'Il sogno.' In 1801 the fashion for Italian opera passed away for a time, and a French opera took its place. Martin, thus deprived of his post, employed the rest of his life in teaching. He died in May 1810.[1] [M.]

MARTINI IL TEDESCO ('the German'), the name by which the musicians of his time knew JOHANN PAUL AEGIDIUS SCHWARTZENDORF, born Sept. 1, 1741, at Freistadt, in the Upper Palatinate, who was organist of the Jesuit seminary at Neustadt, on the Danube, when he was 10 years old. From 1758 he studied at Freiburg, and played the organ at the Franciscan convent there. When he returned to his native place, he found a stepmother installed at home, and set forth to seek his fortune in France, notwithstanding his complete ignorance of the language. At Nancy he was befriended, when in a penniless condition, by the organ-builder Dupont, on whose advice he adopted the name by which he is known. From 1761 to 1764 he was in the household of King Stanislaus, who was then living at Nancy. After his patron's death Martini went to Paris, and immediately obtained a certain amount of fame by successfully competing for a prize offered for the best march for the Swiss Guard. At this time he wrote much military music, as well as symphonies and other instrumental works. In 1771 his first opera, 'L'amoureux de quinze ans,' was performed with very great success, and after holding various appointments as musical director to noblemen, he was appointed conductor at the Théâtre Feydeau, when that establishment was opened under the name of Théâtre de Monsieur for the performance of light French and Italian operas. Having lost all his emoluments by the decree of Aug. 10, 1792, he went to live at Lyons, where he published his 'Melopée moderne,' a treatise on singing. In 1794 he returned to Paris for the production of his opera 'Sappho,' and in 1798 was made inspector of the Conservatoire. From this post he was ejected in 1802, by the agency, as he suspected, of Méhul and Catel. At the restoration of 1814 he received the appointment of superintendent of the Court music, and wrote a Requiem for Louis XVI. which was performed at St. Denis, Jan. 21, 1816. Very shortly afterwards, on Feb. 10 of the same year, he died. Besides the operas mentioned above he wrote 'Le fermier cru sourd' (1722); 'Le rendez-vous nocturne' (1773); 'Henri IV.' (1774); 'Le droit du Seigneur' (1783); 'L'amant sylphe' (1795); 'Annette et Lubin' and 'Ziméo' (1800). In the department of church music he wrote several masses, psalms, requiems, etc. A cantata written for the marriage of Napoleon with Marie Louise exists, besides much chamber music, but Martini's best-known composition is probably the charming song 'Plaisir d'amour.' (Mendel's Lexicon, etc.) [M.]

[1] The article in Mendel's Lexicon, from which many of the above facts are taken, contains several gross mistakes, such as the statement that 'Don Juan' was brought out before 'La cosa rara' (in which case it would have been difficult for Mozart to have used one of the themes from the latter opera in the former!), and the inclusion among works by him, of the book of canons with pianoforte accompaniment, published by Birchall in London, and edited by Clanchettini. These are by Padre Martini.

MARTUCCI, GIUSEPPE, born Jan. 6, 1856, at Capua, was first taught music by his father, a military bandmaster, and later received instruction at the Conservatorio, Naples (1867–72), in pianoforte playing from Cesi; in harmony from Carlo Costa, in counterpoint and composition from Paolo Serrao and Lauro Rossi. He became a pianoforte teacher at Naples, but soon after played with great success at concerts in Rome and Milan. He visited London and Dublin in 1875, playing at Arditi's concert in St. George's Hall, June 14, and elsewhere. He visited Paris in May, 1878, and introduced there with great success a quintet for piano and strings which had gained the prize of the Società del Quartetto at Milan earlier in the year, besides other compositions of his own. Rubinstein, according to a contemporary,[2] expressed himself in the highest terms of Martucci, especially as a composer. He was appointed a professor of the piano at the above Conservatorio in 1880, also director there of the Società del Quartetto, and conductor of the orchestral concerts instituted by the Prince of Ardore, introducing there for the first time in Naples the works of Beethoven, Mozart, Mendelssohn, Schumann, Berlioz, Brahms, and Wagner, in addition to works of the old Italian school. He gave similar orchestral concerts with great success at the Turin Exhibition in 1884, was for a short time director of the Società del Quartetto, Bologna, and became director of the Liceo Musicale there in 1886, which post he still holds. His compositions include an oratorio, orchestral works, two concertos (one of which he has played at Naples, Rome, Bologna, and Milan, 1887), quintets for piano and strings, sonatas and smaller pieces for violin or cello with piano, trios for the same instruments, sonatas for organ, a lyric poem for voice and piano, and about 150 works for piano solo, inclusive of sonatas, fugues, capriccios, scherzos, tarantellas, barcaroles, airs with variations, 'Moto Perpetuo,' op. 63, etc. [A.C.]

MARXSEN, EDUARD. Add date of death, Nov. 18, 1887.

MASS. P. 232 *a*, l. 12 and 13 from bottom, *after* TRACT *add* in Appendix, *and for* SEQUENCE *read* SEQUENTIA.

Since the article on Byrd was written for this Appendix, the British Museum has acquired a set of four part-books (Superius, Medius, Tenor, Bassus) of the second edition (1610) of Byrd's Gradualia. This copy is interleaved with the corresponding parts of all three of Byrd's Masses, viz. those for five, four, and three voices. It is possible that they were published in this form. The part-books are in admirably fresh condition, and have every appearance of being in the same state as when they were first published, but on the other hand the paper on which the masses are printed is different from that of the rest of the work, and the register signatures show that they are not originally intended to form part of the Gradualia.

The account of the Mass for five voices in vol. ii. p. 230 should be corrected by the article on Byrd in this volume, p. 573 *b*. In Father Morris's 'Life of Father William Weston' ('The Troubles of our Catholic Forefathers,' second series, 1875, pp. 142–5) will be found some fresh information about Byrd, though Dr. Rimbault's old mistakes are again repeated there. Father Morris has found several allusions to Byrd as a recusant in various lists preserved in the State Papers (Domestic Series, Elizabeth, cxlvi. 137, cli. 11, clxvii. 47, cxcii. 48), and in the following interesting passage in Father Weston's Autobiography, describing his reception at a house which is identified as being that of a certain Mr. Bold: 'We met there also Mr. Byrd, the most celebrated musician and organist of the English nation, who had been formerly in the Queen's Chapel, and held in the highest estimation; but for his religion he sacrificed everything, both his office and the Court and all those hopes which are nurtured by such persons as pretend to similar places in the dwellings of princes, as steps towards the increasing of their fortunes.' This was written in the summer of 1586. The recently published Sessions Rolls of the County of Middlesex show that true bills 'for not going to church, chapel, or any usual place of common prayer' were found against 'Juliana Birde wife of William Byrde' of Harlington on June 28, 1581; Jan. 19, April 2, 1582; Jan. 18, April 15, Dec. 4, 1583; March 27, May 4, Oct. 5, 1584; March 31, July 2, 1585; and Oct. 7, 1586. A servant of Byrd's, one John Reason, was included in all these indictments, and Byrd himself was included in that of Oct. 7, 1586, and without his wife or his servant a true bill was found against him on April 7, 1592, at which date he is still described as of Harlington. It is very curious that if, as Father Weston was informed, he had sacrificed his place at Court, there should be no mention of it in the Chapel Royal Cheque Book; but his subsequent dealings at Stondon with Mrs. Shelley show that he must have been protected by some powerful influence. To this he seems to allude in the dedication of the Gradualia to the Earl of Northampton. [W.B.S.]

MASSART, L. J. Add day of birth, July 19.

MASSÉ, FÉLIX MARIE, known under the name of VICTOR. Add that he died in Paris, July 5, 1884, after a long and painful illness, which had confined him to the house and rendered him totally incapable of active work. In 1876 he was obliged to give up his professorship of advanced composition at the Conservatoire, and was succeeded by Guiraud. During seven years of suffering his only consolation lay in composition, and in this way his opera, 'La Mort de Cléopâtre,' intended for the Opéra, was written. After his death a representation of the work took place at the Opéra Comique in the composer's honour (April 25, 1885), though the reception of 'Paul et Virginie' did not hold out much hope of success for a work evidently written in the same style and aiming too high. Although the composer's death was sufficiently recent to secure a favourable reception for this misnamed 'grand opera,' yet the composition was an evident failure, consisting as it did of misplaced pretension, and an ambitious imitation of Gounod's methods, in which Massé had lost what little remained to him of his original grace and charm. In spite of this change in his style, and though he must rank as a musician of the second order, there is at times in some of his songs a personal charm, a sober gaiety, and a gentle emotion. It was when he composed a song without having in view any particular interpretation, and when nothing more was required of him, that he could write most freely and could give the exact relation between the music and the words, a quality in which he originally excelled, and in which he resembled the school of Grétry. His ideal, which was on the whole a just one, did not exceed the limits of an exact feeling for prosody, and it is by those compositions of his in which the laws of metre are most faithfully observed that he is most likely to be for a short time remembered. [A.J.]

MASSENET, JULES FRÉDÉRIC ÉMILE. Add that the composer, though now in the prime of life, has produced nothing, during the last ten years, but works which are practically repetitions of his former productions—'Marie Magdeleine,' 'Les Erinnyes,' 'Le Roi de Lahore'—all of which are far superior to anything he has since composed. On May 22, 1880, he conducted his oratorio, 'La Vierge,' at the first historical concert at the Opéra, an unsuccessful scheme of Vaucorbeil's. He produced at Brussels his religious opera 'Hérodiade,' Dec. 19, 1881, which succeeded for one season only in that city, and failed in Paris, where it was represented at the Opéra Italien (Jan. 30, 1884), after being partly rewritten by the composer. On Jan. 19, 1884, the opera 'Manon' was produced at the Opéra Comique, and on Nov. 30, 1885, 'Le Cid' at the Opéra, neither of which have left a very permanent mark behind them. In the former

the composer tried the experiment of connecting the numbers of an opéra comique by a slightly orchestrated accompaniment to the dialogue, which was not sung, as in the case of *recitativo secco*, but spoken as usual. The idea was very ingenious, and deserves to be matured. In 'Le Cid' the heroic element has been ignored entirely, and the result is a work of somewhat effeminate character, wholly destitute of any connection with Corneille's tragedy. To the number of his works are to be added three new Orchestral Suites, nos. 5–7, Scènes Napolitaines, Scènes Alsaciennes, and Scènes de Féerie (Concerts du Châtelet, 1880, 1882, 1883); incidental music to Sardou's 'Théodora' and 'Le Crocodile' (Porte St. Martin, 1884 and 1886); a short work for voice and orchestra, 'Biblis'; various 'Poèmes' for voice and piano, and an opera, 'Pertinax,' intended for the Opéra Comique. In Oct. 1878, Massenet replaced Bazin as professor of advanced composition at the Conservatoire. In 1876 he was decorated with the Légion d'Honneur, and in 1878 was elected a member of the Académie des Beaux-Arts in place of Bazin, and to the exclusion of Saint-Saëns, who was generally expected to be the new member, as he was introduced in the first rank by the musical section. This was one of the rare occasions on which the entire Académie has not observed the order of presentation established by the section to which the new member is to belong. Massenet was only 36 at the time, and was the youngest member ever elected to the Académie des Beaux-Arts, for Halévy, who was the most remarkable previous example of what may be called 'Academic precocity,' was 37 when he entered the Institut in 1836. Massenet, who has recently (Jan. '88) been made an officer of the Légion d'Honneur, has been throughout a spoiled child of fortune; but the only music that can endure is that in which are displayed strong convictions and a firm resolution not to yield to public caprice; while Massenet's works, especially his later compositions, which are written without any fixed ideal, and in view of immediate success, scarcely survive the day of their birth, nor do they deserve to survive it. [A.J.]

MASSOL, Jean Étienne Auguste, born 1802 at Lodève, Hérault, was taught singing at the Paris Conservatoire from 1823–25, and gained a first prize there. He made his début at the Opera as Licinius ('Vestale'), Nov. 17, 1825, and remained there until Oct. 8, 1845. He first played second tenor parts in several new operas—Rodolphe ('Tell'); Herald ('Robert'); Kalaf (in Cherubini's 'Ali Baba'); Tavannes ('Huguenots'); Quasimodo (in Louise Bertin's 'Esmeralda'); Forte Braccio (in Halévy's 'Guido et Ginevra'); Mocenigo ('Reine de Chypre'); and the baritone parts of Tell and Jolicœur ('Philtre'), etc. He played for a time in Brussels, London, etc., and returned as principal baritone to the Opera in 1850, where he remained until his farewell benefit Jan. 14, 1858. The Emperor was present on that occasion, immediately after the attempt made on his life by Orsini on his arrival at the theatre. His best new parts were Reuben (Auber's 'Enfant Prodigue'), Dec. 6, 1850, and Ahasuerus (Halévy's 'Juif Errant'), April 23, 1852. He was a good singer, admirably suited for heroic drama, having the proper figure and height, and a splendid voice. 'In secondary characters no one was Massol's superior, aad when he played the principal parts he did so with the happiest results. Thus he made the success of the Juif Errant. . . . His Quasimodo did him the greatest honour. . . .' (Jules Janin in the 'Débats.') He became for a time Director of the Royal Theatres at Brussels; he subsequently went into business, and, retiring, resided at Versailles, and finally in Paris, where he died Oct. 30, 1887.

While a member of the Brussels Company he made his début at Drury Lane in 1846, as De Nevers July 17, as Jolicœur Aug. 10, etc. He sang at concerts in 1848, and appeared once at Covent Garden as Alphonso XI. July 4. Roger, in his 'Carnet d'un ténor,' has recorded that Massol did not understand Italian, and uttered the most horrible jargon. He sang his first air too low, but otherwise obtained a success, which was partly due to the way in which he had paid court to the journalists and other influential persons, and to his knowledge of artistic cookery. He played there in 1849–50 Pietro ('Masaniello'), De Nevers, Kilian ('Freischütz'), etc.; at Her Majesty's in 1851, Reuben, on the production of 'L'Enfant Prodigue,' June 12; the Baron de Beaumanoir (Balfe's 'Quatre Fils d'Aymon'), Aug. 11, etc. According to the 'Athenæum,' June 14, his Reuben had a patriarchal dignity and pathos, and he sang better in that opera than in any other. [A.C.]

MASSON, Elizabeth, born 1806, was taught singing by Mrs. Henry Smart, sen., and in Italy by Mme. Pasta. She made her first appearance in public at Ella's second subscription concert, in the Argyll Rooms, March 11, 1831, and sang afterwards at the Antient Concerts, March 16, 1831, and at the Philharmonic, March 11, 1833; she sang frequently at those Societies' concerts during a public career of about twelve years, and revived there forgotten airs of Handel, Purcell, Pergolesi, Gluck, Mozart, etc. She was in great request at private concerts, since she possessed, apart from her musical attainments, great talents and accomplishments, and was an excellent linguist. She sang occasionally in oratorio, viz. at the festival in Westminster Abbey, 1834, and at the Sacred Harmonic, where she took the parts of Solomon, Nov. 22, 1839, and Storge on the revival of Jephtha, April 7, 1841. She afterwards devoted herself to teaching and composition. She wrote many songs to the words of Scott, Byron, Adelaide Procter, etc., and edited a series of 'Original Jacobite songs' (Lonsdale, 1839), and 'Songs for the Classical Vocalist' (Leader & Cock, 1st series of twelve songs, 1845; a 2nd series 1860), which enjoyed a well-deserved popularity. She founded the Royal Society of Female Musicians in 1839, and was its hon. treasurer until her death, Jan. 9, 1865. On its amalgamation

with the Royal Society of Musicians in 1866, the late Mr. F. J. Masson, her brother, gave a donation of 200 guineas to the latter society in remembrance of her. 'As a singer this lady was never rated as high as she deserved to be, because her voice, which was a mezzo-soprano, had no remarkable power nor charm. But it had been thoroughly trained under the example and influence of Madame Pasta, and its owner's reading of music, intelligence, expression, and finish, were thoroughly appreciated by all those select connoisseurs who valued style and understanding beyond greater natural powers than hers turned to poor account. As a professor Miss Masson was widely and deservedly in request. Apart from her profession, she was at once conscientious, energetic, and refined, and had withal that racy originality of character which will make her long remembered and missed. In brief, she was a good artist, in part because she was a good woman and a gentlewoman.'[1] [A.C.]

MATERNA, Amalie. Add date of birth, 1847, and that she sang the part of Kundry at the first performance of 'Parsifal,' July 28, 1882.

MATHESON, Johann. The name should be spelt Mattheson throughout, and the day of death added, April 17. In list of works add 'Critica Musica' (1722).

MATHILDE DI SHABRAN. For the date of the production of the work in Paris, read 1857, and for that of the first performance in London, read July 3, 1823. It took place at the King's Theatre.

MATINS. P. 238 *b*, l. 19, *after* Invitatorium *add* in Appendix, vol. iv. p. 685 *b*.

MATTEI, Abbate. P. 239 *a*, l. 9, *for* May 17 *read* May 12.

MAUREL, Victor, born at Marseilles, received instruction at the Paris Conservatoire in singing from Vauthrot, and in opera from Duvernoy, and gained the first prizes in both subjects, co-equal with Gailhard, in 1867. He made his début at the Opéra as De Nevers and Conte di Luna in or about 1869. He was next in Italy, where he played the Cacique on the production of Gomes's 'Guarany' at Milan, March 19, 1870. He made his début at the Royal Italian Opera as Renato, April 21, 1873, made a great success, and was engaged there every year until 1879 inclusive. His parts comprised Don Giovanni, Tell, Almaviva, Hoel, Peter the Great, Valentine, Hamlet, the Cacique; in operas new to England, Telramund, May 8, 1875; Wolfram, May 6, 1876; the Flying Dutchman, June 16, 1877, and Domingo in Massé's 'Paul and Virginia,' June 1, 1878. He reappeared at the French Opéra as Hamlet, Nov. 28, 1879, and also played Amonasro on the production there of 'Aïda,' March 22, 1880. He undertook the management with Corti of the Italian Opera at the Théâtre des Nations with disastrous financial results, in spite of a company including Mesdames Marimon, Adler-Dévriès, Nevada, and Tremelli, Gayarré, the brothers De Reszke, and himself, and the successful production of Massenet's 'Hérodiade,' Feb. 1, 1884. He played at the Opéra Comique, Peter, Oct. 6, 1885, and Zampa, Jan. 19, 1886, with great success. He played again at Covent Garden in 1886, and at Drury Lane for the first time in 1887 in favourite parts. Between these engagements he created, with the greatest success, Iago in Verdi's 'Otello,' Feb. 5, 1887, and showed himself the best acting baritone on the Italian stage since Faure. [A.C.]

[1] Athenæum, Jan. 14, 1865.

MAURER, L. W. Line 2 of article, *for* Aug. *read* Feb.

MAY, Edward Collett. Add date of death, Jan. 2, 1887.

MAY QUEEN. *Add* that it was first performed June 24, 1845, at Bennett's own concert.

MAYER, Charles. Add that a Mazurka by him in F♯ major was for some time considered to be by Chopin, and as such was included in the first issue of Klindworth's edition. It has been removed from later issues.

MAZAS, J. F. Add day of birth, Sept. 23.

MAZZINGHI, Joseph (vol. ii. p. 242 *a*). To have made clear the incongruity in the manner of the original performance of the duet 'When a little farm we keep,' it should have been mentioned that the duet was accompanied on the pianoforte *by one of the singers of it*, upon the stage. [W.H.H.]

MEARS, Richard, son of Richard Meares, a maker of lutes, viols, etc., who in 1677 and for many years afterwards carried on business in Bishopsgate Street, 'near to Sir Paul Pinder's,' was bred to his father's business, but abandoned it for that of a publisher of music. He established himself in St. Paul's Churchyard, and published, among other things, two collections of Harpsichord Lessons by Mattheson, Handel's first of 'Suites de Pièces pour le Clavecin,' and his opera, 'Radamisto'; Ariosti's opera 'Coriolanus,' and Corelli's Sonatas and Concertos. The greater part of his publications were engraved on copper, but some of the later ones were stamped on pewter. He was unable to make head against Walsh, and his business gradually declined. He removed first to Birchin Lane and thence to London House Yard, where he died about 1743. [W.H.H.]

MEINARDUS, LUDWIG SIEGFRIED, born Sept. 17, 1827, at Hooksiel (Oldenburg), was at first educated at the Gymnasium at Jever, where his father held an official post. He was intended to study theology, but his musical inclinations could not be resisted, and he was at length allowed to devote himself to the art, his parents imposing the curious condition that he was to become a public performer on some instrument. To this end he took up the violoncello, learning what he could from the Stadtmusikus of the place, who was a violinist. After making himself ill with excessive practice, he returned to school, and it was not till he had finished his studies there that he finally determined, on the advice of Schumann, who had seen some of his compositions, to embrace the profession of a composer. At Christmas, 1846, he entered the Leipzig Conservatorium, but after half a year, finding that private instruction from Riccius would be more to his advantage, he accordingly remained with him for two years. In 1850 he went to Berlin in order to study with A. B. Marx, but for some reason or other he fell under the suspicions of the police, and was not allowed to remain. He betook himself to Liszt at Weimar, where he stayed some months, after which he went to Erfurt as conductor of a small theatrical company, and subsequently in a similar capacity to Nordhausen. At last he was provided with better credentials, and succeeded in remaining in Berlin. In 1853, having finished his education with Marx, he was appointed conductor of the Singakademie at Glogau, where he remained until, in obedience to a call from Julius Rietz, he went to the Dresden Conservatorium as a teacher in 1865. In 1874 he settled in Hamburg, where he has since been continuously active as a composer and critic. His most prominent compositions are the oratorios 'Simon Petrus,' 'Gideon,' 'König Salomo,' 'Luther in Worms,' 'Ordrun'; an opera, 'Bahnesa' (three acts, finished 1881); 4 ballads for chorus, 'Roland's Schwanenlied,' 'Frau Hitt,' 'Die Nonne,' 'Jung Baldurs Sieg'; two symphonies, and many chamber compositions. A memoir of Mattheson, an autobiographical sketch, and collected criticisms, are his most important contributions to literature. [M.]

MEISTERSINGER VON NÜRNBERG, DIE. Add that it was first given in England, under Richter, at Drury Lane, May 30, 1882.

MEL, R. DEL. Correct the last sentence by a reference to the Catalogue of the Motett Society's publications [see additions below, under MOTETT SOCIETY], where an anthem adapted by Dr. Aldrich to the words 'O praise the Lord,' from a work of Mel's, is found in vol. iii. p. 128.

MELLON, ALFRED. Line 1 of article, *for* Birmingham *read* London.

MELODRAMA. See also BALLAD in Appendix, vol. iv. p. 530 *a*.

MELODY. P. 251 *a*, musical example. The last three notes in bar 2 should be a group of quavers, not two quavers and a crotchet. P. 251 *b*, l. 9, *for* first subject *read* second subject of the first movement.

MENDEL, HERMANN. Last line but one of article, *for* 8 *read* 11. (Corrected in late editions.) Add that in 1883 the supplementary volume appeared, edited by Dr. Reissmann.

MENDELSSOHN. P. 253 *a*, l. 7 from bottom of text, *for* ten *read* eleven; the battle lasted from the 16th to the 19th. P. 253 *b*, l. 5 from bottom, *after* villa *add* on Monte Pincio. In note 3, l. 8, *for* four *read* five. P. 254 *a*, l. 54. Her practical sense of the value of money comes out in her letters to F. David. (See Eckardt's 'David,' 1888, pp. 42, 45.) P. 255 *a*, l. 29, *read* Ich J. Mendelssohn. Line 35, *read* L. v. g. G. Line 45, *read* wandernden (corrected in late editions). P. 258 *a*, l. 35, for *un* read *une*. P. 261 *a*, l. 16 from bottom, *for* Hans *read* Hanoverian. P. 261 *b*, l. 6, *for* cantata *read* lyric poem—'lyrische Dichtung.' P. 263, note 10, *for* four *read* five. P. 264 *b*, note 6, *add* the MS. is headed 'Am Bach,' and the tradition of the Taylors is that it depicts the actual stream, its waterfalls, broad shallows, and other features. P. 265 *a*. Add to note 2: The quartet was dedicated to 'B[etty] P[istor]'; but after her engagement to Rudorf, Mendelssohn requested David to alter the initials ('durch einen kleinen Federschwanz') to 'B. R.' (See Eckardt's 'David,' p. 35.) In the same letter he calls it 'Quartet aus S.' P. 270 *a*, l. 7, *for* Meeresstille *read* Fingal's Cave. Line 27, *for* Feb. 6 *read* Feb. 8. P. 270 *b*, l. 26, *for* complaint in *read* accident to. P. 271 *b*, note 12 *should run* The 'vocal piece' of his contract with the society. It was first sung at the Philharmonic Concert by Mme. Caradori, May 19, 1834, with violin obbligato by Henry Blagrove. The MS. is in the Philharmonic Library. (See below, addition to p. 281 *b*.) P. 272 *a*, l. 16, *for* spring *read* opening. Line 49, *add* His first introduction to Schumann is said to have taken place at Wieck's house on Oct. 3, the day before the Gewandhaus Concert at which Clara played Beethoven's B♭ trio. (Moscheles, Life, i. 301.) P. 272 *b*, l. 35, *add* He had played in Bach's Concerto in D minor for three pianos with Clara Wieck and Rakemann at the Gewandhaus on Nov. 9. P. 274 *b*, at bottom, *add* On Oct. 12, 1837, he writes to thank the Gesellschaft der Musikfreunde of Vienna for diploma of membership. The letter is in their archives. P. 275 *b*, l. 26, *for* 22 *read* 21. P. 281 *b*, l. 37, *add* At this time he rewrote 'Infelice,' the second published version of which is dated Leipzig, Jan. 15, 1843. P. 287 *a*, l. 4 from bottom, *read* He returned to Leipzig on Dec. 3, bringing Miss Lind

with him (Mr. Rockstro's information); and two lines lower, *for* Miss Lind *read* her. P. 288 *a*. Add as a foot-note: On this occasion he discovered the two redundant bars in the Trio of Beethoven's Symphony, which had remained uncorrected, notwithstanding Beethoven's protest to the publishers in 1810. P. 288 *b*, l. 40, *add* As a reminiscence it may be mentioned that the holding C's for the oboe in the recitative of the Youth, in no. 19, were put in at the end of the first rehearsal, on Mr. Grattan Cooke's complaining that Mendelssohn had given him no solos. To note 19 *add* Mr. Bennett's Examination was reprinted and completed in the 'Musical Times' from Oct. 1882 to April 1883 inclusive. P. 294 *b*, l. 5, *add* After a breakfast with him at B. Hawes's, Thackeray told Richard Doyle (who told the writer), 'His face is the most beautiful face I ever saw, like what I imagine our Saviour's to have been.' Sir F. Pollock (Reminisc. i. 215) 'was much struck by his fine face and figure, and the excellence of his conversation.' Line 24, *add* They could also sparkle with rage like a tiger's (Moscheles, Life, i. 324). P. 295 *a*, l. 34. After Schramm, add Vernet's was painted in return for an extempore fantasia on 'Don Juan.' Vernet sent it to the Mendelssohns at Berlin. (See Rebecka's letter in Eckardt's 'David,' p. 39.) P. 300 *b*, after the canon, *add* A somewhat similar canon, written in the album of Mr. Parry in 1846, is printed in the 'Musical World' for Aug. 19, 1848. Another for two violas, 'Viola 1, Sir G. Smart; Viola 2, F. M. B. July 1831,' is given by Dr. J. F. Bridge in his 'Primer of Double Counterpoint and Canon.' P. 308. The dates given in the list are those attached by Mendelssohn to the autograph of the existing form of each work. P. 309 *a*. Op. 94, after 1st version *add* with violin obbligato. P. 309 *b*, paragraph 4. After Chorley's 'Life,' add Eckardt's 'David,' F. Moscheles, 'Briefe'. P. 310 *b*. Add (17). Eckardt, 'Ferdinand David und die Familie Mendelssohn-Bartholdy . . . von Julius Eckardt' (Leipzig, 1888), contains 30 letters by F. M. B. (18). Felix Moscheles, 'Briefe von F. M. B. an Ignaz und Charlotte Moscheles . . . von Felix Moscheles,' Leipzig, 1888, contains many fresh letters by F. M. B. [G.]

* MENDELSSOHN QUINTETTE CLUB, THE, was formed at Boston, Massachusetts, in 1849, for the purpose of giving concerts of chamber-music, and made its first public appearance in Chickering Hall Dec. 14 of that year. For a number of years the Club gave a series of concerts at Boston in each season, classical programmes alternating with those of a popular character. The reputation of the Club extending beyond the city, concert tours were ventured on, these being at first confined to towns in New England. By degrees its sphere of action included remote Western and Southern cities. No similar organization in the United States has had so long a life, or has introduced to its patrons more novelties of every school of chamber-music. As occasion has demanded the Club has been augmented to six or even nine players. Its programmes have been varied by performances of distinguished pianists and singers. [F.H.J.]

MENDELSSOHN SCHOLARSHIP. P. 311 *a*, l. 27, *omit the words* the present scholar. Add that Eugene d'Albert held the scholarship in 1881–2, and that the late scholar, Miss Marie Wurm, was elected in Jan. 1884. The following is a list of the committee, as at present constituted (1887): Mr. Otto Goldschmidt, Mr. J. Barnby, Mr. J. Bennett, Dr. J. F. Bridge, Mr. A. D. Coleridge, Mr. W. G. Cusins, Sir George Grove, Mr. A. G. Kurtz, Mr. Henry Leslie, Rev. Sir F. A. G. Ouseley, Mr. K. J. Pye, Mr. R. R. Pym, Dr. Stainer, Sir Arthur Sullivan, and Mr. Julian Marshall (Hon. Sec.)

MENTER, Sophie. See vol. iii. p. 16 *a*.

MERBECKE, John. Add that in 1550 he took the degree of Mus. D. at Oxford.

MERCADANTE, Saverio. Correct the date of birth, as the certificate of his baptism bears the date Sept. 17, 1795 (Paloschi). P. 312 *b*, l. 10, *for* 1822 *read* 1821. Line 21, add date of 'I due illustri rivali,' 1838. Last line, *for* Dec. 13 *read* Dec. 17.

MERCATOR, Michael. See vol. iv. p. 304 *note*.

MEREAUX, Jean Nicolas le Froid de, born in Paris 1745, was organist of the Church of St. Jacques du Haut Pas. His oratorios 'Samson' and 'Esther' were given at the Concert Spirituel in 1774 and 1775 respectively. These, and an Ode on the birth of the Dauphin, performed at the same concerts in Dec. 1781, are his only works of importance besides his operas, of which the following complete list is given in the supplement to Fétis:—'La Ressource comique,' 1772; 'Le Retour de Tendresse,' 1774; 'Le Duel comique' (partly arranged from Paisiello), 1776; 'Laurette,' 1777; 'Alexandre aux Indes,' 1783; Oedipe et Jocaste, 1791; 'Fabius,' 1793. He died in Paris in 1797. His grandson,

Jean Amédée le Froid de Mereaux, born in Paris 1803, became a remarkable pianist and a most successful teacher. He studied under Reicha from the age of ten, and appeared with great success in Paris and London before 1835, when he settled in Rouen as a teacher, where he died April 25, 1874. Of his original compositions his studies are the most important, but his fame rests chiefly upon his excellent collection published in 1867 under the title of 'Les Clavecinistes de 1637 à 1790.' He was also in great repute as a musical journalist. [M.]

MERK, Joseph. Add days of birth and death, Jan. 18 and June 16 respectively.

MERKEL, Gustav. Add date of death, Oct. 30, 1885.

MERKLIN, SCHUTZE, & CO. See Dublaine et Callinet, vol. i. p. 431.

METAMORPHOSIS is the modification of a musical figure or idea, made with the view

of putting it in a new light, or adapting it to changed conditions. In the later stages of the development of abstract music, composers have concentrated a great deal of energy on devising new ways of enhancing the intellectual interest of their works—as by making the continuity of the component sections more close, and giving a new aspect to the relationship of various movements, or distinct portions of single movements; and most of these are based upon some variation or modification of a well-defined melodic or rhythmic figure. Such devices can be found occasionally in the early stages of modern instrumental music, as in J. S. Bach; and an example from Mozart, in which he welds together a Minuet and Trio, is quoted in the article FORM, vol. i. p. 555. Beethoven was the first to make any very conspicuous use of them, and they are frequently met with in the 'working out' portion of the movements of his sonatas and symphonies. A very striking example is quoted in the article WORKING OUT, vol. iv. p. 489. The device is to be met with also in other situations, as in the first movement of the C minor Symphony, where the well-known figure  at the outset becomes  in the contrasting key. Berlioz makes ingenious and characteristic use of the device in his Symphonie Fantastique, in his treatment of what he calls the 'idée fixe.' Liszt also makes it a conspicuous feature in his experiments in programme music. Wagner makes more elaborate use of it than any one else in his great music dramas, and constantly transforms the character of his Leitmotiven in conformity with the varying nature of the situations. See also LEITMOTIF and WORKING OUT. [C.H.H.P.]

METASTASIO. The following additions are to be made to the Chronological List on p. 316 *a*:—

'Didone abbandonata.' *For* Sarro *read* Sarri, and correct the date of Jommelli's composition to 1745. Add to the names of composers who set the libretto those of Galuppi; Scarlatti, about 1724; Porpora, 1742; Piccinni, 1767; Kozeluch, 1795; Paisiello, 1797; Paer, 1810; Mercadante, 1823; Reissiger, 1823.

'Siroe.' Add the setting by Piccinni, 1759.

'Catone in Utica.' Add Leo and Hasse, 1732; Graun, 1744; Piccinni, 1770.

'Ezio.' Add Handel, 1731; Mercadante, 1826.

'Alessandro nell' Indie.' Correct date of Vinci's work to 1730. Add Leo, 1727; Gluck, 1745; Piccinni, 1758 and 1774.

'Artaserse.' Add Leo, 1740.

'Demetrio.' Add Hasse, 1732.

'Issipile.' Add Porpora, 1723.

'Olimpiade.' Add Pergolesi, 1735; Leo, 1740; Jommelli, 1765; Piccinni, 1761 and 1771. [See OLIMPIADE.]

'Demofoonte.' Add Leo, 1741; Piccinni, 1762; Paisiello, 1773.

'Clemenza di Tito.' Add Leo, 1735.

'Achille in Sciro.' Correct date of Jommelli's work to 1745.

'Ciro riconosciuto.' Scarlatti, 1712; Leo, 1727; Jommelli, 1744.

'Temistocle.' Omit Caldara, as his work is not composed to Metastasio's libretto. Add Porpora, 1742; Pacini, 1838.

'Zenobia.' Add Hasse, 1763.

'Antigono.' Add Gluck, 1754.

'Ipermestra.' Add Jommelli, 1752; Gluck, 1742; Hasse, 1751.

'Attilio Regolo.' Add Jommelli, 1752.

'L'Isola disabitata.' Correct date of Scarlatti's work to 1757.

METHFESSEL, ALBERT GOTTLIEB, born Oct. 6, 1785, at Stadt Ilm, in Thuringia, became Kammermusikus at Rudolstadt, 1810, and Hofkapellmeister in Brunswick in 1832. He published a large number of songs of a popular type, and part-songs for male voices; some of his productions, as for instance, 'Krieger's Abschied,' 'Rheinweinlied' and 'Deutscher Ehrenpreis,' are still popular to a certain extent, and are included in most of the collections. Methfessel died March 23, 1869. [M.]

METRONOME. P. 320 *a*, l. 37, *for* 108 *read* 208.

METZLER. The founder of this well-known business was Valentine Metzler, a native of Bingen on the Rhine, who opened a shop in Wardour Street for the sale of flutes and other instruments about the year 1790. He married an Englishwoman, and his only child was George Richard Metzler (1797–1867), so well and kindly remembered by many of the musical profession and trade in this country. The firm is said to have entered upon music publishing in 1816, and removed in course of time to 37 Great Marlborough Street, where, on the site of the original shop, but including neighbouring houses, the present warehouse stands. The only surviving child of George Richard was George Thomas Metzler (1835–1879). He gained a practical knowledge of the pianoforte in Germany, and had a distinct literary bias, which he followed as far as opportunity permitted. He became known as a writer of words for songs, Mrs. George March (Virginia Gabriel), Mme. Sainton-Dolby, Henry Smart, and J. L. Hatton, having set his graceful lyrics to music. In 1867 Frank Chappell, who had acquired his knowledge of business in the Bond Street firm of that name, joined the late G. T. Metzler in partnership, and from his suggestion the important agency of Messrs. Mason & Hamlin, which practically introduced the American organ into this country, became a specialty of the Metzler business. Frank Chappell died in 1886, and since that date the business has been carried on by the trustees of the estate (1888). The new premises referred to were completed and opened in 1878. So comprehensive is their plan that there may be said to be no musical instrument in present use, or even part of a musical instrument, unrepresented in the stock, while the valuable copy-

rights of the publishing department include all manner of works, from full scores of modern operas to popular instruction books. [A.J.H.]

MEYERBEER, G. P. 324 *b*, l. 26, *for* 1861 *read* 1862.

MICROLOGUS. For corrections see ORNITHOPARCUS in Appendix.

MIGNON. Opéra Comique in three acts, words by MM. Carré and Barbier, founded on 'Wilhelm Meister'; music by Ambroise Thomas. Produced at the Opéra Comique, Paris, Nov. 17, 1866, and in London, at Drury Lane, July 5, 1870. [M.]

MIKADO, THE. Comic opera in two acts; words by W. S. Gilbert, music by Sir Arthur Sullivan. Produced at the Savoy Theatre, March 14, 1885. [M.]

MILAN. For corrections to lines 18–21 of article see GAFORI, in Appendix, vol. iv. p. 643.

MILANOLLO, THE SISTERS. Add date of birth of Teresa, Aug. 28, and of Maria, June 19. The day of the latter's death is Oct. 21.

MINOR. See also DAY, vol. i. p. 436 *a*, and HELMHOLTZ, vol. i. p. 725.

MISERERE. P. 336 *b*, l. 18 from bottom, *add after the word* Geminiani (*i. e.* Alfieri), and see vol. iii. 523 *a*, *note* 1.

MISSA DE ANGELIS. The name generally given to a very beautiful Plain-Chaunt Mass, in Mode XIII, prescribed in the Ratisbon Gradual, for use 'In Festis Solemnibus,' and appended to the Mechlin Gradual, as a 'Missa ad libitum.' Judging from the internal evidence afforded by the freedom of its phrasing, and the Mode in which it is written, the Missa de Angelis would seem to be by no means the oldest Mass of this class now in use: its antiquity is, however, great enough to have obliterated all trace of its history, and even of the origin of the name by which it is now generally designated, and under which it is perhaps more frequently sung than any other Mass of its kind, both in its original form, and in the English translation used at S. Alban's, Holborn, S. Mary's, Paddington, and other London Churches in which Gregorian Services are encouraged.

The number of the older Masses to which allusion has been made is very small. The Ordinarium Missæ in the Ratisbon Gradual, published under the authority of the Congregation of Rites, contains: the 'Missa in Tempore Paschali' in Modes VII and VIII; a very fine 'Missa in Duplicibus,' beginning in Mode I, and another in Mode VIII; a 'Missa Beatæ Mariæ' beginning in Mode I, and another in Mode VIII; the 'Missa in Dominicis,' in Mode I and II; the 'Missæ in Festis Semiduplicibus' and 'In Festis Simplicibus,' both beginning in Mode VIII; the well-known 'Missa pro Defunctis,' beginning in Mode I, and including the famous 'Dies iræ' in Modes I and II; and some smaller Masses, sung in Advent, and Lent, during Octaves, and on Ferial Days. The Mechlin Gradual also gives another 'Missa ad libitum' in Mode XIII, and yet another in Modes VII and VIII.

Some editions of the Paris Gradual add to these a spurious 'Missa Regia,' professedly in Mode I, but really in the modern key of D minor, composed by Dumont, Maître de Chapelle to Louis XIV, in acknowledged imitation of the older unisonous Masses, but in utter ignorance of the principles upon which they are constructed, and without a trace of appreciation of their true style or sentiment. This Mass was once very popular in France, and much sung in the Paris Churches; but since the revival of the taste for pure Ecclesiastical Music, it has wisely been discarded in favour of the older Masses which it was intended to displace. [W.S.R.]

MISSA PAPAE MARCELLI. Line 3 of article, *for* 1567 *read* 1569.

MIZLER, L. C. At end of article add a reference to the English edition of Spitta's 'Bach,' vol. iii. 22–25.

MODES, ECCLESIASTICAL. P. 343 *a*, l. 26, *for* PLAIN CHAUNT *read* PLAIN SONG. P. 343 *b*, end of second paragraph, *for* POLYPHONIC MUSIC *read* POLYPHONIA.

MOLINARA, LA. Add that the air 'Nel cor più non mi sento' is known in England as 'Hope told a flattering tale.'

MOLIQUE, B. P. 351 *b*, bottom line, *for* 1849 *read* 1840. P. 352 *a*, l. 10 from end of article, add day of death, May 10. Line 7 from end, *for* a Pianoforte Trio *read* two Pianoforte Trios.

MONDAY, JOSEPH. See VOWLES, in Appendix.

MONDAY POPULAR CONCERTS. For additions see SATURDAY POPULAR CONCERTS, and add that the 1000th concert took place on Monday, April 4, 1887.

MONIUSZKO, STANISLAUS. Correct date of birth to 1820. P. 353 *b*, l. 2, *for* 1858 *read* 1846, and add date of production of 'Der Paria,' 1869, and that he wrote numerous operettas, etc. Last line, *for* in *read* June 4.

MORALT. Add date of birth of Johann Baptist, Jan. 10.

MORDENT. Example 4. It should be mentioned that many excellent authorities consider it right to play this passage without the accidental, *i. e.* using A, not A♯, as the auxiliary note of the mordent. See Spitta's 'Bach,' English edition, i. 403, *note* 89. Example 7, the last note but one should be D, not B. The sentence between examples 8 and 9 should be compared with the article TREATMENT OF THE ORGAN.

MORIANI, NAPOLEONE. Line 2 of article, *for* about 1806 *read* March 10, 1808. Add day of death, March 4.

MORLACCHI, FRANCESCO. P. 366 *b*, l. 28 from bottom, add date of 'Raoul de Créqui,' 1811, of 'La Capricciosa pentita,' 1813, and the 'Passion,' 1812. P. 367 *a*, l. 19, add date of 'Il Sacrifizio d'Abramo,' 1817. Line 39, add 'Lao-

dicea' (Naples, 1817), 'La Morte d'Abel' (Dresden), and 'Donna Aurora' (Milan), both in 1821.

MORLEY, THOMAS. The date of birth is established as 1557 by the title of a 'Domine, non est,' in the Bodleian Library. It runs, 'Thomae Morley, aetatis suae 19. Anno Domini 1576.'

MORNINGTON, LORD. Add date of his election to the professorship, 1764, and that he held it till 1774.

MORRIS DANCE. P. 369 *b*, for the sentence between the two musical examples, *read* In Yorkshire the following tune, founded on that of 'The Literary Dustman,' is generally used.

MORTIER DE FONTAINE. P. 369 *b*, *for* 1818 *read* May 13, 1816. Add date of death, May 10, 1883.

MOSCHELES, IGNAZ. P. 370 *a*, l. 17, *for* early in 1822 *read* in 1821. Line 32, *for* May 29, 1826, *read* June 11, 1821. Add that the 'Life of Moscheles,' referred to in the last paragraph, was translated by Mr. A. D. Coleridge (Hurst & Blackett). His correspondence with Mendelssohn was published in 1888.

MOSÈ IN EGITTO. Line 3 of article, add date of the Naples production, March 5, and of that in Paris, Oct. 22.

MOSEL. P. 370 *b*, add that he was one of the three chief mourners at Beethoven's funeral.

MOSZKOWSKI, MORITZ. Line 2 of article, *for* Berlin *read* Breslau, and add day of birth, Aug. 23. Add the following to the list of his works:—'Aus allen Herren Länder,' PF. duet; 'Johanna d'Arc,' symphony in four movements, op. 19; 2 Concertstücke for violin and PF.; 3 Concert studies for PF., op. 24; 3 pieces for cello and PF., op. 29; Violin Concerto, op. 30; Suite for orchestra, op. 39; Scherzo for violin and PF. op. 40; besides many PF. solos and duets, and four books of songs.

MOTET. P. 374 *a*, l. 7 from bottom, *for* 'Motetti c. C.' *read* 'Motetti C,' and add that the British Museum possesses a single part-book of this work. P. 375 *a*, in the musical example, *for* deviderat *read* desiderat. (Corrected in late editions.)

MOTETT SOCIETY. In the list of contents, the title of the fifth number of Division 1 is 'Almighty and ever-living.' Six lines from end of the same division, *for* Nannino *read* Nanini. Line 3 of Division 2, omit the 'Do.' implying that a Nunc Dimittis of Gabrieli's is included. At end of Division 3, add the following:—

Lasso, Hear my prayer, 4 voices.	Croce. O praise the Lord, 4 v.
Byrd, Save me O God, 4 v.	Do. O give thanks 4 v.
Tye, From the depth, 4 v.	Do. Teach me Thy way, 4 v.
Lasso, I will love thee, 4 v.	Do. Give ear, Lord, 4 v.
Vittoria, Save me, O God, 4 v.	Do. Behold, I bring you, 4 v.
Mel, O praise the Lord, 4 v.	Lasso, Save me, O God, 4 v.
Tallis, Blessed are those, 5 v.	Vittoria, O God, wherefore, 4 v.
Shepherd, Haste thee, O God, 4 v.	Hooper, Teach me Thy way, 4 v.
Croce, Behold now, praise, 4 v.	

[M.]

MOTTL, FELIX, a celebrated and highly gifted conductor, was born at Vienna in 1856. As a boy he possessed a fine soprano voice, and obtained admission to the Löwenburgische Convict, the preparatory school of the Imperial Court Chapel. Later on he entered the Vienna Conservatory, where Josef Hellmesberger soon recognized the eminent gifts of young Mottl, who in due course obtained all the prizes the college could award. The Academical Richard Wagner Verein of Vienna elected him to the post of conductor of the society's concerts, and it was there that his eminent ability as a chef d'orchestre attracted general notice. In 1876 Mottl took part in the Bayreuth Festival performances of Wagner's 'Ring of the Niblung' as stage conductor, and he became one of the most active members of the so-called 'Niblungenkanzlei.' Upon the recommendation of Dessoff he obtained the post of conductor at the Grand Ducal Opera House at Karlsruhe, which post he holds to the present day. It is due to Mottl's energetic activity that the performances at this opera house are now amongst the finest to be heard in Germany. A sworn enemy of all routine work, he produced at Karlsruhe many important stage works of modern times, including Berlioz's 'Benvenuto Cellini,' and all the musical dramas of Richard Wagner. Mottl has also obtained brilliant successes as a conductor of concerts, and was in 1886 appointed by the Bayreuth authorities to conduct the festival performances of 'Tristan and Isolde,' a task which he accomplished to perfection. He has composed an opera, 'Agnes Bernauer' (successfully produced at Weimar in 1880), and a considerable number of songs for one voice and pianoforte accompaniment. He has lately orchestrated Liszt's pianoforte solo 'St. Francis of Assisi preaching to the birds.' It was played at the Richter Concert of June 4, 1888. [C.A.]

The notice of Mozart can scarcely be considered complete without some mention of works, undoubtedly spurious, which have been attributed to him, and of those which the best authorities consider at least doubtful, especially as some important works are included in these categories. Of the former class Köchel's Catalogue enumerates 63, of the latter 47. The most important are various masses, published, together with Mozart's genuine ones, by Novello in his arrangement for organ and voices. Those in E♭ (Novello's nos. 13 and 16), and in C (his no. 17), Köchel regards as of doubtful authorship (Appendix nos. 185, 186). Novello's no. 7 in B♭, of which the score and parts were published by C. F. Peters at Leipzig as by Mozart, is believed by a writer

in the 'Allgemeine musikalische Zeitung' (xiv. p. 829) to be spurious, which opinion is shared by O. Jahn (ed. 1, i. 673), who states that there were no clarinets in the Salzburg orchestra when Mozart was there; to which Köchel adds that we know enough of Mozart's subsequent life at Mannheim, Munich, and Vienna before 1784, from his own letters, to be sure that he then wrote no Mass except that in C minor. To which must be added that Mozart's widow stated that this Mass was composed by F. X. Süssmayer. Two short Masses (Novello's nos. 8 and 9) in C and G were published by M. Falter at Munich as Mozart's, but are said to be by Gleissner of Munich. A short Requiem in D minor was published by Simrock at Bonn (Novello's no. 18) as Mozart's; but Köchel says it is certain that Mozart never wrote any Requiem except his celebrated last composition.

The most important of these spurious Masses is that which was published in score by N. Simrock at Bonn in 1821, and by Novello for organ and voices as no. 12. This Mass commences in G, but is chiefly in C and its related keys, and ends in C. The reviewer in the 'Allgemeine musikalische Zeitung' xxiii. p. 648, for Oct. 1821 declares that he had possessed it for thirty years, and argues for its genuineness (notwithstanding that the style is rather showy, more calculated to please the Archbishop of Salzburg than to satisfy Mozart himself). But in July 1826 Ritter Ign. von Seyfried opened a controversy on the subject in the 'Cæcilia' (vol. v. Heft 17, p. 77) with 'Scruples concerning the Mass in G published by Simrock in the name of Mozart,' in which he enumerated especially weaknesses in part-writing and tonality, and other faults, and pronounced it spurious. In Heft 22 of the same journal the publisher of the Mass declared that he had received it from Carl Zulehner, who would doubtless explain how he had come into possession of the MS., the handwriting of which was similar to Mozart's, but probably not his. But Zulehner made no answer to the challenge. Jahn (i. 672) agrees with Seyfried, and adds that 'the treatment of the instruments, especially the bassoons, is quite different from Mozart's manner in his Salzburg masses.' And Köchel adds, 'This Mass is declared by all connoisseurs to be decidedly spurious.' To this another testimony can now be added. The violinist Leopold JANSA recognised it as a Mass in which he used to sing as a boy in a musical school in his native country of Bohemia, where it was known as 'Müller's Mass.' This would take us back to about 1812, long before its first publication by Simrock in 1821. If Müller was really the composer's name, it ought to be possible to discover him. As regards his age, he might be August Eberhardt MÜLLER. And he is named in Köchel's Catalogue (App. no. 286) on the authority of a Catalogue of Breitkopf's, as the real composer of some variations published as Mozart's own; besides which, two songs, also published as Mozart's, are attributed to 'Müller' by Köchel (nos. 248, 249) on the authority of a writer in the 'Allgemeine musikalische Zeitung' (i. 745). But as a musician of North Germany he was perhaps hardly likely to be known in manuscript copies in Bohemia. Wenzel Müller, music composer at the various theatres in Vienna from 1786 is more likely in the latter respect, but his serious music is extremely unimportant. If the name Müller be discarded, it might be asked whether Zulehnor may not have palmed off a work of his own on Simrock as Mozart's. Zulehner was well acquainted with Mozart, and worked for Simrock, who published two choruses from 'Thamos,' arranged for four voices with pianoforte accompaniment by Zulehner, which are quite different from those in Mozart's 'Thamos' to the same words, and are therefore placed by Köchel in the list of spurious works (no. 243). This seems a parallel case to that of the Mass, of which Simrock published both the score and an arrangement for four voices and pianoforte by Zulehner. The same publisher published also an arrangement for Mozart's (genuine) symphonies as trios for PF., violin and violoncello, by Zulehner. Moreover Zulehner was the possessor of a Mass in C bearing Mozart's name, and called the 'Coronation Mass.' This was a mere pasticcio of pieces taken from 'Così fan tutte,' transposed, altered, and joined together by intervening chords. Zulehner is said to have maintained that the mass was the original work, and that Mozart 'plundered' his own work (as Jahn says) to produce the opera. This is perhaps the most damaging fact yet ascertained to Zulehner's reputation. Jahn says: 'That the mass is pieced together from the opera by some church-musician is proved by the existence of passages not belonging to the opera, and by the mode in which the borrowed treasure is employed; and no musician to whom I have shown the mass doubted this' (Jahn, iv. Beilage 5). Two other remarks may be made. It rather seems as if the mass were put together from two distinct sources. The Kyrie is in G, the Gloria is in C; the Mass ends in C, and the middle movements are in keys related to C, but not for the most part to G: F, A minor, G, and C minor. It seems, therefore, as if we had a mass in C *minus* the Kyrie, and as if a Kyrie from some other source had been prefixed to complete it. It is finally interesting to note that the only really strong movement in the Mass, the great fugue 'Cum sancto spiritu,' which is well worthy of Mozart, is expressly stated by Simrock in his answer to Seyfried to have been performed, long before the publication of this Mass, in the chapel of the Elector of Cologne in *a Mass* of Mozart's; and he gives no such testimony of any other part of this Mass. It may therefore be possible to cling to the belief that this single movement is genuine.

The other spurious works are less important. Most have never been published, or published only once or twice by obscure publishers in Germany. There are, however, 39 spurious songs in vogue, published chiefly by Rellstab at Berlin and André at Offenbach, of some of which

the true composers are known. One is the beautiful bass air 'Io ti lascio, cara, addio' (published in Suppl. to 'Allg. musik. Zeitung,' i.), which is by G. von Jacquin (Köchel, App. nos. 245–283). Among the doubtful pieces are reckoned three Divertimenti for wind instruments, a sonata in C minor, and a romance for pianoforte in A♭ (ib. 226–228, 204, 205). [R.M.]

MÜLLER, Add date of birth of AEGIDIUS CHRISTOPH, July 2, 1766.

MÜLLER, A. E. Add day of death, Dec. 3.

MÜLLER, CHRISTIAN, of Amsterdam, between 1720 and 1770 built the finest organs in Holland, and especially the celebrated instrument at Haarlem in 1738. See also vol. ii. p. 602. [V. de P.]

MÜLLER, IWAN, a renowned clarinettist, born at Reval, Dec. 3, 1786, appeared first in Paris in 1809, where he brought out many of his structural improvements in the instrument, and where, after a residence of some years, and a successful concert tour through all the principal European cities, undertaken in 1820–1826, he was appointed professor in the Conservatoire. In later life he returned to Germany, and died at Bückeburg Feb. 4. 1854. His compositions have an educational value for players of his instrument, but beyond that they are of no importance. His best production is a 'Gamme pour la nouvelle Clarinette,' published at Berlin in 1825. (Mendel's Lexicon.) [M.]

MÜLLER, WENZEL, born Sept. 26, 1767, at Türnau in Moravia, was for some time a pupil of Dittersdorf, and became conductor in the Brünn Theatre in 1783, and three years afterwards, when only nineteen, obtained a similar post at Marinelli's theatre in Vienna. The rest of his life was spent in the capital, with the exception of the years 1808–13, during which he was director of the opera at Prague, where his daughter Therese, afterwards known as Madame Grünbaum, was engaged as a singer. On his return to Vienna, he become conducter at the Leopoldstadt Theatre, and retained the post until within a short time of his death, which took place at Baden near Vienna, on Aug. 3, 1835. As a composer of light operas, he enjoyed enormous popularity for many years, and his productions in this kind are said to number over 200. His more ambitious works, as symphonies, masses, etc., were less successful. Among his dramatic works may be mentioned:—'Das Sonnenfest der Braminen' (1790); 'Das neue Sontagskind' (1793); 'Die Schwestern von Prag' (1794); 'Die Teufelsmühle auf dem Wienerberge' (1799). A peculiar interest attaches to his 'Zauberzither' or 'Kasper der Fagottist,' produced June 8, 1791, since Schikaneder took several suggestions from it for the plot of 'Die Zauberflöte.' In 1818 Müller produced his 'travestierte Zauberflöte.' (Mendel's Lexicon; Riemann's Opernhandbuch.) [M.]

MUFFAT, AUGUST GOTTLIEB. For date of birth read April 17, 1683, and add date of death, Dec. 10, 1770.

MUSICA FICTA. P. 414 *a*, l. 7, etc., *for* in some new mode to which the composer must be supposed to have modulated, *read* upon one of the Regular or Conceded Modulations of the Mode in question.

MUSICAL ASSOCIATION. The list of Vice-Presidents for the present season (1888–9), is as follows:—Prof. W. G. Adams; R. H. M. Bosanquet; J. F. Bridge, Mus. D.; W. Chappell; G. F. Cobb; F. E. Gladstone, Mus. D.; Otto Goldschmidt; Sir George Grove; J. Higgs; Mus. B.; W. H. Monk, Mus. D.; G. A. Osborne; W. Pole, Mus. D.; C. K. Salaman; J. Stainer, Mus. D. The ordinary members of council are as follows:—H. C. Banister; C. A. Barry; Major G. A. Crawford; W. H. Cummings; F. W. Davenport (Hon. Sec.); F. Praeger; A. H. D. Prendergast; E. Prout; W. de M. Sergison; T. L. Southgate; C. E. Stephens. The auditors are Messrs. D. J. Blaikley and W. S. Collard.

MUSICAL INSTRUMENTS, COLLECTIONS OF. Modern collections of musical instruments are of the nature of museums, but those of the 16th, 17th and 18th centuries were intended for use. The finest and most complete at the present time are those provided with important catalogues, viz.—

LONDON. South Kensington Museum, catalogued by Carl Engel.

PARIS. Conservatoire de Musique et de Declamation, catal. by Gustave Chouquet.

BRUSSELS. Conservatoire Royal, catal. by Victor Mahillon.

FLORENCE. Kraus Collection, catal. by Alessandro Kraus figlio.

MANCHESTER. Boddington Collection, acquired and catalogued by J. Kendrick Pyne, Esq., organist of Manchester Cathedral.

MILAN. Arrigoni Collection, catal. by L. Arrigoni.

After these may be named more or less important collections to be found at

ANTWERP. The Italian instruments of Mr. Wilmotte; Museum of Mr. Steen. The Plantin Museum contains a curious harpsichord.

BASLE. Museum of Antiquities.

BERLIN. Hochschule für Musik (a collection recently acquired from Herr Paul de Wit, Leipzig); Hohenzollern Museum (so far as various instruments are preserved that have belonged to members of that family); Kunst und Gewerbe Museum.

BOLOGNA. Museo Civico.

BRUGES. Le Musée archeologique.

BUDA PESTH. National Hungarian Museum.

CAIRO. Sig. F. Amici (Egyptian instruments).

CLAYDON, Buckinghamshire. Sir Harry Verney, Bart., M.P. (Javanese instruments formerly belonging to Sir Stamford Raffles).

DARMSTADT. Museum of Antiquities.

DELFT. Mr. T. C. Boers.

DUBLIN. Trinity College (under care of Professor Sir Robert Stewart, Mus. Doc.)

EDINBURGH. Music Class Room of the University (under care of Professor Sir Herbert Oakeley).

GENOA. Museum contains the famous Guarnerius that belonged to Paganini.

GLASGOW. Anderson's College.

THE HAGUE. Mr. Scheurleer.

HELSINGFORS. Musée ethnographique.

HORSTEAD, Norfolk. C. R. Day, Esq., 43rd Light Infantry (Indian instruments).

LEYDEN. Musée ethnographique.

LONDON. H.R.H. The Duke of Edinburgh (violins); John Broadwood & Sons (keyboard instruments); Mlle. Marie Decca; George Donaldson, Esq.; Messrs. Arthur and Alfred Hill; A. J. Hipkins, Esq., F.S.A.; India Museum; G. T. Lock, Esq.; London Missionary Society; Otto Peiniger, Esq. (Harrow); Royal College of Music (chiefly Indian instruments, the division of a collection between the Royal College and the Brussels Conservatoire, presented by the Rajah Sir Sourindro Mohun Tagore); Rudall Carte & Co. (wind instruments).

MADRID. Archæological Museum.

MIDDLEBURG (Zealand). Museum.

MILAN. Museo Musicale (Extra-European); Museum of the Conservatorio.

MODENA. Count L. F. Valdrighi.

MOSCOW. Musée Dachkoff.

MUNICH. National Museum.

NAPLES. Museo Nazionale.

NUREMBERG. Germanisches Museum.

OXFORD. Mr. T. W. Taphouse; Pitt-Rivers Museum (ethnological).

PARIS. Mr. E. Gand (violins); Messrs. Pleyel Wolff & Cie. (keyboard instruments); Hôtel Cluny.

RENAIX, Belgium. Mr. Abel Régibo; Mr. César Snoeck.

ROME. The Vatican.

ROSS, Hereford. H. C. Moffatt, Esq., Goodrich Court (Keyboard Instruments).

SALZBURG. The Mozarteum; Städtisches Museum Carolino-Augusteum; Dr. Peter, Director, Communal Museum.

SAVIGLIANO. Cavaliere Maurizio Villa (Violins).

SOUTHAMPTON. Mr. W. Dale (Keyboard Instruments.

ST. PETERSBURG. Museums of the Conservatory, the Academy of Science, the Geographical Society.

STUTTGART. Herr C. Klinckerfuss.

VERONA. Municipality.

VIENNA. Ambroser Sammlung; Museum der Musikfreunde; Dr. Hans Richter (Chinese instruments); Baron Nathaniel de Rothschild.

VILNA. Musée ethnographique. [A.J.H.]

MUSICAL LIBRARIES. P. 420 *b*, l 17, *for* Canonicus de Silvestris a Barbarano *read* Has alteras Sacras Cantiones. Line 32, *for* for *read* after.

The following additions and corrections are to be made to the article. The information with regard to the German libraries is mainly derived from various numbers of the 'Monatshefte für Musik-Geschichte,' where further information as to the contents of these libraries is to be obtained. For the account of the recent discoveries at Durham, the writer is indebted to Dr. Armes.[1]

Great Britain and Ireland.

CAMBRIDGE. *a.* The catalogue of the music in the Fitzwilliam Museum is now (1888) in the press.

d. Trinity College Library contains a vellum roll of Early English carols, dating from the 15th century. Amongst these is a copy of the Agincourt song.

e. The Catalogue of the Peterhouse MSS. by Dr. Jebb has been printed.

DURHAM. The old MSS. in Durham Cathedral have been recently carefully collated and indexed by the present organist. They consist of four sets of books, all unfortunately imperfect. The old set contains about 40 full and 50 verse anthems by Tallis, White, Parsons, Hooper, Morley, Weelkes, Byrd, Batten, Giles, Tomkins, East, Gibbons, etc. The second set is rich in anthems and services for men's voices only. The third consists of eight out of ten magnificent folio volumes containing Preces and Psalms for special days by Byrd, Gibbons, William and Edward Smith; and services by Shepherd, Parsons, Batten, and others. The fourth set consists of organ parts of practically all the anthems and services used in the Cathedral from Tallis to Purcell.

LONDON. *a.* British Museum. The statement at vol. ii. p. 419 that the collection is not strong in early printed music is no longer the case. The collection of madrigals is extremely fine, and there are no fewer than 12 works printed by Petrucci, of which only two are incomplete. The collection was increased in 1886 by the acquisition, from M. Kockx of Antwerp, of a large number of works printed at the press of Phalèse at Louvain and Antwerp. Many of these volumes were exhibited at the Brussels Exhibition of 1880, and described in Section D of the catalogue. The suggestion on p. 420 for the publication of a catalogue of the music printed before 1800 will be shortly adopted, and a new catalogue of the MS. music, which is much needed, is also in contemplation.

c. Sacred Harmonic Society. This library has passed into the possession of the Royal College of Music.

RIPON. In the Minster Library is preserved an interesting volume of theological tracts by Gerson and others, on blank leaves of which are written two 16th century ballads for three voices. The first is entitled 'A ballet of y^e^ deth of y^e^ Cardinall' (*i. e.* Wolsey), and the second, 'A lytyll ballet mayde of y^e^ yong dukes g^ac^e,' (*i. e.* Henry Fitzroy, Duke of Richmond and Somerset, a natural son of Henry VIII, who died in 1536.) The words of these ballads are printed in the Yorkshire Archæological and

[1] ARMES, PHILIP, born at Norwich in 1836, was educated in the Cathedral choir of his native town from 1846-8, and in that of Rochester from 1848 to 1851. He was appointed organist of St. Andrew's, Wells Street, in 1857, of Chichester Cathedral in 1861, and of Durham Cathedral in 1862. He graduated Mus. B. at Oxford in 1858, and Mus. D. in 1864. His chief compositions are 'Hezekiah,' written for the Worcester Festival in 1878; 'St. John the Evangelist,' written for York in 1881; and several services, anthems, and other Church music.

Topographical Journal, ii. 396. The library also contains some rare liturgical printed books, particularly a York Manuale (W. de Worde) of 1509, and a York Missal (Rouen) of 1517.

PRIVATE COLLECTIONS. *c.* The greater portion of Mr. Julian Marshall's library was sold in 1884. A large part of the more valuable MSS. had been previously acquired by the British Museum.

k. Mr. J. E. Matthew has a very fine and extensive collection of early treatises and other music, including a copy of Virdung's rare 'Musica getutscht.'

Belgium.

GHENT. The University Library contains an extremely valuable collection of MS. Treatises on Music, besides many liturgical MSS.

France.

CAMBRAI. The Public Library contains a precious collection of MS. church music by early Flemish and Burgundian musicians, besides songs for two, three, and four parts, dating from the 14th century. The collection was described in M. de Coussemaker's 'Notice sur les Collections Musicales de la Bibliothèque de Cambrai.' (1843.)

DOUAI, DUNKERQUE, LILLE, VALENCIENNES. The few books and MSS. of interest in these libraries are described in an appendix to Coussemaker's work on the Cambrai collection.

PARIS. *a.* An excellent catalogue of the rare musical works in the Conservatoire library, with illustrations and facsimiles, was published by the librarian, Mr. J. B. Weckerlin, in 1885.

Germany.

ARNSTADT. The Church library possesses six folio volumes of vocal music of the 16th century.

AUGSBURG. The Stadtbibliothek, the Archives, and the Historical Society possess valuable collections of early printed and MS. music, chiefly collected from the suppressed monasteries of the city. An excellent catalogue of these collections was published in 1878 by Herr Schletterer.

BERLIN. *a.* The catalogue of the Joachimsthal collections was published by Herr Eitner in 1884. Less important collections are in the Kgl. Kirchenmusik-Institut, the Nikolaikirche, and the Berliner Tonkünstler-Verein.

BONN. The University library contains about 600 vols. of music, chiefly of the present century. Amongst the few early works is a copy of the 1517 edition of the 'Micrologus' of Ornithoparcus.

BREMEN. About 74 musical works belonging to the Stadtbibliothek are in the care of the Bremen Tonskünstler-Verein.

BRESLAU. The musical works (printed before 1700) in *a.* the Royal Academic Institute, *b.* the Town library, and *c.* the University library have been admirably catalogued by Herr Emil Bohn (Berlin, Colne, 1883.) These three collections are some of the richest in Germany in early printed music.

d. The Cathedral library contains about 1000 musical works, of which 60 are in manuscript. The collection chiefly consists of church music of the past and present century.

e. The Domstifts-Bibliothek contains a small collection of MSS.

f. The church of St. Elisabeth contains about 4200 musical works, chiefly church music of the 18th and 19th centuries.

BRIEG. The Gymnasium contains a small but valuable collection, chiefly of printed works of the 16th century.

CASSEL. The Landesbibliothek contains about 340 musical works, printed and MS. Amongst the former are copies of Morley and Weelkes' madrigals. Most of the works date between 1560 and 1620. The catalogue was published by Carl Israel in 1881.

COLOGNE. The Jesuitenbibliothek has a small collection of printed 16th century music, including copies of the 'Silium Musice Plane' of 1506, and Wollick's 'Enchiridion' (Paris, 1512).

DANZIG. *a.* The Town library contains a valuable collection, principally of works of the second half of the 16th century.

b. The Allerheiligen-Bibliothek possesses a small collection of the same period.

c. The Town Archives contain six MS. volumes of music, dating from 1611 to 1692.

DONAUESCHINGEN. The library of Prince Fürstenberg contains 13 MS. antiphoners (14th–18th century) and a fragment of a MS. treatise on music of the 15th cent.

DRESDEN. *b. For* 400 *read* 4000. The same collection contains a clavichord of the 17th century, and a harpsichord and clavyorganum, both of which are said to be by Silbermann.

e. The Royal Public Library contained (in 1872) 1177 volumes on musical theory, and 1468 volumes of practical music. There are many early printed books of rarity, including a copy of the Mainz Psalter of 1457.

f. The Dreikönigskirche possesses a few rare printed works, including the discant and tenor parts of Walther's Wittenberg hymnbook (1524).

EICHSTÄTT. The Royal library is rich in rare printed liturgical works containing music.

ELBLING. *a.* The Marienkirche library contains 76 works of the 16th century and 85 of the 17th; 13 Polish cantionales (1571–1792) and many MS. church compositions of the 18th and 19th centuries.

b. The Town library possesses a few rare books, including a copy of the Syntagma of Praetorius.

ERFURT. The Royal library has many liturgical MSS. and printed books, chiefly derived from suppressed convents.

FRANKFORT ON THE MAIN. The library of St. Peter's Church is said (Monatsh. 1872, p. 22) to be the same as that now preserved in the Gymnasium.

GÖTTINGEN. The University Library contains 145 musical works, mostly of the 15th and 16th centuries, many of which are of great rarity. An excellent catalogue has been published by Herr Albert Quantz.

GOTHA. The Ducal library contains a small but interesting collection, comprising several rare early works.

GRIMMA. The Landesschule has about 131 works of the 16th and 17th centuries. A catalogue was published by N. M. Petersen in the yearly school report for 1861.

GÜSTROW. The Domschule library contains a small but valuable collection of rare early printed musical works, chiefly of the 16th century. They are described in the school prospectus for 1853.

HANNOVER. There are a few rare early works on music (including a copy of Burtius' 'De Musica,' 1487) in the Royal Public Library.

HEILBRONN. The Gymnasium library possesses 16th and 17th century part-books, apparently of considerable value.

JENA. The University library contains about 60 vols. of music, chiefly consisting of rare early treatises.

LIEGNITZ. The Bibliotheca Rudolfina of the Ritter-Akademie contains an extremely valuable collection of 16th and 17th century music. The catalogue of the printed books was published in the official programme of the academy (1876–8) by Dr. Ernst Pfudel. That of the MSS. appeared as a supplement to the Monatshefte für Musik-Geschichte in 1886.

LÜBECK. The Stadtbibliothek is said to contain valuable early German and Italian printed music. An account of a few interesting volumes appeared in the Monatshefte für Musik-Geschichte for 1884, No. 11.

LÜNEBURG. The Stadtbibliothek is rich in musical works of the 16th and 17th century, both MS. and printed.

MAYRINGEN. The Oettingen-Wallerstein library contains much MS. music: 390 symphonies, 214 cantatas and oratorios, 114 masses and 111 works for stringed instruments—chiefly by composers of the late 18th century. There are also 120 works on theory.

MUNICH. The University library has a small but valuable collection of 16th and 17th century music.

NEISSE. The Kreuzheiliges Stift has a few printed works of the 16th century and also MS. liturgical works.

NÜRNBERG. The Stadtbibliothek possesses 13 MSS. and 47 printed volumes of 16th and 17th century church music. It also contains a MS. Antiphoner in eight folio volumes.

PIRNA. The Stadtkirche library contains 8 16th century MSS. and 63 printed musical works of the 16th and 17th centuries.

PRAGUE. The University library possesses a few valuable early MS. treatises, besides printed works of the 16th and 17th centuries.

SONDERSHAUSEN. The Schlosskirche library contains much MS. music, chiefly sacred cantatas of the first half of the 18th century.

STRASSBURG. The University library possesses a small collection of early printed musical works, the rarest of which are the 'Harmonie' of Tritonius (Augsburg, 1507) and the 'Novus partus sive concertationes musicae' of Besardus (Augsburg, 1617).

ULM. The Stadtbibliothek has about 142 volumes of printed music, chiefly dating from the early 17th century.

VIENNA. *c.* Dr. Gehring's library was sold in 1880.

WOLFFENBÜTTEL. The Grand Ducal library and Bibliotheca Augusta are rich in music, especially in hymns and liturgical works of the 17th century.

WÜRZBURG. The University library possesses liturgical and choir books of the 14th, 15th and 16th centuries, besides other musical works of interest.

ZITTAU. The Stadtbibliothek has a few early printed works, and several MSS., among which are 7 missals, dating from 1435, decorated with illuminations of great beauty.

ZWICKAU. The Rathsschulbibliothek is rich in early printed music, particularly in Psalters and collections of Hymns. There are also a few MSS. The library is described in the 'Monatshefte für Musik-Geschichte' for 1875, No. 11, and 1876, No. 2.

For many less important collections, see the 'Monatshefte für Musik-Geschichte' for 1872, Nos. 1 and 2, and 1873, No. 12.

Italy.

BOLOGNA. The library described in vol. ii. p 425 belongs to the Liceo Comunale di Musica, not to the Liceo Filarmonico. The mistake has arisen owing to the Accademia Filarmonica being located in the same building. A catalogue has been compiled by Prof. Gaetano Gasparo, and is announced for publication (June, 1888).

CRESPANO. The musical library formed by Professor P. Canal is very extensive, and rich in musical literature. There are several early printed treatises here, and also a number of madrigal part-books. A catalogue of the collection was published at Bassano in 1885.

FLORENCE. *a. Add* and also some interesting MSS., particularly a volume (Cod. MS. No. 58) containing compositions by the Netherlands School, described in the 'Monatshefte für Musik-Geschichte,' 1877, No. 2.

ROME. The archives of the Papal Choir have been at length examined with the greatest care by F. X. Haberl. The results of his labours have been published in an admirable bibliographical and thematic catalogue which appeared first as an Appendix to the 'Monatshefte für Musik-Geschichte,' and has since been published separately by Breitkopf & Härtel. See SISTINE CHAPEL in Appendix.

VENICE. *a.* The library of St. Mark's contains much interesting music. Amongst the theoretical books are copies of the works of Galilei, Aron, Artusi, L. Folianus, Zacconi, Zarlino, J. Froschius, Gafori, Ornithoparcus, Burtius ('Opusculum,' 1487), and many others. The collection of practical music is rich in part-books of madrigals, chiefly in Venetian editions. The following is a list of composers whose works

are contained in this section of the library:—Agostini, Anerio, Antegnati, Archadelt, Asola, Baccusi, Balbi, Berchem, Bertani, Bianco, Caccini, Cambio Perissone, Corvus, Croce, Donato, Doni, Dorati, La Faya, Ferretti, Fiesco, Freddi, A. Gabrieli, Giovanelli, Gero, Gombert, della Gostena, Sigismondo d'India, Ingegneri, Orlando Lasso, G. de Macque, Manara, Marenzio, Marien d'Artois, Masotti, Mazzone, Merulo, F. di Monte, Monteverde, Nasco, Peri, Petrino, Phinor, G. da Ponte, Pordenone, Porta, Portinaro, Primavera, Renaldi, Romano, de Rore, Rossi, Rosso, Rubini, Ruffo, Sabino, Spontini, Stabile, Stivori, Striggio, Tarditi, Tigrini, G. da Udine, Vecchi, Verdelot, dalla Viola, G. de Wert, Zacchino, Zappasorgo, Zuccarini, G. A. Bontempi, Crescentini, Crivelli, Frescobaldi, Grossi, Hartmann-Stunz, T. Merula, Miniscalchi, Moretti, Morlacchi, and Rinuccini. The MSS. include works by Marcello (2 Intermezzi and a Serenata, autograph, a treatise (1707) two cantatas, an aria and two operas); S. Albero; D. Scarlatti (a Serenata a 4, and 13 vols. of Sonatas, 1752–1757); Perez (8 operas, 1752–1755); Cafara; T. Traetta; L. Vinci; Sarti; Graun; Perotti; Haydn; Mysliweczek ('Demofoonte,' played at Venice in 1769); Bonno; Galuppi; Guglielmi ('Il Re Pastore,' 1767); Naumann; Leardini; C. Grossi; Venier (Procurator of St. Mark's, 1732–45); Stradella; Mattheis; Brusa; Giaii (Theatre Airs, 1738); G. Porta; Porpora (Theatre Airs, 1727); D. Terradellas; Hasse (five operas, 1730–58), and two oratorios; A. Scarlatti (opera, 'L'Eurillo,' and the following twenty-seven operas by Cavalli:—Gli Amori d'Apollo e di Dafne, Alcibiade, L'Artemisia, La Calisto, Il Ciro, La Didone, La Doriclea, L'Egista Elena, L'Eliogabalo, Ercole amante, L'Erismena (two settings), L'Eritrea, Il Giasone, L'Hipermestra, Muzio Scevola, Le Nozze di Teti e Peleo, L'Orimonte, L'Orione, L'Oristeo, L'Ormindo, Pompeo Magno, La Rosinda, Scipione Africano, La Statira, La Virtù degli Strali d'Amore, Xerse.

There are also many detached cantatas and songs. The Contarini collection, which is extremely rich in operas (some autograph) of the early Venetian school, has recently been admirably catalogued by Dr. T. Wiel, who has identified many works previously considered as anonymous.

b. The Museo Correr has a considerable collection of music, chiefly MS. compositions of the later Venetian schools. There are many autographs of B. Furlanetto, and church music, operas, intermezzos, etc., by Morlacchi, Bernasconi, Perotti, Salari, Pergolese, Jommelli, Mayer, Lotti, Burzolla, Bertoni, and many others. In 1881 the collection of Count Leopardo Martinengo, consisting chiefly of detached vocal and instrumental pieces, was added to the collection.

Sweden.

UPSALA. The Royal library of the Academy contains 191 printed musical works of the 16th century, 198 of the 17th, and 120 of the 18th century. Among the earlier books are many of great rarity. [W.B.S.]

MUSICAL PERIODICALS. At end of first paragraph, *for* 1828 *read* 1829. Add to notice of *The Musical World* that in 1886 it was published by Messrs. Mallett, of Wardour Street, Mr. F. Hueffer becoming editor. In 1888 its *locale* was changed to 12 Catherine Street, and in August of that year it was bought by Mr. E. F. Jacques. P. 427 *b*, l. 30 from bottom, *for* 1843 *read* 1842. Line 25 from bottom, add date of beginning of *The Musical Examiner*, Nov. 1842. P. 428 *a*, par. 1, add that on the retirement in 1887 of Mr. Lunn, the editorship of *The Musical Times* was assumed by Mr. W. A. Barrett. P. 428 *a*, par. 2, add that *The Tonic Sol-fa Reporter* has a department of 'Musical questions and their answers.' P. 428 *b*, par. 1, add that the proprietorship was transferred to Mr. Harry Lavender. Mr. Turpin edited *The Musical Standard* from 1880 to 1886, Mr. Broadhouse succeeding him for two years; finally Mr. Ernest Bergholt, B.A., became editor in 1888. P. 428 *b*, par. 2, add that in 1882 *The Orchestra* appeared again in a folio size. Par. 3, add that *The Choir* came to an end in 1878. P. 428 *b*, par. 4, add that in 1887 Mr. W. A. Barrett left the editorial chair. Among recent contributions to *The Monthly Musical Record*, Mr. Pauer's 'Chronological Tables and their materials,' and articles by Dr. Carl Reinecke, Mr. S. Stratton, and Mr. Verey may be mentioned.

At end of article add as follows:—

The Musical Review, a weekly musical journal (Novello & Co.), lasted for a few months from the beginning of 1883.

The Magazine of Music (Coates), a monthly, was established in 1884. It is profusely illustrated, and contains a musical supplement.

Musical Opinion and Music Trade Review (Fitzsimmons, monthly), has flourished since 1877. It has illustrations, musical examples, original articles, etc.

The Academic Gazette of Trinity College is owned by a company, but worked as the official organ of the College, and published monthly by Hammond & Co. Dr. Bonavia Hunt was editor of *Musical Education*, as it was then called, from 1880 to 1884. From 1884 Mr. Turpin has edited the Academic Gazette.

The Lute (Patey & Willis) has been published as a monthly journal since 1883, and was edited for some time by Mr. Joseph Bennett. It is now altered in style and has six pages of musical matter to four of letterpress, with Mr. Lewis Thomas as editor.

The Quarterly Musical Review (Heywood), edited by Dr. Hiles, dates from February 1885.

Musical Society (Morley), first appeared (monthly) in March 1886. It contains articles by Mr. Hamilton Clarke and others, and a musical supplement.

The British Bandsman and Orchestral Times, circulates among bandmasters and members of military, orchestral, and brass bands. It was established in September 1887, under the joint editorship of Mr. Waterson and Mr. Cope, the latter of whom is also proprietor and publisher. It appears monthly, with a musical supplement.

The Meister, the organ of the Wagner Society, made its first appearance on Feb. 13, 1888. It is issued quarterly by Redway, under the honorary editorship of Mr. Ashton Ellis and Mr. E. F. Jacques. Messrs. Dowdeswell, Shedlock, Glasenapp and Barry are among the contributors. [L.M.M.]

MUSICAL UNION. Add that the association ceased to exist in 1880, and that its founder, Mr. John Ella, died Oct. 2, 1888.

MUSIC-PRINTING. P. 433, note 1, *for* now *read* a copy of which is. The book referred to was one of the most interesting exhibits in the Loan Collection of the Inventions Exhibition of 1885. P. 435 *b*, l. 28 from bottom, correct statement as to 'The Musical Miscellany,' as that was printed not from types, but from engraved blocks.

Henry Fougt's Patent, mentioned in vol. ii. p. 435 *b*, of which the specification may be read in the Patent Office (No. 888, year 1767) states that the old 'choral' type consisted of the whole figure of the note with its tail and the five lines; but that in his system every note with its five lines is divided into five separate types. The modern system is therefore very similar to this.

A new process for printing music is that called 'Gravure Chimique,' examples of which have been occasionally seen in the French 'Figaro.' The music is first punched on a pewter plate in the ordinary way, from which a paper proof is taken and transferred to a zinc plate. Nitric acid is then applied, which dissolves the zinc where it is not protected by the ink, and leaves the notes in relief. This stereotype plate is then used to print from in the ordinary typographic press. Mr. Lefman, 57 Rue d'Hauteville, Paris, who kindly explained the process to the writer, also informed him that these clichés, of the ordinary music size, can be made for 50 francs (£2) each. [See also SCHEURMANN, vol. iii. p. 248.]

Mr. Augener, of Newgate Street, London, has produced some beautiful specimens of music-printing. The music is first punched on pewter plates in the usual way, and is then transferred to a stone, from which it is printed. The ornamental title-pages are equal to the finest copper-plate engravings. [V. de P.]

MUSIC SCHOOL, OXFORD. Add that the portraits, of which a list is given, have been lately moved to the New Schools. They were exhibited at the Inventions Exhibition in 1885, when Salomon's portrait was identified. See Add. MS. 23071, fol. 65, for a list of them in 1733–4.

MUSIKALISCHES OPFER. To end of article add references to English edition of Spitta's Bach, iii. 191–7, 233, 292, 294.

MUTE. Omit reference to DOLCE CAMPANA.

MYSLIWECZEK, JOSEF. Line 15, *for* Nov. 1772, *read* Oct. 1770.

MYSTÈRES D'ISIS. Line 4 of article, *for* Aug. 26 *read* Aug. 23.

N.

NABUCCO. Line 3 of article, *for* in Lent *read* March 9.

NACHBAUR, FRANZ. Add that in 1882 he was a member of the German Opera Company at Drury Lane, and on June 3 sang the part of Walther in 'Die Meistersinger,' originally sung by him on the production of the work at Munich in 1868. He also appeared as Adolar in 'Euryanthe' on June 13. [A.C.]

NACHRUF. The German word expresses the idea, not merely of farewell, but of fame after death; thus 'Elegy' would be a more accurate translation.

NADESCHDA. Romantic opera in four acts; words by Julian Sturgis; music by A. Goring Thomas. Produced by the Carl Rosa Company at Drury Lane, April 16, 1885. [M.]

NÄGELI, J. G. Mention should be made of the 'Lied vom Rhein,' given on p. 16 of Scherer's collection.

NAENIA. Add that a setting of the same words for chorus and orchestra is op. 82 of the published works of Brahms.

NAPLES. P. 446 *a*, l. 1, *for* towards the end of 1584 *read* in the year 1583. See also MUSICAL LIBRARIES, vol. ii. p. 425 *b*.

NAPOLEON, ARTHUR, son of Alexandre Napoleon, an Italian, and Doña Joaquina dos Santos, a Portuguese lady, was born at Oporto, March 6, 1843. He began to learn the piano at four years of age under the direction of his father, who was a professor of music in that city. At six years of age he played at the Philharmonic of Oporto. His extraordinary precocity at once excited attention in Portuguese musical circles. In 1850, 1851, and 1852 he gave successful concerts at Lisbon and Oporto, and was invited to the Court, where he played several times before the Queen, Doña Maria II. In 1852 he went to London, and, under the patronage of the Duchess of Somerset, gained the favourable notice of the English aristocracy. In 1853 he gave concerts in the Salle Herz, Paris, and played before the Emperor and Empress. Returning to London he played at the Musical Union. In Jan. 1854 he was engaged for 12 concerts at the Kroll Theatre, Berlin, and having been presented by Meyerbeer, played at the palace of Charlottenburg before the King of Prussia. He studied with Mr. Hallé at Manchester in the same year, and undertook tours in the United Kingdom and Ireland (where the Lord Mayor of Dublin presented him, in public, with a testimonial of silver plate worth £100).

In 1856 he played in Germany and Poland, and made a tour in England in 1857 with Sivori and Piatti. In that year Arthur Napoleon went to the Brazils and was enthusiastically received by his countrymen. In the first four concerts he gave in Rio Janeiro he made a profit of over £3000. Having travelled through South America he returned to Portugal in 1858. From thence he went to the United States, making several long tours, and to the West Indies in 1860, where he played with Gottschalk in Havana, and resided for some time during 1860 and 1861 at Porto Rico. At this time the constant travelling and excitement of continued public playing proved prejudicial to that musical progress which was expected of one so gifted. His re-appearance in London at St. James's Hall in 1862, when he gave a concert with the sisters Marchisio, was not entirely satisfactory. He now perceived that serious study of the classical composers was essential to his artistic development and to the ultimate attainment of the position for which his natural talents fitted him. He, however, while not neglecting this discipline, continued his tours, going again to the Brazils and Portugal, where he was charged with the direction of the opening fête at the Exhibition at Oporto in 1865. His last tour was made in Portugal and Spain in 1866, when he played before Queen Isabella. Owing to circumstances entirely independent of art, Arthur Napoleon left off playing in public at a time when he might really have begun a distinguished career as one of the first pianists in Europe, for which he had all the requisites. In 1868 he established at Rio Janeiro a business in music and pianofortes that has become the first in South America, the present style of the firm being Arthur Napoleaõ & Miguez. He married a lady of Rio in 1871. He has not altogether abandoned music as an art, having written several successful pieces for piano and for orchestra. At the request of the Emperor of the Brazils he directed in 1876 the performance of Verdi's Requiem, and in 1880 undertook the direction of the Camoens tercentenary festival. [A.J.H.]

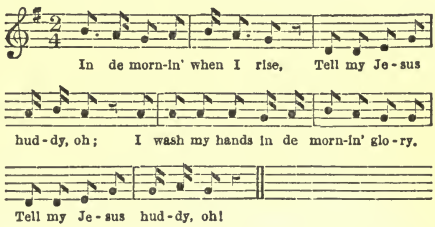
NARDINI. Add day of death, May 7.

NARES. Add that he was born shortly before April 19, 1715, on which day he was baptized.

NATIONAL TRAINING SCHOOL. Additions and corrections will be found under TRAINING SCHOOL, vol. iv. p. 158. The date of the incubation of the scheme is 1854, as in vol. ii.; not 1866, as in vol. iv.

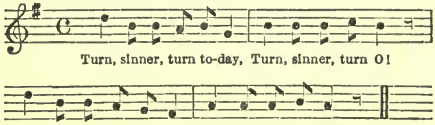
NAUMANN. Add that Dr. Emil Naumann's exhaustive 'History of Music' has been translated by Ferdinand Praeger, edited and furnished with very necessary additional chapters on English music by Sir F. A. G. Ouseley, and published by Cassell & Co. (1886). The author died June 23, 1888.

NAVA, GAETANO. Add days of birth and death, May 16 and March 31 respectively.



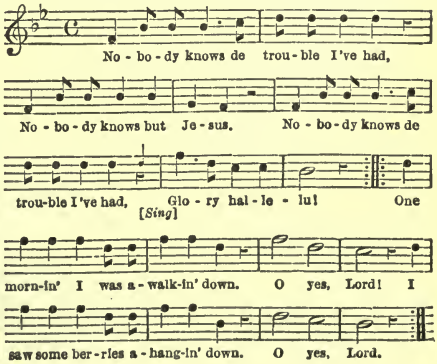
NAYLOR, JOHN, one of our best cathedral organists, was born at Stanningley, near Leeds, on June 8, 1838. As a boy he was a chorister at the Leeds parish church, and also received instruction on the pianoforte from the well-known musician and organist Mr. R. S. Burton. With this exception he is a self-taught man. At the age of 18 he was appointed organist of the parish church, Scarborough, where he soon began, in spite of his youth, to promote a taste for good music in the town. He graduated at Oxford in 1863 as Mus.B. and proceeded to the degree of Mus.D. in 1872. In 1873 he became organist of All Saints' Church, Scarborough, where in collaboration with the vicar, the Rev. R. Brown-Borthwick, he raised the musical services to a pitch of great excellence. He was here able to make experiments in connection with the chanting of the Psalms which were not without their influence in bringing about the publication of Dr. Westcott's Paragraph Psalter. Dr. Naylor is now organist and choir-master of York Minster, for which post he was selected out of numerous candidates in 1883. He is a musician of catholic tastes, and a composer of no mean merit. His works include, besides various anthems and services, the cantatas 'Jeremiah' and 'The Brazen Serpent,' written with organ accompaniment, which were performed with great success by a large body of voices in York Minster in 1884 and 1887 respectively. [T.P.H.]

* NEGRO MUSIC OF THE UNITED STATES. The nearest approach to 'folk music' in the United States is that played or sung by the negroes in the Southern States. Before the Civil War (1861–65) brought freedom to the slaves, the ability to read was very rare among those held in bondage. Indeed, in many of the States which authorized slavery, education of the slave was a misdemeanour. The tunes to which they danced or to which they sang their songs and hymns were, therefore, traditional. The origin of some of the tunes is held to be African on these grounds:—they can be reduced to a pentatonic scale, which is the scale of musical instruments said to be still in use in Abyssinia, Nubia, and other countries in Africa; they have the same 'catch' that appears in songs still sung in Africa, according to the observations of several travellers. Both 'catch' and scale are also common in the traditional music of the Scotch, Irish, Welsh, and Magyars, the 'catch' being the rhythmic device known as the 'Scotch snap.' There are, however, many tunes in common use among the American negroes which have neither peculiarity. The negroes have the imitative faculties very highly developed, and most of their tunes which do not resemble those of the old races were probably caught from Methodist preachers, whose system of conducting 'revivals,' with its appeals to the imagination of the hearer, was such as readily to capture these impressionable people. Many of the negro hymns have lines and phrases that show a Wesleyan origin. Traces of Catholic teachings are visible also, but these are infrequent. Resemblances between various sections as to the tunes and the words used are noted by close observers, the differences being such as would naturally be produced in

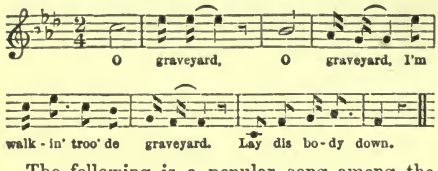


* Copyright 1889 by F. H. JENKS.

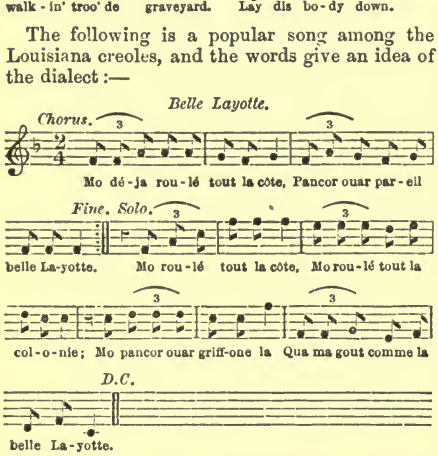
the flight of time or by lapse of memory, as they were handed down from father to son or carried across the country. The tunes are sometimes minor (generally without a sharp seventh) and sometimes major; occasionally a mixed mode is employed, beginning in a major key, and ending in either the relative or tonic minor; or the contrary course may be followed. And there are tunes which end on the subdominant or anywhere but on the tonic or the dominant. The negroes are very sensitive to rhythm. As one dances a jig, his companions gather about him and furnish a percussive accompaniment with bones (played after the manner of castanets) or roughly made tambourines, or, wanting instruments, by alternately slapping their hands together and on their knees, keeping excellent time. They have songs for all occasions where they move in concert, such as loading or unloading ships, or working at the pumps of a fire engine. Their rhythmic sympathies are most strongly active on these occasions. Often one of a gang acts as a precentor, giving a line or two by himself, and the chorus coming in with the refrain. This leader, when his supply of lines gives out or his memory fails, resorts to improvisation. A similar practice obtains with them at their religious and social gatherings. Sometimes the improvised lines will be given in turn by different ones in the company who have the faculty of inventing them. The women's voices have a peculiarly pathetic timbre within their natural range, which is narrow, rarely reaching farther than from A below the treble stave to D (fourth line). When forced they are harsh and strident. As a rule the tenor voices are dry, but the basses are generally rich and sonorous. A quick ear is more common than tunefulness among the race, but the effect produced by the singing of a great number, always in unison, so quickens the hearer's pulse or moves him to tears that defects are forgotten. Their time is sure to be accurate. Of instruments in use among them the variety is small. Bones and tambourines are common, but the banjo is not so generally used by them as has been thought, and fiddlers are very rare. Some of the slave songs, especially those that may be classed as hymns, were made known in the Northern States for the first time by small bands of singers of both sexes who gave concerts in the principal cities in 1871 and subsequently. One troupe (the 'Jubilee singers') came from the Fisk University, Nashville, Tennessee, and in the course of its tours, which included two trips to Europe, raised over 150,000 dollars for the University, which was established especially to educate those who had been born in slavery. Another came from a similar institution at Hampton, Virginia. One effect of their tours was the introduction of some of the songs into the religious services of the Northern negroes. It is observed, however, that the songs are everywhere gradually disappearing from use as the negroes become better educated. Their imitative faculties lead them to prefer music exactly like that which is performed in churches where the worshippers are white. Some of the secular songs of the negroes have acquired peculiar distinction. 'Jim Crow'—the name both of the song and of the negro whose performance of it had a local reputation in Louisville, Kentucky, in 1830—was, indirectly, the origin of the negro minstrel show, the most familiar example of which in England was that long known as Christy's. Many of the plantation songs were introduced into these shows, 'Coal-black Rose,' 'Zip Coon,' and 'Ole Virginny nebber tire' being the most familiar among them. A plantation song, 'Way down in Raccoon Hollow,' enjoyed a wide popularity set to words beginning 'Near the lake where droops the willow.'



A few examples of the negro melodies and verses are appended. They are taken from the collection 'Slave Songs of the United States.' The reader must understand that all of these are sung much faster than either the tunes or the words would seem to warrant, the rapid pace being a result of the negroes' strong rhythmic instincts. The first example shows a pentatonic scale, and the use of the 'Scotch snap.'



The following is an illustration of the use of an unconventional ending:—



A very popular tune, and full of pathos when sung by a large company, is the following:—

Dr. W. Howard Russell, of the 'Times,' describes in chapter xviii. of 'My Diary North and South,' a song which made a remarkable impression on him, and which, from his description, appears to be the following :—

The following is a popular song among the Louisiana creoles, and the words give an idea of the dialect :—

The subject has so many ramifications that full treatment is impossible in this article. Those interested will find it discussed in the following treatises by writers who have lived at the South, and made special studies of the subject :—

Dwight's Journal of Music, Nov. 8, 1862. Letter, Miss McKim, Philadelphia; probably the first occasion when public attention was called to the Slave songs.

Continental Monthly, Philadelphia, August, 1863. Article, 'Under the Palmettos,' Mr. H. G. Spaulding, with specimens of the music.

Atlantic Monthly, June, 1867. Article, 'Negro Spirituals,' T. W. Higginson, with the words of many of the most popular hymns.

'Slave Songs of the United States,' New York, 1871. Words and tunes, the largest collection published.

The Century, New York, Feb. 1886; Article, 'Creole Slave Dances.' April, 1886; article, 'Creole Slave Songs.' Both by Mr. G. W. Cable. Especially interesting because of the descriptions of negro customs in Louisiana, some of which are of remote African origin, and because of the explanation of the peculiar dialect of the Louisiana negroes—a mixture of French and English, sometimes a little Spanish, but each greatly modified by the negro's own method of speech. Gottschalk, who was a native of New Orleans, used some of the creole music as subjects for free treatment on the pianoforte. Mr. J. A. Brockhoven, of Cincinnati, has written a suite for orchestra, based on creole tunes, which has been performed at concerts in the United States. [F.H.J.]

NERUDA, Mme. Add that on July 26, 1888, she married Sir Charles Hallé.

NESSLER, Victor, born Jan. 28, 1841, at Baldenheim in Alsace, at first studied theology at Strasburg, but the success of his essay at operatic composition, a work entitled 'Fleurette,' and produced there in 1864, induced him to devote himself to music. He then went to Leipzig, and obtained various posts as conductor of male choral societies, for the use of which he wrote a set of part-songs, etc. In 1870 he became choral director at the Stadt Theater, and in 1879 conductor at the Carolatheater in the same town. Meanwhile various operas had been brought out with varying success. The list is as follows :—'Die Hochzeitsreise' (1867); 'Dornröschen's Brautfahrt' (1868); 'Nachtwächter und Student' (1868); 'Am Alexandertag' (1869); 'Irmingard,' a more ambitious work than the previous productions, in five acts (1876); 'Der Rattenfänger von Hameln' (1879), an opera which rapidly spread his fame throughout Germany, and which has attained an enormous success; 'Die wilde Jäger' (1881); 'Der Trompeter von Säkkingen' (1884); and 'Otto der Schütz' (1886). The success of the 'Trompeter' was almost as great as that of the 'Rattenfänger.' Both owe their popularity to an easy superficiality of style, which commends itself to the less musical portion of the German public. When the 'Rattenfänger,' under the name of 'The Piper of Hamelin,' was produced at Covent Garden Theatre by the English Opera Company on Jan. 7, 1884, it achieved a well-merited failure. (Died May 27, 1890.) [M.]

NEUMARK, Georg, born March 6, 1621, at Mühlhausen in Thuringia, became librarian and secretary to Duke Wilhelm II. of Weimar, where he died July 8, 1681. He was a renowned player on the harpsichord and viola da gamba, but his fame rests upon his chorales, of some of which he wrote both words and music. Of these the most important is 'Wer nur den lieben Gott lässt walten.' This and other chorales by which his name is known appeared in one or other of his collections of hymns. These were 'Poetisch-musikalisches Lustwäldchen,' etc. 1652, and an enlarged form of the same book, published at Jena in 1657 under the title of 'Poetisch-musikalisches Lustwald.' Two of his productions seem to have been intended for the stage. They are 'Keuscher Liebesspiegel' (1649), which Dr. K. E. Schneider ('Das musikalisches Lied,' iii. 151) says is a kind of opera; and 'Politisches Gesprächsspiel' (Weimar 1662). [M.]

NEVADA, Emma. See Wixom, vol. iv. p. 477.

NEW PHILHARMONIC SOCIETY. Add that the society came to an end in 1879, the concert of June 21 being the last concert given under the above title. The scheme was carried on for three years more under the title of Ganz's Orchestral Concerts.

NIBELUNGEN. Add that the trilogy, or tetralogy, as it is called in the article, was given at Her Majesty's Theatre on May 5–9, 1882. Four performances of the entire work took place.

NICODÉ, Jean-Louis, a pianist and composer of Polish birth, well known in Germany. He was born at Jerczik near Posen, in 1853, was brought at an early age to Berlin by his

father, an amateur of music, who, after losing his property, earned a living by his violin playing. Jean-Louis received musical instruction in Berlin, resided there for some years as a teacher and executant, and was offered in 1879 a professorship at the Dresden Conservatoire. Nicodé held this post until 1885. In the meantime he had won a reputation by his compositions; and on coming forward as conductor of orchestral concerts was accorded by the public and the press hearty support and sympathy, which increased when his talent for conducting became evident. Under Nicodé, *virtuosi* of the first rank are heard in Dresden, in conjunction with the band of the Gewerbehaus, at the Subscription—or, as they have come to be called, the Philharmonic—Concerts; whereas the excellent though infrequent concert performances of the Court Orchestra did not admit of the introduction of the solo element.

Amongst Nicodé's compositions for orchestra are 'Introduction and Scherzo,' op. 11, 'Maria Stuart,' Symphonic poem, Suite in B minor, op. 17, 'Die Jagd nach dem Glück,' and Symphonic Variations, op. 27; 'Das Meer' for orch. and male chorus; 'Bilder aus dem Süden' (op. 28) and other pieces for PF.; also music for cello, violin, and solo voice (B. & H.). [L.M.M.]

NICOLINI, Ernest. Add that he married Mme. Adelina Patti on Aug. 10, 1886.

NIEDERRHEINISCHE MUSIKFESTE. Add to the table on p. 457 the following particulars of the festivals since 1880:—

No.	*Year.*	*Place.*	*Conductors.*	*Principal Choral and Orchestral Works.*
58	1881	Düsseldorf .	Gade and Tausch . .	Handel's Samson; Gade's Zion and Symphony in Eb.
59	1882	Aix . . .	Wüllner	Handel's Joshua; part of Bach's B minor Mass; Symphony, no. 9, Beethoven.
60	1883	Cologne . .	Hiller and Brahms . .	Haydn's Creation; Mendelssohn's Ps. cxiv; Symphonies, Eroica, Beethoven, and Brahms in D.
61	1884	Düsseldorf .	Brahms and Tausch. .	Handel's Messiah; Bach's Magnificat; Brahms's Symphony in F; Beethoven's PF. Concerto no. 5.
62	1885	Aix . . .	Reinecke and Kriese .	Handel's Judas Maccabeus and Alexander's Feast; Beethoven's C minor Symphony.
63	1886	Cologne . .	Wüllner	Handel's Belshazzar; Symphonies, Beethoven no. 9, Mozart in Eb, and Brahms, no. 4.
64	1887	Düsseldorf .	Richter and Tausch . .	Handel's Joshua; Bach's Ascension Cantata 'Lobet Gott'; Tausch's 'Miriam's Siegesgesang'; Beethoven's PF. Concerto in G; Symphonies, Beethoven's Eroica and Schumann's in Bb.
65	1888	Aix . . .	Richter and Schwickerath	Messiah; Bach's 'Gottes Zeit'; Mendelssohn's Ps. cxiv; Bruch's 'Schön Ellen'; Finale 'Gotterdämmerung'; Brahms's Double Concerto; Symphony, no. 9, Beethoven.

In the small list of symphonies at the end of the article, the right hand column should read as follows:—

No. 5, performed nine times.
No. 7, do. eight times.
No. 3, do. eleven times.
No. 9, do. fourteen times. [H.S.O.]

NIEMANN. At the end of article, *for* twice *read* three times. Add that Herr Niemann sang the part of Siegmund in the performance of the 'Nibelungen' at Her Majesty's Theatre in 1882, and that he recently (1887) took his farewell of the public. A son of his, Otto Niemann, also a tenor, appeared in a selection from 'Parsifal,' given at the London Symphony Concert of Dec. 13, 1887.

NILSSON, Christine. Line 1 of article, *for* Aug. 20 *read* Aug. 3. P. 458 *b*, l. 4 from bottom, add that M. Rouzaud died Feb. 22, 1882. Add that she created the parts of Margaret and Helen of Troy in Boito's 'Mefistofele,' when that work was produced in England, July 6, 1880. She played at the same theatre in 1881, since when she has only been heard in concerts. She married Count Casa di Miranda in March 1887. She has retired altogether into private life since her farewell concerts, the second and last of which took place June 20, 1888.

NISARD, Theodor. See vol. ii. p. 614, note.

NIXON, Henry George, born Feb. 20, 1796, at Winchester, was successively organist at St. George's Chapel, London Road, 1817–1820; at Warwick Street Chapel; at St. Andrew's Roman Catholic Chapel, Glasgow, and finally at St. George's Cathedral, Southwark, in 1839, which post he held until his death from cholera in 1849. His compositions include five Masses, a Te Deum, 'Respice Victimae Paschali,' 'Dominus regnavit'; a Cantata written for Malibran; Vespers for every festival in the year, many of them published after his death in two folio volumes, besides pianoforte solos and songs. He married in 1818 Caroline Melissa Danby, who died in 1857, the daughter of John Danby, the glee composer, by whom he had thirteen children; among them were

James Cassana (1823–1842), a promising young violinist.

Henry Cotter, the fourth son, born 1842 in London, was taught music and the organ by Deval of Hull, by Henry Smart, Dr. Steggall, and G. A. Macfarren. He was successively organist at various churches of all denominations at Hull, Woolwich, Blackheath, Spanish Place, and St. Leonard's, where he now resides, and is the local representative of the Royal Academy of Music. He received the degree of Mus.B. at Cambridge in 1876. His compositions include a sonata for piano and violin, played by himself and Henry Blagrove in 1871; a pianoforte trio, first prize Trinity College, London, in 1880; sonata for pianoforte and cello; overture 'Titania' (Mr. Cowen's Concerts, Dec. 18, 1880) concertstück for piano and orchestra; songs. [A.C.]

NOHL, C. F. L. Line 9 from end of article, *for* 1870 *read* 1867. Add date of death, Dec. 16, 1885.

NORCOME, DANIEL. Add that he was born at Windsor in 1576. Having embraced the tenets of the Romish Church, he was deprived of his lay clerkship and went to Brussels, where he became one of the instrumentalists in the Vice-regal Chapel. His name occurs in a list of the members of the chapel in 1641. [W.H.H.]

NORDISA. Romantic opera in three acts, words and music by F. Corder. Produced by the Carl Rosa Company at Liverpool on Jan. 26, and at Drury Lane, May 4, 1887. [M.]

NORMA. Line 2 of article, *for* Lent, 1832, *read* Dec. 26, 1831, and l. 5, *for* 1855 *read* 1835.

NORWICH FESTIVAL. Add that in 1881 the festival was conducted by Signor Randegger, who still holds the post. The new works were Cowen's 'St. Ursula' and A. Goring Thomas's 'Sun-worshippers,' and, for orchestra alone, Barnett's 'Harvest Festival' and W. Macfarren's 'Henry V.' In 1884 the chief novelties were Mackenzie's 'Rose of Sharon' and Stanford's 'Elegiac Ode.' At this festival Mme. Albani was not engaged, the principal soprano music being sung by Miss Emma Nevada. In 1887 Mme. Albani again appeared, and contrary to previous practice, several of the younger English singers were engaged. The new works were both Italian oratorios, 'The Garden of Olivet,' by Bottesini, and Mancinelli's 'Isaias.'

NOTA CAMBITA. After the reference to PART-WRITING *add* in Appendix.

NOTATION. P. 470 *b*, the statement as to the stave, occurring immediately after the first illustration, col. *b*, is to be corrected by a reference to vol. iii. p. 692 *b*. P. 477 *a*. l. 24 from bottom, *for* Scarlatti's opera, etc. *read* Cavalli's 'Giasone,' 1655. Compare vol. i. p. 47 *a*. P. 477 *b*, l. 17, add that the tenor part in choral works is sometimes indicated by two G clefs close together. Messrs. Ricordi & Co. use a somewhat barbarous combination of the G and C clefs for the same purpose. P. 478 *a*, l. 19–20 from bottom. *for* are usually *read* were formerly; and a line below, *for* Sometimes *read* In modern music.

NOTOT, JOSEPH, born at Arras, Pas de Calais, in 1755. From his earliest infancy he manifested a wonderful aptitude for music. His father intended to educate him for the church or the bar; and for the purpose of diverting his mind from the pursuit he most loved they sent him to Paris. It happened soon after his arrival in that city that a friend took him to St. Germain-des-Prés, where, having obtained permission of Leclerc, the organist, to sit at the organ, he performed extempore in so ingenious a manner that Leclerc would not believe it possible the boy could be playing from his own ideas. Leclerc therefore gave him a subject, upon which the boy instantly formed a fugue, and acquitted himself so admirably that the great composer seized him in his arms, and, lifting him up as high as he could, exclaimed, in an ecstasy of delight, 'Tu resteras à Paris.' His father, finding him to have really a genius for music, permitted the boy to adhere to the study of music as his future profession, and he consequently remained in Paris, where he soon acquired a great reputation. On his return to Arras he was appointed organist there. His compositions, which were greatly admired by John Christian Bach, consist of four symphonies, three pianoforte concertos, and a number of sonatas for that instrument. And it is said that in his style of accompanying from a full score Joseph Notot was unequalled. At the French Revolution this excellent musician renounced music as a profession and came to reside in England. We regret not to be able to ascertain the period of his decease. The above notice is from a work called the 'British Minstrel and Musical Literary Miscellany,' published some years ago in Glasgow as a periodical, No. 58. [C.H.P.]

NOTTEBOHM. Add to his publications, 'Ein Skizzenbuch von Beethoven aus dem Jahr 1803' (B.&H. 1880). This contains the sketches for the Eroica. His death took place at Gratz, on Oct. 30, 1882. Since then the papers which appeared in the 'Mus. Wochenblatt' as 'Neue Beethoveniana,' with others of the same nature by him, have been collected by E. Mandyczewski, and published in 1887 by Rieter-Biedermann of Leipzig in a volume of 590 pages; as 'Zweite Beethoveniana.' An index to both the Beethoveniana volumes was published in Oct. 1888. [G.]

NOVELLO, EWER & CO. Add date of death of Henry Littleton, May 11, 1888.

NOZZE DI FIGARO. Line 5 of article, *for* 1876 *read* 1786.

NUANCES. For corrections of this article see NOTATION, vol. ii. p. 468*b*, 476*b*, and also 535 *b*.

O.

OAKELEY, Sir Herbert Stanley. Line 13 of article, add:—He received in 1879 the degree of Mus. D. from the University of Oxford, and in 1881 that of LL.D. from the University of Aberdeen; he was created in the same year Composer of Music to Her Majesty in Scotland. In 1886 the University of Toronto conferred on him the degree of D.C.L., and in 1887 he received the degree of Mus. D. from the University of Dublin. Line 14, *for* some 20 *read* 25, and add that 20 of the songs have been published in a 'Jubilee Album' dedicated to the Queen. Line 17, *for* 12 *read* 18. Line 18, add a Jubilee Cantata for 1887. Among the sacred compositions add a motet with orchestral accompaniment. Add that the annual festival mentioned in the third line from the end of the article, is due to Sir Herbert Oakeley. (See Reid Concerts, vol. iii. p. 101.) He has lately (1886) prepared a scheme for musical graduation at the Edinburgh University, which has been approved by the senate, and only awaits the sanction of the Chancellor and the University Court to come into effect.

OBERTAS.[1] This is described in the 'Encyklopedyja Powszechna' (Warsaw 1884) as the most popular of Polish national dances. The couples follow their leader, turning from right to left, and describing a circle or oval ring. The woman sometimes dances round her partner, and sometimes *vice versâ*; a song is often sung at the same time. The obertas is evidently regarded by the Poles as their national waltz, though, as will have been seen, it differs from the German waltz in several characteristics of the dance as well as in the style of the music associated with it by modern composers. Wieniawski's 'Mazurka caractéristique' for violin No. 1, bears the subtitle 'Obertas'; it is deficient in the rough, wild character, without which the dance is scarcely to be distinguished from a mazurka. Boito introduces the obertas into the first scene of act i. of 'Mefistofele':

[1] From 'Obracać,' signifying to turn round. 'Obertas' has a second meaning, confusion or perplexity. The accent lies on the second syllable.

Whether Boito was guilty of an anachronism in representing his 16th century Frankfort populace indulging in a national dance of Poland (to say nothing of Polish exclamations) is open to question. The Mazurka found its way into North-Germany only after August III. of Saxony ascended the throne in 1733 (Brockhaus). Had the obertas been adopted at any time by the German people, such writers as Angerstein, Czerwinski, Voss, etc, could not have ignored it in their works on the art and history of the Dance; though their neglect to include the name of a dance known only in Poland, in their enumeration of dances of all nations, is at least excusable. However, the charm of these stirring strains, no doubt suggested to Boito by his Polish mother, renders very welcome the composer's possible deviation from historic truth.

Wieniawski and Boito suggest by a drone bass in fifths the rude accompaniment of the bagpipes or other primitive combination of instruments.

> Tutto vanno alla rinfusa
> Sulla musica confusa
> Così far la cornamusa—

writes Boito for his chorus. The wild and romping nature of this dance and music must have proved without attraction for Chopin, who has at any rate not included by name an Obertas among his Mazurkas. Nevertheless, we may recognize that in C major, op. 56, no. 2 (Vivace), as being in harmony and rhythm the nearest approach to the Obertas attempted by this fastidious and undramatic composer. [L.M.M.]

OCCASIONAL ORATORIO, THE. A work of Handel, probably intended to celebrate the failure of the Jacobite rising of 1745. It consists of an overture and three parts, among which are 'O liberty,' afterwards transferred to 'Judas Maccabeus,' some of the choruses from 'Israel in Egypt' and a Coronation Anthem, introduced into Part III. The words of Part I. are in great part taken from Milton's Psalms, and many numbers appear to be written by Dr. Morell. (See pref. to the work in the Händelgesellschaft edition.) It was performed at Covent Garden on Feb. 14, 19, and 26, 1746. (Rockstro's Life of Handel.) [M.]

OCTAVE. Add that an explanation of the term 'Short Octave' will be found in vol. ii. p. 588, and vol. iii. p. 653.

ODINGTON, WALTER DE, or Walter of Evesham, as he appears to have been indifferently called, probably took his name from Oddington, in Gloucestershire. It has been the fashion among musical historians to identify him with the Walter, monk of Canterbury, whose election to the primacy was quashed by the Pope in 1229; but unfortunately the true spelling of his name was Einesham or Eynsham. The subject of this article could not have been born much before the middle of the 13th century, if, as appears beyond doubt, he was the Walter de Evesham who is referred to in a list of mathematicians as living in 1316. Upon this supposition we may accept the date, 1280, at which Leland states that Odington was flourishing. In all probability his musical works were written early in his life, his latter days being given up to astronomy, in which science he is known to have been proficient, from several treatises which have come down to us. His only known musical work was the 'De Speculatione Musices,' of which there is a MS. copy in Corpus Christi College, Cambridge. Another copy is supposed to have been contained in one of the Cotton MSS. of which the remains are now at the British Museum. In this treatise Walter shows himself a sound musician as well as a learned writer, supplying in almost all cases examples of his own composition. The principal subjects he handles are musical intervals, notation, rhythm, musical instruments, and harmony, which latter term he uses instead of the old 'discantus'; he gives interesting definitions of such words as rondeau, motet (which he calls 'motus brevis cantilenæ'), etc. But the treatise is especially important for the study of rhythm in the 13th century. All that is known of his life is that he was a Benedictine of the monastery at Evesham, and that he was at Oxford, as stated above, in 1316. [A.H.-H.]

OEDIPUS. Add that incidental music, choruses, etc. were written to the play by Dr. C. V. Stanford, for the performance at Cambridge on Nov. 22–26, 1887.

OFFENBACH. Add that he died of gout on the heart, at his residence on the Boulevard des Capucines, Oct. 5, 1880. His posthumous works include 'La belle Lurette,' composed within a short time of his death, and 'Les Contes d'Hoffmann,' opéra comique. The former was revised by Léo Delibes, and produced at the Rénaissance, Oct. 30, 1880, with Jane Hading, Milly Meyer, Vauthier, Jolly, etc. (in English at the Avenue Theatre, March 24, 1883). The second opera was the composer's most cherished work, on which he had been working for years. For some time Offenbach had felt his end approaching, and said to M. Carvalho, 'Make haste, make haste to mount my piece; I am in a hurry, and have only one wish in the world — that of witnessing the *première* of this work.[1]' It was finally revised and partly orchestrated by Guiraud, and produced at the Opéra Comique, Feb. 10, 1881, with Adèle Isaac, Marguérite Ugalde, Talazac, Taskin, Grivot, etc. It was played no less than 101 nights in the year of its production. It was given in Germany, and at the Ring Theatre, Vienna, at the time of its conflagration. Some of the music was adapted to a one-act farce by Leterrier and Vanloo, 'Mlle. Moucheron,' produced at the Renaissance, May 10, 1881. Offenbach's widow died April 19, 1887. [A.C.]

OLD HUNDREDTH TUNE, THE. This tune, as well as others in the Genevan Psalter, has been so often erroneously ascribed to Goudimel, or the name of that composer appended to harmonies which are not his, that it will be interesting to give here a transcript of the melody by Bourgeois, 1552, as harmonized by Goudimel, 1565.

In 1561 Kethe wrote versions of twenty-five psalms for the enlarged edition of Knox's Anglo-Genevan Psalter published in that year. One of these was the Long Measure version of Psalm C, 'All people that on earth do dwell,' to which the Genevan tune was then for the first time adapted. [G.A.C.]

OPERA. P. 499 *a*, l. 13, *for* Mantua *read* Modena. P. 501 *a*, l. 3, *for* 1613 *read* 1615. P. 502 *a*, l. 30. The drama called 'Il Ritorno di Angelica,' etc., is ascribed, in Lady Morgan's 'Life and Times of Salvator Rosa,' to a composer named Tignali. This name is considered by Mr. S. S. Stratton to be a corruption of Tenaglia, whose 'Clearco' was produced at

[1] 'Daily Telegraph,' Paris Correspondence, Oct. 7, 1880.

Rome in 1661. P. 506 *a*, l. 32 from bottom, *for* 1669 *read* 1671. P. 507 *a*, l. 15 from bottom, *for* (1677), 'Abelazor' (ib.), *read* (1675), 'Abdelazar' (1677). Line 10 from bottom, correct date of 'Amphitrion' to 1690, and four lines below, for date of 'Don Quixote,' *read* 1695. P. 514 *b*, l. 3, *for* written in 1734 *read* performed in 1733. P. 522 *a*, l. 14 from bottom, *for* 1844 *read* 1843. P. 524 *a*, l. 29, omit 'The Castle of Andalusia,' since that opera is not by Shield but by Arnold. Same col., l. 9 from bottom, *for* 1810 *read* 1811. P. 525 *a*, l. 20 from bottom, *for* the same *read* the previous. Nine lines below, *for* 1814 *read* 1813.

OPÉRA COMIQUE (second article with that title). At end add that the theatre was burnt down on May 25, 1887.

ORATORIO. P. 549 *a*, l. 13, *for* 1745 *read* 1750.

ORAZZI E CURIAZI. Line 3 of article, *for* 1794 *read* 1796.

ORCHESTRA. P. 562 *a*, last line but one, *for* 1549 *read* 1649.

ORCHESTRINA DI CAMERA. The title of a series of little instruments of the harmonium tribe. They were invented and are made by W. E. Evans, of London, and represent the orchestral clarinet, oboe, flute, French horn, and bassoon. They imitate the *timbre* of the respective instruments after which they are called, and have the same compass of notes. The clarinet and French horn are furnished with shifting keyboards, in order to arrange for the mechanical transposition of the parts when these are not written in the key of C. The different qualities of tone are obtained by making the vibrating reeds of varying dimensions, and by the peculiar shape of the channels conveying the wind to them. The orchestrinas are chiefly intended to be employed as convenient substitutes for the real instruments at performances where players of the orchestral instruments cannot be obtained. Dr. Hullah, in his 'Music in the House,' recommends them as valuable for the practice of concerted music, as well as for the purpose of supplying obbligato accompaniments. [T.L.S.]

ORDRES. Another name for SUITES, used by Couperin and some of his contemporaries. There is no difference of arrangement or structure which would account for the employment of the two names. [M.]

ORGAN. P. 599 *b*, l. 31, *for* he *read* Mr. Barker.

ORGANISTS, COLLEGE OF, an association founded in 1864 on the initiative of the late Mr. R. D. Limpus, with a view (1) to provide a central organization in London of the profession of organist; (2) To provide a system of examinations and certificates for the better definition and protection of the profession, and to secure competent organists for the service of the church; (3) to provide opportunities for intercourse amongst members of the profession and the discussion of professional topics; (4) to encourage the composition and study of sacred music. A council was chosen, and the College was opened at Queen Square, Bloomsbury, and afterwards located at 95 Great Russell Street. The College of Organists is incorporated under the Companies' Acts; it consists of a President, Vice-Presidents, Musical Examiners, Hon. Treasurer, Hon. Secretary, Hon. Librarian, Hon. Auditors (2), Fellows, Associates, Hon. Members and Ordinary Members. The Archbishop of Canterbury and the Bishop of London are Patrons of the College, and the names of some notable musicians appear among the office-bearers —Elvey, Goss, Hullah, Macfarren, Ouseley, Stewart, Sullivan, Stainer, Hopkins, Bridge, etc.—from the commencement up to the present time. A council of twenty-one Fellows, with the Hon. Secretary and Hon. Treasurer, hold the reins of government, retiring annually; two-thirds of the number are re-elected with seven other Fellows who have not served during the preceding year. The trustees are Messrs. M. E. Wesley, E. J. Hopkins, and E. H. Turpin. At the general meeting every July the retiring council present their report on the state of the College.

Arrangements are made for the half-yearly holding of Examinations in Organ Playing, General Knowledge of the Organ, Harmony, Counterpoint, Composition, Sight-reading, and general musical knowledge, after passing which a candidate is entitled to a First Class diploma admitting him to a fellowship in the College. This examination is only open to candidates who have previously been examined for and obtained the certificate of associateship, and to musical graduates of the English Universities. An idea of the growth of this institution may fairly be gained by comparing the numbers of candidates for examination in different years. Whereas 7 presented themselves in July 1866, 38 came up in 1876, and 244 in 1886. Of Fellows, Associates and Members the College now numbers about 600, a position which the Hon. Secretary, Mr. E. H. Turpin, and the Hon. Treasurer, Mr. Wesley, have greatly assisted in securing and maintaining for the institution. To the latter gentleman is due the proposal to establish a Pension Fund for organists incapacitated by age or illness, a proposal which is likely to be followed up. Other features of the College work are the Organists' Register, and the prizes for composition.

Since June, 1887, the press representation of the College has been effected through the 'Musical World,' a part of which weekly paper is under the superintendence of Mr. E. H. Turpin, and is devoted to organ news and articles of special importance to organists, besides occasional reports of the lectures delivered at the College meetings. It would be impossible in a small space to give an adequate idea of the number and interest of these addresses, which are largely attended by strangers and friends; the list of those that were heard in

the year 1886–7 includes 'Ancient Keyboard Music,' by Mr. Hipkins; 'Musical Elocution,' by Mr. Ernest Lake; 'False Relations,' by Mr. James Turpin; 'Organ Construction,' by Mr. Richardson; and 'How to enjoy Music,' by Mr. Banister. [L.M.M.]

ORGANOPHONE. A variety of the Harmonium invented by the late A. Debain of Paris, wherein the reeds or vibrators are raised within instead of being beneath the channels. The result of this disposition is the production of a tone-quality assimilating to that of the American organ. [A.J.H.]

ORGENYI. For name read Orgéni, Anna Maria Aglaia, and add that her real name is von Görger St. Jörgen, and that she was born in 1841 at Rima-Szombath, Galicia. She sang for a few nights at the Lyrique, Paris, in 1879, as Violetta. In 1881 she re-appeared in England, and sang with success at the Crystal Palace, Philharmonic, and other concerts. She is now a teacher of singing at the Dresden Conservatorium. [A.C.]

ORIANA, The Triumphs of. P. 611 *a*, l. 4, *for* in 1601 *read* in 1603 (after Queen Elizabeth's death, as is proved by Arber's Stationers' Register). The book was printed in 1601, but the publication delayed till two years afterwards, probably because the Queen disliked the title of Oriana.

ORNITHOPARCUS, vol. ii. p. 611 *b*. It will be observed that the date of the publication of the first edition of the Micrologus of Ornithoparcus is stated variously as 1516 and 1517. The former date is that given by Panzer (vii. p. 196), on the authority of the Catalogue of Count Thott's Library (vii. p. 172). But no trace of this edition—if it ever existed—can now be found, and it seems certain that the work was first printed in 1517. The following are the various editions through which it passed:—

1. Leipzig, Jan. 1517. The colophon runs as follows:—

Excussum est hoc opus Lipsiae in aedibus Valentini | Schumañ. Mēse Januario, Annī virginei partus De | cimiseptimi supra sesquimillesimū Leone de | cimo pont. max. ac Maximiliano | glorioſissimo Impatore orbi terrar | praesidentibus. |

This is the first edition, and only one copy is known to exist, viz. in the Bibliothèque Nationale at Paris, the whole of sheet A of which is wanting. It was described by Fétis, who however confuses it with the second edition.

2. Leipzig, Nov. 1517. Described in Panzer (ix. 496). The colophon is:—

Excussum est hoc opus, ab ipso authore denuo castigatum, | recognitumq; Lipsie in edibus Ualentini Schumanni, calco- | graphi solertissimi: Mense Nouēbr: Anni virginei partus de- | cimi septimi supra sesquimillesimū. Leone decimo Pont. Max. | ac Maximiliano inuictissimo impatore orbi terrar pīdētibus. |

This edition, though the colophon clearly proves the contrary, is generally described as the first. Copies of it are in the British Museum; Kgl. Bibliothek, Berlin; Hofbibliothek, Darmstadt; Library of St. Mark's, Venice; University of Bonn, and the 'Rosenthal Antiquariat,' Munich (May 1888).

3. Leipzig, 1519. The colophon runs:—

Excussum est hoc opus: denuo castigatum recognitumq; | Lipsie in edibus Ualentini Schumanni: calcographi solertissi | mi: Mense Aprili; Anni virginei partus vndeuigesimi supra | sesquimillesimum. |

There are copies of this at Berlin (Royal Library), Munich (Royal Library), Königsberg (see 'Monatshefte für Musikgeschichte,' 1870, p. 47), Göttingen (University Library) and Brussels (see 'Catalogue de la Bibliothèque de F. J. Fétis,' p. 621). A copy is said ('Monatshefte für Musikgeschichte,' viii. p. 22) to be in the Rathsschulbibliothek of Zwickau. Fétis says there is an edition of 1521 at the Bibliothèque Nationale in Paris, though on enquiry (May, 1888) the only copy found there was that of Jan. 1517. The colophon he quotes is that of the 1519 edition, but he seems to have imagined that 'undevigesimi' meant twenty-one, instead of nineteen. His statement has been copied by Mendel.

4. Cologne, 1533. The title-page runs:—

Andræ Ornitoparchi Meyningensis, De arte cantandi micrologus, libris quatuor digestus, omnibus musicæ studiosis non tam utilis quam necessarius, diligenter recognitus. Coloniæ, apud Joannem Gymnicum, anno 1533.

A copy of this edition is in the Bibliothèque du Conservatoire National de Musique, Paris (see M. Weckerlin's Catalogue, p. 209).

5. Cologne, 1535. An edition without colophon, similar to the preceding. A copy is in the Royal Library at Munich.

6. Gerber (Lexicon, ed. 1813, iii. p. 618) quotes Schacht's 'Bibl. Music.' (1687) to the effect that there exists an edition in oblong 8vo. printed by Johannes Gymnicus at Cologne in 1540, but no copy of this is known to exist.

Add to the account of Ornithoparcus that he was M.A. of Tübingen, and in October 1516 was connected with the University of Wittenberg. [W.B.S.]

ORRIDGE, Ellen Amelia, born in London, 1856, was taught singing by Manuel Garcia at the Royal Academy, and gained the Llewellyn Thomas bronze and gold medals for declamatory singing in 1876 and 1877, the certificate of merit, the Parepa-Rosa medal, and the Christine Nilsson 2nd prize in 1878. While still a student she sang in a provincial tour with Sims Reeves in 1877. She made a successful début at the Ballad Concerts, Nov. 21 of the same year, and was engaged for the whole season. Miss Orridge afterwards worthily maintained the reputation acquired at the outset of her career, and gave promise that in the future she would become one of our best contralto concert singers. She sang at Mr. Ganz's concert in a selection from Berlioz's 'Romeo and Juliet,' May 28; at the Richter in Stanford's 46th Psalm, May 30; in the 'Nuits d'Été' and Choral Symphony, Oct. 24, 1881; at the Philharmonic in the last work, Feb. 9; at the Symphony Concerts in Schumann's 'Faust,' June 8, 1882; at the Crystal Palace, at the Popular Concerts, etc. She died Sept. 16, 1883, of typhoid fever, at Guernsey, where she had gone

for a short holiday; the news of her death was received with universal regret, on account of her amiability and kindliness of disposition. [A.C.]

OSBORNE, G. A. Add day of birth, Sept. 24. Add that his father was lay-vicar as well as organist. During his residence in Brussels he taught the present king of the Netherlands, by whom he was afterwards decorated. Line 5 from end of article, omit the words string quartets, and add to list of works, three trios for piano and strings, a sextet for piano, flute, oboe, horn, cello, and double-bass. Of the many duets for piano and violin, thirty-three were written with De Bériot, the greater part of which are original, one was written in conjunction with Lafont, one with Artôt, and two with Ernst. (Died Nov. 1893.)

OTELLO. Line 3 of article, *for* in *read* Dec. 4. Add:—2. Opera in 4 acts; libretto, founded on Shakespeare, by Arrigo Boito, music by Verdi. Produced at La Scala, Milan, Feb. 5, 1887.

OTTO, Melitta, *née* Alvsleben, born 1845[1] at Dresden, was taught singing there by Thiele at the Conservatorium, and made her début at the opera in the autumn of 1861 as Margaret of Valois, appearing subsequently as Irene and Bertha. She remained a member of the company until 1873, having married Max Otto, an actuary, in 1866. Her parts comprised Anna in 'Hans Heiling,' Rowena in 'Templer und Jüdin,' Queen of Night, Alice, Martha, Eva, etc. She acquired a great reputation as a concert singer, and was the solo soprano at the Beethoven Centenary at Bonn in 1871. She first appeared in England at Mme. Schumann's concert, St. James's Hall, March 20, 1873; at the Crystal Palace, March 22; at Manchester, in Bach's Passion music; at the Albert Hall, April 2 and 7. She made a great success, and remained in England until 1875, appearing most frequently at the Crystal Palace and Albert Hall, notably in the revivals of 'Theodora,' Oct. 30, 1873, and the 'Christmas Oratorio,' Dec. 15, 1873. She sang at the Philharmonic, March 25, 1874; at the Leeds Festival in 'St. John the Baptist' and Schumann's 'Paradise and the Peri,' etc., in 1874; at the Sacred Harmonic, the Wagner, Mr. Bache's, the Ballad, and principal provincial concerts, etc. She returned to Dresden in 1875, and sang in opera there and at Berlin and Hamburg. She was engaged at Hamburg in 1880 and gave 'Gastspiele' at Leipzig. In the same year she was re-engaged at the Dresden opera. [A.C.]

OÙ PEUT-ON, etc. After note 2 *add* in Appendix.

OURY, Mme. Line 4 of article, *for* 1806 *read* 1808.

OUSELEY, Sir F. A. G. P. 618 *a*, l. 8, *after* Dr. Corfe *insert* who was succeeded in 1884 by Dr. C. H. H. Parry.

OVERTURE. P. 621 *b*, l. 4, *for* clarinet *read* chalumeau.

OXFORD. In the additional list of Doctors of Music given on p. 624 *b*, add to Wainwright his Christian name, Robert; and that of Marshall, William. At end of paragraph add that in 1883 an honorary degree of Mus. D. was conferred upon Mr. C. V. Stanford. For the additional information promised at end of article, see Degrees in Appendix, vol. iv. p. 609.

P.

PACCHIEROTTI, Gasparo. P. 626 *a*, at beginning of second paragraph, add that on his second visit to London he was engaged by Sheridan for the season (1782–3) at a salary of £1150, with a benefit. Six lines below, correct the date of Galuppi's death to 1784. [J.M.]

PACHMANN, Vladimir de, born at Odessa, July 27, 1848. His father was a professor in the University there, and an amateur violinist of considerable celebrity. Before taking up his residence in Russia, he had lived in Vienna, where he came in contact frequently with Beethoven, Weber, and other great musicians of the time. He was his son's teacher, and ultimately sent him, at the age of 18, to the Conservatorium of Vienna, where he remained two years under Professor Dachs. He obtained the gold medal, and returned to Russia in 1869, when he made his first appearance as a pianist, giving a series of concerts which were very successful, although the young artist was not contented with his own performances. He refused to appear again for eight years, during which time he engaged in hard study. At the end of this long period of probation, he played at Leipzig, Berlin, and elsewhere, but again he was his own severest critic, and after a time he once more retired for two years. Being at last satisfied with his own achievements, he gave three concerts in Vienna, and subsequently three in Paris, and was uniformly successful. On May 20, 1882, he appeared in London at one of Mr. Ganz's orchestral concerts, playing the Eb Concerto of Beethoven, and achieving a brilliant success. Since this time he has occupied a very high position in the estimation of musicians and the public. He has played in all the principal cities of Europe, and when in Copenhagen received the rank of Chevalier of the illustrious order of Dannebrog. Although his individuality is too strong and too little under control to allow of his being considered a perfect player of concerted music, yet as a solo player, more especially of the works of Chopin, he is justly and unreservedly admired. In April 1884 he

[1] According to Baptie's Dictionary.

married his pupil, Miss Maggie OKEY, who had attained very considerable success as a pianist. She reappeared at a Crystal Palace Concert on Nov. 26, 1887, in Schumann's Concerto. [M.]

PACINI, GIOVANNI. Line 2 of article, *for* Feb. 19 *read* Feb. 17. P. 627 *a*, l. 5, the date given applies only to 'L'ultimo giorno di Pompei'; 'Niobe' was produced in 1826.

PALADILHE, ÉMILE. Add the following to the article in vol. ii. p. 634:—The first important work of Paladilhe's, 'Suzanne,' having had but a moderate success in spite of the merit of its first act, a delicately treated idyll, the young composer turned his attention to the concert-room, and produced a work entitled 'Fragments Symphoniques' at the Concerts Populaires, March 5, 1882. It is a composition of no extraordinary merit, but some of the songs which he wrote at the time are exceedingly graceful. On Feb. 23, 1885, his 'Diana' was brought out at the Opéra-Comique, but only played four times. The libretto was dull and childish, and the music heavy and crude, without a ray of talent or passion. Undismayed by this failure, Paladilhe set to work on a grand opera on Sardou's drama 'Patrie.' Legouvé, who has always shown an almost paternal affection for Paladilhe, and who was anxious to make amends for the failure into which he had led the composer by his libretto of 'L'Amour Africain,' obtained from Sardou the exclusive right of composing the music for Paladilhe. The work was given at the Opéra, Dec. 20, 1886, and at first was successful beyond its merits. His operatic method is that of thirty years ago, and he is deficient in real invention. He has disregarded the course of musical development, and thus, though he is young in years, his style is already old-fashioned. In Jan. 1881 he was decorated with the Légion d'Honneur. [A.J.]

PALESTRINA. P. 636 *b*, l. 12 from bottom, *for* 1563 *read* 1564. P. 640 *a*, l. 7, *for* 1562 *read* 1582,

PARISIENNE. After reference at end of first paragraph, *add* in Appendix.

PARRATT, WALTER, was born Feb. 10, 1841, at Huddersfield, Yorkshire, where his father, Thomas Parratt, was a fine organist and at the head of his profession. The boy displayed much precocity and was thoroughly grounded by his father at an early age. At 7 years old he took the service in church, and at the age of 10 he played on one occasion the whole of the 48 preludes and fugues of Bach by heart, without notice. He thus laid the foundation of that affectionate and intimate knowledge of Bach's music which now distinguishes him. His predilection for the organ was no doubt grounded on his father's example and on his familiarity with Conacher's organ factory, which he haunted when very young. At any rate he was an organist from the beginning. At 11 years of age he held his first appointment at Armitage Bridge Church. After a few months he was sent to school in London, and became a pupil of George Cooper's; but the school was unsatisfactory, and in a short time he was recalled to Huddersfield, and became organist of St. Paul's, where he remained till 1861. In that year he received the appointment of organist to Lord Dudley, at Witley Court in Worcestershire. Here he had time and opportunity for study, of which he availed himself. His next steps were to the parish church, Wigan, in 1868; to Magdalen College, Oxford, in 1872, and to St. George's Chapel, Windsor, his present post, *vice* Sir G. Elvey, in 1882. In 1873 he took the degree of Mus. Bac. at Oxford, and in 1883 was chosen Professor of the Organ in the Royal College of Music. He is conductor of the Madrigal Society of Windsor, and 'Passed Grand Organist' of the Freemasons.

His publications comprise an anthem, 'Life and Death,' to words by Dean Stanley, a valse-caprice, three songs, and a piece or two for the organ in the 'Organist's Quarterly.' He wrote the music for the performance of 'Agamemnon' at Oxford in June 1880, and to 'The Story of Orestes,' Prince's Hall, June, 1886. Mr. Parratt's gifts are very great. His playing needs no encomium, and in addition his memory is prodigious, and many stories of curious feats are told among his friends. His knowledge of literature is also great and his taste of the finest. He has been a considerable contributor to this Dictionary, and supplied the chapter on music to Mr. Humphry Ward's 'Reign of Queen Victoria' (Longmans, 1887). He is a very hard worker, and the delight of his colleagues, friends, and pupils. Nor must we omit to mention that he is an extraordinary chess-player. [G.]

PARRY, C. H. H. Line 13 from end of article, *for* A minor *read* A♭. Add that he received the degree of Mus. D. from the University of Cambridge in 1883, and in the next year succeeded Dr. Corfe as Choragus of the University of Oxford, receiving the degree of Mus. D. in the following year. He is Professor of Composition and Musical History in the Royal College of Music. To the list of his works the following are to be added:—Symphony in G, no. 1, Birmingham Festival, 1882; Do. no. 2, in F, Cambridge University Musical Society, 1883, and (in a remodelled form) Richter, 1887; music to 'The Birds' of Aristophanes, Cambridge, 1883; 'Suite Moderne,' Gloucester Festival, 1886, and at a London Symphony Concert in the following winter; Sonata for piano and violoncello in A; Theme and vari-

ations for piano in D minor; Partita for piano and violin in D minor; Trio for PF. and strings in B minor; Quintet for strings in E♭; two sets of 'Characteristic popular tunes of the British Isles,' arranged for PF. duet; two sets of English Lyrics, and one set of Shakespearean sonnets (songs); Choral Ode, set to Shirley's words, 'The glories of our blood and state,' from 'The Contention of Ajax and Ulysses,' Gloucester Festival, 1883; Do. 'Blest Pair of Sirens' (Milton) Bach Choir, May 17, 1887, and Hereford Festival, 1888; and Oratorio 'Judith,' Birmingham Festival, 1888. Director of R. C. M. née Grove, 1895. Knighted, Easter, 1898. [M.]

PARSIFAL. Add that the first performance took place at Bayreuth, July 30, 1882. On Nov. 10 and 15, 1884, it was performed as a concert under Mr. Barnby's direction at the Albert Hall, with Malten, Gudehus, and Scaria in the principal parts.

PART-BOOKS. The Polyphonic Composers of the 15th and 16th centuries very rarely presented their works to the reader in Score. Proske, indeed, tells us that examples are sometimes to be met with, both in MS. and in print, of the genuine *Partitura cancellata*—*i. e.* the true barred Score, as opposed to the semblance of a Score resulting from Hucbald's method of writing between an unlimited number of horizontal lines,[1] or the early practice of employing, as in the Reading MS., a single Stave comprehending lines and spaces enough to include the aggregate compass of an entire composition.[2] Moreover, the English Student will scarcely need to be reminded that our own Morley has given examples, in genuine Score, at pp. 131–142, and many other places of his 'Plaine and Easie Introduction.' But examples of this kind are the exceptions which prove the rule; since, usually, the Polyphonists preferred to issue their works in the separate Parts, and generally, in separate volumes, well known to students of mediaeval Music as 'the old Part-Books.'

Of these Part-Books, the greater number may be divided into three distinct classes.

In the first class—that of the true representative Part-Book—each Vocal-Part was transcribed, or printed, in a separate volume.

In the second class, the Parts were indeed transcribed, or printed, separately; but, in the form called, in early times, *Cantus lateralis*: *i. e.* side by side, and one above the other, in such a manner that the whole number of Parts could be seen, at one view, on the double pages of the open book, and that all the performers could sing, at once, from a single copy of the work.

In the third class, the plan employed was that known in Germany as Tafel-Musik; the Parts being arranged side-ways and upside-down, so that four performers, seated at the four sides of the little table on which the open book was placed, could each read their own Parts the right way upwards.

The most famous, and, with one exception only, by far the most perfect and beautiful specimens of the first class are those published, at Venice and Fossombrone, at the beginning of the 16th century, by Ottaviano dei Petrucci, the inventor of the art of printing Music from moveable types. Of these now exceedingly rare and costly Part-Books, more than fifty volumes have been catalogued, since the time of Conrad Gesner, who, however, in his 'Pandecta' mentions some few which cannot now be identified. Many of these are now known only by an unique exemplar, which, in some few cases, is imperfect. A rich assortment of these treasures is preserved at the Liceo Comunale at Bologna; and most of the remainder are divided between the Libraries of Vienna, Munich, and the British Museum—the last-named collection boasting eleven volumes, comprising ten complete and two imperfect sets of Parts. In the following complete list of Petrucci's publications, as far as they are now known,[3] those in the British Museum are indicated by an asterisk, and those at Bologna, Munich, Vienna, Rome, and Berlin, by the letters B, M, V, R, and Ber.

Harmonice Musices Odhecaton. A. Venice, 1501.[4] May 14. (B. and Paris Conservatoire.)

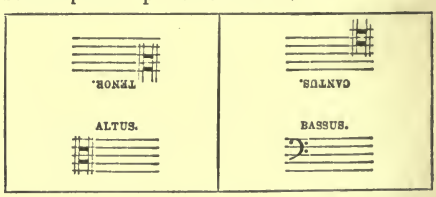
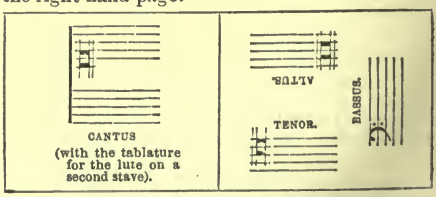
The execution of these rare Part-Books is above all praise. The perfection of their typography would have rendered them precious to

1 See vol. iii. p. 427 *a*.
2 See vol. iii. p. 428.
3 The discovery of some additional copies in Italy is reported as these pages go to press.
4 But see Vernarecci as to this date.
5 These two editions are unnoticed by Schmid.



collectors, even without reference to the value of the Compositions, which, but for them, would have been utterly lost to us.[1] Each Part is printed in a separate volume, oblong 4to, without a title-page at the beginning, but with a Colophon on the last page of the Bassus, recording the date and place of publication. In one instance only has the brilliancy and clearness of the typography been surpassed. The British Museum possesses the unique Bassus Part of a collection of Songs, printed by Wynkin de Worde in 1530, which exceeds in beauty everything that has ever been produced, in the form of Music-printing from moveable types, from the time of its invention by Petrucci until now. The volume[2] is an oblong 4to, corresponding very nearly in size with those of Petrucci; but the Staves are much broader, and the type larger, the perfection of both being such as could only be rivalled at the present day by the finest steel engraving. The volume contains nine Songs *a* 4, and eleven, *a* 3, by Fayrfax, Taverner, Cornyshe, Pygot, Ashwell, Cowper, Gwynneth, and Jones; and, at the end of the book is the first leaf of the Triplex, containing the title and index only. This, unhappily, is all that has hitherto been discovered of the work.

Petrucci's successors were as far as those of Wynkin de Worde from approaching the excellence of their leader—and even farther. The separate Parts of Palestrina's Masses, and the Madrigals of Luca Marenzio, printed at Venice in the closing years of the 16th century, though artistic in design, and in bold and legible type, are greatly inferior, in execution, to the early examples; and the Motets of Giovanni Croce published by Giacomo Vincenti (Venice 1605) are very rough indeed. The nearest approach to the style of Petrucci is to be found in the earlier works printed, in London, by John Day; the 'Cantiones Sacræ' of Tallis and Byrd, printed by Thomas Vautrollier (London, 1575); and the earlier works published by Thomas Est, under the patent of William Byrd[3], such as Byrd's 'Psalmes, Sonets, and Songes of Sadnes and Pietie' (1588) and his 'Songs of sundrie natures' (1589). But Est's later productions, including the second book of Yonge's 'Musica Transalpina' (1597), and the works of the later Madrigalists, are far from equalling these, and little, if at all, superior to the later Italian Part-Books.



The finest Part-Books of the second class, presented in Cantus lateralis, are the magnificent MS. volumes in the Archives of the Sistine Chapel; huge folios, transcribed in notes of such gigantic size that the whole Choir can read from a single copy, and adorned with illuminated borders and initial letters of exquisite beauty. In these, the upper half of the left-hand page is occupied by the Cantus, and the lower half, by the Tenor; the upper half of the right-hand page by the Altus, and the lower half by the Bassus. When a Quintus is needed, half of it is written on the left-hand page, below the Tenor, and the remainder (*reliquium*) below the Bassus, on the right-hand page. When six Parts are needed, the Quintus is written below the Tenor, and the Sextus, below the Bassus. Books of this kind seem to have been less frequently used in England than in Italy; unless, indeed, the MSS. were destroyed during the Great Rebellion.[4]

The finest printed examples of this class are, the large folio edition of Palestrina's First Book of Masses (Roma, apud heredes Aloysii Dorici, 1572) and the still finer edition of 'Hymni totius anni' (Roma, apud Jacobum Tornerium et Bernardinum Donangelum, 1589). A very beautiful example of this kind of Part-Book, on a small scale, will be found in Tallis's 'Eight Tunes,' printed, by John Day, at the end of Archbishop Parker's metrical translation of the Psalms (London, 1560); and one not very much inferior, is Thomas Est's 'Whole Booke of Psalmes' (London, 1592). Ravenscroft's 'Briefe Discourse,' (1606), is a very rough example; and the 'Dodecachordon' of Glareanus (Basle, 1547), though so much earlier, is scarcely more satisfactory, in point of typography.

The third class of Part-Books, designed to be read from the four sides of a table, was more common in England than in any other country. One of the best-known examples is that given in the closing pages of Morley's 'Plaine and easie Introduction' (London, 1597 and 1606), in which the parts are presented in a rectangular arrangement, each part facing outwards as the book is placed open on the table.

In Douland's 'First Booke of Songs or Ayres,' a still more complicated arrangement is dictated by the necessity for accommodating a Lutenist by the side of the Cantus, the part for these two performers appearing on two parallel staves on the left-hand page, while the other three voices share the right-hand page.

An interesting example of this class is 'Le Parangon des Chansons,' printed by 'Jaques

[1] Facsimiles will be found in 'Ottaviano dei Petrucci da Fossombrone,' by Anton Schmid (Vienna, 1845), and 'Ottaviano dei Petrucci da Fossombrone,' by Augusto Vernarecci (2nd edit. Bologna, 1882). The student may also consult Catelani, 'Bibliogr. di due stampi ignoti da Ottav. dei Petrucci' (Milan), and the Catalogue of Kitner.

[2] K. 1. e. 1.

[3] See vol. iv. p. 572 *a*.

[4] A large folio MS. of this kind, containing a Mass by Philippus de Monte, was lent to the Inventions Exhibition of 1885 by Miss Rivington, and another exceedingly fine specimen, containing a Gloria a 5, written by Fayrfax for his degree of Mus. D. was lent to the same exhibition from the Lambeth Palace Library.

Moderne dict Grand Jacques' (Lyon, 1539–41) in 9 volumes, containing 224 Songs, *a* 4, and 32 *a* 2 and 3, so arranged, that the Superius and Tenor sit facing each other, on opposite sides of the table—the Superius reading from the lower half of the left-hand page, and the Tenor from the upper half; while the Bassus and Altus occupy the same positions with regard to the right-hand page.

The rapid cultivation of Instrumental Music in the 17th and 18th centuries, naturally exercised a great influence upon the Part-Books of the period. Scores, both vocal and instrumental, became more and more common: and the vocal and instrumental Part-Books gradually assumed the form with which we are familiar at the present day. [W.S.R.]

PART-WRITING (Free Part-Writing; The Free Style; German, *Stimmführung*). When the Polyphonic Schools were abandoned, in the beginning of the 17th century, in favour of the newly-invented Monodic Style, the leaders of the revolutionary movement openly professed their contempt for Counterpoint, and for every form of composition for which it served as the technical basis. Vincenzo Galilei thought it puerile; Monteverde made a pretence of studying it, under Ingegneri, but never paid the slightest attention to its rules; neither he, nor any other disciple of the Monodic School, ever suggested a better system to supply its place. But musicians like Giovanni Gabrieli, Bernadino Nanini, and Leo Hasler, could not content themselves with a stiff and ungraceful Melody, accompanied only by a still more stiff and unmelodious Continuo. Still less could their successors, Colonna, and Alessandro Scarlatti, in Italy, and the ancestors of the great Bach family in Germany, dispense with the effect producible by a number of voices or instruments, combined in accordance with a well-arranged system of harmonious concord. On the other hand, the gradual abandonment of the Ecclesiastical Modes opened the way for many new forms of treatment, and rendered many older ones impossible. Yielding therefore, from time to time, to the necessities of the case, these true apostles of progress gradually built up a new system, which, while relinquishing no part of the old one which it was possible or expedient to retain, added to it all that was needed for the development of a growing School, marked by peculiarities altogether unknown to the earlier Polyphonists.

In order to understand the changes introduced into the new system of Part-writing, by the pioneers of the modern Schools, we must first briefly consider the changed conditions which led to their adoption.

The daily increasing attention bestowed upon Instrumental Music played an important part in the revolutionary movement. When voices were supported by no accompaniment whatever, it was necessary that they should be entrusted with the intonation of those intervals only which they were certain of singing correctly in tune; and on this point the laws of Counterpoint were very precise. When instrumental support was introduced, it was found that many intervals, previously forbidden on account of their uncertainty, could be used with perfect security; and, in consequence of this discovery, the severity of the old laws was gradually relaxed, and a wide discretion allowed to the composer, both with regard to pure instrumental passages, and vocal passages with instrumental accompaniments.

Again, the complete abandonment of all the Ecclesiastical Modes, except the Æolian and Ionian, led to a most important structural change. In the older style, the composer was never permitted to quit the Mode in which his piece began, except for the purpose of extending its range by combining its own Authentic and Plagal forms.[1] But, he was allowed to form a True Cadence[2] upon a certain number of notes, called its Modulations.[3] As it was necessary that these Cadences should all terminate upon Major Chords, they involved the use of a number of Accidentals which has led modern writers to describe the Modulations of the Mode as so many changes of Key, analogous to the Modulations of modern Music. But the Modulations of the Mode were no more than certain notes selected from its Scale, like the Dominant and Sub-Dominant of the modern Schools; and, in applying the term Modulation to a change of Key, the technical force of the expression has been entirely changed, and the word itself invested with a new and purely conventional meaning.[4] When it became the custom to use no other Modes than the Ionian and Æolian—the Major and Minor Modes of modern Music—and to change the pitch of these Modes, when necessary, by transposition into what we now call the different Major and Minor Keys, it was found possible to change that pitch many times, in the course of a single composition—in modern language, to modulate from one Key to another. But, this form of Modulation was quite distinct from the formation of true Cadences upon the Regular and Conceded Modulations of the Mode; and it necessarily led to very important changes in the method of Part-writing.

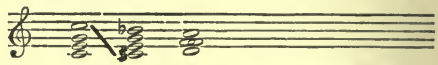
Another striking characteristic of the new School—closely connected with that of which we have been speaking—was manifested in the construction of its Cadences. The principle of the Polyphonic Cadence was based upon the melodic relation of two real parts.[5] The Cadence of the modern School is based upon the harmonic relation of two successive Chords.[6] And, naturally, the two forms demand very different treatment in the arrangement of the vocal and instrumental parts.

Finally, the free introduction of the Chromatic genus, both in Melody and in Harmony, opened a wide field for innovation in the matter of

[1] See vol. ii. p. 338-9. [2] See vol. iv. p. 592. [3] See vol. ii. 351 b.
[4] The Latin words *Modula* and *Modulatio* simply mean a tune.
[5] See vol. iii. p. 742; also vol. iv. App. p. 592.
[6] See vol. i. pp. 290 *et seq.*

Part-writing. Neither in Harmony nor in Melody was the employment of a Chromatic Interval permitted, in the Strict Counterpoint of the 16th century.[1] The new School permitted the leap of the Augmented Second, the Diminished Fourth, and even the Diminished Seventh; and, by analogy, the leap of the Tritonus, and the False Fifth, which, though Diatonic Intervals, are strongly dissonant. The same intervals and other similar ones were also freely employed in harmonic combination; for the excellent reason that, with instrumental aid, they were perfectly practicable, and exceedingly effective.[2]

These new conditions led, step by step, to the promulgation of an entirely new code of laws, which, taking the rules of Strict Counterpoint as their basis, added to or departed from them, whenever, and only whenever, the new conditions rendered such changes necessary or desirable.



The new laws, like those of the older code, were at first entirely empirical. Composers wrote what they found effective and beautiful, without being able to account, upon scientific principles, for the good effect produced. It was not until Rameau first called attention, in the year 1722, to the roots of chords, and the difference between fundamental and inverted harmonies,[3] that any serious attempt was made to account for the prescribed progressions upon scientific principles, or that the essential distinction between the so-called 'vertical' and 'horizontal' methods was satisfactorily demonstrated:[4] and, even then, the truth was only arrived at, after long and laborious investigation.[5]

We shall best understand the points of difference between the two systems by referring to the general laws of Strict Counterpoint, as set forth in vol. iii. p. 741–744.

The 'Five Orders' of Strict Counterpoint are, theoretically, retained in Free Part-writing, though, in practice, composers very rarely write continuous passages in any other than the Fifth Order,[6] which includes the four preceding ones, and, in the new style, admits of infinite variety of rhythm.

The four Cardinal Rules remain in force, though their stringency is slightly modified, in their relation to 'Hidden Consecutives.' In one respect, however, the severity of the law is increased. In Strict Counterpoint, there is no rule forbidding the employment of Consecutive Fifths by contrary motion;[7] while, in the Free Style, the progression is severely censured.

In Free Part-writing of the First Order, it is not necessary to begin with a Perfect Concord. Melodic leaps, in any interval, whether diatonic or chromatic, are freely permitted. The employment of more than three Thirds or Sixths in succession is not prohibited. Dissonant harmonies, both fundamental and inverted, may be used with the freedom of consonances, provided only that they be regularly resolved. Chromatic chords may be freely introduced; and, as a natural consequence of their employment, the law which relates to the treatment of False relations —especially, that of the Octave—has undergone considerable modification, as in cases analogous to the following, which is perfectly lawful in the free style—

Among these innovations, one of the most important—perhaps the most important of all—is the natural result of the introduction, by Monteverde, of the Unprepared Discords so carefully avoided in Strict Counterpoint.[8] Not only is the harmony now known as that of the Dominant Seventh[9] freely permitted without any form of preparation whatever; but, the Licence is extended to the Dominant Ninth, whether Major or Minor:[10] the Diminished[11] and Augmented Triads; the three forms of the Augmented Sixth; the Diminished Seventh; and even to double Dissonances, sounded simultaneously. Combinations tolerated, in Strict Counterpoint, as Suspensions only, and therefore strictly confined to the Fourth Order, may be treated in Free Part-writing without preparation, and used in the First Order as Appoggiaturas. Dissonant Harmonies may be employed as freely as Fundamental Concords; and the Licence is comprehensive enough to include all possible combinations of this character, provided only that the percussion of the Discord be followed by its legitimate resolution. And so great is the change of style effected by the introduction of this salient feature, that had the progress of the movement been arrested here, it would still have sufficed to separate the Polyphonic from the Modern Schools, by an impenetrable barrier.

In the Second Order, it is not necessary that the Minim on the Thesis should always be a Concord, or that every Discord should lie between two Concords. All that is prescribed, in place of this rule, is, that the Discord, whether struck upon the Thesis or the Arsis, must be followed by its correct harmonic Resolution, upwards or downwards, either in the next note or the next note but one—or at most two.

In the Third Order these conditions are still farther relaxed. The Crotchets may proceed to Discords by leap, either on the strong or the weak parts of the measure, falling into figures

[1] One of the earliest known instances of the employment of the chromatic genus in Polyphonic Music will be found in a canzonet by Giles Farnaby, 'Construe my meaning' (1598) lately edited by Mr. W. B. Squire. The English School was always in advance of all others in innovations of this kind.

[2] It is true that, at the present day, these intervals are freely employed in unaccompanied vocal passages; but, they are only safe now, because our vocalists have so long been accustomed to sing them with instrumental assistance.

[3] See Sir George Macfarren's remarks upon this subject, in the Encyclopædia Britannica, art. 'Music.'

[4] See vol. i. p. 672.

[5] An attempt has been made to claim for Dr. Alfred Day the credit of having first clearly explained the difference between the Strict and the Free Styles; but the distinction had already been clearly demonstrated by Albrechtsberger more than half a century earlier.

[6] A remarkable exception to this will be found in the opening movement of the *Credo*, in Bach's great Mass in B minor.

dominated by Appoggiaturas or Mordents at will. Or, they may take all the notes of a given Chord, in succession, in the form of an Arpeggio, either with or without Appoggiaturas or Mordents between them, as in the following examples: all that is necessary being the ultimate Resolution of every Dissonance into a Consonant Harmony:—

In the Fourth Order, it is not necessary that the Syncopation should invariably be prepared in a Concord. On the contrary, it may, in certain cases, be even struck, suspended, and resolved, in combination with two or more successive Discords, as in the following example—

In the Fifth Order, as in the Fifth Order of Strict Counterpoint, the Rules and Licences prescribed in connection with the first four Orders are combined; while much additional freedom is derived from the rhythmical involutions resulting from the intermixture of notes of different length.

The highest aim of Strict Counterpoint was, the perfect development of Unlimited and Limited Real Fugue—*i. e.* Imitation, with all its most complicated devices, and Canon. The highest aim of Free Part-writing is the perfect development of Tonal Fugue. And as the Real Fugue of the 16th century could only be developed, in its most complex forms, by the aid of Double, Triple, and Quadruple Counterpoint, so, for the development of the more modern Art-form, it was necessary to invent corresponding Orders of Double, Triple, and Quadruple Free Part-writing—that is to say, combinations of two, three, four, or even a greater number of parts, which could be placed in any required order, above, below, or between each other, without injury to the harmony; in the absence of which provision, the successful manipulation of a Subject with two, three, or more Counter-Subjects, would have been impossible. The rules for these devices were, *mutatis mutandis*, very nearly analogous to those observed in Strict Counterpoint: the chief points insisted on being, that the Parts could not be permitted to cross each other—since this would have nullified the effect of the desired inversion; and, that two consecutive Fourths could not be permitted, since these, when inverted, would become consecutive Fifths.

The Polyodic School,[1] which was gradually developed in connection with this species of Part-writing, reached its culminating point of perfection under Handel and Bach, in the earlier half of the 18th century. Both these Composers observed exactly the same laws; but the student can scarcely fail to notice the strongly-marked individuality with which they applied them. Though constantly using the most dissonant intervals, both in harmony and melody, Handel delighted in consonant points of repose; and to these his Music owes much of the massive grandeur which is generally regarded as its most prominent characteristic. Sebastian Bach delighted in keeping the ear in suspense; in constantly recurring collisions of discord with discord, which allowed the ear no repose. And this fearless determination to give the ear no rest, enabled him to interweave the Subjects of his Fugues with a freedom which has rarely, if ever, been rivalled. Both masters made free use of every resource provided by the progress of Art: but, while Bach dwelt lovingly upon the discords, Handel used them only as a means of making the concords more delightful, and thus attained a sweetness of expression which Bach never attempted to cultivate.

But, the influence of the new School of Part-writing was not confined, like that of Strict Counterpoint, to the development of one single form of Composition alone. It made itself felt in Instrumental Music of every kind; and, in no case more prominently than in the Sonata-Form of the classical period.

Passages such as those we have described, in speaking of Part-writing of the Third Order—Arpeggios, with or without Appoggiaturas or Mordents between their principal notes; Scale passages, and the like, when written in notes of very brief duration, and executed with rapidity, form an essential element in Instrumental Music. When accompanied simply, with long-drawn harmonies, they are purely Monodic—Instrumental Melodies, supported upon a harmonized Bass. But they are not always confined to a single Part; and, in that case, they form a connecting link between the Monodic and Polyodic Styles—between the 'vertical' and the 'horizontal' methods of modern criticism. In Strict Counterpoint, the 'vertical' method, characterized by the formation of long passages upon the harmony of a single Chord, was impossible. Its passages were formed by horizontally interweaving together a number of independent Melodies. In Free Part-Writing, 'vertical' and 'horizontal' passages succeed each other frequently. In Bach's Fantasia and Suite in G Major, the opening Arpeggios of the Prelude are distinctly Monodic, and vertically constructed; while the massive harmonies which succeed them are distinctly Polyodic, and constructed on the 'horizontal' method. Vertical passages, interspersed with Free Part-writing, are constantly found in Handel's finest Choruses—*e. g.* 'Worthy is the Lamb,' and 'The horse and his rider.' The contrast is less frequently found in the Choruses of Bach;

[1] So called, in contradistinction to the Monodic School, by which it was immediately preceded.

but it may be seen sometimes—as in the 'Et vitam venturi' of the Mass in B Minor. In Beethoven's Sonatas, we meet it at every turn. To mention two instances only; the Rondo of the 'Sonate pathétique,' and the final Variations in the Sonata in E Major, op. 109, exhibit the contrast in its most strongly-marked form. In the works of Wagner, the two methods are so closely combined that it is sometimes scarcely possible to separate them. The Leading-Themes are interwoven in Free Part-writing as ductile and as fearless as that of Bach himself; while an occasional burst of sustained harmony unites the strongest characteristics of the 'vertical' and 'horizontal' methods, in a single passage.

It will be seen from what we have already said, that Free Part-writing was no new invention peculiar to the 17th and 18th centuries, but a gradual development from the Strict Counterpoint of the 16th century. It is not, therefore, to be wondered at, that it can only be successfully studied by those who have previously mastered the laws of Strict Counterpoint, in all their proverbial severity. So true is this, that before writing Exercises in the Free Style, Beethoven studied Strict Counterpoint in the Ecclesiastical Modes, first under Haydn, and then under Albrechtsberger, as his exercise-books conclusively prove. Schubert felt it so strongly that, at the moment of his death, he was actually in treaty with a well-known teacher of the time, for lessons in Counterpoint. Modern progress would have us believe that it is unnecessary for the student to master the rule, so long as he makes himself familiar with the exceptions. Time will prove whether this system is, or is not, more profitable than that which Beethoven followed, and which Schubert, after all he had already attained, was preparing to follow, when an early death put an end to his astonishing career. [W.S.R.]

PASDELOUP, Jules Étienne. Add to article in vol. ii. p. 659, the following:—After a popularity of many years' duration, during which the Concerts Populaires acquired an almost universal celebrity, and did much to develop musical taste in France, and to cultivate the symphonic school of music, the enterprise rapidly declined. The Sunday Matinées at the theatres were formidable rivals to Pasdeloup's concerts, besides which the public taste which he had done so much to train was turning altogether in the direction of the concerts given by MM. Colonne and Lamoureux, whose standard of performance was more careful, and who succeeded better in gauging the requirements of the audience. Under these circumstances Pasdeloup, after vain efforts to reinstate himself in public favour, decided to resign, and closed the Concerts Populaires in April 1884, the 23rd year of their existence. On May 31, 1884, a grand festival benefit was organized in Pasdeloup's honour at the Trocadéro, by which a sum of nearly 100,000 francs was raised; all French artists, whether composers, singers or instrumentalists, joined to contribute towards assuring a competence for the excellent man who had done so much to make the fortunes of many artists without furthering his own interests. After this exhibition of gratitude and charity M. Pasdeloup would have done well to remain in well-earned retirement; in the winter of 1885, however, he organized concerts at Monte Carlo, and afterwards founded pianoforte classes in Paris. At the conclusion of the educational course he gave paying concerts of chamber music. In Oct. 1886, after Godard had failed (in 1884) in his attempt to reconstruct the Concerts Populaires, Pasdeloup began a new series with the old title, giving one concert a month from Oct. 1886 to March 1887, with a sacred concert on Good Friday. This inopportune revival, with a conductor weakened by age and illness, and an inefficient orchestra, could not possibly succeed. Pasdeloup did not long survive the cessation of the concerts, and died at Fontainebleau on Aug. 13, 1887, from the effects of paralysis. [A.J.]

PASQUALATI. Add that Beethoven's 'Elegischer Gesang' (op. 118), was written in memory of Eleonora Pasqualati, who died in 1811, and dedicated to her husband, Baron Pasqualati. [See vol. iv. p. 537.]

PASQUALI, Nicolò, a composer who settled in Edinburgh about 1740 until his death in 1757. He published numerous compositions, an opera called 'L'Ingratitudine Punita,' songs in 'The Tempest,' 'Apollo and Daphne,' and 'The Triumph of Hibernia,' as well as the 'Solemn Dirge in Romeo and Juliet.' Most of these are printed in the 'XII English songs in score,' dated 1750, and published in London. Two sets of sonatas, one for violin and bass, and one for two violins, tenor and thoroughbass, were also published in London. 'XII Overtures for French horns' (!) were printed in Edinburgh, 'for Rob. Bremner, the assigney of Signor Pasquali'; and the book by which his name is best known, 'Thoroughbass made Easy,' was published in Edinburgh in the year of his death. [M.]

PASSACAGLIA. Add that the form has recently been introduced into the symphonic structure, by Brahms, in whose Symphony in E minor, no. 4 (op. 98), the finale is an exceedingly elaborate passacaglia.

PASSION MUSIC. Besides the work mentioned at the end of the article, Bach wrote four other settings of the story of the Passion. The Passion according to St. John, which is now as well known in England as its grander but not more inspired companion work, was first performed in the Thomaskirche on Good Friday, April 7, 1724. These two masterpieces happily came into the hands of Emanuel Bach, and were thus preserved in their integrity; the other three works were left to Friedemann Bach, by whom they were sold for a small sum; two of them have so far entirely disappeared. Of these last, one was a setting according to St. Mark, performed on Good Friday, 1731, in the Thomaskirche, and the other seems to have been set to

words by Picander, in the year 1725. The remaining one was a Passion according to St. Luke, the autograph of which is extant in the possession of Herr Joseph Hauser of Carlsruhe. There is no doubt that Bach wrote the MS. at some time between 1731 and 1734, but from internal considerations it is equally certain that it was not then newly composed. If the whole composition is ultimately proved to be genuine, it must be assigned to a very early period of Bach's career, probably to the first Weimar period; the question of its authenticity must be still regarded, however, as an open one, although there are many numbers in the work which bear evident traces of Bach's style. A great boon has been recently conferred upon lovers of music by the publication of the work in vocal score (Breitkopf & Härtel, 1886). The whole subject of the Passion settings is discussed at length in Spitta's Life of Bach, book v. chap. vii.

The four settings by Heinrich Schütz, mentioned on p. 665 *b* have been published in Breitkopf & Härtel's complete edition of that composer's works, vol. i, and his Matthew Passion has also appeared in vocal score. [M.]

PASTORALE. Line 20 of article, *for* in May *read* on March 19.

PATON, Mary Anne. Line 2 of article, *for* master *read* writing-master. Last line but one of same column, *for* July 22 *read* July 23. P. 673 *a*, l. 15 from bottom, *for* 1854 *read* 1864. [W.H.H.]

PATRICK, Richard. *Omit the words* (sometimes called Nathan or Nathaniel). That name belongs to a composer whose 'Songs of sundry natures' were printed by Este in 1597.

PATTI, Adelina. Line 2 of article, *for* Feb. 19 *read* Feb. 10. Both parents of Mme. A. Patti were Italians, her father having been born at Catania, Sicily, and her mother at Rome. The latter's maiden name was Chiesa, and before her marriage with Signor Patti she had married a certain Signor Barilli. Their son, Antonio Barilli, a musician, died at Naples, aged 50, June 15, 1876. (Pougin, Supplement to Fétis.) In 1885 Mme. Patti was divorced from the Marquis de Caux, and in 1886 married M. Nicolini. [See above, p. 731 *b*.] [A.C.]

PAUKEN. The German name for Kettle Drums, commonly used in orchestral scores. See Drum, vol. i. p. 463. [V. de P.]

PAVAN. For another description of the dance see Bishop Earle's 'Microcosmographie,' ed. by Bliss (Nares's Glossary).

PAXTON, Stephen. Add that he died Aug. 18, 1787, aged 52, and was buried in St. Pancras old churchyard. [W.H.H.]

PEDALIER. The sentence in lines 7–11 of the article is to be corrected, as recent researches made by Mr. Dannreuther leave scarcely any doubt that these works were intended for the organ. Add that Gounod has written a suite concertante for pedal piano with orchestra, and a fantasia for the same on the Russian National Hymn, both for Mme. Lucie Palicot, by whom the former was introduced at the Philharmonic on April 21, 1887.

PEDALS. P. 682 *a*, l. 22, *for* wrote once only up to F *read* wrote twice up to F and once up to F♯.

PENTATONIC SCALE. The name given to an early tonality, of very imperfect construction, but extremely beautiful in its æsthetic aspect, and peculiar to a great number of National Melodies, especially those of Scotland.[1]

The term is an unfortunate one, since it leads us to expect a Scale based upon five intervals of a Tone; whereas, it really means a Scale formed from the combination of five fixed sounds.

No written record tending to throw a light upon the origin or history of the Pentatonic Scale has been preserved; but the construction of the Scale itself furnishes us with a very valuable clue. The five sounds employed—*Ut, Re, Mi, Sol, La*—correspond exactly with those of the Hexachord, minus the *Fa*. Now the *Fa* was precisely the *crux* which prevented the completion of the system of the Hexachords, with their various Mutations,[2] until the difficulty was removed by the invention of the *Fa fictum*[3]—presumably by Guido d'Arezzo[4]—in the opening years of the 11th century. It is, therefore, more than probable that the Pentatonic Scale belongs to a period anterior to that date: how far anterior, it is absolutely impossible even to hazard a guess.

The characteristics of the Scale led to certain marked peculiarities in the form of the Melodies for which it was employed; and there is abundant proof that these peculiarities were continued, as a feature of 'style,' after the invention of the Hexachords supplanted the older tonality by a more perfect system: for instance, the Melody of 'The Flowers of the Forest,' which cannot have been composed before the year 1513, exhibits, in its first strain, the strongest possible pentatonic character, while the second strain is in the pure Hypomixolydian Mode (Mode VIII) —assuming, that is, the F♮ to be genuine; a fact of which the Skene MS. leaves but little doubt.

The Chinese Melody, 'Chin chin joss,' introduced by Weber into the Overture to 'Turandot,' is, if we may trust an apparently uncorrupted copy, in the Pentatonic Scale; though some versions introduce an F♮, which would reduce it to the Mixolydian Mode (Mode VII). [W.S.R.]

PENTATONON (*πεντάτονόν*). The Greek term for the interval known in Modern Music as the Augmented Sixth, which consists, in the aggregate, of five Tones; *i. e.* two Greater and two Lesser Tones, and one Diatonic and one Chromatic Semitone.

The term cannot be correctly applied to the Minor Seventh, since, though this contains the aggregate of five Tones, in Equal Temperament, it contains more than that in Just Intonation—

1 See Scotish Music.
2 See Hexachord, vol. i; Mutations, vol. ii.
3 See Fa Fictum, Appendix.
4 See Guido d'Arezzo, Appendix.

viz. two Greater and two Lesser Tones, and two Diatonic Semitones. [W.S.R.]

PERGOLESI. P. 688 *a*, l. 20 from bottom, add that before the successful performance of 'La Serva Padrona' in France it had failed there in 1746.

PETRELLA, ENRICO. Line 2 of article, *for* Dec. 1 *read* Dec. 10. P. 696 *a*, l. 2, add date of production of 'Le Precauzioni' May 20, 1851, at Naples, and add 'Elena di Tolosa,' 1852. Line 4, *for* 1855 *read* 1854. Add that his last work was 'Bianca Orsini,' produced at Naples, April 4, 1874. A more correct chronological list than that given by Mendel will be found in Pougin's supplement to Fétis, art. Petrella.

PETRUCCI, O. DEL. Line 4 of article, *for* June 14 *read* June 18. Line 11 from bottom of same column, *for* shortly after that he probably died *read* he died May 7, 1539. See PART-BOOKS, above, p. 739.

PETZMAYER, JOHANN, born in Vienna, 1803, the son of an innkeeper. When he was 18 years old he obtained a common zither, and taught himself to play it with such success that his performances brought a considerable amount of custom to his father. His fame spread in higher quarters, and it was not long before he became the fashion in Vienna. He even played before the Emperor. In later life he took to the bowed zither (Streich-Zither) instead of the ordinary kind he had previously used. In 1833 he made a successful tour in Germany, and in 1837 was made Kammervirtuos to Duke Maximilian of Bavaria. He was living in Munich in 1870. (Wurzbach's Biographisches Lexicon, vol. 22.). [M.]

PFEIFFER, GEORGES, pianist and composer, was born at Versailles, Dec. 12, 1835. His first piano lessons were from his mother, Mme. Clara Pfeiffer, an excellent pianist of the school of Kalkbrenner. Maleden and Damcke first taught him composition. He gained a brilliant success at the Conservatoire concerts in 1862. His compositions include a symphony, a quintet, trios, sonatas, concertos, of which the 3rd has been repeated several times in Paris. Also an oratorio, 'Agar'; a symphonic poem, 'Jeanne d'Arc'; an overture, 'Le Cid,' and a quantity of piano music, including some well-known studies. His last important work is a comic opera, 'L'Enclume,' represented in 1884 and '85. M. Pfeiffer is a partner in the piano firm of Pleyel, Wolff & Cie, Paris, and although he has fully maintained his artistic reputation he has yet found time to devote serious attention to this business. He succeeded his father, Emile Pfeiffer in this position. His great uncle, J. Pfeiffer, was one of the pioneers of piano-making in Paris. [A.J.H.]

PHILHARMONIC SOCIETY. P. 698*b*, l. 9, to the list of treasurers add the name of Charles E. Stephens, who was elected on the secession of Walter C. Macfarren after the season of 1880. The office of treasurer has been honorary since the foundation of the Society, except in seasons 1836 to 1840, inclusive. Complete the list of secretaries as follows: Henry Hersee (1881–1884); Francesco Berger (1885). The office of secretary became honorary in 1883. The office of conductor was originally honorary, except in the case of some special engagements, and was performed by one or other of the directors. After the first three concerts in 1844, Mendelssohn was engaged for the remaining five, and, in 1845, Sir Henry Bishop for the whole series, but at the third concert he withdrew on the plea of illness, and Charles Lucas officiated in his stead; Moscheles was engaged for the remaining five concerts of the season. For subsequent conductors see pp. 699 and 700; and below, for completion to the present time.

The list on pp. 699 and 700 is continued as follows :—

N.B. • denotes that a work was composed for the Society; † that it was first performed in England in the year named. 1st app. signifies first appearance at the Philharmonic.

1881. (Six concerts). Dr. Francis Hueffer appointed annotator of programmes, in succession to Sir G. A. Macfarren. Dramatic Symphony, 'Roméo et Juliette,' Berlioz (given twice during the season). • Sinfonietta in A (MS.), F. H. Cowen. Overtures — 'Waverley,' Op. 1, Berlioz; 'Sigurd Slembe,' J. Svendsen. † P.F. Concerto, No. 2, in C minor (MS.) Xaver Scharwenka. Liederkreis, Op. 98, Beethoven. 1st app. Sofie Menter, Eugène d'Albert, Ovide Musin, Hope Glenn, Sembrich, Albani, F. Boyle, Herbert Reeves, King, and Ghilberti.

1882. (Six concerts). † Poème Symphonique, 'Hungaria,' Liszt. Overtures—† 'Ossian' (MS.) F. Corder; † 'The Veiled Prophet,' Stanford. † PF. Concerto in G minor, Sgambati. Violin Concerto in A minor, Molique. Scena, 'Che vuoi, mio cor' (MS.) Mendelssohn. The Centurion's Song (Boadicea), Dr. J. F. Bridge. Chorus of Reapers (Prometheus), Liszt. Choral Symphony, Beethoven; † Choral Ode, 'Nänie,' Brahms. † Chorus for female voices, 'Die Nixe,' Rubinstein. Selection from 'Preciosa,' Weber. † 'Paradise Lost,' Rubinstein. 1st. app. Sgambati, Kufferath, Annie Marriott, Edith Santley, Marion Fenna, Eleanor Farnol, Ellen Orridge, Sophie Hudson, F. Barrington Foote, Ludwig. First season of a voluntary choir (trained by the Society's Conductor, Mr. W. G. Cusins).

1883. (Six concerts.) Prize of ten guineas offered for the best Overture. Forty-six submitted, anonymously. Adjudicator, Sir Michael Costa, assisted, in his serious illness, by Sir Julius Benedict and Mr. Otto Goldschmidt. • Ballade for Orchestra, 'La Belle Dame sans Merci,' Mackenzie. † Fantaisie Ecossaise, Violin, Max Bruch. † Scena, 'Marie Stuart's Farewell,' Benedict. † Prize Overture, 'Among the Pines,' Oliver A. King. † Motet, 'Adjutator in opportunitatibus,' Cherubini; † Pastorale and 'Angel's Message' (Christus), Liszt. The Choral Fantasia, the Chorus of Dervishes, and the March and Chorus in 'The Ruins of Athens,' Beethoven. 1st app. Pachmann, Teresina Tua, Minnie Gwynne, Mierzwinsky, Ernest Laris. At the close of this season Mr. W. G. Cusins resigned the office of conductor, which he had held for 17 years.

1884. (Six concerts.) Conductors (honorary for this season), George Mount, Dr. C. V. Stanford, J. Francis Barnett, F. H. Cowen. Symphonies—† No. 4, in B♭ minor, Cowen; in D Op. 60; † Overture, 'Husitska,' and Rhapsodie (Sclavische), No. 2, Op. 45, Dvořák; Symphony, No. 2, in D, Op. 73, Brahms. Saltarello, Gounod. PF. Concerto in C minor, Op. 185, Raff. Double bass Concertino in F♯ minor, Bottesini. † Scène religieuse, 'O déplorable Sion!' (Racine's Esther), A. G. Thomas. 1st app. Clara Asher, Gertrude Griswold and W. J. Winch. Herr Dvořák made his first appearance in England this season, at the invitation of the directors.

1885. (Six concerts.) Sir Arthur Sullivan appointed conductor. Annotator of the first and part of the second programmes, Dr. Francis Hueffer; of part of the second and the third, Mr. Charles E. Stephens (*ad interim*), after which Mr. Joseph Bennett was appointed. Prize of twenty guineas offered for the

best Overture. Eighty-eight submitted, anonymously. Adjudicators, Messrs. W. H. Cummings, George Mount, and Charles E. Stephens. *Symphony, No. 2, in D minor (MS.) and PF. Concerto in G minor, Op. 23, Dvořák. †Symphonic Poem, 'Johanna d'Arc,' Moszkowski. *Orchestral Serenade, T. Wingham. † Dramatic Overture (Prize Composition), Gustav Ernest. Symphony, No. 3, in F, Brahms. 1st app. Clotilde Kleeberg, Oscar Beringer, Franz Rummel, Elly Warnots, Minnie Hauk, Marie Etherington, Carlotta Elliot, Mary Beare, Florence Major, Iver M'Kay, Arthur Thompson, A. C. Oswald, and W. H. Brereton. Herr Moszkowski made his first appearance in England this season, at the invitation of the directors.

1886. (Six concerts). Symphonies—No. 3, in F, Prout; *in C minor, St. Saëns. *Orchestral Scene, 'The Forest of Arden,' Gadsby. *Suite in F, and †Violin Concerto in C, Moszkowski. Pastoral Introduction, and Overture to second part of 'The Light of the World,' Sullivan. Overture, 'Graziella,' Bottesini. †Violin Concerto in A minor, Op. 53, Dvořák. Ingeborg's Lament (Frithjof), Max Bruch. 1st app. Frickenhaus, Fanny Davies, Tivadar Nachèz, Ondříček, Antoinette Trebelli, Agnes Larkcom.

1887. (Eight concerts.) Symphonies—No. 3, in C minor, 'The Scandinavian,' Cowen; No. 4, in E minor, Brahms; in F, Hermann Goetz. *Suite 'Roumanian,' Corder. Overtures—†'Kenilworth,' Macfarren; 'Di ballo,' Sullivan. 'Loreley,' Max Bruch. Quatuor Concertant, Oboe, Clarinet, Horn, and Bassoon, with Orchestra, Mozart. † Concerto for Piano-Pedalier (MS.) Gounod. †Vocal duet, 'Hark, her step' (MS., a revised setting for the Opera, 'The Canterbury Pilgrims'), Stanford. †Aria, 'Per questa bella mano,' with Contrabasso obbligato, Mozart. * Prayer of Nature (Byron), MS., Randegger. 1st app. Schönberger, Josef Hofmann, Lucie Palicot, Marianne Eissler, Nettie Carpenter, Marie de Lido, Ella Russell, Lillian Nordica, Nevada. At the close of the season Sir Arthur Sullivan resigned the conductorship, which he had held for 3 years.

1888. (Seven concerts.) Mr. F. H. Cowen appointed Conductor. Symphonies—in G (from an early set of six), Haydn; in D, and Norwegian Rhapsody, No. 2, Svendsen. Overtures—'Romeo and Juliet,' Macfarren; 'Œdipus,' Stanford; 'Siegfried Idyll,' Wagner. †Music to a 'Walpurgis Night,' Widor. †Serenade for strings, and †Tema con Variazioni from third Orchestral Suite, Tschaikowsky. Suite, selected by F. A. Gevaert from works by Rameau. Petite Suite, 'Jeux d'enfants,' Bizet. Pastoral Suite, J. F. Barnett. Two elegiac Melodies for strings, Grieg. * Three mythological pieces, 'Aphrodite,' 'Vulcan' and 'Pan,' Silas. Scotch Rhapsody, No. 1, Mackenzie. Song of Judith, Prout. 1st app. Fräulein Soldat, Otto Hegner, E. Grieg, A. Hollins, Liza Lehmann, Eleanor Rees, Mme. Fursch-Madi, Mrs. Hutchinson, Hilda Wilson, Carl Mayer. Herren Tschaikowski, Grieg and Svendsen, and M. Widor made their first appearance in England this season, at the invitation of the directors. After the fifth concert, Mr. Cowen, having been appointed Musical Conductor at the Melbourne Exhibition, was released from completing his engagement at the Philharmonic, and Herr Johan Svendsen, of Copenhagen, conducted the last two concerts of the season.

It is ardently to be hoped that a society so active in promoting the cause of true art, and in encouraging the composition of works of high aim, may long continue to pursue its honoured career. [C.E.S.]

* PHILLIPPS, Adelaide, a contralto singer, counted as American, though born in England at Stratford-on-Avon, in 1833. Her father was a chemist and druggist, and her mother, who was of Welsh birth, was a teacher of dancing. The family emigrated to America in 1840, going first to Canada, and then to Boston, Mass. Adelaide was early instructed in dancing by her mother, and on Jan. 12, 1842, made her first appearance on the stage at the Tremont Theatre, Boston, as an 'infant prodigy.' On Sept. 25, 1843, she began an engagement at the Boston Museum; she remained at this house eight years, playing a great variety of parts besides dancing, alone or with one or both of two brothers. Occasional trips to Philadelphia and New York were taken at this period. Her vocal gifts soon attracted the attention of connoisseurs, and, in 1850, she was introduced to Jenny Lind, then on a professional tour in America. The great singer advised the young actress to give herself up to the study of music, a subscription-list was started for the purpose of paying for her training, and she was sent to Manuel Garcia in London. She had before this received some instruction in music at home from Mme. Arnoult, a teacher of repute in her day, and Thomas Comer, a cultivated English musician and the director of the orchestra at the Boston Museum. Another fund was subscribed to enable Adelaide to pursue her studies for the opera in Italy. On Dec. 17, 1854, she made a début at the Teatro Carcano, Milan, as Rosina. In Aug. 1855 she returned to Boston, and in October appeared at a concert in Music Hall. She was then engaged for a series of operas of the English ballad school—'The Duenna,' 'The Devil's Bridge,' and 'The Cabinet'—at the Boston Theatre. Her American début in Italian opera was at the Academy of Music, New York, March 17, 1856, as Azucena in 'Il Trovatore.' Her success secured for her an engagement for five seasons. She went first to Havana, and subsequently to Paris (where she sang Azucena at Les Italiens in Oct. 1861), Madrid, Barcelona, and through Hungary and Holland. Her repertory comprised all the contralto parts in the operas that held their places on the Italian stage during the twenty-five years that she was known as an opera-singer. In 1879 she became identified with the Boston Ideal Opera Company, devoted to the presentation of operettas. She appeared with this company for the last time in Boston, on the Museum stage, where her early triumphs had been won, on Nov. 30, 1880. Her last appearance on any stage was at Cincinnati in December 1881. Miss Phillipps was a universal favourite with American audiences as a concert and oratorio singer. From Dec. 31, 1860, when she sang in the 'Messiah,' to Nov. 24, 1878, when she took part in Verdi's Requiem, she was a frequent and a welcome contributor to the concerts of the Handel and Haydn Society in Boston. In Sept. 1882, the state of her health induced her to go to Carlsbad. Some improvement was detected, but there came a sudden relapse, and she died on Oct. 3, 1882. Her remains were carried to Boston, and subsequently buried at Marshfield, Massachusetts, where the family had long lived on a fine estate purchased by Adelaide. She left a sister, Mathilde, also a contralto of excellent reputation in America, and three brothers. Brothers and sister were alike indebted to Adelaide for their education and start in life. Miss Phillipps's personal reputation was the best that a woman could enjoy. She was especially noted for her freedom from professional jealousy, and for her readi-

* Copyright 1889 by F. H. Jenks.

ness to advise and encourage young singers. Her life was one of constant and hard labour, the care of a large family having early in life been thrown upon her, but she was always patient and cheerful. [F.H.J.]

PHILP, ELIZABETH, born 1827 at Falmouth, educated at Bristol under the care of Mary Carpenter, was taught singing by Manuel Garcia, and received instruction in harmony and composition from Hiller at the last-named place. She afterwards devoted herself to teaching singing and composition. Her first works were published in 1855, and comprised a Ballad, 'Tell me, the summer stars,' words by Edwin Arnold; also six songs from Longfellow, etc. Among other of her compositions we may name her setting of songs from 'The Water Babies,' of Elizabeth Barrett Browning's 'Inclusions' and 'Insufficiency,' of Victor Hugo's 'Chant des Lavandières,' also arranged by her as a duet; 'Le Soupir' (Prudhomme); 'Lillie's good morning,' 'Lillie's good night'; Duets 'The Moon is up,' and 'It was the time of roses; Part-songs, 'What is Love?' 'The Owl in the Ivy Bush,' etc. many of which were sung by herself and other vocalists at her own concerts, and became popular. Miss Philp was also the author of 'How to sing an English Ballad.' She died in London Nov. 26, 1885. [A.C.]

PHRASING. P. 707 *a*, l. 7, *for* dominant *read* subdominant.

PIANOFORTE, P. 713 *b*, l. 8, concerning Frederick the Great's pianofortes see SILBERMANN, vol. iii. p. 494 *b*. The examination of the one at the Neues Palais was made at the request of the writer, who had peculiar facilities for examining the pianofortes and harpsichords at Potsdam and Berlin accorded to him by H.I.H. the Crown Princess (since Empress) of Germany. P. 719 *a*, l. 19 from bottom, add that Isaac Hawkins took out the London patent for his son John Isaac Hawkins the inventor, who was at that time living in Philadelphia, U.S.A. P. 720 *a*, l. 14 from bottom, add that Pierre Erard had patented a system of fixed iron bars in Paris in 1822. He could not do so in London, being barred by Stodart's (Thom & Allen's) patent. Stodart refrained from opposing the Broadwoods when James Shudi Broadwood took out his patent for stringplate and bars in 1827. The writer had this particular information from Mr. Joseph Ries who died in 1882. *For* tension bars, *throughout the article, read* iron bars. P. 723, in the synopsis of inventions, etc., the date of John Broadwood's first 5½ F–C octave piano should be 1790, and that of his first six-octave C–C piano should be 1794. [A.J.H.]

P. 743 *a*, l. 2, add death of Kullak, 1882. In the table on p. 744 the following corrections are to be made:—Col. *a*, death of Schobert to be altered to 1767; birth of Nanette Streicher (Stein) to 1769. Col. *b*, birth of Kalkbrenner to 1784, and that of Lucy Anderson to 1790; death of Benedict added, 1885, and Mme. Oury's birth corrected to 1808. Col. *c*, J. Kufferath's death to be added, 1882; do. Hiller and W. H. Holmes, 1885; do. Liszt, 1886, and Voss, 1882; Döhler's death to be corrected to 1858. P. 745, col. *a* of table, omit date of Ravina's death, and insert those of Kullak, 1882; Mortier de Fontaine, 1883; Lacombe, 1884; Gutmann, 1882; Evers, 1875; and Köhler, 1886. Litolff's birth to be corrected to 1818, and that of Horsley to 1822. Col. *b*, add deaths of Wehle, Moritz Strakosch, Lindsay Sloper, 1887; and Jaell, 1882. Col. *c*, add dates of deaths of Ritter,

1886, and Brassin, 1884, whose birth is to be altered to 1836. Col. *d*, add date of death of C. V. Alkan, May 1888.[1]

PIATTI, Alfredo. Add day of birth, Jan. 8.

PICCINNI. P. 748 *a*, l. 27 from bottom, *for* 17 *read* 27. P. 748 *b*, l. 28, *for* Feb. 20 *read* Feb. 22; l. 19 from bottom, *for* Feb. 28 *read* Feb. 25.

PICCOLOMINI, Maria. The date of birth is 1836, as given by Pougin, Paloschi, and Mendel. Lines 5–6 of article, *for* Signors Mazzarelli and P. Romani *read* Signora Mazzarelli and Signor Pietro Romani. P. 751 *b*, l. 6, *for* April 33 *read* April 30, and add that the occasion was the second performance of the opera, which had been produced on the 26th of the month. In 1884 a testimonial was set on foot for the artist, who was reported to be in reduced circumstances. ('Daily News,' March 21, 1884.)

PIETEREZ, Adrian, born at Bruges early in the 15th century, is the earliest known organ-builder in Belgium. He built an instrument in 1455 at Delft, which is still in the new church; but it has been so often restored that nothing remains of his work. [V. de P.]

PIETOSO, 'pitiful' or 'compassionate.' As a musical direction it indicates that the passage to which it refers is to be performed in a sympathetic style, with much feeling. Although the term appears in Brossard's Dictionary, where it is defined as 'd'une manière capable d'exciter de la pitié ou de la compassion,' it is not to be found in Beethoven's works, and the 'romantic' composers, in whose music it might be expected to occur frequently, seem to prefer other terms to indicate the same intention. 'Con duolo' is Weber's favourite equivalent, and most composers find 'espressivo' sufficiently definite. [M.]

PILGRIME VON MEKKA, DIE. Line 4 of article, add that it had been previously played at Schönbrunn with French words in 1764, that it was produced in German in Vienna in 1776, and in Paris, as 'Les Foux de Medina,' 1790.

PINSUTI, Ciro. Add date of death, March 10, 1888.

PIRATA, IL. Line 3, *for* in the autumn of, *read* on Oct. 27.

PISCHEK, Johann Baptist. See vol. iii. p. 54 *a*.

PITTMAN, Josiah. Add date of death, April 23, 1886.

PIXIS. Line 14 from end of article, *for* Dec. 21 *read* Dec. 20.

PIZZICATO. Add that early instances of the use of this effect are to be found in Handel's 'Agrippina,' 'Pastor Fido,' 'Terpsichore,' and in an air by Hasse, written for Mingotti in 1748.

PLAIN SONG. Add to references on p. 765 *b*, and 766 *a*, a reference to Gregorian Tones in Appendix, vol. iv. p. 655.

[1] The news of Alkan's death in Paris arrived after the earlier sheets of this Appendix were printed.

PLANTÉ, François, born at Orthez in the Basses Pyrenées, March 2, 1839, appeared in Paris at a very early age as an infant prodigy, playing the piano with much success. In Dec. 1849 he entered Marmontel's class at the Conservatoire, and in the following year carried off the first prize. He was then before the public again as a performer, for some three years, during which time he played frequently at the chamber concerts given by Alard and Franchomme; in 1853 he returned to the Conservatoire to study harmony under Bazin. Here he obtained a second prize in 1855. It must be regarded as a fortunate circumstance that, at a party at which he was playing, the audience persisted in talking to an extent that highly offended Planté; whereupon he retired in great wrath to the Pyrenees, where he remained for nearly ten years, becoming familiar with the compositions of all schools, and counteracting the evils which necessarily accompany such a career as his had hitherto been. He did not reappear in Paris until 1872, when he devoted himself to playing on behalf of various charitable objects. A series of concerts given with Alard and Franchomme established his position, and thenceforth he has held a distinguished place among French pianists. He has undertaken many successful concert-tours on the Continent, and appeared in England in 1878. His playing is characterized by repose, maturity of style, and rare intelligence. He is Chevalier of the Légion d'honneur. (Pougin's supplement to Fétis.) [M.]

PLAYFORD, John. Add that he commenced business as a book publisher about 1648. His first musical publication was 'The English Dancing Master: or Plaine and easie rules for the dancing of Country Dances,' with the tune to each dance, bearing the date 1651, but really issued in or about Nov. 1650, which became very popular, and during the next 80 years, under the title of 'The Dancing Master,' ran through 18 editions. [W.H.H.]

Line 8 of article, *for* 1679 *read* 1681. Line 10, the date 1680 should probably be 1681, as in that year his house at Islington was advertised for sale, and it is not likely that he would have set up the house in Arundel Street before getting rid of his former residence. Line 12 from end of article, the date of Henry Purcell (the younger's) death should probably be 1703.

PLEYEL. P. 3 *b*, correct date of Camille Pleyel's birth to Dec. 18, 1788. (Pougin; Mendel's supplement.) Line 23 from bottom, *after* Moke *add* or Mooke. *Add* Berlioz in 1830 was violently in love with her, as an episode in his great passion for Miss Smithson; and her coolness after his departure for Rome nearly caused him to commit a frightful crime. See his Biography, chap. 34, and 'Lettres intimes,' xxvii–xxxiii. Also in M. Jullien's 'Hector Berlioz,' 1888.

PLEYEL & CO. Line 12 of article, add date of death of Henri Pape, Feb. 1887.

POHL, C. F. Line 13 from end of article, add that the second volume of the Life of Haydn was published in 1882, and that the third is in course of completion by Herr Mandyczewski, to whom Herr Pohl left his materials at his death, which took place in Vienna, April 28, 1887.

POHLENZ, Christian August. See vol. iii. p. 54 *b*, in which, *for* which he appears to have held for nine years (p. 55 *a*, l. 1), *read* he had held since 1827.

POLLEDRO, G. B. Line 12 of article, *for* that year *read* the previous year.

POLLINI, Francesco. Add a second christian name, Giuseppe. Correct date of death to Sept. 17, 1846.

POLLITZER, Adolphe, was born at Pesth in 1832, and after studying music in his native town, in 1842 went to Vienna, where he studied the violin under Böhm, and composition under Preyer. After gaining the first prize at the Conservatorium in 1846, he went on a concert tour through the principal towns of Germany, and finally went to Paris, where he continued his studies under Alard. By the advice of Erard, in 1851 Mr. Pollitzer came to London, where he has since resided, having occupied the position of leader at Her Majesty's Opera, the Royal Choral Society, the New Philharmonic, and a professorship at the London Academy of Music. He has written violin concertos and solos which are still in manuscript. [W.B.S.]

POLONAISE. P. 11, last line but one before first musical example, *for* major seventh *read* leading note.

POLONINI. P. 11 *b*, l. 2 from end, add that he died in the autumn of 1880.

PONCHIELLI, Amilcare. Add that 'La Gioconda' was produced with success at Covent Garden, May 31, 1883, and that the composer died Jan. 16, 1886. Among his last compositions is a hymn in memory of Garibaldi, performed in Sept. 1882. His last work of all was an opera in 3 acts, 'Marion Delorme,' produced at the Scala, March 17, 1885. In April, 1881, Mr. Carl Rosa produced his 'Promessi Sposi' at Birmingham.

POPULAR ANCIENT ENGLISH MUSIC. Add that the author of 'Popular Music of the Olden Time,' etc., Mr. W. Chappell, died Aug. 20, 1888, at his house in Upper Brook Street. See the obituary notice in the 'Musical Times' for September, 1888.

PORTA, Costanzo, born at Cremona (1520–30?); studied under Willaert at Venice, where his motets (Bk. I) were printed in 1555 (Draudius alone giving 1546 as the date of their first issue); became a Franciscan monk; was chapel-master at Osimo till 1564; then held similar posts at Padua, first perhaps in the cathedral, for the 52 Introits published in 1566, are dedicated to the cathedral chapter, and later in the church of S. Antonio. These Introits, designed for the Sundays throughout the year, and a second set of the same for saints' days, were among the first works printed by Claudio Merulo, the organist of St. Mark's, Venice, who wrote of Porta as 'his very dear friend and one with very few equals in his profession.' Merulo's opinion has been endorsed by all competent critics down to our own times, and by common consent Porta ranks as one of the great contrapuntal masters. Arisius, moreover, speaks of him as proficient in all the liberal arts.

In 1569 he left Padua to become chapel-master at Ravenna, and one of the teachers in the boys' school founded in that city in 1568 by the young cardinal Giulio Feltrio della Rovero, who had lately been appointed archbishop and was meditating reforms in the music of his cathedral, in accordance no doubt with the recent decisions of the council of Trent. The school was a success, and Porta had several good pupils, but with reform in music itself he had scant sympathy. Composers indeed at that time were passing through a period of depression. Forbidden any longer to use in their choirs works of the older masters which they reverenced, and had hitherto regarded as models for their own art, they were now called upon to supply new compositions written under such conditions in respect of simplicity and brevity as must greatly have lessened the interest in their task. Porta disliked the introduction of new masses. His mind was 'hostile' to the duty of composing them; scruples of all kinds assailed him. 'I thought,' he writes, 'it behoved me rather to guard from an unjust oblivion the works which the great composers have left to posterity, so apt as they are to their purpose, so full of beauty, delight, and charm.' Accordingly, for many years he published nothing, but in 1575 the archbishop, in granting his request to be removed from Ravenna to the church 'della Santa Casa' at Loreto in succession to Pionerio, extracted from him a more distinct promise to publish some new works, urging him to aim at a style which would make it not only *possible* but even *very easy* to hear the words of the mass, and recommending *brevity* as specially suitable to Loreto, where it was an object not to tire the large congregations of pilgrims in all ranks of life, who came to worship at the shrine. Porta, however, still delayed. Further pressure was put upon him. His word, he was told, had been given and his honour was at stake. Moreover the serious illness of the Archbishop in 1577 may have warned him to delay no longer the fulfilment of his promise. So, at length, without resting day or night, and with great anxiety of mind, he prepared 12 masses, the first six (*a* 4) of a simple character, and the rest (*a* 5 and *a* 6, and some settings of the Agnus Dei *a* 7 and *a* 8) of somewhat more elaborate design. The dedication was signed July 4, 1568, and addressed to the Archbishop, who died two months later (Sept. 3). A copy of this work, which must be rare, since certain dates fixed by the preface have not been given in former accounts of the composer, is now in the British

Museum. The masses are of great interest, for they belong to the same period as the three famous masses of Palestrina, and owe their existence and style to the same circumstances. Leaving Loreto, Porta went back to Ravenna; for Pomponius Spretus, describing the entry of Cardinal Sforza into that city on Nov. 6, 1580, mentions the performance of 'a delightful piece of music composed by M. Costanzo Porta of Cremona, the first musician of the time, and chapel-master of our cathedral.' To this year belong 52 motets (*a* 5, 6, 7, 8), from which Burney has chosen the elaborate 'Diffusa est gratia' to print in his History. In 1585 a set of motets (*a* 6) were dedicated to Pope Sixtus V, from the title-page of which we know that Porta had returned to Padua as chapel-master in the cathedral. In 1595 he was appointed to the church of S. Antonio 'for the second time,' and held this post till his death in June 1601. An assistant, B. Ratti, had been appointed the previous year to help him on account of his great age. Many extracts from his works are given in modern notation by Paolucci, Choron, Martini, Proske, etc. A curious example is the piece which Hawkins has copied from Artusi, a 4-part setting of 'Vobis datum est nosce mysterium' which can be sung upside down. Four books of madrigals represent Porta's contribution to secular music. [J.R.S.-B.]

PORTOGALLO. Line 2 of article, add Christian name, MARCANTONIO. Line 4, *for* in 1763 *read* March 24, 1762. Line 11 from end of article, add exact date of death, Feb. 7, 1830.

POTT, AUGUST. Add that he died in Nov. 1883.

POTTER, CIPRIANI. P. 23 *a*, l. 27, *for* Sterndale Bennett *read* Charles Lucas (corrected in late editions). Add that on March 8, 1824, he introduced Beethoven's C minor Concerto at the Philharmonic Concert.

POUGIN, ARTHUR. Add the most important of his later works, a 'Life of Verdi,' published first in Italian, 1881, and translated by J. E. Matthew, 1887.

PRACTICAL HARMONY. Lines 14, 15, of article, *for* vols. i. and ii. alone *read* all the volumes.

PRAETORIUS. P. 25 *b*, l. 19 and note 3, *for* 1518 and 1519 *read* 1618 and 1619. Add that Fétis's date is correct. The order of publication of the 'Syntagma' is as follows:—

Vol. I. Part 1. Wolfenbüttel, 1614; Part 2. Wittenberg, 1615.

Vol. II. Part 1. Wolfenbüttel, 1619; Part 2. ditto, 1620. [W.B.S.]

PRENTICE, THOMAS RIDLEY, born July 6, 1842, at Paslow Hall, Ongar, entered the Royal Academy in 1861, studying the piano under Mr. Walter Macfarren, and harmony and composition under the late Sir. G. A. Macfarren. In 1863 he obtained the Silver Medal and the Potter Exhibition. On leaving the institution he was elected an associate, and since that time has been chiefly engaged in pianoforte teaching. In 1869 he started 'monthly popular concerts' at Brixton, which were carried on for five years, the assistance of first-rate artists being secured, and many new works, both English and foreign, being performed. For some years he gave an annual concert at the Hanover Square Rooms. At the Crystal Palace he played Beethoven's Rondo in B♭ with orchestra, for the first time in England. [See vol. iv. p. 538, no. 151.] For some time he held the post of organist at Christ Church, Lee Park. In 1880 he was appointed professor of the piano at the Guildhall School of Music, and in the same year he organized an extremely successful series of 'twopenny concerts' in Kensington Town Hall, especially intended for the working class. During the two seasons in which the scheme was carried on, many artists of eminence appeared; and chamber music of a high class was given. In 1881 he became professor at the Blackheath Conservatoire of Music. His compositions include a cantata, 'Linda,' for female voices, several anthems, 'Break forth into joy,' 'I love the Lord,' etc., part-songs, trios, etc., besides numerous songs and pianoforte pieces, among the latter of which may be mentioned a 'Gavotte fantastique,' an elegy, a minuet and trio, etc. He edited six cantatas by Carissimi, with accompaniments, and has lately completed an excellent series of instruction-books for the pianoforte under the collective title of 'The Musician' (Swan Sonnenschein & Co.), in which special stress is laid upon the analysis of musical compositions from the beginning of pianoforte study. [M.]

PREYER, GOTTFRIED. Line 2 of article, *for* March 15, 1808, *read* May 15, 1809.

PRINCESS IDA; OR CASTLE ADAMANT. Comic opera in a prologue and two acts, written by W. S. Gilbert, music by Arthur Sullivan. Produced at the Savoy Theatre, Jan. 5, 1884. The piece was called 'a respectful operatic perversion of Tennyson's "Princess."' [M.]

PROFESSOR. Line 6 of article, *for* 1848 *read* 1847. Page 33 *a*, l. 8, add the date of Dr. C. V. Stanford's election to the Cambridge Professorship, Dec. 1887. Line 21 from bottom of the same column, *for* 1845 *read* 1847. Line 17 from bottom, *for* 1862 *read* 1861.

PROGRAMME-MUSIC. Page 34 *b*, l. 32, omit the mention of Weber's Concertstück, as that is a specimen of intentional 'Programme-music.' The authority for Weber's intention is handed down by Sir Julius Benedict, in his life of Weber. The sentence on p. 35 *b*, l. 4–7 after musical example, is to be omitted, since both Jannequin and Gombert wrote pieces with the title of 'Le Chant des Oyseaux.' The composition by the former is for four voices, and was published in 1551, that of Gombert being for three voices, and published in 1545. Line 30 from bottom of same column, omit the words 'Soprano, Alto, Tenor and Bass,' since the composition referred to is in three parts, not four. It is 'in four parts' in the sense only of being in four sections, or movements. Correct the

sentence beginning 7 lines below, with the words 'Mr. Bird's Battle' by a reference to LESSON, and VIRGINAL MUSIC, where the exact title is given. The detailed title of the piece from which the first examples on p. 36 are taken will be found in the article last mentioned, vol. iv. p. 308 *a*, note 2. P. 36 *b*, l. 19–26, the statement that the titles given by Couperin to his harpsichord pieces have no application in the sense of 'Programme-music,' is to be corrected; to mention but two instances out of many, 'Le Reveil-matin' is as true a specimen of the class as could be found in all music, while 'La Triomphante' exceeds 'The Battle of Prague' as far in graphic delineation as it does in musical beauty. P. 39 *b*, l. 30 from bottom, *for* the preludes 'Tasso,' etc., *read* the symphonic poems, 'Les Préludes,' 'Tasso,' etc.

PROMENADE CONCERTS. P. 40 *b*, l. 8 from bottom, *for* 1851 *read* 1850.

PROPORTION. P. 41 *b*, in the diagram, above the figure 8 in the top row of figures, the sign should be a semicircle, not a circle. The note below the sign is correct.

PROUT, EBENEZER. Add to list of compositions Minuet and trio for orchestra, op. 14; 'Queen Aimée,' a cantata for female voices, op. 21; 'Freedom,' for baritone solo, chorus and orchestra; a Symphony in F, No. 4, op. 22 (Birmingham Festival, 1885); Symphony in D, No. 5 (MS. Oxford, 1886); a Magnificat and Nunc Dimittis in D; a scena for contralto and orchestra, 'The Song of Judith,' Norwich Festival, 1887, etc. Made Prof. of Mus., T. C. Dublin, Easter, 1895.

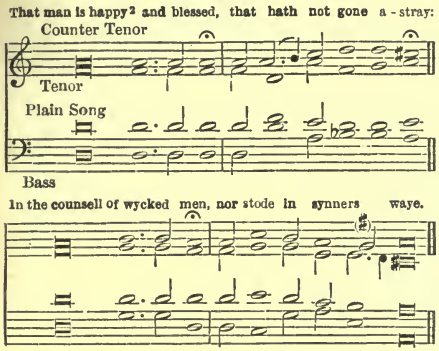
PRUCKNER, CAROLINE, singer and professor, was born at Vienna in 1832, and developed dramatic feeling together with a powerful voice so early in life that, notwithstanding the counsels of prudence, she was heard (at a provincial theatre) in the part of Adalgisa when only 15. An engagement followed in 1850 at the Hanover Court Theatre, where she won much applause as Martha, Susanna, Leonora ('Stradella,') etc. Two years later similar success attended her performances, at Mannheim, of more arduous parts, such as Elvira and Valentine. Thus seemingly launched upon a brilliant career, Caroline Pruckner must have cruelly felt the total loss of her voice in 1855, when she was barely 24 years of age; and it speaks well for the courage and the temper of the budding prima donna that she at once resigned herself in the best possible way by devoting herself to teach the art she loved, especially that branch of it which is concerned with the nursing of the vocal organs (as a part of voice-training), and the healing of injuries done by forcing and other ill-usage. Fräulein Pruckner applied her newly acquired science to her own case; and to some extent her voice recovered its power. It was at Luib's Polyhymnia that she entered upon her professorial life; after two years, in 1870, she opened an independent School of Opera in the Feinfalter Strasse, whence a move was effected in 1887 to the Hohenstaufengasse. Her 'Theorie und Praxis der Gesangskunst' (Schlesinger 1872) has gained for the authoress a wide celebrity, and on the appearance of a second edition (1883), the Grand Duke of Mecklenburg-Schwerin decorated her with a gold medal for art and science. The production of new songs and cantatas is an important feature of the concerts and lectures given at the Schools of Song and Opera by Fräulein Pruckner and her pupils. [L.M.M.]

PSALTER, THE ENGLISH METRICAL, or paraphrastic rhyming translation of the Psalms and Evangelical Hymns, intended to be sung, dates from the third year of King Edward the Sixth, the year 1549; but if we may believe the accounts usually given of the subject, the practice of singing compositions of this nature in England is far older, having existed among the sympathizers with the new doctrines, long before the Reformation; it may even have had its beginnings among the followers of Wycliffe or Walter Lollard. With regard to this supposition, one thing only is certain: Sternhold's translations—the nucleus of the metrical psalter which has come down to us—were not by any means the first. Sir Thomas Wyat the elder had already translated the seven penitential psalms, and the Earl of Surrey three others; and in 1549, the year in which Sternhold's first small work was published, without tunes, there appeared a metrical translation of the Psalter complete, together with the Evangelical Hymns, and music set in four parts, of which the title is as follows:—

The Psalter of David newely translated into Englysh metre in such sort that it maye the more decently, and wyth more delyte of the mynde, be read and songe of al men. Wherunto is added a [1] note of four partes, with other thynges, as shall appeare in the Epistle to the Readar. Translated and Imprinted by Robert Crowley in the yere of our Lorde MDXLIX the XX daye of September. And are to be sold in Eley rentes in Holbourne. Cum privilegio ad Imprimendum solum.[2]

In the 'Epistle to the Readar' the music is described thus:—

A note of song of iiii parts, which agreth with the meter of this Psalter in such sort, that it serveth for all the Psalmes thereof, conteyninge so many notes in one part as be syllables in one meter, as appeareth by the dyttie that is printed with the same.



This book is extremely interesting, not only in itself, but because it points to previous works of which as yet nothing is known. In his preface the author says:—'I have made open and playne that which in other translations is obscure and harde,' a remark which must surely apply to something more than the meagre contributions of Surrey and Wyat; and indeed the expression of the title, 'the Psalter of David, newly translated,' seems clearly to imply the existence of at least one other complete version. The metre is the common measure, printed not,

[1] 'Note' or 'note of song,' was, or rather had been, the usual description of music set to words. At this date it was probably old-fashioned, since it seldom occurs again. In 1544, Cranmer, in his letter to Henry VIII, respecting his Litany, speaks of the whole of the music sometimes as 'the note,' and sometimes as the 'song.'

[2] The unique copy of this book is in the library of Brasenose College, Oxford. Thanks are due to the College for permission to examine it.

as now, in four lines of eight and six alternately, but in two lines of fourteen, making a long rhyming couplet.[1] The verse, compared with other work of the same kind, is of average merit: the author was not, like Surrey or Wyat, a poet, but a scholar turned puritan preacher and printer, who pretended to nothing more than a translation as faithful as possible, considering the necessities of rhyme. But the most interesting thing in the book is the music, which here follows:—

MODE IX.

Its interest is of several kinds. In the first place it is the earliest music to an English metrical version as yet discovered. It is also a double chant, a musical form hitherto supposed unknown till a hundred years later; and it thus shows by what a simple transition the passage from chanting the prose psalter to singing the metrical one might be accomplished. It would be unwise to argue from this single specimen that it was so accomplished, or that we see here the typical early English metrical psalm-tune; but certainly the discovery of this little composition, so obviously intermediate in character, very much diminishes the probability that anything like the chorale form, which soon afterwards prevailed, was known in England at this time.

We now enter upon the history of what afterwards became the authorized version. In the year 1548 or 1549—it is uncertain which, but possibly early in 1549—appeared a small volume with the following title:—

Certayne Psalmes chosen out of the Psalter of David and drawen into Englishe Metre by Thomas Sternhold, Grome of yᵉ Kynges Maiesties Robes. London, Edvardus Whitchurche.'

This volume, which is without date, contains 19 psalms only, in the double common measure, or four lines of fourteen, by Sternhold alone, without music. Sternhold died in 1549, and on Dec. 14 of that year another edition was published, with a new title:—

All such psalmes of David as Thomas Sternehold late groome of yᵉ Kinges Maiesties Robes didde in his lyfetime draw into English metre. Newly imprinted by Edward Whitchurche.

[1] This was the usual way of printing the common measure in Crowley's day, and for many years afterwards.

[2] In the original the reciting note is divided into semibreves, one for each syllable.

Besides the original 19, this edition contains 18 by Sternhold; and, printed as a second part, a supplement of 7 by J. Hopkins, without music. This is the volume which in previous accounts of the subject[3] has been usually described as the first edition; and no mention is made of Hopkins's supplement. It has also been usual to describe the contents as 'fifty-one psalms'; the actual number, it will be seen, is 44. Lowndes mentions a second edition of this work in the following year:—'by the widowe of Jhon Harrington, London, 1550.'

In this year also William Hunnis, a gentleman of the Chapel Royal, published a small selection of metrical psalms, in the style of Sternhold, with the following title:—

Certayne Psalms chosen out of the Psalter of David, and drawen furth into English Meter by William Hunnis. London, by the wydow of John Herforde, 1550.

A copy of this work is in the public library of Cambridge. There is no music. In 1553 appeared a third edition of the volume dated 1549, again published by Whitchurche. This edition contains a further supplement of 7 psalms, by Whittingham, thus raising the number to 51. There is still no music. Lowndes mentions another edition of the same year, 'by Thom. Kyngston and Henry Sutton, London.'

To this year also belongs a small volume containing 19 psalms in the common measure, which is seldom mentioned in accounts of the subject, but which is nevertheless of great interest, since it contains music in four parts. The title is as follows:—

Certayne Psalmes select out of the Psalter of David, and drawen into Englyshe Metre, with notes to every Psalme in iiij parts to Synge, by F. S. Imprinted at London by Wyllyam Seres, at the Sygne of the Hedge Hogge, 1553.[4]

In the dedication, to Lord Russell, the author gives his full name, Francys Seagar. The music is so arranged that all the four voices may sing at once from the same book: the parts are separate, each with its own copy of words; the two higher voices upon the left-hand page, the two lower upon the right; all, of course, turning the leaf together. Though the music continues throughout the book, the actual number of compositions is found to be only two, one being repeated twelve times, the other seven. The first is here given:—

MODE II. Transposed.[5]

[3] Except in that given by Warton, who speaks of *several* editions during Sternhold's lifetime; it is impossible however to corroborate this.

[4] The unique copy of this book is in the library of Emmanuel College, Cambridge. Thanks are due to the College for permission to examine it.

[5] The original is without bars.

It will be perceived that we have not yet quite arrived at a tune. The part next above the bass, in descending by one degree upon the final, performs the office of a cantus firmus, but exhibits no other characteristic of a tune that could be sung alone. The composition is in fact a little motet, full of points of imitation, but capable of repetition. It is written in a style which will be easily recognised by those who are acquainted with Dr. Tye's music to his metrical Acts of the Apostles (also published in this year) or with the four-part song 'In going to my naked bed'; a native style, founded upon the secular part-songs of Fayrfax, Cornysshe, Newark, and Banister, which had been growing up during the reign of Henry the Eighth. We see it here, however, in an imperfect shape, and its development into a flowing, consecutive common measure tune is only to be found in Tye's work.[1] It is true that Tye, in the last line of his compositions generally, and occasionally elsewhere, somewhat injured the rhythmical continuity by introducing a point of imitation; but that was so obviously a concession to scholarship, and could with so little difficulty have been altered, that we may certainly ascribe to him the invention of an English form of psalm tune, in four parts, suitable for popular use, and far more beautiful than the tunes in chorale form to which it was compelled to give way. The influence of Geneva was at this time exceedingly powerful in England, and the tendency, slight as it is, to florid descant in Tye's work, must have been to the reformers extremely objectionable; for just as unisonous psalm-singing was to the papist the sign of heresy, so not less to the reformer was florid descant the sign of popery. To this, no doubt, it is owing that no more tunes were written in this style.

[1] One of Tye's tunes has already been printed entire in this work. See article WINDSOR OR ETON TUNE.

The publications of this year probably took place before July, which was the month of the king's death; and nothing further was produced in this country during the reactionary reign of his successor. But in 1556 an edition of Sternhold was published in Geneva, for the use of the Protestants who had taken refuge there, which is extremely important in the history of the subject, since it contains the first instalment of those famous 'Church tunes,' some at least of which have been sung, Sunday after Sunday, in our English churches, from that day to this. The book appeared with a new title:—

One and fiftie Psalmes of David in English metre, whereof 37 were made by Thomas Sterneholde and the rest by others. Conferred with the hebrewe, and in certeyn places corrected as the text, and sens of the Prophete required.[2]

The date is gathered from the second part of the book, which contains the Geneva catechism, form of prayer, and confession, and is printed 'by John Crespin, Geneva, 1556.' No addition, it will be seen, had been made to the number of translations: it only remains, therefore, to speak of the tunes. In one respect this edition differs from all others. Here a new tune is given for every Psalm; in subsequent editions the tunes are repeated, sometimes more than once. They are printed without harmony, in the tenor or alto clef, at the head of the Psalm; the first verse accompanying the notes. The question has often been discussed, what the Church tunes are; what their origin, and who their author. Burney says they are 'mostly German'; but that is impossible, since the translations in the edition of Sternhold which the emigrants took with them to Geneva were all, except one or two, in double common measure; and there are no foreign tunes of this date which will fit that peculiarly English metre. The true answer is probably to be found in Ravenscroft's classified index of the tunes in his Psalter, published in 1621; where, under the heading of 'English tunes imitating the High Dutch, Italian, French and Netherlandish tunes,' will be found almost all the original 'Church tunes' which remained in use in his day. According to this excellent authority, therefore, the 'Church tunes,' as a whole, are English compositions. Furthermore, considering that they appear for the first time in this volume, published at Geneva, three years after the emigration, it becomes exceedingly probable that they are imitations of those which the emigrants found in use at Geneva among the French Protestants; which were chiefly, if not entirely, the tunes composed by Guillaume Franc for the Psalter of Marot and Béza. [See BOURGEOIS and FRANC in App.] Some of the French tunes evidently at once became great favourites with the English Protestants. Already in this volume we find two most interesting attempts to adapt the famous French tune now known as the Old Hundredth to the double common measure. One is set to the 3rd Psalm, the other to the 68th. In both the first line is note for note the same as in the French tune: the difference begins with the difference of

[2] The unique copy of this book is in the Bodleian Library.

metre, in the second line. We find further that as the translation of the Psalter proceeded towards completion, Keith and Whittingham, residents in Geneva, rendered some of the later psalms into special metres, and re-translated others—among them the 100th, in order to provide for the adoption of the most admired French tunes intact: these will be mentioned in detail, so far as they have been as yet identified, later on. The question of authorship is of secondary interest. There were at this time, no doubt, many English musicians capable of composing them, among the organists or singing men in the Cathedrals and Chapels Royal, who are known to have entered almost as warmly as the clergy into the religious discussions of the time, and of whom many took refuge at Geneva along with the clergy. Immediately upon the death of Mary, in 1558, this work found its way to England. The tunes at once became popular, and a strong and general demand was made for liberty to sing them in the churches. In the following year permission was given, in the 49th section of the injunctions for the guidance of the clergy; where, after commanding that the former order of service (Edward's) be preserved, Elizabeth adds:—

And yet nevertheless, for the comforting of such as delight in music, it may be permitted, that in the beginning or in the end of Common Prayer, either at morning or evening, there may be sung an hymn, or such like song, to the praise of Almighty God, in the best melody and music that may be conveniently devised, having respect that the sentence of the hymn may be understood and perceived.

This permission, and the immediate advantage that was taken of it, no doubt did much to increase the popular taste for psalm-singing, and to hasten the completion of the Psalter. For in the course of the next year, 1560, a new edition appeared, in which the number of Psalms is raised to 64, with the following title:[1]—

Psalmes of David in Englishe Metre, by Thomas Sterneholde and others: conferred with the Ebrue, and in certeine places corrected, as the sense of the Prophete required: and the Note joyned withall. Very mete to be used of all sorts of people privately for their godly solace & comfort, laying aparte all ungodly songes & ballades, which tende only to the nourishing of vice, and corrupting of youth. Newly set foarth and allowed, according to the Quenes Maiesties Iniunctions. 1560.

There is no name either of place or of printer, but in all probability it was an English edition. Although no mention is made of them in the title, this work includes metrical versions of three of the Evangelical Hymns, the ten Commandments, the Lord's Prayer, and the Creed. It may have included a few more of the same kind, but the only known copy of the work is imperfect at the end, where these additions are printed as a kind of supplement. The practice of repeating the tunes begins here, for though the number of psalms has been increased, the number of tunes has diminished. There are only 44, of which 23 have been taken on from the previous edition; the rest are new. Among the new tunes will be found five adopted from the French Psalter, in the manner described above. They are as follows:—The tunes to the French 121st, 124th, and 130th, have been set to the same psalms in the English version; the French 107th has been compressed to suit the English 120th; and the French 124th, though set to the same psalm in the English version, has been expanded by the insertion of a section between the third and fourth of the original; the French psalm having four lines of eleven to the stanza, the English five. The tune for the metrical commandments is the same in both versions.

By the following year 23 more translations were ready; and another edition was brought out, again at Geneva:[2]—

Foure score and seven Psalmes of David in English Mitre, by Thomas Sterneholde and others: conferred with the Hebrewe, and in certeine places corrected, as the sense of the Prophet requireth. Whereunto are added the Songe of Simeon, the then commandments and the Lord's Prayer. 1561.

From the 'Forme of Prayers,' etc., bound up with it, we gather that it was 'printed at Geneva by Zacharie Durand.' The number of tunes had now been largely increased, and raised to a point beyond which we shall find it scarcely advanced for many years afterwards. The exact number is 63; of which 22 had appeared in both previous editions, 14 in the edition of 1560 only, and 2 in the edition of 1556 only. The rest were new. Among the new tunes will again be found several French importations. The tunes for the English 50th and 104th are the French tunes for the same psalms. The 100th is the French 134th, the 113th the French 36th, the 122nd the French 3rd, the 125th the French 21st, the 126th the French 90th. The 145th and 148th are also called 'French' by Ravenscroft.[3] Thus far there is no sign of any other direct influence. The imported tunes, so far as can be discovered, are all French; and the rest are English imitations in the same style.

Before we enter upon the year 1562, which saw the completion of Sternhold's version, it is necessary that some account should be given of another Psalter, evidently intended for the public, which had been in preparation for some little time, and was actually printed, probably in 1560, but which was never issued;—the Psalter of Archbishop Parker. The title is as follows:—

The whole Psalter translated into English metre. which contayneth an hundreth and fifty psalmes, Imprinted at London by John Daye, dwelling over Aldersgate beneath S. Martyn's. Cum gratiâ et privilegio Regiæ maiestatis, per decennium.

The privilege sufficiently proves the intention to publish. It seems at first sight curious, that while it has been necessary to speak of the copies of published works hitherto referred to as unique, it should be possible to say of this, which was never given to the public, that at least four or five examples are in existence. The reason, however, is no doubt to be found in the fact that

[1] The unique copy of this work is in the library of Christ Church, Oxford. Thanks are due to the College for permission to examine it.

[2] The unique copy of this book is in the Library of S. Paul's Cathedral. Thanks are due to the Dean and Chapter for permission to examine it.

[3] The imported tunes sometimes underwent a slight alteration, necessitated by the frequency of the feminine rhymes in the French version. By this method a new character was often given to the tune.

the few copies struck off as specimens were distributed to select persons, and so, finding their way at once into careful hands, were the better preserved. The existing copies, so far as they have been compared, correspond exactly; and show that the work was complete, lacking nothing except the date, for which a blank space was left at the foot of the title page. The verse of this translation, which is in various metres, is in every way far superior to that of Sternhold's; but though the author has evidently aimed at the simplicity and directness of his original, he is frequently obscure. The suppression of the work, however, was probably not due to any considerations of this kind, but either to the enormous popularity of Sternhold's version, which was every day becoming more manifest, or, as it has been sometimes supposed, to a change in the author's opinion as to the desirability of psalm-singing. In any case, it is much to be regretted, since it involved the suppression of nine tunes, specially composed by Tallis, in a style peculiar to himself, which, if the work had been published, would at all events have once more established the standard of an English tune in four parts, broad, simple, and effective, and suitable for congregational use; and, from the technical point of view, finer than anything of the kind that has been done since. Whether it would have prevailed or not, it is impossible to say. We have seen how, in the case of Tye, the influence of Geneva triumphed over the beauty of his music; and that influence had become stronger in the interval. On the other hand, the tendency to florid descant, so hateful to the reformers, was absent from the work of Tallis. The compositions in this book are printed, in the manner then customary, in separate parts, all four being visible at once. They are in nearly plain counterpoint; the final close is sometimes slightly elaborated, but generally the effect—which is one of great richness, solemn or sweet according to the nature of the particular scale—is obtained by very simple means. Eight of the tunes are in the first eight modes, and are intended for the psalms; the ninth, in Mode XIII, is supplementary, and is set to a translation of 'Veni Creator.' Two of them have been revived, and are now well known. One appears in our hymnals as 'Tallis,' and is the supplementary tune in Mode XIII.; the other, generally set to Bishop Ken's evening hymn, and known as 'Canon,' is the tune in Mode VIII. With regard to the latter, it should be mentioned that in the original it is twice as long as in the modern form, every section being repeated before proceeding to the next. With this exception the melodies appear as they were written; but, as regards the three other parts, only such fragments have been retained as have happened to suit the taste or convenience of compilers. In the original, too, the tenor leads in the canon; this is reversed in the modern arrangement. The example here given, which is the tune in Mode I, is in a more severe and solemn strain than the two just mentioned. The treatment of the B—natural in the first half of the tune, and flat in the latter half—is in the finest manner of Dorian harmony.[1]

The instruction with regard to the tunes is as follows:—

The tenor of these partes be for the people when they will syng alone, the other parts, put for greater queers, or such as will syng or play them privatlye.

The method of fitting the psalms to appropriate tunes is very simple. At the head of each psalm stands an accent—grave, acute, or circumflex—indicating its nature as sad, joyful, or indifferent, according to the author's notion: the tunes bear corresponding accents. The work is divided into three parts, each containing fifty psalms; and since it is only in the third

[1] The bars in the original are only sectional, coinciding with the punctuation of the text.

part that these accents appear, (together with a rather ingenious system of red and black brackets, showing the rhyming structure of the verse,) we may perhaps conclude that the work was not all printed at once, and that it was only towards the end—possibly after the promulgation of Elizabeth's injunctions—that it was thought desirable to have tunes composed.

It seems certain that the first complete edition of this version, containing the whole Psalms, the Evangelical Hymns, and the Spiritual Songs, was published in 1562, and that another followed in 1563; but the earliest now in existence is the one of 1564, of which the title is as follows:—

'The whole booke of Psalms collected into Englysh Meter, by Thomas Sternhold, J. Hopkins, and others, conferred with the Hebrew, with apt notes to sing them withal, faithfully perused and allowed according to thorder appoynted in the Queenes maiestyes Iniunctions. Very meet,' etc., as in the edition of 1560. 'Imprinted at London by John Daye, dwelling over Aldersgate. Cum gratia et privilegio regiæ Maiestatis per septennium. 1564.'

The number of tunes in this edition is 65; of which 14 had appeared in all the previous editions, 7 in the editions of 1560 and 1561 only, and 7 in the edition of 1561 only, and 4 in the edition of 1560 only. The rest were new. Nothing more had been taken from the French Psalter; but two tunes which Ravenscroft calls 'High Dutch' were adopted. One of them, set to Wisdome's prayer 'Preserve us, Lord, by thy dear word,' was identified by Burney with the so-called Luther Chorale set to similar words. It will have been observed that a considerable re-arrangement of the tunes had hitherto taken place in every new edition; the tunes which were taken on from previous editions generally remained attached to the same psalms as before, but the number of new tunes, as well as of those omitted, was always large. Now, however, the compilers rested content; and henceforward, notwithstanding that a new edition was published almost yearly, the changes were so gradual that it will only be necessary to take note of them at intervals. The tunes are printed without bars, and in notes of unequal length. Semibreves and minims are both used, but in what seems at first sight so unsystematic a way—since they do not correspond with the accents of the verse—that few of the tunes, as they stand, could be divided into equal sections; and some could not be made to submit to any time-signature whatever. In this respect they resemble the older ecclesiastical melodies. The idea of imitation, however, was probably far from the composer's mind, and the object of his irregularity was no doubt variety of effect; the destruction of the monotonous swing of the alternate eight and six with accents constantly recurring in similar positions. To the eye the tunes appear somewhat confused; but upon trial it will be found that the long and short notes have been adjusted with great care, and, taking a whole tune together, with a fine sense of rhythmical balance. The modes in which these compositions are written are such as we should expect to meet with in works of a popular, as opposed to an ecclesiastical, character. The great majority of the tunes will be found to be in the modes which have since become our major and minor scales. The exact numbers are as follows:—28 are in Modes XIII. and XIV., 23 in Modes IX. and X., 12 in Modes I. and II., one in Mode VII., and one in Mode VIII. All these modes, except the last two, are used both in their original and transposed positions.

A knowledge of music was at this time so general, that the number of persons able to sing or play these tunes at sight was probably very considerable. Nevertheless, in the edition of 1564, and again in 1577, there was published 'An Introduction to learn to sing,' consisting of the scale and a few elementary rules, for the benefit of the ignorant. The edition of 1607 contained a more elaborate system of rules, and had the sol-fa joined to every note of the tunes throughout the book; but this was not repeated, nor was any further attempt made, in this work, to teach music.

For competent musicians, a four-part setting of the church tunes was also provided by the same publisher:—

The whole psalmes in foure partes, which may be song to al musicall instrumentes, set forth for the encrease of vertue, and abolishyng of other vayne and triflyng ballades. Imprinted at London by John Day, dwelling over Aldersgate, beneath Saynt Martyns. Cum gratiâ et privilegio Regiæ Maiestatis, per septennium. 1563.[1]

Notwithstanding this title, only the first verse of each Psalm is given; enough to accompany the notes once, and no more: it is therefore only a companion to Sternhold; not, like almost all subsequent works of the kind, a substitute. But in other respects it was designed on a much larger scale than anything that appeared afterwards. It is in four volumes, one for each voice. Every composition, long or short, occupies a page; and at the head of each stands one of the fine pictorial initial letters which appear in all Day's best books about this time. But it is as regards the quantity of the music that it goes farthest beyond all other collections of the same kind. The composers of subsequent Psalters thought it quite sufficient, as a rule, to furnish each of the 65 church tunes with a single setting; but here, not only has each been set, but frequently two and sometimes three and four composers have contributed settings of the same tune; and as if this were not enough, they have increased the work by as many as 30 tunes, not to be found in Sternhold, and for the most part probably original. The total result of their labours is a collection of 141 compositions, of which 4 are by N. Southerton, 11 by R. Brimle, 17 by J. Hake, 27 by T. Causton, and 81 by W. Parsons. It is worthy of remark that while all the contemporary musicians of the first rank had already been employed upon contributions to the liturgical service, not only by way of MSS., but also in the printed work, 'Certayne notes,' etc. issued

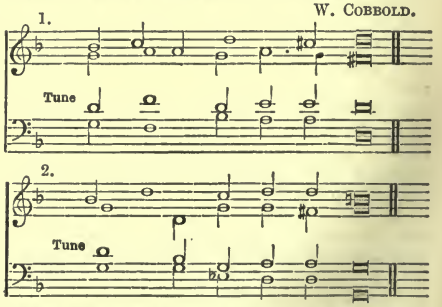
[1] A second edition was published in 1565.

by Day in 1560,—the composers to whom the publisher had recourse for this undertaking are all, except one,[1] otherwise unknown. Nor is their music, though generally respectable and sometimes excellent, of a kind that requires any detailed description: it will be sufficient to mention a few of its most noticeable characteristics, interesting chiefly from the insight they afford into the practice of the average proficient at this period. The character of these compositions in most cases is much the same as that of the simple settings of the French Psalter by Goudimel and Claude le Jeune; the parts usually moving together, and the tenor taking the tune. The method of Causton, however, differs in some respects from that of his associates: he is evidently a follower of Tye; showing the same tendency towards florid counterpoint, and often indeed using the same figures. He is, as might be expected, very much Tye's inferior in invention, and moreover still retains some of the objectionable collisions, inherited by the school of this period from the earlier descant, which Tye had refused to accept.[2] Brimle offends in the same way, but to a far greater extent: indeed, unless he has been cruelly used by the printer, he is sometimes unintelligible. In one of his compositions, for instance, having to accommodate his accompanying voices to a difficult close in the melody, he has written as follows:—[3]

The difficulty arising from the progression of the melody in this passage was one that often presented itself during the process of setting the earliest versions of the church tunes. It arose whenever the melody, in closing, passed by the interval of a whole tone from the seventh of the scale to the final. When this happened, the final cadence of the mode was of course impossible, and some sort of expedient became necessary. Since, however, no substitute for the proper close could be really satisfactory—because, no matter how cleverly it might be treated, the result must necessarily be ambiguous—in all such cases the melody was sooner or later altered. As these expedients do not occur in subsequent Psalters, two other specimens are here given of a more rational kind than the one quoted above.

MODE IX. Transposed (Final, D).

MODE I. Transposed (Final, G).



Both Parsons[5] and Hake appear to have been excellent musicians. The style of the former is somewhat severe, sometimes even harsh, but always strong and solid. In the latter we find more sweetness; and it is characteristic of him that, more frequently than the others, he makes use of the soft harmony of the imperfect triad in its first inversion. It should be mentioned that of the 17 tunes set by him in this collection, 7 were church tunes, and 10 had previously appeared in Crespin's edition of Sternhold, and had afterwards been dropped. His additions, therefore, were none of them original. One other point remains to be noticed. Modulation, in these settings, is extremely rare; and often, when it would seem—to modern ears at least—to be irresistibly suggested by the progression of the melody, the apparent ingenuity with which it has been avoided is very curious. In the tune given to the 22nd Psalm, for instance, which is in Mode XIII (final, C), the second

[1] Causton, a Gentleman of the Chapel Royal, had been a contributor to 'Certayne notes.'

[2] He frequently converts passing discords into discords of percussion, by repeating the bass note; and his ear, it seems, could tolerate the prepared ninth at the distance of a second, when it occurred between inner parts.

[3] This passage, however, will present nothing extraordinary to those who may happen to have examined the examples, taken from Risby, Pigott, and others, in Morley's 'Plaine and Easie Introduction to Practicall Musick.' From those examples it appears that the laws which govern the treatment of discords were not at all generally understood by English musicians, even as late as the beginning of Henry the Eighth's reign: it is quite evident that discords (not passing) were not only constantly taken unprepared, but, what is more strange, the discordant note was absolutely free in its progression. It might either rise or fall at pleasure; it might pass, by skip or by degree, either to concord or discord; or it might remain to become the preparation of a suspended discord. And this was the practice of musicians of whom Morley says that 'they were skilful men for the time wherein they lived.'

[4] In Este's psalter the tune of No. 1 has already been altered, in order to make a true final close possible, in the manner shown below. The tune containing No. 2 does not occur again, but here also an equally simple alteration brings about the desired result.

[5] W. Parsons must not be confounded with R. Parsons, a well-known composer of this period. J. Hake may possibly have been the 'Mr. Hake,' a singing man of Windsor, whose name was mentioned by Testwoode in one of the scoffing speeches for which he was afterwards tried (with Merbecke and another) and executed.

half begins with a phrase which obviously suggests a modulation to the dominant :—

but which has been treated by Parsons as follows :—[1]

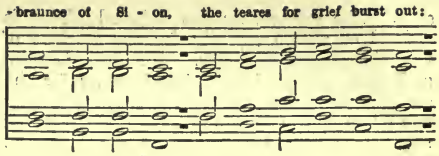
The importance of this Psalter, at once the first and the most liberal of its kind, entitles it to a complete example of its workmanship. The tune chosen is that to the 137th Psalm, an excellent specimen of the English imitations of the French melodies, and interesting also as being one of the two tunes which, appearing among the first printed—in Crespin's edition of Sternhold,—are in use at this day. It was evidently a favourite with Parsons, who has set it three times; twice placing it in the tenor, and once in the upper voice. The latter setting is the one here given :—[2]

MODE XIV. Transposed.

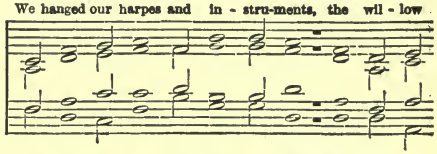
Psalm cxxxvii. W. PARSONS.

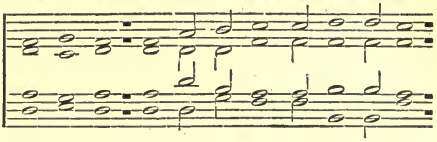
[1] Nothing is more interesting than to trace the progress of a passage of this kind through subsequent psalters, and to notice how surely, sooner or later, the modulation comes :—

MODE XIII. Transposed.



W. COBBOLD (Este's Psalter, 1592).





T. MORLEY (Barley's Psalter).

[2] It must be confessed that the tune is more beautiful without its setting. Parsons has not only avoided every kind of modulation,

At the end of the book are to be found a few miscellaneous compositions, some in metre and some in prose, evidently not specially intended for this work, but adopted into it. Some of these are by the musicians employed upon the Psalter; but there are also two by Tallis, and one each by Shephard and Edwards.

The ample supply of four-part settings contained in Day's great collection seems to have so far satisfied the public craving, that during the next sixteen years no other publication of the same kind was attempted. Nor had the work which appeared at the end of that period been composed with any kind of desire to rival or succeed the existing one; it had, in fact, never been intended for the public, and was brought out without the permission, or even the knowledge of its author. Its title was as follows :—

The Psalmes of David in English meter with notes of foure partes set unto them by Guilielmo Damon, for John Bull, to the use of the godly Christians for recreatyng themselves, instede of fond and unseemly Ballades. Anno 1579 at London Printed by John Daye, Cum privilegio.

The circumstances of this publication, as they were afterwards related, were shortly these. It was Damon's custom, on the occasion of each of his visits to his friend, Mr. John Bull, to compose, and leave behind him, a four-part setting of some one of the church tunes; and these, when the collection was complete, Bull gave to the printer, without asking the author's con-

but has even refused closes which the ear desires, and which he might have taken without having recourse to chromatic notes. It remained for later musicians to bring out the beauty of the melody.

sent. The preface, by one Edward Hake, is a kind of apology, partly for the conduct of the above-mentioned Mr. John Bull, 'citizen and goldsmith of London,' and partly for the settings themselves, of which he says that they were 'by peece meale gotten and gathered together from the fertile soyle of his honest frend Guilielmo Damon one of her Maiesties Musitions,' who 'never meant them to the use of any learned and cunnyng Musition, but altogether respected the pleasuryng of his private frend.' The settings—one only to each tune—are very much of the kind that might be expected from the circumstances. They are in plain counterpoint, with the tune in the tenor; evidently the work of a competent musician, but without special merit. The book contains 14 tunes not to be found in Day, and among these are the first four of those single common measure tunes which later quite took the place in popular favour of all but a few of the older double kind. They had not as yet been named, but they were afterwards known as Cambridge, Oxford, Canterbury, and Southwell. Two of the church tunes have been dropped; and it should also be remarked that in many tunes the value of the notes has been altered, the alteration being, in all cases, the substitution of a minim for a semibreve.

Warton mentions a small publication, 'VII Steppes to heauen, alias the vij [penitential] Psalmes reduced into meter by Will Hunnys,'[1] which he says was brought out by Henry Denham in 1581; and 'Seuen sobs of a sorrowfull soule for sinne,' published in 1585, was, according to the same authority, a second edition of the same work with a new title. The later edition contains seven tunes in double common measure, in the style of the church tunes, exceedingly well written, and quite up to the average merit of their models. Burney and Lowndes both mention a collection of settings with the following title:—

Musicke of six and five parts made upon the common tunes used in singing of the Psalmes by John Cosyn, London by John Wolfe 1585.[1]

Another work, called by Canon Havergal the 'Psalter of Henrie Denham,'[1] is said to have been published in 1588.

Damon seems to have been considerably annoyed to find that compositions which he thought good enough for Mr. Bull, had been by Mr. Bull thought good enough for the public; and, as a protest against the injustice done to his reputation, began, and lived long enough to finish, two other separate and complete settings of the church tunes, in motet fashion; the tunes in the first being in the tenor, and in the second in the upper voice. They were brought out after his death by a friend, one William Swayne, from whose preface we learn the particulars of the publication of 1579. The titles are as follows:—

1. The former booke of the Musicke of M. William Damon late one of her maiesties Musitions: conteining all the tunes of David's Psalmes, as they are ordinarily soung in the Church: most excellently by him composed into 4 parts. In which sett the Tenor singeth the Church tune. Published for the recreation of such as delight in Musicke: by W. Swayne Gent. Printed by T. Este, the assignè of W. Byrd. 1591.

2. The second Booke of the Musicke of M. William Damon, conteining all the tunes of David's Psalmes, differing from the former in respect that the highest part singeth the Church tune, etc.

[1] These works the writer has not been able to meet with.

In both these works the compositions are in the same rather ornate style; points of imitation are frequently taken upon the plain song, the parts from time to time resting, in the usual manner of the motet. Their whole aim is, in fact, more ambitious than that of any other setting of the church tunes. Twelve of the original tunes have been dropped; and one in single common measure, added,—the tune afterwards known as Windsor or Eton. [See WINDSOR TUNE.]

Este, the publisher of these two works, must have been at the same time engaged upon the preparation of his own famous Psalter, for in the course of the next year it was brought out, with the following title:—

The whole booke of psalmes: with their wonted Tunes, as they are song in Churches, composed into foure parts: All which are so placed that foure may sing ech one a seueral part in this booke. Wherein the Church tunes are carefully corrected, and thereunto added other short tunes usually song in London, and other places of this Realme. With a table in the end of the booke of such tunes as are newly added, with the number of ech Psalme placed to the said Tune. Compiled by sondry avthors who haue so laboured herein, that the vnskilfull with small practice may attaine to sing that part, which is fittest for their voice. Imprinted at London by Thomas Est, the assigné of William Byrd: dwelling in Aldersgate streete at the signe of the Black Horse and are there to be sold. 1592.[2]

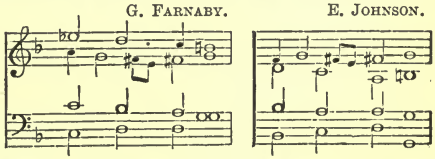
It seems to have been part of Este's plan to ignore his predecessor. He has dropped nine of the tunes which were new in Damon's Psalters, and the five which he has taken on appear in his 'Note of tunes newly added in this booke.' Four of these five were those afterwards known as Cambridge, Oxford, Canterbury, and Windsor, and the first three must already have become great favourites with the public, since Cambridge has been repeated 29 times, Oxford 27 times, and Canterbury 33 times. The repetition, therefore, is now on a new principle: the older custom was to repeat almost every tune once or twice, but in this Psalter the repetition is confined almost entirely to these three tunes. Five really new tunes, all in single common measure, have been added. To three of these, names, for the first time, are given; they are 'Glassenburie,' 'Kentish' (afterwards Rochester), and 'Chesshire.' The other two, though not named as yet, afterwards became London and Winchester.

For the four-part settings Este engaged ten composers, 'being such,' he says in his preface, 'as I know to be expert in the Arte and sufficient to answere such curious carping Musitions, whose skill hath not been employed to the furthering of this work.' This is no empty boast: 17 of the settings are by John Farmer; 12 by George Kirbye; 10 by Richard Allison;

[2] A second edition was published in 1594, and a third in 1604. The work was reprinted by the Musical Antiquarian Society in 1844.

9 by Giles Farnaby; 7 by Edward Blancks; 5 by John Douland; 5 by William Cobbold; 4 by Edmund Hooper; 2 by Edward Johnson, and 1 by Michael Cavendish. It will be observed that though most of these composers are eminent as madrigalists, none of them, except Hooper, and perhaps Johnson, are known as experts in the ecclesiastical style: a certain interest therefore belongs to their settings of plainsong; a kind of composition which they have nowhere attempted except in this work.[1] The method of treatment is very varied: in some cases the counterpoint is perfectly plain; in others plain is mixed with florid; while in others again the florid prevails throughout. In the plain settings no great advance upon the best of those in Day's Psalter will be observed. Indeed, in one respect, —the melodious progression of the voices,— advance was scarcely possible; since equality of interest in the parts had been, from the very beginning, the fundamental principle of composition. What advance there is will be found to be in the direction of harmony. The ear is gratified more often than before by a harmonic progression appropriate to the progression of the tune. Modulation in the closes, therefore, becomes more frequent; and in some cases, for special reasons, a partial modulation is even introduced in the middle of a section. In all styles, a close containing the prepared fourth, either struck or suspended, and accompanied by the fifth, is the most usual termination; but the penultimate harmony is also sometimes preceded by the sixth and fifth together upon the fourth of the scale. The plain style has been more often, and more successfully, treated by Blancks than by any of the others. He contrives always to unite solid and reasonable harmony with freedom of movement and melody in the parts; indeed, the melody of his upper voice is often so good that it might be sung as a tune by itself. But by far the greater number of the settings in this work are in the mixed style, in which the figuration introduced consists chiefly of suspended concords (discords being still reserved for the closes), passing notes, and short points of imitation between two of the parts at the beginning of the section. It is difficult to say who is most excellent in this manner. Farmer's skill in contriving the short points of imitation is remarkable, but one must also admire the richness of Hooper's harmony, Allison's smoothness, and the ingenuity and resource shown by Cobbold and Kirbye. The two last, also, are undoubtedly the most successful in dealing with the more florid style, which, in fact, and perhaps for this reason, they have attempted more often than any of their associates. They have produced several compositions of great beauty, in which most of the devices of counterpoint have been introduced, though without ostentation or apparent effort.

Farnaby and Johnson were perhaps not included in the original scheme of the work, since they do not appear till late, Johnson's first setting being Ps. ciii. and Farnaby's Ps. cxix. They need special, but not favourable, mention; because, although their compositions are thoroughly able, and often beautiful—Johnson's especially so—it is they who make it impossible to point to Este's Psalter as a model throughout of pure writing. The art of composing for concerted voices in the strict diatonic style had reached, about the year 1580, probably the highest point of excellence it was capable of. Any change must have been for the worse, and it is in Johnson and Farnaby that we here see the change beginning.[2]



There is, however, one Psalter which can be said to show the pure Elizabethan counterpoint in perfection throughout. It is entirely the work of one man, Richard Allison, already mentioned as one of Este's contributors, who published it in 1599, with the following title:—

The Psalmes of David in Meter, the plaine song beeing the common tunne to be sung and plaide upon the Lute, Orpharyon, Citterne or Base Violl, severally or altogether, the singing part to be either Tenor or Treble to the instrument, according to the nature of the voyce, or for fowre voyces. With tenne short Tunnes in the end, to which for the most part all the Psalmes may be usually sung, for the use of such as are of mean skill, and whose leysure least serveth to practize. By Richard Allison Gent. Practitioner in the Art of Musicke, and are to be solde at his house in the Dukes place neere Alde-Gate London, printed by William Barley, the asigne of Thomas Morley. 1599.

The style of treatment employed by Allison in this work—in which he has given the tune to the upper voice throughout—is almost the same as the mixed style adopted by him in Este's Psalter. Here, after an interval of seven years, we find a slightly stronger tendency towards the more florid manner, but his devices and ornaments are still always in perfectly pure taste.[3] The lute part was evidently only intended for use when the tune was sung by a single voice, since it is constructed in the manner then proper to lute accompaniments to songs, in which the notes taken by the voice were omitted. Sir John

[1] Farmer had published, in the previous year, forty canons, two in one, upon one plainsong. These however were only contrapuntal exercises.

[2] Johnson (Ps. cxi.) has taken the fourth unprepared in a chord of the 6-4, and the imperfect triad with the root in the bass. Farnaby so frequently abandons the old practice of making all the notes upon one syllable conjunct, that one must suppose he actually preferred the leap in such cases. The following variants of a well-known cadence, also, have a kind of interest, since it is difficult to see how they could for a moment have borne comparison with their original:—

Johnson, though sometimes licentious, was also sometimes even prudish. In taking the sixth and fifth upon the fourth of the scale, his associates accompanied them, in the modern way, with a third; Johnson however refuses this, and, following the strict Roman practice, doubles the bass note instead.

[3] It was by a chance more unfortunate even than usual that Dr. Burney selected this Psalter,—on the whole the best that ever appeared,—as a victim to his strange prejudice against our native music. His slighting verdict is that 'the book has no merit, but what was very common at the time it was printed': which is certainly true; but Allison, a musician of the first rank, is not deserving of contempt on the ground that merit of the highest kind happened to be very common in his day.

Hawkins, in his account of the book, makes a curious mistake on this point. He says, 'It is observable that the author has made the plain-song or Church tune the cantus part, *which part being intended as well for the lute or cittern, as the voice, is given also in those characters called the tablature which are peculiar to those instruments.*' That the exact opposite is the case,[1] will be seen from the translation of a fragment of the lute part, here given :—

The next Psalter to be mentioned is one which seems to have hitherto escaped notice. It was issued without date; but since collation with Este's third edition proves it to be later than 1604, and since we know that its printer, W. Barley, brought out nothing after the year 1614, it must have been published in the interval between those two dates. Its title is as follows :—

The whole Booke of Psalmes. With their woonted Tunes, as they are sung in Churches, composed into foure parts. Compiled by sundrie Authors, who have so laboured herein, that the unskilful with small practise may attaine to sing that part, which is fittest for their voice. Printed at London in little S. Hellens by W. Barley, the assigne of T. Morley, and are to be sold at his shop in Gratious street. Cum privilegio.

From this title, and from the fact that Morley was the successor to Byrd, whose assignee Este was, it would be natural to infer that the work was a further edition of Este's Psalter : and from its contents, it would seem to put forward some pretence to be so. But it differs in several important respects from the original. Este's Psalter was a beautiful book, in octavo size, printed in small but perfectly clear type ; the voice parts separate, but all visible at once, and all turning the leaf together. Barley's Psalter is reduced to duodecimo size, becoming in consequence inconveniently thick; it is badly printed; and the parts, though separate, do not always turn the leaf together. Worse than this, in almost all the settings, *the two upper voice parts are omitted*, and the remaining parts—the tune and the bass—being separate are rendered useless even to the organist, the only person who could have turned two parts to any sort of account. The work, therefore, is so unsatisfactory as to be scarcely worthy of notice, did it not contain ten new and admirable settings, of which four are by Morley himself, five by John Bennet, and one by Farnaby. These not only save the book, but render it valuable; for in Ravenscroft's Psalter, published a few years later, only five of them—two by Morley, and three by Bennet—survive. This work therefore contains six compositions by eminent musicians which are not to be found elsewhere. They are of course printed entire, as are also the settings of the two established and often repeated favourites above referred to, Oxford and Cambridge tunes, and a few others, which, however, though they have escaped mutilation, have not escaped alteration, considerable changes being sometimes made in the parts. In some of the mutilated settings, also, the bass part has been altered, and in some a new bass has been substituted for the old one, while the editor has allowed the name of the original composer to stand above the tune. Examples of extreme carelessness in editing might also be given, were it worth while to do so. On the whole, the book is somewhat of a puzzle. There would be nothing surprising in its peculiarities had it been some unauthorized or piratical edition of Este; but when we remember that the printer was working under the royal patent granted to Morley, and that Morley himself, and another musician almost as distinguished, contributed to it some of the best settings of church tunes ever composed, it becomes difficult to account for its badness.[2] Besides the new settings of old tunes, it also contains one new tune set by Blancks, afterwards called by Ravenscroft a Dutch tune.

Ravenscroft's Psalter, which comes next in order, was published in 1621, with the following title :—

The whole Booke of Psalmes with the Hymnes Evangelicall and Songs Spirituall. Composed into four parts by sundry authors, to such severall tunes, as have been, and are generally sung in England, Scotland, Wales,

[1] Hawkins has evidently been misled by the clumsily worded title.

[2] One explanation only can be suggested at present. The work may never have been intended to rank with four-part psalters at all. The sole right to print Sternhold's version, with the church tunes, had just passed into the hands of the Stationers' company; and it is possible that this book may have been put forward, not as a fourth edition of Este, but in competition with the company : the promoters hoping, by the retention of the complete settings of a few favourite tunes, and the useless bass part of the rest, to create a technical difference, which would enable them to avoid infringement of the Stationers' patent. The new settings of Morley and Bennet may have been added as an attractive feature. If, however the announcement in the title of the third edition of Este (1604), 'printed for the companie of Stationers,' should mean that the company had acquired a permanent right to that work, Barley's publication would seem no longer to be defensible, on any ground. Further research may make the matter more clear.

Germany, Italy, France, and the Netherlands: never as yet before in one volume published... Newly corrected and enlarged by Thomas Ravenscroft Bachelar of Musicke. Printed at London, for the Company of Stationers.[1]

This Psalter contains a larger number of compositions than any other except that of Day; but the number in excess of the Church tunes is not made up, as in Day, by alternative settings, but by the addition of 40 new tunes, almost all of which are single common measure tunes of the later kind, with names. They appear in the index under the heading—'such tunes of the Psalmes usually sung in Cathedrall Churches, Collegiat Chapels, &c.,' and are divided broadly into three classes, one of which contains those named after the English Cathedrals and Universities, while the other two are called respectively Scotch and Welsh, and the tunes named accordingly. The whole subject of these names, and how they are to be understood, has been gone into at some length by Canon Havergal in the preface to his quasi-reprint of this Psalter; and his conclusion is probably the right one, namely, that the tunes were in most cases designated according to the localities in which they were found in use, but that this does not necessarily imply a local origin. We have already referred to Ravenscroft's description of the old double common measure tunes, and need add nothing here with respect to them. Under the heading 'forraigne tunes usually sung in Great Brittaine' will be found, for the French, only the few tunes taken from the Geneva Psalter, enumerated above; with regard to other sources, the magnificent promise of the title-page is reduced to three German tunes, two Dutch, and one Italian.

Of the 100 settings in this work, 38 had appeared in previous ones. All the musicians engaged upon Este's Psalter are represented here; 31 of their compositions have been taken on, and Douland and Hooper have each contributed a new one; Douland's is the setting of the 100th Psalm, already given in this work. [See HYMN, vol. i. p. 762 *b*.] Also, one of Parsons' settings has been taken from Day's Psalter, though not without alteration. The four settings by Morley and Bennet, from Barley's Psalter, have already been mentioned, and in addition there is a new one by Morley, a setting of the 1st Psalm. Tallis's tune in Mode VIII is also given here from Parker's Psalter (to a morning hymn), in the shortened form, but with the tenor still leading the canon.

Eight new composers appear, whose names and contributions are as follows:—R. Palmer, 1; J. Milton, 2; W. Harrison, 1; J. Tomkins, 1; T. Tomkins, 2; W. Cranfield or Cranford, 2; J. Ward, 1; S. Stubbs, 2; Ravenscroft himself, 48. In the work of all these composers is to be seen the same impurity of taste which was visible in the settings made for Este by Farnaby and Johnson. The two cadences given above in a note, as examples of a kind of aberration, are here found to have become part of the common stock of music; and an inferior treatment of conjunct passages in short notes, in which the alternate crotchet is dotted, finds, among other disimprovements, great favour with the editor. Ravenscroft and Milton appear to be by far the best of the new contributors. The variety shown by the former in his methods of treatment is remarkable: he seems to have formed himself upon Este's Psalter, to have attempted all its styles in turn, and to have measured himself with almost every composer. Notwithstanding this, it is evident that he had no firm grasp of the older style, and that he was advancing as rapidly as any musician of his day towards the modern tonality and the modern priority of harmonic considerations in part writing. Milton's two settings are fine, notwithstanding the occasional use of the degraded cadence, and on the whole worthy of the older school, to which indeed he properly belonged. The rest, if we except Ward, may be briefly dismissed. They were inferior men, working with an inferior method.

Two years later appeared the work of George Wither:—

The Hymnes and Songs of the Church, Divided into two Parts. The first Part comprehends the Canonicall Hymnes, and such parcels of Holy Scripture as may properly be sung: with some other ancient Songs and Creeds. The second Part consists of Spirituall Songs, appropriated to the severall Times and Occasions, observable in the Church of England. Translated and composed by G. W. London, printed by the assignes of George Wither, 1623. Cum privilegio Regis Regali.

This work was submitted during its progress to James the First, and so far found favour that the author obtained a privilege of fifty-one years, and a recommendation in the patent that the book should be 'inserted in convenient manner and due place in every English Psalm book in metre.' The king's benevolence, however, was of no effect; the Company of Stationers, considering their own privilege invaded, declared against the author, and by every means in their power, short of a flat refusal, avoided the sale of the book. Here again, as in the case of Parker's Psalter, the virtual suppression of the work occasioned the loss of a set of noble tunes by a great master. Sixteen compositions by Orlando Gibbons had been made for it, and were printed with it. They are in two-part counterpoint, nearly plain, for treble and bass; the treble being the tune, and the bass, though not figured, probably intended for the organ. In style they resemble rather the tunes of Tallis than the imitations of the Geneva tunes to which English congregations had been accustomed, it being possible to accent them in the same way as the words they were to accompany; syncopation, however, sometimes occurs, but rarely, and more rarely still in the bass. The harmony often reveals very clearly the transitional condition of music at this period. For instance, in Modes XIII and XIV a sectional termination in the melody on the second of the scale was always, in the older harmony, treated as a full close, having the same note in the bass; here we find it treated in the modern way, as a half close, with the fifth

[1] A second edition was published in 1633. It was also several times reprinted, either entirely or in part, during the 18th century.

of the scale in the bass. Two of these tunes, altered, appear in modern hymnals.[1]

In 1632 an attempt was made to introduce the Geneva tunes complete into this country. Translations were made to suit them, and the work was brought out by Thomas Harper. It does not seem, however, to have reached a second edition. The enthusiasm of earlier days had no doubt enabled the reformers to master the exotic metres of the few imported tunes; but from the beginning the tendency had been to simplify, and, so to speak, to anglicize them; and since the Geneva tunes had remained unchanged, Harper's work must have presented difficulties which would appear quite insuperable to ordinary congregations.

We have now arrived at the period when the dislike which was beginning to be felt by educated persons for the abject version of Sternhold was to find practical expression. Wither had intended his admirable translation of the Ecclesiastical Hymns and Spiritual Songs to supersede the older one, and in 1636 George Sandys, a son of the Archbishop, published the complete psalter, with the following title:—

A paraphrase upon the Psalms of David, by G. S. Set to new tunes for private devotion; and a thorough bass, for voice or instrument. By Henry Lawes, gentleman of His Majesty's Chapel Royal.[1]

The tunes, 24 in number, are of great interest. Lawes was an ardent disciple of the new Italian school; and these two-part compositions, though following in their outline the accustomed psalm-tune form, are in their details as directly opposed to the older practice as anything ever written by Peri or Caccini. The two parts proceed sometimes for five or six notes together in thirds or tenths; the bass is frequently raised a semitone, and the imperfect fifth is constantly taken, both as a harmony and as an interval of melody. The extreme poverty of Lawes's music, as compared with what was afterwards produced by composers following the same principles, has prevented him from receiving the praise which was certainly his due. He was the first English composer who perceived the melodies to which the new system of tonality was to give rise; and in this volume will be found the germs of some of the most beautiful and affecting tunes of the 17th and 18th centuries: the first section of the famous St. Anne's tune, for instance, is note for note the same as the first section of his tune to the 9th psalm. Several of these tunes, complete, are to be found in our modern hymnals.

The translation of Sandys was intended, as the title shows, to supersede Sternhold's in private use; but several others, intended to be sung in the churches, soon followed. Besides the translation of Sir. W. Alexander (published in Charles the First's reign), of which King James had been content to pass for the author, there appeared, during the Commonwealth, the versions of Bishop King, Barton, and Rous. None, however, require more than a bare mention, since they were all adapted to the Church tunes to be found in the current editions of Sternhold, and have therefore only a literary interest. Nothing requiring notice here was produced until after the Restoration, when, in 1671, under circumstances very different from any which had decided the form of previous four-part psalters, John Playford brought out the first of his well-known publications:—

Psalms and Hymns in solemn musick of foure parts on the Common Tunes to the Psalms in Metre: used in Parish Churches. Also six Hymns for one voyce to the Organ. By John Playford. London, printed by W. Godbid for J. Playford at his shop in the Inner Temple. 1671.

This book contains only 47 tunes, of which 35 were taken from Sternhold (including 14 of the single common measure tunes with names, which had now become Church tunes), and 12 were new. But Playford, in printing even this comparatively small selection, was offering to the public a great many more than they had been of late accustomed to make use of. The tunes in Sternhold were still accessible to all; but not only had the general interest in music been steadily declining during the reigns of James and Charles, but the authorized version itself, from long use in the churches, had now become associated in the minds of the Puritans with the system of Episcopacy, and was consequently unfavourably regarded, the result being that the number of tunes to which the psalms were now commonly sung, when they were sung at all, had dwindled down to some half dozen. These tunes may be found in the appendix to Bishop King's translation, printed in 1651. According to the title-page, his psalms were 'to be sung after the old tunes used in y^e^ churches,' but the tunes actually printed are only the old 100th, 51st, 81st, 119th, Commandments, Windsor, and one other not a Church tune. 'There be other tunes,' adds the author, 'but being not very usuall are not here set down.' The miserable state of music in general at the Restoration is well known, but, as regards psalmody in particular, a passage in Playford's preface so well describes the situation and some of its causes, that it cannot be omitted here:—

For many years, this part of divine service was skilfully and devoutly performed, with delight and comfort, by many honest and religious people; and is still continued in our churches, but not with that reverence and estimation as formerly: some not affecting the translation, others not liking the music: both, I must confess need reforming. Those many tunes formerly used to these Psalms, for excellency of form, solemn air, and suitableness to the matter of the Psalms, were not inferior to any tunes used in foreign churches; but at this day the best, and almost all the choice tunes are lost, and out of use in our churches; nor must we expect it otherwise, when in and about this great city, in above one hundred parishes there is but few parish clerks to be found that have either ear or understanding to set one of these tunes musically as it ought to be: it having been a custom during the late wars, and since, to choose men into such places, more for their poverty than skill or ability; whereby this part of God's service hath been so ridiculously performed in most places, that it is now brought into scorn and derision by many people.

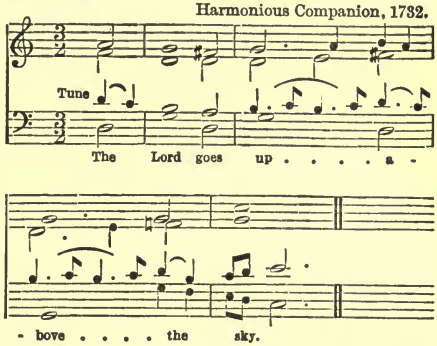
The settings are all by Playford himself. They are in plain counterpoint, and the voices indicated are Alto, Countertenor, Tenor, and

[1] These works were reprinted by John Russell Smith in 1856 and 1872 respectively.

Bass, an arrangement rendered necessary by the entire absence, at the Restoration, of trained trebles.

This publication had no great success, a result ascribed by the author to the folio size of the book, which he admits made it inconvenient to 'carry to church.' His second psalter, therefore, which he brought out six years later, was printed in 8vo. The settings are here again in plain counterpoint, but this time the work contains the whole of the Church tunes. The title is as follows :—

The whole book of Psalms, collected into English metre by Sternhold Hopkins, &c. With the usual Hymns and Spiritual Songs, and all the ancient and modern tunes sung in Churches, composed in three parts, Cantus Medius and Bassus. In a more plain and useful method than hath been heretofore published. By John Playford. 1677.



Playford gives no reason for setting the tunes in three parts only, but we know that this way of writing was much in favour with English composers after the Restoration, and remained so till the time of Handel. Three-part counterpoint had been much used in earlier days by the secular school of Henry the Eighth's time, but its prevalence at this period was probably due to the fact that it was a favourite form of composition with Carissimi and his Italian and French followers, whose influence with the English school of the Restoration was paramount.

This was the last complete setting of the Church tunes, and for a hundred years afterwards it continued to be printed for the benefit of those who still remained faithful to the old melodies, and the old way of setting them. In 1757 the book had reached its 20th edition.

Playford generally receives the credit, or discredit, of having reduced the Church tunes to notes of equal value, since in his psalters they appear in minims throughout, except the first and last notes of sections, where the semibreve is retained; but it will be found, on referring to the current editions of Sternhold, that this had already been done, probably by the congregations themselves, and that he has taken the tunes as he found them in the authorized version. His settings also have often been blamed, and it must be confessed that compared with most of his predecessors, he is only a tolerable musician, though he thought himself a very good one; but this being admitted, he is still deserving of praise for having made, in the publication of his psalters, an intelligent attempt to assist in the general work of reconstruction; and if he failed to effect the permanent restoration of the older kind of psalmody, it was in fact not so much owing to his weakness, as to the natural development of new tendencies in the art of music.

The new metrical translations afterwards brought out were always intended, like those of the Commonwealth, to be sung to the Church tunes; and each work usually contained a small selection, consisting of those most in use, together with a few new ones. Concurrently with these appeared a large number of publications,—Harmonious Companions, Psalm Singer's Magazines, etc., which contained all the favourite tunes, old and new, set generally in four parts. Through one or other of these channels most of the leading musicians of this and the following century contributed to the popular Psalmody. Both tunes and settings now became very various in character, and side by side with settings made for Este's Psalter might be found compositions of which the following fragment will give some idea.

Harmonious Companion, 1732.

On the next page is the original setting of the 44th Psalm by Blancks.

The fact most strongly impressed upon the mind after going through a number of these publications, extending over a period of one hundred and fifty years, is that the quality and character of the new tunes and settings in no way depends, as in the case of the old psalters, upon the date at which they were written. Dr. Howard's beautiful tune, St. Bride, for instance, was composed thirty or forty years after the strange production given above; his tune, however, must not be taken as a sign of any general improvement, things having rather gone from bad to worse. The truth seems to be that the popular tradition of psalmody having been hopelessly broken during the Commonwealth, and individual taste and ability having become the only deciding forces in the production of tunes, the composers of the 17th and 18th centuries, in the exercise of their discretion, chose sometimes to imitate the older style, and sometimes to employ the inferior methods of contemporary music. To the public the question of style seems to have been a matter of the most perfect indifference.

Sternhold continued to be printed as an authorized version until the second decade of the present century. The version of Tate and Brady remained in favour twenty or thirty years longer, and was only superseded by the hymnals now in actual use. [H.E.W.]

PUCITTA, Vincenzo. Line 1 of article, *for* Rome *read* Civita Vecchia.

PUPPO, Giuseppe. Line 2 of article, add day of birth, June 12, and l. 6 from end, that of death, April 19.

PURCELL. P. 46 *b*, l. 19–25. This sentence is to be corrected by a reference to MACBETH MUSIC, vol. ii. p. 184; the question of the date of composition of 'Dido and Aeneas' is discussed in Mr. Cummings's 'Life of Purcell.' P. 47, l. 3–4, *for* 'He does not appear to have produced,' etc, *read* His only production for the stage in 1679 was Lee's 'Oedipus.' [See DORSET GARDEN THEATRE in Appendix vol. iv. p. 617.]

PURCELL SOCIETY. The edition of 'Timon of Athens' referred to in the last sentence but one of article, was issued in 1882. The music-meetings mentioned at the end were abandoned, and in 1887 the scheme, which had fallen into abeyance for a time, was re-organized by Mr. Cummings and Mr. W. Barclay Squire, who undertook the respective duties of editor and honorary secretary.

PYNE. Line 7, *omit the words* (afterwards Mrs. Galton). Susan, or more correctly Susannah, Pyne, married Mr. F. H. Standing, a baritone singer, known professionally as Celli; Mrs. Galton was another sister, who had no repute as a singer. P. 54 *b*, l. 6, add the date of the return to England and commencement of theatrical management, 1858.

Q.

QUARENGHI, GUGLIELMO, violoncellist, and professor of the cello at the Conservatorio of Milan, was born at Casalmaggiore Oct. 22, 1826. He studied under Vincenzo Merighi, who, as he says, 'gave a proof of his wisdom and skill in educating that piece of perfection (quella perfezione) called Alfredo Piatti.' Quarenghi has published numerous compositions for his instrument, but he will always be best known by his great 'Metodo di Violoncello' published at Milan in 1877, which is undoubtedly the most complete method extant. It was formally adopted by the Milan Conservatorio in 1875, after a commission of four professors (with Piatti) had reported on its merits. It is divided into five parts, of which the third is a short treatise on Harmony and Counterpoint, a branch of study which, in the words of the report, has been either omitted or imperfectly developed in the existing methods. It is much to be regretted that this admirable work has not been translated, as the writer feels assured that it only has to be known to be thoroughly appreciated by all professors of the violoncello. [G.H.]

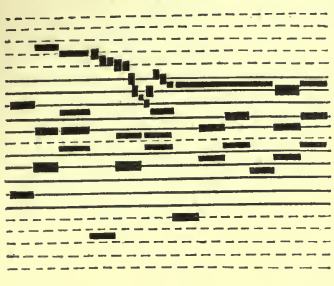
RECORDING MUSIC PLAYED EXTEMPORANEOUSLY. Many efforts have been made to obtain a permanent record of music played impromptu on the pianoforte or organ.



In the year 1747 the Rev. J. Creed proposed to make a machine 'to write down extempore voluntaries as fast as any master shall play them,' but the apparatus does not seem to have been constructed. In vol. i. p. 499 of this work will be found a brief account of some early attempts to construct such machines. Hohlfeld's apparatus, made in 1752, is simplicity itself, and has been the parent of many such schemes put forth as novel from that time down to our own day. The plan of attaching a pencil or some form of stylus underneath the far end of each pianoforte key, so that when it is depressed it shall make a mark (more or less long according to the time value of the note held down) upon a slowly moving band of paper unwound from a roll, is an obvious idea. But there are material difficulties connected with such a plan, the chief being the ready translation of its product into the ordinary notation. Some inventors proposed to substitute for the friable pencil a metal stylus and black carbonized paper. But no attempt was made to indicate the bars on the paper, and so the streaks more or less long, the hazy accidentals and the rests on the paper presented a hopeless puzzle to the transcriber. In 1827 M. Carreyre exhibited before the French Institute a 'Melographic piano,' in which the music played was represented by certain signs impressed on a thin plate of lead. A committee was appointed to examine the apparatus, but inasmuch as they never reported, the machine was doubtless not a success. M. Boudouin afterwards read before the same body a paper concerning another scheme of this kind, but nothing is known of his plan. In 1836 an English patent was taken out on behalf of M. Eisenmenger of Paris for an apparatus of the depressed stylus and carbonized paper type, and it is notable as showing the first attempt made to measure off the bars. The inventor suggested that this could be accomplished by the performer's beating time with his foot on a pedal; mechanism connected with this punctured the moving band of paper, dividing it into regulated spaces. It is uncertain whether a machine was ever made on this plan. Towards the close of 1840, M. Duprat de Tressog patented at Paris an apparatus of this kind, but no description of the plan has been published. In 1856 I. Merzolo, an Italian engineer, applied for a provisional patent for an apparatus to give an 'identical repetition with types like those used in ordinary printing.' The specification is very brief, and too vague to indicate how the desired object could be accomplished. In 1863 electricity is first mentioned in connection with this subject, a patent being taken out by Mr. F. B. Fenby of Worcester, for 'The Electro-Magnetic Phonograph' (the same word which Edison employed some sixteen years later). The main principle of Fenby's instrument was identical with that which underlies all telegraphic operations, viz. the making a bent piece of soft iron into a temporary magnet by passing an electric current round it; by the motion so obtained from its armature a small inked wheel was pressed against a band of moving paper. The scheme seems to be complicated, and there is no evidence that such a machine was ever made. In 1864 Mr. E. S. Endres applied for a patent, but it was refused him. His chimerical proposal was to have as many type-wheels as there were pianoforte keys; on the periphery of these wheels there were cut notes of various values, from a semibreve to a demisemiquaver. Upon the finger rising from a note struck, the intention was, that the revolving wheel should print on paper an ordinary note of the exact time-value of the sound played. Pedals had to be depressed when accidentals were used. An examination of the mechanism drawn shows that the idea was quite impracticable. As late as 1880 Schwetz a German, Hoyer a Frenchman, in 1884 Allen an Englishman, and in 1885 Greiner of New York, amongst others, took out patents for apparatuses of the depressed pencil order. At the Paris Exhibition of 1881, M. J. Charpentier exhibited 'La Mélographie Répétiteur,' attached to a small harmonium. Its inventor stated that it was to write down ordinary music played extemporaneously on the instrument *dans le langage de Jacquard*. The process was to be effected by means of electro-magnets connected with the keys putting into action a series of cutters which cut slits in a band of moving paper, the slits corresponding to the length and position of the notes. By an after arrangement the perforated paper allows the wind to pass through its slits, and thus reproduces the music previously played. M. Charpentier was enthusiastic enough

to believe he could also make his machine print the music executed in the ordinary notation, but avowed that this was only a project. The apparatus shown did not appear to have been in working order. In 1887 M. Charpentier took out another patent, in which metal styles attached to the under part of the keys acted on the balanced ribs of a revolving cylinder; these were kept inked, and marked the paper as it gradually unwound. He also provided for depressing by electro-magnets or pneumatic agency. In 1880 Mr. H. J. Dickenson proposed to apply the principle of the Casselli electro-chemical telegraph to recording music played on the piano; from the meagre account of his plan printed in the specification it is impossible to describe its mechanism. In 1881, M. A. P. Hodgson, an engineer of Paris, took out a patent (No. 573) for an 'Apparatus for correctly transcribing musical compositions.' The instrument is termed by the inventor the 'Pianograph Metronome.' To judge from the specification and drawings attached to the patent, this apparatus was of the most complicated description. The machine was furnished with a metronome for governing the rate of motion at which a cylinder should revolve, and so regulating the time; this had to be mathematically exact, otherwise the mechanism would not synchronise with the player. If all went right, the machine was supposed to print on a huge band of paper about four feet broad, lines representing in their length the duration of the notes held down. As no provision was made for indicating any variation of the time-measure, or for *accelerandos*, *ritardandos*, etc., M. Hodgson's machine would not have proved of much utility, even if it could have been constructed; he had so little idea of music that he directed the player 'to end his composition by a perfect chord in the key of F, and not by the tonic a third or a fifth.'

In 1881 Herr J. Föhr showed at the Stuttgart Exhibition of that year an excellent contrivance which accomplishes the object aimed at in a more complete way than before. The apparatus was exhibited in action in London, and a paper was read upon the subject by the present writer at the June meeting 1882, of the Musical Association; it is described at length in the 1881–2 volume of the society's proceedings. The machine was also shown in operation before the members of the College of Organists. The mechanism of this *Electro-chemischer Notenschreibapparat* is simple. The apparatus is contained in a small pedestal which may be placed at the side of a piano, and connection is made with the instrument through a cable of wires attached to a long frame resting on the keyboard of the instrument. This is furnished with a series of studs each one touching the back of the ivories and ebonies just in front of the usual name board; these studs, by means of insulated wires, are in connection with platinum points which press on a band of paper, five inches broad, unwound from a drum by means of clockwork. The paper, as it passes through the mechanism, is saturated with a solution of ferrocyanide of potassium, ammonia, sulphuric acid and water; it is afterwards ruled by means of an aniline inking roller with the five lines of the stave, and some dotted ledger lines are added above and below. On the pianoforte key being depressed, the circuit is completed and the current runs from a Leclanché battery, passing through the saturated paper by the particular style or styles in connection with the keys struck, and staining it a bluish colour; the electric current decomposing the salts with which the paper is charged. The length of the stain depends upon the time the key is held down; a semibreve, for instance, appearing as a long streak, while a quaver would be but a dash, and a demisemiquaver a mere dot. The blank spaces on the paper represent the periods of silence; thus, marks are formed by the passing current, and rests are indicated by its absence. The stains representing the white notes ▬ are twice as broad as those standing for the black ones ▬. A pedal serves to indicate the bar lines. On depressing this (as in the ordinary mode of beating time) the position of the first beat in the bar is indicated by short double lines = stained at the moment of depression on the top and bottom of the stave. The rate of motion of the paper is governed by a sliding lever, which also serves to start and stop the clock-work arrangement. Herr Föhr's apparatus is simple in design, and the musical shorthand it produces is translateable without much difficulty. It is worked upon much the same plan as that of the electro-chemical telegraph of Bain. In 1872 Mr. Alexander A. Rossignol took out a patent (No. 990) for an 'Apparatus for tracing music,' and his scheme is substantially the same as that of Herr Föhr. The only modification would seem to be that M. Rossignol employed styles made of two different metals which severally stain the saturated paper red and blue, representing the black and white keys of the piano. There is no record of this instrument having been constructed. As it is stated that Herr Föhr's design dates from several years ago, since which time he has been working it out, the question as to priority of invention is uncertain. The following illustration is a reduced representation of the first section of 'God Save the Queen,' as produced by Herr Föhr's contrivance; it is in the key of A and in four parts, 3–4 time.

The following represents bar 16 from Chopin's Nocturne in Eb, Op. 9, No. 2 (12–8 time). In this example the paper has been set to run slower, and so the bars occupy a larger space.

In 1886 Mr. H. H. Muir took out a patent for recording music, the principle of which was practically the same as that of Herr Föhr. [T.L.S.]

REDEMPTION, The. A Sacred Trilogy, written and composed by Charles Gounod. First performed at the Birmingham Festival, Aug. 30, 1882, under the composer's direction. [M.]

REDHEAD, Richard, born March 1, 1820, at Harrow, was a chorister at Magdalen College, Oxford, 1829–36, having received his musical education there from Walter Vicary, the organist. He was organist at Old Margaret Chapel (now All Saints' Church), Margaret Street, in 1839–64, since which he has been, and still is, organist at St. Mary Magdalene, Paddington. His works are almost exclusively written or compiled for use in the Church of England service, viz. 'Laudes Diurnæ, the Psalter and Canticles in the Morning and Evening Service,' 1843, Music for the Office of the Holy Communion,' 1853; 'O my people,' anthem for Good Friday; 'Church Melodies, a collection of short pieces and Six Sacred Songs,' 1858; 'The Celebrant's Office Book,' 1863; 'Ancient Hymn Melodies, Book of Common Prayer with Ritual music, Canticles at Matins and Evensong, pointed as they are to be sung in churches and adapted to the Ancient Psalm Chants, and Parish Tune Book and Appendix,' 1865; 'The Universal Organist, a Collection of Short Classical and Modern Pieces,' 1866–81; 'Litany with latter part of Commination Service, Music to the Divine Liturgy during the Gradual, Offertorium and Communion, arranged for use throughout the year,' 1874; Festival Hymns for All Saints and St. Mary Magdalene Days, Hymns for Holy Seasons, Anthems, etc. [A.C.]

REED, Thomas German. Add date of death, March 21, 1888. P. 91 *a*, add to list of pieces produced at St. George's Hall, under the management of Mr. Corney Grain and Mr. Alfred Reed:—

'No. 204.' F. C. Burnand and German Reed.
'Once in a century.' G.A'Beckett and Vivian Bligh.
'Our new Dolls' House.' W. Yardley and Cotsford Dick.
'Answer Paid.' F. C. Burnand and W. Austin.
'Doubleday's Will.' Burnand and King Hall.
'Artful Automaton.' Arthur Law and King Hall.
'A Tremendous Mystery.' F. C. Burnand and King Hall.
'Enchantment.' A. Law and German Reed.
'Grimstone Grange.' G. A'Beckett and King Hall.
'100*l.* Reward.' A. Law and Corney Grain.
'Back from India,' Pottinger Stevens and Cotsford Dick.
'The Pirates' Home.' G. A'Beckett and Vivian Bligh.
'A Christmas Stocking.' G. A'Beckett and King Hall.
'Castle Botherem.' A. Law and Hamilton Clarke.
'The Three Hats.' A. A'Beckett and Edouard Marlois.
'A Flying Visit,' A. Law and Corney Grain.
'The Turquoise Ring.' G. W. Godfrey and Lionel Benson.
'A Merry Christmas.' A. Law and King Hall.
'Sandford and Merton.' Burnand and A. S. Gatty.
'All at Sea.' A. Law and Corney Grain.
'Many Happy Returns.' G. A'Beckett and Lionel Benson.
'A Bright Idea.' A. Law and Arthur Cecil.
'Cherry Tree Farm.' A. Law and Hamilton Clarke.
'The Head of the Poll.' A. Law and Eaton Faning.
'Nobody's Fault.' A. Law and Hamilton Clarke.
'A Strange Host.' A. Law and King Hall.
'That Dreadful Boy.' G. A'Beckett and Corney Grain.
'A Mountain Heiress.' G. A'Beckett and Lionel Benson.
'Treasure Trove.' A. Law and A. J. Caldicott.
'A Water Cure.' A. Law, Arnold Felix, and George Gear.
'A Moss Rose Rent.' A. Law and A. J. Caldicott.
'A Double Event.' A. Law. Alfred Reed, and Corney Grain.
'Fairly Puzzled.' Oliver Brand and Hamilton Clarke.
'A Terrible Fright.' A. Law and Corney Grain.
'Old Knockles.' A. Law and A. J. Caldicott.
'A Peculiar Case.' A. Law and G. Grossmith.
'Hobbies.' Stephens, Yardley, and G. Gear.
'A Pretty Bequest.' M. Watson and Hamilton Clarke.
'A Night in Wales.' H. Gardner and Corney Grain.
'In Cupid's Court.' M. Watson and A. J. Caldicott.
'A United Pair.' Comyns Carr and A. J. Caldicott.
'The Friar.' Do.
'The Naturalist.' Comyns Carr and King Hall.
'Tally-Ho!' M. Watson and A. J. Caldicott.
'Wanted an Heir.' Do.
'The Bo'sun's Mate.' W. Browne and A. J. Caldicott.
'Brittany Folk.' Walter Frith and A. J. Caldicott.

For some years the 'Musical Sketches' of Mr. Corney Grain have been the principal attractions of the entertainment. Upwards of 50 of these have been given, the 50th coinciding with Her Majesty's Jubilee, and treating of topics connected with that event. [M.]

REFORMATION SYMPHONY. It should be added that one of the most prominent themes of the work is the beautiful ascending phrase known as the 'Dresden Amen,' which has been used with marvellous effect in Wagner's 'Parsifal.'

REFRAIN. P. 93 *b*, *add* See Schubert's 'Vier Refrainlieder,' op. 95.

REGAL. This name describes a variety of organ (not differentiated by size alone, as is implied in vol. iii. p. 93), which is especially interesting as being in some ways the prototype of the modern harmonium. It consists of a single row of 'beating' reeds, the pipes of which are in some instances so small as hardly to cover the reeds. A fine specimen is in the possession of the Brussels Conservatoire, and was lent to the Inventions Exhibition in 1885. The name 'bible regal' is not a synonym, but the title of another variety, the peculiarity of which consists in its being arranged to fold in two, on a similar principle to that on which leather backgammon boards are made. The bellows are covered with leather, so that when the instrument is folded, it presents the appearance of a large book. Line 11 of article, *for* Roll *read* Voll. For further particulars the reader is referred to Mr. A. J. Hipkins's 'Musical Instruments' (A. and C. Black, 1887), where both instruments are figured.

REGONDI, GIULIO. Line 8 of article, *for* 1831 or 1832 *read* in June 1831.

REICHARDT, ALEXANDER. Add date of death, May 14, 1885.

REICHARDT, J. F. P. 100*a*, l. 34, *for* 17 *read* 27.

REICHER, HEDWIG, *née* Kindermann, the daughter of the celebrated baritone,[1] was born July 15, 1853, at Munich. She was taught the piano first by her mother, and at the School of Music, but abandoned the same in favour of singing, on the advice of Franz Wüllner. She received her vocal instruction from her father, and made her début at the Munich Opera as one of the boys in the 'Meistersinger,' and next played small parts in the opera, drama, and ballet, besides singing in the chorus, so as to gain experience. She sang the alto part in Franz Lachner's Requiem at Leipzig in 1871 with such success that she became engaged at Carlsruhe. She played 'as guest' at Berlin as Pamina, June 5, and Agatha, June 9, 1874; she then returned to Munich, and sang Daniel in Handel's 'Belshazzar,' April 14, 1875. Soon after she married Emanuel Reicher, an actor at the Gärtnerplatz theatre, and for a time sang there in opera bouffe, but returned to opera and played Grimgerde in the 1st Cycle, and Erda in the 2nd Cycle at Bayreuth in 1876. She next played at Hamburg, Vienna (where she appeared as Leah on the production of Rubinstein's 'Maccabees'), and again at Munich. Having received instruction for the purpose from Faure and Jules Cohen at Paris, she played in French at Monte Carlo in 1880 with such success that she received an offer to sing at La Scala, Milan, but declined it in favour of an engagement at Leipzig under Neumann, where she made her début as Fidelio May 12, 1880. She became a great favourite, and remained there until 1882. She played on tour with Neumann as Brünnhilde in the 'Trilogy' in London, Berlin, and other German towns, and finally at Trieste, where she died June 2, 1883.

She made a great impression at Her Majesty's Theatre as Fricka on the production of 'Rheingold,' May 5, and of 'Walküre,' May 6, 1882, and still more as Brünnhilde in the 2nd Cyclus in the first two parts of the Trilogy; not only was her 'magnificent voice' equal to all the demands upon it, but her presentation of the character was full of force and of pathos. While no less touching than Frau Vogl in the truthfulness of her expression, she was more heroic and dignified; the supernatural element was brought into stronger relief . . . in the grand awakening scene her manner was perhaps too coldly dignified and wanting in the impulsiveness which characterizes the heroine when she has finally abandoned her supernatural attributes and become a true woman.[2] [A.C.]

[1] KINDERMANN, AUGUST, born Feb. 6, 1816, at Berlin, began his career at the opera as a chorus singer, received instruction from Meyer, and played both bass and baritone parts at Leipzig in 1839—1846, since when he has been engaged at Munich, where he obtained a life engagement, and has always been there a great favourite, being a very versatile artist. He celebrated his 25th anniversary of his engagement there on June 15, 1871, as Figaro in 'Nozze,' the Cherubino being his elder daughter Marie, then engaged at Cassel. He played Titurel (Parsifal) at Bayreuth in 1882; and on Sept. 9, 1886, he celebrated the jubilee of his career, and the 40th year of his engagement at Munich, playing the part of Stadinger in Lortzing's 'Waffenschmied.'

REID, GENERAL JOHN. P. 101*a*, l. 23, *for* 1842 *read* 1841.

REINECKE, KARL. Line 4 of article, *for* 1827 *read* 1824. To the list of his works add 'Die Flucht nach Aegypten,' cantata for male voices; an opera, 'Auf hohem Befehl' (Schwerin, Mar. 13, 1887); an overture 'Zenobia,' and a funeral march for the late Emperor of Germany (op. 200). Of his settings of fairy tales as cantatas for female voices 'Schneewittchen,' 'Dornröschen' and 'Aschenbrödel,' are very popular.

REINE DE CHYPRE, LA. Last line of article, *for* 1846 *read* 1841.

REINKEN, J. A. P. 103*b*, l. 7, *for* viola *read* viola da gamba, and add that the 'Hortus Musicus' has lately been republished as no. XIII of the publications of the Maatschappij tot bevordering der Toonkunst (Amsterdam, 1887). No. XIV of the same publication consists of Reinken's 'Partite Diverse' (variations). Note 1, add reference to English translation of Spitta's 'Bach,' i. 197–9.

REINTHALER. Add MARTIN as a second Christian name; also that he was a pupil of A. B. Marx, and that his cantata 'In der Wüste' has been very successful.

RENN, organ builder. See JARDINE & Co. vol. iv. p. 685.

REQUIEM. Mention should be made of the Requiem Masses of Gossec. [See vol. i. p. 611.] Berlioz, whose work is in some respects the most extraordinary setting of the words that has ever been produced, and Verdi, whose setting of the words may be regarded as marking the transitional point in his style. A work of Schumann's, op. 148, is of small importance; more beautiful compositions of his, with the same title, though having no connection with the ecclesiastical use of the word, are the Requiem for Mignon, and a song included in op. 90. See vol. iii. p. 420*a*.

REYER, LOUIS ETIENNE ERNEST. Add the following to the article in vol. iii. p. 122:—The revival of 'Maître Wolfram' and 'La Statue' at the Opéra Comique, Dec. 12, 1873, and April 20, 1878, respectively, showed how little the composer had been influenced by injudicious advice given him on the production of the former work, and the transformation of 'La Statue' into a grand opera made evident the fact that his artistic tendencies and convictions had become stronger instead of weaker. After numerous attempts on Reyer's part to secure an unmutilated performance of 'Sigurd' at the Paris Opera, he produced it at the Théâtre de la Monnaie, Brussels, Jan. 7, 1884, with considerable and lasting success. On July 15 of the same year it was produced at Covent Garden. The first per-

[2] Athenæum, May 20, 1882.

formance of the work in France was at Lyons, on Jan. 15, 1885, when it was received with marked success. On June 12, 1885, 'Sigurd' was performed at the Grand Opéra in Paris, but at the general rehearsal the directors thought fit to make curtailments in the score, and the composer retired, protesting against the proceeding, and yet unwilling to withdraw a work, on which so much trouble and expense had been bestowed, on the eve of its production. He threatened never to set foot in the opera-house until his score should have been restored to its original integrity, and in this he has kept his word. The public, less exacting than the composer, received the opera, which in many passages must have considerably surprised them, with increasing sympathy, and its success was all the more remarkable as it was entirely unassisted either by the composer, who appeared to take no interest in its fate, or by the directors, who would not have been sorry had it failed. The qualities which are most prominent in 'Sigurd' are the individual charm of its musical ideas, the exact agreement between the words and the music, vain repetitions and conventional formulas being generally absent; and lastly, the richness and colouring of the instrumentation, the style of which was greatly influenced by Reyer's favourite masters, Weber and Berlioz, and in places by Wagner. No charge of plagiarism from the last-named composer is intended to be suggested, nor could such a charge be substantiated. It is true that the subjects of 'Sigurd' and the 'Ring des Nibelungen' are identical, but this is a mere coincidence. The plot of the libretto, which was written by Du Locle and A. Blau, is taken from the Nibelungen Nôt, the source that inspired Wagner, who, however, went further back and took his subject direct from the Eddas, moulding it after his own conception. In 1868 the libretto of Wagner's trilogy had been published for 15 years, but it was completely unknown in France, and when the trilogy was produced in 1876, Reyer's score was nearly finished and ready for production. Reyer was decorated with the Légion d'Honneur in August 1862, after the successful performance of 'La Statue' at the Lyrique, and was raised to the rank of an officer in Jan. 1886, after that of 'Sigurd,' the success of which has had the important result of deciding him to write a new grand opera on Flaubert's 'Salammbô.' He is now editor of the musical portion of the 'Journal des Débats.' having succeeded d'Ortigue, who followed Berlioz. (The sentence in lines 1–5 from bottom of page 122 *a*, is thus to be corrected.) He has collected his most important articles and published them under the title of 'Notes de Musique' (Paris, Charpentier, 1875). In both literature and composition he is the disciple and admirer of Berlioz. It is curious that M. Reyer, having succeeded F. David at the Institut (1876), who himself succeeded Berlioz in 1869, should thus occupy the positions, both in music and literature, of the master whose legitimate successor he may well claim to be. [A.J.]

RHAPSODY. The Greek Rhapsodist (Ῥαψῳδός) was a professional reciter or chaunter of epic poetry. Ῥαψῳδία is the Greek title of each book of the Homeric poems, the first book of the Iliad being Ῥαψῳδία **A**, and so forth. The Rhapsody was the song of the *Rhapsode*; a sequel of Rhapsodies when sung in succession or written down so as to form a series constituted an epic poem, and when a long poem was chanted in sections at different times and by different singers it was said to be *rhapsodized*. The usual derivation of Ῥαψῳδία is ῥάπτω = I sew, and ᾠδή = song, ode.

Musicians might speak, in Hamlet's phrase, of a 'rhapsody of words,' or of tunes—that is to say, of a string of melodies arranged with a view to effective performance in public, but without regular dependence of one part upon another. Such a description would seem to apply pretty closely to Liszt's fifteen *Rhapsodies Hongroises*, and to his 'Reminiscences d'Espagne' (a fantasia on two Spanish tunes, Les Folies d'Espagne and La Jota Arragonesa, 1844–45) which, in 1863, he republished as a 'Rhapsodie Espagnole.' The history of the latter piece is similar to that of the Hungarian rhapsodies—portions of which were originally published under the title of 'Mélodies Hongroises—Ungarische National-melodien'—short transcriptions of Hungarian tunes as they are played by the wandering bands of Gipsies, the national musicians of Hungary. The prototype of these 'melodies' in all probability was Schubert's 'Divertissement à la Hongroise,' in G minor, op. 54—a piece Liszt has always been fond of, and of which he has produced several versions—as of the whole for pianoforte solo, and of the march in C minor for orchestra.[1] Liszt's ten sets of 'Mélodies Hongroises' date from 1839 to 1847; the 15 so-called *Rhapsodies Hongroises* from 1853 to 1854.

In 1859 Liszt published a book in French, 'Des Bohémiens et de leur Musique en Hongrie'—a late and overgrown preface, as he confesses, to the Rhapsodies. In this brilliant, though at intervals somewhat meretricious work,[2] an effort is made to claim for the set of Rhapsodies the dignity of an Hungarian Epic *sui generis*. P. 344: 'Alors nous acquîmes la conviction que ces morceaux détachés, ces mélodies disjointes et éparses étaient des parties disséminées, émiettées, éparpillées d'un grand tout; . . . et pourrait être considérés comme une sorte d'épopée nationale,—*épopée bohémienne*,—chantée dans une langue et dans une forme inusitées,' etc. P. 346: 'Par le mot de *Rhapsodie*, nous avons voulu désigner l'élément fantastiquement *épique* que nous avons cru y reconnaitre.' 'Les Rhapsodies, nous ont toujours semblé faire partie d'un cycle poétique,' etc. Be this as it may, the term 'Rhapsodie' remains as one of Liszt's many happy hits in the way of musical nomenclature, witness 'Poèmes Symphoniques' (Sinfonische Dichtungen), 'Partitions de Piano,' 'Paraphrases de Concert,' 'Fantaisies Dramatiques,' etc.

[1] He played his version of the march in London, April, 1886.

[2] Like Liszt's 'Chopin,' this book is on good authority reported to be the joint production of himself and certain lady-friends.

Brahms has adopted the term 'Rhapsodie' both in Liszt's sense and in that of the Greek Rhapsodists; and, as usual with him, he has added weight to its significance. His original 'Rhapsodien,' op. 79 for pianoforte solo—in B minor and G minor—are abrupt impassioned aphoristic pieces of simple and obvious structure, yet solidly put together. The 'Rhapsodie' in C, op. 53, for contralto, male chorus, and orchestra, justifies its title, in the Greek sense, inasmuch as it is a setting—a recitation, a rhapsody—of a portion of Goethe's poem 'Harzreise im Winter'; it, also, is a compact and carefully balanced piece.

Of Rhapsodies recently written, for the most part in the vein of Liszt, the following may be mentioned:—

RAFF, op. 22, two 'Rhapsodies élégiaques,' op. 120, 'Rhapsodie Espagnole,' and the 'Rhapsodie' contained in the Suite, op. 163—all for pianoforte.

DVOŘÁK, op. 45, three 'Slavische Rhapsodien,' for orchestra.

SVENDSEN, two 'Norwegische Rhapsodien,' for orchestra.

A. C. MACKENZIE, op. 21, 'Rhapsodie Écossaise' in B♭ (original), and op. 24, 'Burns, Second Scotch Rhapsody,' also in B♭, for orchestra. The latter, based on national tunes, is an admirable example of its kind.

The last movement of C. HUBERT H. PARRY'S 'Symphonic Suite in A minor for orchestra,' entitled 'Rhapsodie,' consists of a systematized series of melodies on the plan familiar in the Rondo. [E.D.]

RHEINBERGER, JOSEPH. Line 2 of article, *for* 1859 *read* 1839. Among his works are to be mentioned the following, besides those referred to in the article. Two large compositions for solos, chorus and orchestra, 'Christoforus' and 'Montfort'; two elaborate settings of the 'Stabat Mater' and a Requiem for the same, an organ concerto, and 6 sonatas for that instrument, making the number of these compositions eleven in all; two string quartets, three piano trios, a quintet for piano and strings, a duet for two pianos, besides part-songs, and other vocal works. Among his latest works are a nonet for wind instruments (op. 139), a string quartet (op. 147), 6 pieces for PF. and organ (op. 150), a mass (op. 151) and 12 organ pieces (op. 156). He has the title of Hofkapellmeister and Professor, and is a member of the Academy of Arts in Berlin.

RICHARDS, BRINLEY. Add date of death, May 1, 1885.

RICHARDSON, VAUGHAN. Line 8 of article, *for* about 1695 *read* in June 1693.

RICHTER, HANS. Line 5 of article, *for* Pesth *read* Vienna. P. 129 *a*, l. 9, *for* Capellmeister *read* Hofkapellmeister; l. 10, etc. add that the Richter Concerts have been given every year, since the publication of the article, and are now among the most successful of London concerts.

RICORDI. Line 14 of article, add that Tito Ricordi was born in 1811, and died Sept. 7, 1888.

RIEDEL, CARL. Add date of death, June 4, 1888.

RIES. P. 132 *a*, add day of birth of HUBERT RIES, April 1.

RIETZ, JULIUS. Line 7 from end of article, *for* Oct. 1 *read* Sept. 12.

RIMSKY-KORSAKOW, NIKOLAUS ANDREJEWITCH, born at Tichwin, Russia, in 1844, was at first intended for a military career, and became an officer of marines in the Imperial army. After several years' service, he abandoned his profession in order to devote himself to music. Although principally self-taught, he turned his studies to such good account that in 1871 he was made professor of composition at the Conservatorium at St. Petersburg. Not long afterwards he was appointed director of the free school of music in the same capital. Two operas by him have been represented at the Russian opera-house, 'Pskowitjanka,' Jan. 13, 1873, and 'Die Mainacht' (as the name is given in Riemann's Opernhandbuch), Jan. 20, 1880. The words of the latter are by the composer himself. Some fragments of another opera were published at St. Petersburg, where several symphonies, works for piano, and a collection of 100 Russian popular songs, have appeared. A 'legend' for orchestra, entitled 'Sadko,' was given by the Allgemeine Deutsche Musikverein at Altenburg in 1876, in which year a string quartet by him obtained considerable success, The society just mentioned produced his symphony 'Antar' (op. 15), at Magdeburg in 1881. He lately collaborated with the Russian composers, Liadow, Borodine, and Glazounow, in writing a string quartet on the name Belaieff, i. e. the notes 'B-la-f,' or B♭, A, F. A 'symphoniette' in A minor has lately been published as op. 31, a 3rd symphony as op. 32, a fantasia for violin and orchestra on Russian themes as op. 33, and a Capriccio Espagnol for orchestra as op. 34. [M.]

RITTER, F. L. Line 2 from end of article *for* Women *read* Woman. Add that Mme. Ritter has recently brought out a second series of the Essays and Criticisms of Schumann, and has written a sketch entitled 'Some Famous Songs.'

RITTER, THEODORE. See vol. ii. p. 735 *a*, and add date of death, April 6, 1886.

ROBARTT, of Crewkerne, was an 'orgyn maker' who let out organs to churches by the year. The Mayor of Lyme Regis in 1551 paid him ten shillings for his year's rent. [V. de P.]

ROBERTO DEVEREUX. Line 4 of article, *for* 1836 *read* the autumn of 1837, and add that an opera of the same name, composed by Mercadante, was produced at Milan on March 10, 1883.

ROBERTS, J. VARLEY. Add that in 1882 he was elected organist at Magdalen College, Oxford, succeeding Mr. Parratt. In 1884 the University Glee and Madrigal Society was founded under his conductorship; it now numbers about 150 members. In 1885 he accepted the post of organist of St. Giles's, Oxford, and in the same

year was appointed examiner in music to the Oxford Local Examinations, and also became conductor of the Oxford Choral Society. In 1886 he was appointed one of the University examiners for musical degrees. The latest addition to the list of his church music is an anthem, 'I will sing unto the Lord,' written for the Jubilee Service in Magdalen College. [W.B.S.]

ROBSON, JOSEPH, organ builder. See FLIGHT, vol. i. p. 532, and FLIGHT, vol. iv. App. p. 636.

ROCHE. Line 1, *for* EDWARD *read* EDMOND. The facts of the case concerning the French translation of 'Tannhäuser' have only recently been made public, in M. Jullien's 'Richard Wagner' (1887). Roche, not knowing German, had recourse to the services of a friend named Lindau, and the translation, when sent to the director of the Opera, was rejected, as it was in blank verse; the necessary alteration into rhyme was made by Roche, Nuitter, and Wagner in collaboration. On this Lindau brought an action against Wagner, to enforce the mention of his name as one of the translators; the case was heard on March 6, 1861, a week before the first representation of the opera, and it was decided that no name but that of Wagner should appear in the books. [M.]

RODE, PIERRE (properly JACQUES PIERRE JOSEPH). Line 2 of article, *for* 26 *read* 16. P. 142 *b*, l. 20, add that he was solo violin at the Opéra until Nov. 17, 1799. P. 143 *a*, l. 13 from bottom, add that three more concertos were published posthumously. (See Pougin's supplement to Fétis.)

ROGERS, BENJAMIN. Line 5, add that he succeeded Jewitt in the appointment to Christ Church, Dublin, in 1639. Line 4 from bottom of same column, refer, as to his degree, to Carlyle's 'Oliver Cromwell,' v. 243, 4 (People's Edition).

ROGERS, ROLAND, Mus. Doc., born at West Bromwich, Staffordshire, Nov. 17, 1847, where he was appointed organist of St. Peter's Church in 1858. He studied under Mr. S. Grosvenor, and in 1862 obtained by competition the post of organist at St. John's, Wolverhampton. In 1867 he similarly obtained the organistship of Tettenhall parish church, and in 1871 was appointed organist and choirmaster at Bangor Cathedral, a post which he still holds. He took the Oxford degree of Mus. B. in 1871, and that of Mus. D. in 1875. Dr. Rogers's published works are 'Prayer and Praise' a cantata, Evening Services in B♭ and D, Anthems, Part-songs, Organ Solos, and Songs; a Symphony in A, a Psalm 'De Profundis,' and several Anthems and Services are still in MS. [W.B.S.]

ROMANCE. P. 148 *a*, l. 2, add the three pieces by Schumann, op. 28. Line 3, *omit the words* or some one of his followers.

ROMANTIC. P. 149 *b*, second example, the last three dotted minims should not be tied.

ROME. The early music schools of Rome, from the time of St. Sylvester to that of Palestrina, were so closely connected with the papacy that their history, as far as it is known, may be read in the article SISTINE CHOIR, vol. iii. p. 519.

Whether or not Guido d' Arezzo founded a school of singing at Rome in the first half of the 11th century is only a matter of conjecture; the probabilities are in favour of the theory, as it is known that Guido spent a short time, at least, at the capital about the year 1032, and that the then Pope John XIX. was so delighted with his method of teaching singing that he urged him to take up his residence in Rome, an invitation which only ill-health prevented Guido from accepting. In any case there can be no reasonable doubt that the papal choir received many valuable hints from him.

The Sistine Chapel was not the only one which had a school or college of music attached to it, though it was by far the earliest. In 1480 Sixtus IV. proposed the formation of a 'cappella musicale' in connection with the Vatican, distinct from the Sistine; his idea was not however realized till the time of Julius II., when the 'Cappella Giulia' was founded (in 1513) for 12 singers, 12 scholars, and 2 masters for music and grammar. Arcadelt was the first 'Maestro de' Putti' (in 1539), Palestrina the first 'Maestro della cappella della basilica Vaticana' (1551–4); among celebrated 'maestri' in later days were Tommaso Bai (1713–15), and Domenico Scarlatti (1715–19). The 'Cappella musicale nella protobasilica di S. Giovanni in Laterano' was founded in 1535 by Cardinal de Cupis; one of the earliest 'Maestri de' Putti' was Lasso (1541); Palestrina held the office of 'Maestro di cappella' here after his exclusion from the Vatican chapel (1555–61). The 'Cappella di Musica nella basilica Liberiana' (or Sta. Maria Maggiore) was founded about the same time as the Lateran chapel, and numbers among its 'maestri' Palestrina (1561–71), Giov. Maria Nanini (1571–1575), Alessandro Scarlatti (1703–9).

Besides these exclusively ecclesiastical schools, others were established by private individuals. The first man who is known to have kept a public music school at Rome was a foreigner, Claude Goudimel, of Vaison, near Avignon; his school is supposed to have been founded about the year 1539, and among his earliest pupils were Palestrina, Giovanni Animuccia, and Giovanni Maria Nanini. In 1549 Nicola Vicentino, the would-be restorer of the Ancient Greek Modes, opened a small private school at Rome, into which a few select pupils were admitted, whom he endeavoured to indoctrinate with his musical views. But it was not till a quarter of a century later that a public music school was opened by an Italian. Whether it was that Nanini was inspired by his master's example, or, which is still more likely, was stirred by the musical agitation of the day, is of little importance; but it is certain that the year to which the opening of his school is attributed was the same which saw the foundation of the Order of Oratorians, who in the person of their leader, St. Filippo Neri, were then doing so much for

the promotion of music. Nanini soon induced his former fellow-pupil, Palestrina, to assist him in teaching, and he appears to have given finishing lessons. Among their best pupils were Felice Anerio and Gregorio Allegri. After Palestrina's death Nanini associated his younger brother Bernardino with him in the work of instruction, and it was probably for their scholars that they wrote jointly their treatise on counterpoint. Giovanni Maria dying in 1607 was succeeded by Bernardino, who was in his turn succeeded by his pupil and son-in-law Paolo Agostini. It must have been this school that produced the singers in the earliest operas and oratorios of Peri, Caccini, Monteverde, Cavaliere, Gagliano, etc. In the second quarter of the 17th century a rival school was set up by a pupil of B. Nanini, Domenico Mazzocchi, who, with his younger brother Virgilio, opened a music school, which was soon in a very flourishing condition; this was due in a great measure to the fact that the masters were themselves both singers and composers. Their curriculum differed but slightly from that of the Palestrina-Nanini school. In the morning one hour was given daily to practising difficult passages, a second to the shake, a third to the study of literature, and another hour to singing with the master before a mirror; in the afternoon an hour was occupied in the study of the theory of music, another in writing exercises in counterpoint, and another in literature; the remainder of the day (indoors) was employed in practising the harpsichord and in composition. Outside the school the pupils used sometimes to give their vocal services at neighbouring churches, or else they went to hear some well-known singer; at other times they were taken to a spot beyond the Porta Angelica to practise singing against the echo for which that neighbourhood was famous. In 1662 Pompeo Natale kept a music school, at which Giuseppe Ottavio Pitoni, the reputed master of Durante and Leo, learnt singing and counterpoint. G. A. Angelini-Buontempi, a pupil of the Mazzocchis, writing in 1695, says that Fedi, a celebrated singer, had opened the first school exclusively for singing at Rome. His example was soon followed by Giuseppe Amadori, with equal success; the latter was a pupil of P. Agostini and no doubt had not entirely forgotten the teachings of the old school; but by the end of the 17th century its traditions were gradually dying out, to be replaced by the virtuosity of the 18th century.

We must now retrace our steps and give some account of the most important musical institution at Rome of past or present time—the 'Congregazione dei Musici di Roma sotto l'invocazione di Sta. Cecilia.' It was founded by Pius V. in 1566, but its existence is usually dated from 1584, when its charter was confirmed by Gregory XIII.; almost all the masters and pupils of the Palestrina-Nanini school enrolled their names on its books, and their example has been since followed by over 4000 others, including every Italian of note, and in the present century many illustrious foreigners, such as John Field, Wagner, Liszt, Gounod, etc., etc.

The officers originally appointed were a Cardinal Protector, a 'Primicerio' or president, usually a person of high position, a 'Consiglio dirigente' of four members (representing the four sections—composition, the organ, singing and instrumental music), a Secretary, a Chancellor, twelve Councillors, two Prefects, etc.; there were also professors for almost every branch of music; Corelli was head of the instrumental section in 1700. Those qualified for admission into the institution were chapel-masters, organists, public singers, and well-known instrumentalists. By a papal decree of 1689 all musicians were bound to observe the statutes of the Academy; and by a later decree (1709) it was ordained that its licence was necessary for exercising the profession. Soon after this the Congregation began to suffer from an opposition which, though covert, was none the less keenly felt; and in 1716 a papal decree unfavourable to the institution was passed. In 1762 it was flourishing again, for in that year we find that a faculty was granted to the cardinal protector to have the general direction of all ecclesiastical music at Rome. By another decree, of 1764, it was enacted that none but those *skilled* in music should be in future admitted as members. The entrance-fee was, as it has continued to be, a very small one. The demands made upon members were also very slight. At first they were only expected to assist, by their compositions or performances, in the grand annual festival in honour of the patron saint. Towards the close of the 17th century were added one or two annual services in memory of benefactors; in 1700 a festival in honour of St. Anna, and in 1771 a '*piccola* festa di Sta. Cecilia.'

The Academy originally took up its quarters at the College of Barnabites (afterwards Palazzo Chigi) in the Piazza Colonna, where they remained for nearly a century; thence they moved to the Convent of Sta. Maria Maddalena, and again to another college of Barnabites dedicated to San Carlo a Catinari. Here they resided for the greater part of two centuries, and, after the temporary occupation of premises in the Via Ripetta, finally, in 1876, settled at their present quarters, formerly a convent of Ursuline nuns, in the Via dei Greci. Besides the hostility which the Congregation had to undergo, as we have seen, from outsiders, at the beginning of the last century—which was repeated in another form as late as 1836—it has had its financial vicissitudes. Indeed at the end of the last, and beginning of the present century, the funds were at a very low ebb, from which they have been gradually recovering. The institution was dignified with the title of Academy by Gregory XVI. in 1839, and shortly after Queen Victoria consented to become an associate. Two years later Rossini's 'Stabat Mater' was performed for the first time in Italy in its entirety by the members of the Academy. Pius IX., who became Pope in 1846, though he founded several other schools for singing, such as that of 'S. Salvatore in Lauro,' did little more

for the Academy than to bestow upon it the epithet 'Pontificia.' After the consolidation of the kingdom of Italy the Academy began to make great strides; Victor Emmanuel himself gave it his support and erected it into a Royal Institution. In 1870 Signors Sgambati and Pinelli started their pianoforte and violin classes, which are still the most popular, owing to the excellence of the instruction given and the very moderate price of lessons. It was not till 1877 that the long-wished-for 'Liceo musicale' in connection with the Academy became a *fait accompli*. Members were now divided into 'Soci di merito, ordinari, illustri, and onorari'; but the titles of the principal officers were not materially altered. Professors were appointed, twenty-nine in number (since increased to thirty-four) for every quality of voice and for every instrument of importance. Alessandro Orsini had the superintendence of the Singing, and Ferdinando Furino of the Violoncello classes. A school was also set up for choral singing; lectures were delivered by the Librarian, Professor Berwin (to whose efforts a great deal of the success of the 'Liceo' may be attributed); prizes were offered; public concerts were given by the members;—in fact it is to the Academy that Rome looks on all public occasions, whether it is for a charity concert or a requiem, as in the cases of Garibaldi and Victor Emmanuel. The Library, which was a very small one when Gregory XVI. bequeathed to it, in 1846, his musical library, has since, in 1875, been enriched by the Orsini collection, and, in 1882, by the musical works which had formerly belonged to the dissolved Monasteries; in the latter year were also added copies of all modern musical publications—since 1500—which were to be found in the various libraries of Rome; so that now the Academy possesses one of the largest and most important musical libraries in Italy. Owing to the large grants made by the government, the municipality, etc., at the time of the creation of the 'Liceo,'—grants which have been for the most part continued annually and in some cases increased—the institution has been enabled to extend its sphere of operations. It still enjoys Court patronage, King Humbert being honorary president, and Queen Margherita also an associate. There are now nearly 200 members, and it is proposed to erect new schools to meet the increased demands. Interest in the Academy is not by any means confined to Italy; this is often shown in a substantial way, as in the presentation to it of pianofortes by Messrs. Erard and Brinsmead, etc. etc. At the present moment a large concert hall is in course of construction.[1]

The institution has done great service in the past to the Roman musical world, and is still continuing to do so, to such a degree that Rome no need longer fear comparison with any other Italian town, Milan perhaps excepted.

Still, notwithstanding the presence of such excellent musicians as Sgambati and Pinelli, whose classical concerts have done much to elevate the taste of the capital, notwithstanding its national Apollo theatre, its well conducted journal the 'Palestra Musicale,' and its numerous musical critics, the Rome of 1889 reflects but little of its former glories. [A.H.-H.]

[1] A considerable part of the information relating to the Academy has been derived from Enrico Tosti's 'Appunti storici sull' Accademia di S. Cecilia.'

ROMEO AND JULIET. Line 8 of article, *for* Carnival *read* Jan. 30. Line 11, *for* the Scala *read* the Teatro della Canobbiana, *and for* spring of 1826 *read* Oct. 31, 1825. Line 15, *for* 12 *read* 11. Add date of first performance of Berlioz's symphony, Nov. 24, 1839.

RONCONI. P. 154 *b*, l. 14 from bottom, *for* Giovannina *read* Elguerra. Line 13 from bottom, *for* the previous year *read* early in the same year. Line 12 from bottom, *for* St. James' Theatre *read* Lyceum and King's Theatres. Add date of death of GIORGIO, Feb. 1883. P. 155 *a*, l. 3 from bottom, add that his first appearance in England was at the Lyceum as Cardenio in Donizetti's 'Furioso,' Dec. 17, 1836. It is presumed to have been Sebastiano who sang at the Philharmonic Feb. 27, 1837, since Giorgio first appeared in London in 1842.

ROOSE, JOHN, a Brother of the Order of Preaching Friars, repaired one of the organs in York Minster in 1457. This is the first English organ builder of which we have any authentic mention. [V. de P.]

RORE, CIPRIANO DI. Line 14 of article, *for* almost immediately *read* after about eighteen months.

ROSA, CARL. Add that in 1882 a season was given at Her Majesty's Theatre, from Jan. 14 to March 11. 'Tannhäuser' and Balfe's 'Painter of Antwerp' ('Moro') were produced, and Mme. Valleria joined the company. For the season of 1883 (March 26–April 21) the company moved to Drury Lane, which was its London centre until 1887. Thomas's 'Esmeralda' and Mackenzie's 'Colomba' were produced, and Mme. Marie Roze appeared as Carmen, etc. In 1884 (April 14–May 10) Stanford's 'Canterbury Pilgrims' was the only new work produced. In 1885 (April 6–May 30) Thomas's 'Nadeschda' and Massenet's 'Manon' were given. In 1886 (May 23–June 26) Mackenzie's 'Troubadour,' and in 1887 (April 7–June 11) Corder's 'Nordisa' were the novelties. In 1889, a 'Light Opera Company' opened with Planquette's 'Paul Jones' at the Prince of Wales's Theatre.

ROSALIA. P. 160 *b*, 2nd paragraph, *add* For a fivefold repetition see the BRANLE given under FORM, vol. i. p. 542 *b*.

ROSENHAIN, JACOB. Line 5, *for* Stuttgart in 1825, *read* Frankfort in 1823. Line 11, *for* not so fortunate *read* never performed. Line 12 from end, *for* minor *read* major. Line 11 from bottom, *for* but not played *read* played at a Concert Populaire. To list of works add a PF. concerto, op. 73; Sonata, op. 74; do. PF. and cello, op. 98; 'Am Abend' for quartet, op. 99.

ROSSI, LAURO. P. 163 *b*, l. 12, *for* one of the Milanese theatres *read* the Teatro della

Canobbiana, in September 1849. Line 2 from end of article, *for* version *read* libretto. Add date of death, May 5, 1885.

ROSSINI. P. 166 *a*, l. 5 from bottom, *for* 1814 *read* 1813–14. Line 4 from bottom, *for* in the Carnival *read* in Dec. 1813. P. 174 *a*, l. 30–34, add that the three choruses for female voices here referred to are stated by Mr. Louis Engel to be spurious. In his 'From Mozart to Mario' he says that the composer denied their authenticity. P. 177 *a*, l. 13 from bottom, *for* Countess *read* Baroness. P. 177 *b*, in the list of operas, after 'Ermione,' insert 'Figlio per Azzardo, Il,' produced at Venice, Carnival, 1813. For date of production of 'Moïse' in Paris, read March 26. For date of production of 'Mosè' at Naples, read March 5. For the first performance of 'Otello' at Naples, read Dec. 4, and for production of the same in London, read May 16. For date of production of 'Tancredi' in Venice read Feb. 6. After 'Turco in Italia' insert 'Viaggio a Reims,' produced in Paris, June 19, 1825. P. 178 *a*, omit from the list of Sacred Music 'La Foi, l'Esperance, et la Charité.'

ROTA. Line 4 of article, *omit the words* or dulcimer or primitive zither. The instrument is partly analogous to the Welsh Crwth, and would appear to be derived from the ancient lyre. The word Rota is also employed to denote a round or canon, as in the well-known instance of SUMER IS ICUMEN IN.

ROUGET DE LISLE. Line 12 from end of article, omit the reference to Varney.

ROUSSEAU'S DREAM. For the last two sentences of the article read as follows:—The melody occurs in the 'Pantomime' in Scene 8 of the 'Devin du Village,' where its form is as follows:—

The origin of the title 'Dream' is not forthcoming. [M.]

ROW OF KEYS. Line 4 from end of article, *for* one sounding less noisy wires than the other *read* one fitted with jacks more finely quilled, and therefore less powerful, than those connected with the other manual.

ROYAL ACADEMY OF MUSIC. P. 186 *b*, l. 25, add that the room was not available as a public concert room for a few years, the license being withdrawn for some time. Line 28, add that Mr. Shakespeare was succeeded in this capacity by Mr. Barnby in 1886. Line 34, add date of death of Sir G. A. Macfarren, 1887, and that of the appointment of his successor, Dr. A. C. Mackenzie, 1888.

ROYAL COLLEGE OF MUSIC, THE. For information as to the commencement of the institution, see TRAINING SCHOOL, vol. iv. p. 159. Line 15 from end of that article, add that in 1886, Mme. Lind-Goldschmidt was succeeded by Mr. Henschel, and he by Mr. A. Blume. Add that the number of scholarships is now (Feb. 1889) 58, of which 15 include maintenance; the number of paying students is 188. In 1887 the Alexandra House was opened, containing a beautiful concert hall, where the students' concerts are regularly held, as well as accommodation for 100 ladies, some of whom are pupils of the College.

ROZE, MARIE. Add that after singing at the Birmingham Festival of 1882 with great success, she joined the Carl Rosa company from 1883 to 1887; in that time she added to her repertory Fidelio, and Elsa, and was the first representative in England of Manon Lescaut in Massenet's opera of that name. Margaret and Helen in Boito's 'Mefistofele,' Carmen, Fadette in Maillart's 'Dragons de Villars,' Donna Maria in Marchetti's 'Ruy Blas,' are among the parts which she has sung on the first production of these works in English.

RUBINI. Line 20 from end of article, add that the date of death is variously given as March 1 (Paloschi), and 2 (Mendel and Riemann).

RUBINSTEIN, ANTON. Line 3, correct date of birth to 1830. To the list of his operas given on p. 192 *a*, add 'Die sibirische Jäger,' 'Toms, der Narr,' 'Die Rache,' and 'Kalaschnikoff,' (1880), all to Russian words; 'Sulamith,' in 5 acts, Hamburg, Nov. 8, 1883, 'Unter Räubern,' comic opera in one act (produced, according to Riemann's 'Opernhandbuch,' on the same evening with 'Sulamith'), and 'Der Papagei,' comic opera in one act, Hamburg, Nov. 11, 1884. (The last three with German words.) Add to list of works the following:—

Op. 108. Trio for PF. and Strings in C minor.
109. Soirées Musicales. 9 PF. pieces.
110. Eroica. Fantasia for PF. and Orchestra.
Op. 111. 6th Symphony (A minor).
112. 'Moses,' a Biblical opera in 8 tableaux. Part I, containing four tableaux (Blider), was published by Senff, 1888.

P. 192 *b*, l. 8 from bottom, *omit the sentence beginning* No doubt he played in public, etc., *and add that* an account of his performance will be found in the 'Musical and Dramatic Review' for 1842. P. 193 *a*, l. 10, *for* 'Ocean' *read* 'Dramatic.' Line 17, add that he gave a set of seven historical recitals in S. James's Hall, in May and June 1887. (Died Nov. 20, 1894.)

RUBINSTEIN, JOSEF. Add that he died by his own hand in September 1884.

RUCKERS. P. 194 *a*, l. 3. This Hans Ruckers harpsichord transformed into a grand pianoforte appeared again at the sale of Lord Lonsdale's furniture in June 1887, when it realised £700. Burney's description of Rameau's portrait inside the lid should be amended. The composer does not hold a lyre, and is being

crowned with a wreath. The expressive character shown in the portrait should vouch for the resemblance to the composer even if Burney had not said that it was very like. On the front board above the keys is inscribed a complete piece of clavecin music, 'Pastorale par Mr. Balbastre, le 6 Aoust, 1767,' beginning—

The stand for this instrument is rococo, and gilt. In the same house (Carlton House Terrace), and sold by auction at the same time for £290, was an Andries Ruckers harpsichord that had also been made into a pianoforte by Zeitter. In this instrument the original belly, dated 1628, was preserved. The soundhole contained the rose (No. 6) of this maker. The present compass of the piano is five octaves F—F. Inside the top is a landscape with figures, and outside, figures with musical instruments on a gold ground. Round the case on gold are dogs and birds, a serpent and birds, etc. All this decoration is 18th century work. The instrument is on a Louis Quinze gilt stand. It will be seen that these two harpsichords have undergone remarkable changes at intervals of more than one hundred years. They will be numbered 67 and 68 in the list of extant Ruckers clavecins, which completes all that is at present known to the writer concerning the existing instruments of that family.

HANS RUCKERS (the Elder or the Younger) and ANDRIES RUCKERS (the Elder).

No.	*Form.*	*Date.*	*Dimensions.*	*General Description.*	*Present Owners.*	*Source of information.*
67	Bent side.		Not original.	To be found in pp. 193 *b*, 194 *a*.	Panmure Gordon, Esq.	A. J. Hipkins.
68	Bent side.	1628	7ft. 7¼ by 3ft. 6½	Rose No. 6 in soundboard, which is painted with the usual decoration. The width has been increased to admit of a greater compass.	Walter H. Burns, Esq. and Captain Hall.	A. J. Hipkins.
69	Four cornered.		32 in. long, 12½ in. wide, 6 in. deep: keyboard projects 4 in.	White natural keys, E to D, nearly 4 octaves. Inscribed Andreas Ruckers me fecit Antverpiae (Rose No. 6?). Inside surfaces painted in black curved design on a white ground. Red line round the inside. Georgian mahogany case.	W. H. Hammond Jones, Esq., Witley, Godalming.	W. H. H. Jones, Esq.

ANDRIES RUCKERS (the Elder).

No.	*Form.*	*Date.*	*Dimensions.*	*General Description.*	*Present Owner.*	*Source of information.*
70	Bent side.	1639	6 ft. 4 in., 2 ft. 9 at keyboard.	Two keyboards, compass 4½ octaves G—D, white naturals. Two unisons and octave. Soundboard painted, and usual A. Ruckers rose.	Mr. C. Cramp, Byfield, Northamptonshire.	Mr. C. Cramp.

Nos. 1 to 58 are tabulated in vol. iii. pp. 197-9. Nos. 59 to 62, vol. iii. p. 652. Nos. 63 to 66, vol. iv. p. 305.

P. 194 *a*, l. 21, *for* always long *read* long, or it may have been trapeze-shaped. It must be remembered that the names Clavicordio in Spain, Clavicordo in Italy, and Clavicorde in France, have been always applied to the quilled instruments. We are not therefore sure whether old references to the clavichord are to be taken as describing a plectrum or a tangent keyboard instrument.

P. 194 *b*, It is doubtful what changes of construction Hans Ruckers made in the harpsichord —perhaps the octave strings only. Yet a clavicembalo by Domenico di Pesaro, dated 1590, lately acquired by South Kensington Museum, has the octave strings with two stops. His great service may after all have only been to improve what others had previously introduced. It is nearly certain that harpsichords with double keyboards and stops for different registers existed before Hans Ruckers' time, and their introduction may be attributed to the great favour the Clavi-organum, or combined spinet and organ, was held in during the 16th century. The researches of Mr. Edmond Vander Straeten ('La Musique aux Pays Bas,' vol. viii. Brussels 1885), have done much to bring into prominence the great use of the Claviorganum at an early time; see Rabelais, who, before 1552, described Carêmeprenant as having toes like an 'epinette organisée.'

P. 194 *b*, footnote 2. The latest harpsichord in date known to have been made in London is the fine Joseph Kirkman, dated 1798, belonging to Mr. J. A. Fuller Maitland.

P. 195 *b*, l. 37, see Ruckers No. 59, by Hans the elder, now in the Kunst und Gewerbe Museum, Berlin, as being similarly constructed.

P. 196 *a*, footnote, The Hitchcocks were active in the second half of the 17th century and in the first years of the 18th. [A.J.H.]

RUDDYGORE: OR, THE WITCH'S CURSE (Title afterwards spelt RUDDIGORE.) Comic opera in two acts; the words by W. S. Gilbert, music by Sir Arthur Sullivan. Produced at the Savoy Theatre, Jan. 22, 1887.

RUDERSDORFF, HERMINE. Line 11 of article, *for* June 5 *read* June 25. Add date of death, Feb. 26, 1882.

RUDOLPH, ARCHDUKE. P. 201 *b*, to list of works *add* Variations by him on a theme of Rossini's, corrected by Beethoven, exist in MS. (Thayer).

RUDORFF, E. To list of works add Symphonic variations and a Scherzo capriccioso for orchestra.

RUE, Pierre de la, also known as Pierchon, Pierson, Pierzon, Pierozon, and Petrus Platensis, born in Picardy about the middle of the 15th century and fellow-pupil of Josquin des Prés in the school of Okeghem. State records prove that he was in the service of the court of Burgundy in the years 1477, 92, 96, 99, 1500 and 1502. In 1501 he was a prebend of Courtrai, and later held a similar benefice at Namur, which he resigned in 1510. Most writers on music accord him a position as a contrapuntal composer scarcely second to that of Josquin, and the magnificent copies of his masses made by order of the Princess Margaret of Austria, and now in the libraries of Vienna and Brussels, testify to the value set upon his works by those he served. Indeed, considering his great reputation, it is somewhat surprising that so little is known of the events of his life, and that so little of his music has been printed. Of the 36 masses now existing Petrucci printed five in the composer's life-time (Misse Petri de la Rue; Venetiis, 1503), and a few more in later collections. Of motets only 25, and of secular pieces no more than 10, are to be found in the publications of the 16th century—a small result compared to the long catalogue of Josquin's printed works. Burney, Forkel and Kiesewetter give short examples from Pierre de la Rue's compositions. [J.R.S.B.]

RULE BRITANNIA. Add that Wagner wrote an overture in which it is introduced. See vol. iv. p. 373 *a*.

RUSSELL, Henry, was born at Sheerness on Dec. 24, 1813; went to Bologna, in 1825, to study music, to New York in 1833, returning to England in 1840, when he commenced travelling as a vocalist and composer. In his particular styles he has had no rival. His songs 'I'm afloat,' 'A life on the ocean wave,' 'Cheer, boys, cheer' (the only air played by the regimental drum and fife band when a regiment goes abroad), 'Woodman, spare that tree,' etc., are still familiar, and some of his dramatic songs, as 'The Dream of the Reveller,' 'The Maniac,' 'The Gambler's Wife,' etc., were immensely popular in their day. It may certainly be said that over 800 songs have either been written or composed by him. Fifty years ago (when Australia, Tasmania and New Zealand were almost unknown), Henry Russell was instrumental, through the Canadian government, in sending over thousands of poor people who are now wealthy. A memoir was published in 1846, and two volumes of copyright songs in 1860; 'L'amico dei cantanti,' a treatise on the art of singing. His last composition is a song 'Our Empress Queen,' written in honour of Her Majesty's Jubilee. [J.H.D.]

S.

SACCHINI, A. M. G. P. 208 *b*, add that the opera of 'Oedipe' was performed at Versailles, Jan. 2, 1786.

SACRED HARMONIC SOCIETY. P. 210 *b*, l. 4 from bottom, *for* only *read* first. Add that the original society was dissolved in 1882, its last concert being a performance of 'Solomon' on April 28 of that year. At the sale of its property its valuable library was acquired for the Royal College of Music. Some members of the committee determined to resuscitate the society, and the new institution was incorporated in 1882. Mr. Charles Hallé was appointed conductor, and in 1885 was succeeded by Mr. W. H. Cummings, who had, up to that time, acted as assistant conductor. In the autumn of 1888 the new society ceased to exist.

SAINT-GEORGES, J. H. V., Marquis de. Add day of death, Dec. 23.

SAINT-SAËNS, Charles Camille. Add the following to the article in vol. iii.:—Since the article was written, the composer has produced two important dramatic works, 'Henri VIII' (Opéra, March 5, 1883) and 'Proserpine' (Opéra Comique, March 16, 1887), neither of which has kept the stage in spite of their real musical interest. The former, after a successful series of representations, was twice revived without success and almost immediately given up; 'Proserpine' was received with marked disapprobation, and only played ten times. Saint-Saëns is a consummate master of composition, and no one possesses a more profound knowledge than he does of the secrets and resources of the art; but the creative faculty does not keep pace with the technical skill of the workman. His incomparable talent for orchestration enables him to give relief to ideas which would otherwise be crude and mediocre in themselves; and it is this talent which makes him the one French musician most fitted to compete with the classic masters of the Symphony. His weakness consists not only in the inequality of his inspiration, but also in the indecision of his artistic principles; this is shown in all his compositions, and it is this which leads him to place excellent and objectionable passages in juxtaposition. For the same reason his works are on the one hand not frivolous enough to become popular in the widest sense, nor on the other do they take hold of the public by that sincerity and warmth of feeling which is so convincing. Saint-Saëns, who was made a knight of the Légion d'honneur in 1867, and an officer of the same in July 1884, is always the same incomparable pianist. It would even seem that

during the last few years his talent in this direction had increased, and such receptions as he has received at the Conservatoire, where he played Beethoven's Choral Fantasia, in Russia, on the occasion of his tour in 1887 with Taffanel, Turban, and Gillet, and in London, prove him to be one of the most remarkable and earnest pianoforte players of the day. Under the title of 'Harmonie et Mélodie' (Paris, Calmann Lévy, 1885), he has published a collection of his principal contributions to periodical literature, with an introduction and appendix explaining the change which his views have undergone in relation to Richard Wagner. This volume, proving as it does the author's mobility of character and changeableness as regards ideals and tendencies, will not add materially to his fame.

To the list of works on p. 216 *a*, add the following:—

Dramatic and Lyric:—'Henry VIII' and 'Proserpine,' mentioned above; 'Hymne à Victor Hugo' (Trocadéro, March 15, 1884); Psalm xix, for solo, chorus, and orchestra (Sacred Harmonic Society, Nov. 20, 1885).

Orchestral:—A third Symphony in C minor, for orchestra, organ, PF., 4 hands (played at a Philharmonic Concert in May 1885), (op. 78); 'Le Carnaval des Animaux,' orchestral suite.

Concerted music with orchestra:—'Rhapsodie d'Auvergne,' for PF. and orchestra (Concerts du Châtelet, March 13, 1885).

Chamber music:—Sonata for PF. and violin in D minor; Caprice (quartet) on Danish and Russian airs for PF. and wind instruments (op. 79); Havanaise for violin and PF. (op. 83).

Pianoforte:—'Souvenir d'Italie' (op. 80), and 'Feuillet d'Album' (op. 81).

Vocal:—'La Fiancée du Timballer,' ballade (V. Hugo), (op. 82).

[A.J.]

SAINTON-DOLBY, Charlotte Helen. Add that she died at the age of 64 at her residence, 71 Gloucester Place, Hyde Park, Feb. 18, 1885, and was buried at Highgate Cemetery, the great concourse of persons assembled testifying to the estimation in which this singer was held. M. Sainton's farewell concert, June 1883, at the Albert Hall, was the occasion of his wife's last appearance in public. 'Florimel,' a fairy cantata for female voices, written during the last few months of Madame Sainton-Dolby's life, has since been published by Novello. The Royal Academy of Music founded, shortly after her death, a scholarship in memory of the eminent singer, once a student within its walls. [L.M.M.]

SALMON, Thomas. See vol. iii. p. 655, note 2.

SALVAYRE, Gervais Bernard, called Gaston, born at Toulouse, Haute-Garonne, June 24, 1847, began his musical education at the maîtrise of the cathedral, and afterwards studied at the conservatoire of the town, before he was brought by Ambroise Thomas to the Paris Conservatoire, where he studied the organ with Benoist, and composition and fugue with Thomas and Bazin. He gained the first prize for organ in 1868, and competed for the Prix de Rome every year from 1867 to 1872, gaining it at last by sheer force of perseverance. During his stay at Rome, Salvayre worked very hard, and many of his compositions date from this time, notably his opera of 'Le Bravo,' and his sacred symphony in four movements, 'Le Jugement dernier,' of which the first two movements were performed at the Concerts du Châtelet, March 19, 1876. It was given in its entirety at the same concerts on Dec. 3, 1876, under the title of 'La Résurrection,' and again, under a third title, 'La Vallée de Josaphat,' at Lamoureux's concert on April 7, 1882. The remaining works written by Salvayre for the concert-room are an 'Ouverture Symphonique,' performed on his return from Rome at the Concerts Populaires, March 22, 1874; a Stabat Mater, given under the care of the Administration des Beaux-Arts; a setting of Ps. cxiii for soli, chorus, and orchestra; and an air and variations for strings, performed in 1877, all the last given as the fruits of his residence in Italy. On his return to Paris, he was appointed chorus master at the Opéra Populaire which it had been attempted to establish at the Théâtre du Châtelet, and he then wrote ballet music for Grisar's 'Amours du Diable,' revived at this theatre Nov. 18, 1874. Three years later he made his real début with his grand opera, 'Le Bravo' (Théâtre Lyrique, April 18, 1877), a noisy and empty composition revealing the true nature of the composer, who loves effect, but is wanting in inspiration, style, and form, and is wholly destitute of any fixed ideal. His little ballet, 'Fandango' (Opéra, Nov. 26, 1877), in which he made use of some highly characteristic Spanish melodies, was a decided advance in point of instrumentation, but his grand opera, 'Richard III,' performed at St. Petersburg, Dec. 21, 1883, was a dead failure, and in 'Egmont,' produced at the Opéra Comique, Dec. 6, 1886, his chief faults, noisiness, and an amalgamation of different styles, from that of Meyerbeer to that of Verdi, were so predominant that the work was only performed a few times. Salvayre, who is a great friend of the present director of the Opera, M. Gailhard, having been his companion at the maîtrise of Toulouse, was commissioned to set to music Dumas' drama 'La Dame de Monsoreau,' a subject little fitted for musical treatment. It was produced at the Opéra, Jan. 30, 1888, and was wholly unsuccessful. Salvayre, who has the qualities of a good musician, in spite of his repeated failures, was decorated with the Légion d'honneur in July 1880. [A.J.]

SAMARA, Spiro, is a Greek, son of the Consul-general of Greece in Corfu, by an English mother. He was born Nov. 29, 1861. He got his first musical education in Athens, under the tuition of Enrico Stancampiano, a pupil of Mercadante, himself an opera conductor and music master, living in the Greek capital. While studying piano and harmony, literature had a great attraction for young Samara, and he dedicated to it all the time he did not employ with music. Thanks to his perseverance and to his natural facility, Samara

acquired both ancient and modern Greek, and became a good English, French and Italian scholar. He was already a pianist of uncommon talent when he left Athens for the Paris Conservatoire. There he finished his musical education as a pupil of Delibes. It was in Paris that Samara's first compositions for orchestra were executed; there also some of his drawing-room songs were received with success. But that was not sufficient for the new composer; his ambition wanted a larger field, and he went to Milan, where the publisher E. Sonzogno, who had already heard of him in Paris, gave him 'Flora mirabilis,' a three-act libretto by the renowned poet, Ferdinando Fontana, to set to music. The first performance of his opera took place on May 16, 1886, at the Theatre Carcano of Milan. In a few days the name of the Greek *maestro* became popular in Italy, so successful was the appearance of his work. While the public applauded with enthusiasm, the critics were unanimous in proclaiming that this opera, without approaching perfection, still showed that its author had studied the great masters with care, that he possessed a certain originality of ideas, and above all, dramatic power.

Many important European towns have confirmed the verdict of Milan, and Samara has triumphed everywhere. Before writing 'Flora mirabilis' he had already composed an opera entitled 'Medjé.' This he has lately revised and completed, and it was brought out at the Costanzi Theatre in Rome, Dec. 12, 1888. 'Lionella' is the title of another three-act libretto by Fontana, on which Samara is now at work.

After the splendid dawn of 'Flora mirabilis,' it is not surprising that the musical world should expect great things from its author. [F.Rz.]

SAN CARLO. P. 223 *b*, l. 9, *for* first *read* second.

SANDONI. See CUZZONI in Appendix.

SANTINI, FORTUNATO. Line 2, *for* July *read* Jan. (on the authority of Riemann and Paloschi).

SANTLEY, CHARLES. Add that he joined Mr. Carl Rosa's company for the season of 1876, when he sang the 'Flying Dutchman' with the greatest success. On April 5, 1889, he left London for an artistic tour in Australia. His daughter, Miss Edith Santley, before her marriage with the Hon. R. H. Lyttelton in 1884, had a short but exceedingly brilliant career as a concert singer.

SAPHO. Add that the opera was recently remodelled by its composer, extended to four acts, and produced at the Grand Opéra April 2, 1884, with moderate success.

SARABANDE. P. 227 *b*, in the example at top *add* a dot to each quaver rest; and make the last G♮ quaver in line 1, and the E quaver in line 3, semiquavers.

SARASATE. Add that his full name is Pablo Martin Meliton Sarasate y Navascues. (The right date of birth is that given in the Dictionary.) In 1885 and 1886 he gave sets of orchestral concerts, conducted by Mr. Cusins, in St. James's Hall, and at the Birmingham Festival of 1885 played a violin concerto written for him by Mr. Mackenzie.

SARTORIS, MRS. Line 2, *for* 6 *read* 4.

SATZ. The German term for MOVEMENT, which see.

SAVONAROLA. Grand opera in a prologue and three acts; words by Gilbert à Beckett, music by C. Villiers Stanford. Produced at the Stadt-Theater, Hamburg (words translated by Ernst Frank), April 18, 1884, and at Covent Garden (German Opera, under Richter), July 9 of the same year. [M.]

SAXOPHONE. Add that R. Wagner gave to instruments of this class the formidable-looking name of 'Raçenkreuzungsklangwerkzeuge,' which may be translated by 'tonal hybrids.'

For the second paragraph of the article, substitute the following:—

It is manufactured in different sizes, comprising a complete choir of its class. A. Sax says he made *eight* varieties; namely, 1. Sopranino in E♭; 2. Soprano in B♭; 3. Alto in E♭; 4. Tenor in B♭; 5. Baritone in E♭; 6. Bass in B♭; 7. Bass in E♭ (an octave lower than the baritone); 8. Contrabass in B♭ (an octave lower than the bass). Of these the first and the two last-named kinds have, however, never come into general use.

It is rather singular that an instrument of considerable artistic capacity, and very effective when manipulated by an artist, should never have been accepted as a means of enlarging the tonal resources of our modern orchestras. Georg Kastner introduced it into the score of his biblical opera, 'Le dernier roi de Juda,' which was performed at the Conservatoire in Paris in Dec. 1844; A. Adam gives an effective solo to the E♭ Alto Saxophone in his opera 'Hamlet,' and we are told that it is also employed by Berlioz in his opera 'Les Troyens.' This last work remaining in MS. it is not easy to get precise information on the point; in none of the published works of Berlioz is the Saxophone to be found. Wagner, the greatest tone-painter of our time, has never given it a place in his scores, and the instrument remains outside the recognized orchestral resources.

The reason for this neglect lies probably in its unsympathetic tone, combining two characteristic tone colours, 'reed' and 'brass,' which are preferable when rendered separately and pure by either the clarinet or a brass instrument.

It has, however, been accepted as a valuable addition to WIND-BANDS, where its hybrid tone forms a most effective link between reed and brass instruments. When represented by a full choir it materially improves the tone quality, while its capacity for distinct rendering of very rapid passages, combined with its powerful tone, make it a valuable adjunct for obtaining a good balance of instrumentation of wind-bands.

The Saxophone is extensively employed in most military reed-bands of the south of Europe, especially those of France; but in the infantry bands of Germany and Austria it remains almost unknown.

Even in France it has had a rather chequered career. Adopted by a decree of the Minister of War (published in the 'Moniteur de l'armée,' of Sept. 10, 1845), it came into general use with all infantry bands. In the year 1848 it was suppressed, to be again reintroduced in 1854, since which time it has obtained a permanent footing. [J.A.K.]

SCARAMUCCIA, UN' AVVENTURA DI. P. 237 *b*, l. 1, *for* Sept. 6 *read* March 8.

SCARIA, Emil. Add that he created the part of Gurnemanz in 'Parsifal' at Bayreuth, and sang the same at the concert performances of the work in Nov. 1884 at the Albert Hall. He subsequently became insane, and died July 22, 1886.

SCARLATTI, Alessandro. To the list of works add the following, the MSS. of which are in the possession of the Earl of Aylesford:—Oratorios: 'Giuditta,' and 'S. Cecilia,' a 'Salve Regina' for chorus, and a cantata.

SCARLATTI, Domenico. P. 240 *a*, l. 9, *for* B. Cooke *read* John Johnson (at the Harp and Crown, Cheapside). After l. 12, add that in 1752 John Worgan obtained the sole licence to print certain new works by Domenico Scarlatti, and published them (at J. Johnson's, facing Bow Church, Cheapside). These were twelve sonatas, most of them new to England.

SCENA. P. 240 *b*, l. 11 from bottom, *for* 1688 *read* 1689.

SCHACK, Benedict. Add that in the 'Harmonicon,' vol. ix. p. 298, there is an account of a Mass by him which was finished by Mozart.

SCHARWENKA, Xaver. Line 2 of article, *for* 1840 *read* 1850. To list of important works add a Symphony in C minor, op. 60.

SCHAUROTH, Delphine. Add date of birth, 1814. She appeared in England when only nine years old, and gave a concert on July 2, 1823, playing Beethoven's Eb quartet for PF. and strings, and an air and variations by Kalkbrenner.

SCHEIDEMANN. The name of a family of organists in Hamburg in the 16th and 17th centuries. Gerber, in his Lexicon, mentions Heinrich Scheidemann, born about 1600, died 1654, but appears to confuse him with an older and more important member of the family, David Scheidemann, probably an uncle of Heinrich. The date of David Scheidemann's birth is not ascertained, but in 1585 he was organist of St. Michael's Church, Hamburg. He is chiefly noteworthy as associated with three other Hamburg organists of repute, Jacob and Hieronymus Praetorius, and Joachim Decker, in the compilation of what we should now call a Choralbuch, though this name was not in general use then,[1] a book of the usual hymn-tunes or chorales of the Lutheran Church, simply harmonized in four parts for congregational singing. This book appeared in 1604. Its original title is 'Melodeyen-Gesangbuch, darem Dr. Luthers und ander Christen gebräuchlichste Gesänge, ihren gewöhnlichen Melodien nach . . . . in vier stimmen übergesetzt.' The example first set by Lucas Osiander in 1586, of uniformly giving the melody to the soprano part, and not to the tenor, as the older practice was, is here followed, and in the preface attention is called to the greater convenience of this for congregational singing. Of the 88 tunes in the book, David Scheidemann harmonized 13 or 14; among them there appears for the first time harmonized 'Wie schön leuchtet der Morgenstern.' Gerber, confusing David with Heinrich, attributes both the melody and the setting of this Chorale to Heinrich. But Winterfeld shows (Ev. Kirch. i. p. 90) that the melody belongs to neither, but seems to be taken from an old secular song, beginning with similar words ('Wie schön leuchten die Aeugelein'), to the metre of which Philip Nicolai in 1599 wrote the words of his hymn, 'Wie schön leuchtet der Morgenstern.' Winterfeld praises Scheidemann's settings of the chorales for their fresh animated character, and for the happy way in which the rhythmical peculiarities of the old melodies are brought out. Chorales were not then sung as now, all in slow uniform rhythm, but many of the older melodies had curious changes of rhythm, as from common to triple time, in successive lines. See the specimens of Scheidemann in Winterfeld, Part I. nos. 70, 71.

Heinrich Scheidemann, mentioned above, was the son of Hans Scheidemann, organist of St. Catherine's Church, Hamburg. In 1616 he and Jacob Praetorius the younger were sent at the public expense to Amsterdam, to be initiated into a higher style of organ-playing, under the tuition of the then most famous organ-player of Europe, Peter Sweelinck. In 1625 Heinrich succeeded his father as organist of St. Catherine's. Matheson says of Scheidemann that his organ playing and compositions were like himself, popular and agreeable, easy and cheerful, with no pretence or desire for mere show. None of his organ pieces have survived, though Fétis speaks of having obtained some. As a composer, Heinrich Scheidemann was again associated with Jacob Praetorius in contributing melodies to

[1] It is worth while noting that the word Choral (in English usually spelt Chorale), as now restricted to the melodies of German metrical hymns, really originated in a misunderstanding of what Walther meant when he spoke of Luther as having called the 'deutscher Choralgesang' into life. What both Luther and Walther meant by 'Choralgesang' was the old Cantus Choralis or Plain-song of the Latin Church, which Luther himself wished to retain; and his merit consisted in the adaptation of the chief parts of the Latin Choral to German words, his work in this respect corresponding to Marbeck's 'Book of Common Prayer Noted' with us in England. All the older Lutheran Church-musicians, such as Lucas Lossius and Michael Praetorius, used the words Choral and Choralgesänge in this sense of the old Plain-song melodies to the graduals, sequences, and antiphons, whether sung to Latin or adapted to German words. It was only when German metrical hymns gradually superseded in common use the other choral parts of the service, that the name Choral in course of time became restricted to the melodies of these hymns. See Winterfeld, Ev. Kirch. i. pp. 151, 152.

Rist's 'Himmlische Lieder,' which were published in 1641, 42. Praetorius composed ten to the 4th part of Rist's Book, Scheidemann ten to the 5th part, entitled 'Höllenlieder.' One of Scheidemann's melodies in this collection, 'Frisch auf und lasst uns singen,' continued for a while in church use, as it appears again in Vopelius Leipziger Gesangbuch of 1682. On Scheidemann's death in 1654, Joh. Adam Reinke or Reinken became his successor as organist of St. Catherine's, Hamburg. [J.R.M.]

SCHEIDT, SAMUEL, one of the celebrated three S.'s (the other two being Heinrich Schütz and Hermann Schein, his contemporaries), the best German organist of his time, was born at Halle in 1587. His father, Conrad Scheidt, was master or overseer of salt-works at Halle. The family must have been musical, as some works are still preserved of Gottfried, Samuel's brother, which A. G. Ritter ('Geschichte der Orgelmusik') says show considerable musical ability. Samuel owed his training as an organist to the then famous 'Organisten-macher' Peter Sweelinck of Amsterdam. At what date he betook himself to Amsterdam, and how long he remained a pupil of Sweelinck, is not precisely ascertained. In 1620 at least, if not earlier, he was back in his native town, and had received the appointment of organist and capellmeister to Christian Wilhelm, Markgraf of Brandenburg, and then Protestant Administrator of the Archbishopric of Magdeburg. In this capacity Scheidt officiated as organist not at Magdeburg, but in the Hof-kirche at Halle. The troubles of the Thirty Years War and the misfortunes of his patron, the siege and sack of Magdeburg in 1631, and the abdication of Christian Wilhelm in 1638, seem to have made no difference to Scheidt's official position at Halle, though his income and means of living may have suffered. We have no record as to his personal relations with Christian's successors in the administration of the Magdeburg archbishopric, but Chrysander in the 'Jahrbücher für musikalische Wissenschaft,' i. p. 158, prints a letter from Scheidt to Duke Augustus of Brunswick in 1642, which seems to imply that he was then looking for some patronage or assistance from that art-loving prince. Scheidt never left Halle however, and his circumstances may have improved, as in his will he bequeathed some money for the sake of the organ in the St. Moritz-kirche at Halle. He died at the age of 67 on March 14, 1654.

Scheidt's first published work appeared at Hamburg in 1620 ('Cantiones Sacrae octo vocum'), and consists of 39 vocal compositions, 15 of which are settings of Lutheran chorales. His fame however rests not on his vocal compositions, but on his works for the organ. His next work, also published at Hamburg in 1624, is considered epoch-making in the history of organ music. It consists of three parts, but the whole work bears the general title 'Tabulatura Nova'; the same title, indeed, as many earlier works of the same kind in Germany (*e. g.* Ammerbach, 1571; B. Schmid, 1577; Paix, 1583; Woltz, 1617), from all of which, however, it differs widely both in aim and style, and indeed marks the beginning of a new and better treatment of the organ both with regard to playing and to composition. From 1570 to about 1620, organ playing in Germany almost entirely consisted in what was known as the art of 'koloriren,' the art of 'colouring' melodies sacred or secular by the inserting of meaningless passages, all framed on one and the same pattern, between each note or chord of the melody. These earlier Tablature-books were all compiled simply to teach this purely mechanical art of 'colouring' melodies for the organ. The music was written in the so-called German Tablature, *i. e.* with letters instead of notes.[1] (For a full account of these German 'Coloristen'[2] of the 16th and 17th centuries, see A. G. Ritter's 'Geschichte der Orgelmusik,' pp. 111–139.) Scheidt's 'Tabulatura Nova' put an end to this miserable style of playing and composing for the organ, as well as to the old German Tablature. The music in his book is noted in score of four staves, with five lines to the stave, so far differing from the notation both of Frescobaldi and Sweelinck, the former using two staves of six and eight lines respectively, the latter two staves both of six lines. To give an idea of the contents of Scheidt's work, we transcribe in full the separate titles of the three parts:—

I. Tabulatura Nova, continens variationes aliquot Psalmorum, Fantasiarum, Cantilenarum, Passamezzo et Canones aliquot: in gratiam Organistorum adornata a Samuele Scheidt Hallense, Reverendiss. Illustrissimique Principes ac Domine Christiani Gulielmi Archiepiscopi Magdeburgensis, Primatis Germaniae Organista et Capellae Magistro. Hamburgi... MDCXXIV.

II. Pars Secunda... continens Fugarum, Psalmorum, Cantionum et Echos Tocatae variationes varias ac omnimodas. Pro quorumvis Organistarum captu et modulo. . . .

III. Tertia et ultima pars, continens Kyrie Dominicale. Credo in unum Deum, Psalmum de Coena Domini sub Communione, Hymnos praecipuorum Festorum totius anni, Magnificat 1—9 toni, modum ludendi pleno Organo et Benedicamus . . . In gratiam Organistarum, praecipue eorum qui musice pure et absque celerrimis coloraturis Organo ludere gaudent . . .

The last words mark an important difference between the third part and the two preceding. In the first two parts the composer appears to wish to show how he could beat the 'Colourists' on their own ground, his figures and passages however not being like theirs, absolutely meaningless and void of invention, but new and varied, and having an organic connection with the whole composition to which they belong. He shows himself still as virtuoso, desirous to extend the technique of organ-playing, while at the same time displaying his contrapuntal mastery. So far as technique is concerned, there is to be noticed in Scheidt the extended use of the pedal, so different from Frescobaldi's occasional use of it for single notes merely, also the imitation of orchestral effects, such as what he himself terms 'imitatio violistica,' the imitation of the

[1] For an example of German Organ Tablature, see Schlecht, 'Geschichte der Kirchenmusik,' p. 377 ff.

[2] 'Geschmacklose Barbaren' (tasteless barbarians), as Ambros calls them.

effects of the different ways of bowing on the violin, and the imitation of an organ tremulant itself by the rapid interchange of the fingers of the two hands on one and the same key ('Bicinium imitatione tremula organi duobus digitis in una tantum clave manu tum dextra, tum sinistra'). The first two parts contain a mixture of sacred and secular pieces, the secular pieces however being marked off as for domestic rather than for church use by the absence of a pedal part. The sacred pieces consist of ten fantasias or sets of variations on chorale melodies, with a few fugues or fantasias on another motive, among which is a 'fantasia fuga quadruplici,' on a madrigal of Palestrina's, which Ritter describes as a masterpiece of contrapuntal art, four subjects from the madrigal being treated first singly and then together, and with contrary motion and other devices. The secular pieces consist chiefly of variations on secular melodies, among which appears one entitled an English song 'de fortuna.' The third part of the 'Tabulatura Nova' stands however on a higher level than the first two. The composer expressly renounces the virtuoso; he writes, as the title-page says, for those who delight to play the organ purely musically, and without mere ornamental and passage work. In this third part he gives very full directions with regard to registering both for manuals and pedal. It is intended entirely for church use, and both by the choice of pieces, and the manner in which they are arranged, it gives us an insight into the way in which the organ was very frequently employed in the church services of those days. It was not then generally used to accompany or sustain the voices of the choir or congregation, but rather to alternate with them. Thus, for instance, between each verse of the 'Magnificat' sung by the choir without accompaniment, the organ would come in independently with some variation or changing harmonies on the plain-song melody. A further use of the organ was even to take the place of the choir in making the responses to the ecclesiastical intonations of the officiating clergy when there was no proper choir to do this. Frescobaldi's works (especially 'Fiori Musicali,' 1635) furnish instances of this use of the organ in the Roman Church. Thus when the priest had intoned the Kyrie of the Mass, in the absence of a proper choir, the organist would answer, as Ambros expresses it, when speaking of Frescobaldi's works of the kind, 'with a kind of artistically-ennobling and enriching echo' ('mit einer Art von künstlerisch-veredelnden und bereichernden Echo'), that is to say, the organist, taking up the plain-song theme, would not just harmonize it note by note, but treat it in the form of a short polyphonic composition for the organ. (See the quotations from Frescobaldi in Ambros's 'Geschichte der Musik,' iv. pp. 444–450.) The third part of Scheidt's 'Tabulatura' shows that this usage was not confined to the Roman Church, but was also retained for a considerable time in the Lutheran. It opens with twelve short movements based on the plain-song of the different sections of the Kyrie and Gloria of the Mass, and the remark, or rubric, as we might call it, 'Gloria canit Pastor,' shows that they were expressly intended as responses made by the organ to the intonation of officiating clergy. The Magnificat follows, in all the church tones, one verse sung by the ecclesiastic and every alternate verse arranged to be played by the organ in lieu of a choir. This way of treating the Magnificat prevailed in Lutheran Churches even up to Pachelbel's time (1706), though the plain-song was more and more put into the background, and the practice became simply an excuse for interludes on any motive. After the Magnificat came a series of hymns common to both Roman and Lutheran Churches, with their plain-song melodies treated in a similar fashion. The book further contains Luther's version of the Creed ('Wir glauben All, an einen Gott') with its Doric melody, John Huss's Communion Hymn, arranged to be played instead of being sung during Communion. The two last pieces in the book are 6-part movements for the full organ, meant to be played at the end of Vespers. Interwoven with the last is the liturgical melody of the Benedicamus. In all these compositions Scheidt has faithfully adhered to the original plain-song melodies when they appear as Cantus Firmus, but in the further working out has not been content simply to harmonize them according to the laws of the Church modes, but has so far altered them in accordance with the new ideas of harmony then beginning to make way. But there is still wanting in him a consistent system of modulation. The chromatic semitones are still employed by him rather in a hap-hazard sort of way.

Twenty-six years later, viz. in 1650, Scheidt published another work for the organ, his second and last, which shows a different conception as to the use of the organ in the services of the Church, and probably marks a change which was then going on gradually in the practice of the Lutheran Church. The congregational singing of metrical hymns was gradually superseding the older liturgical music, and the organ had more and more to surrender its independence to accommodate itself to the simple accompaniment in 4-part harmony of the melodies of these hymns, which now began to assume exclusively the name of Choral-musik. This, which was at first a loss, became in time a gain, as it deepened the sense of the value of harmony for its own sake; and besides, out of this originated the new art-form of the Choral-Vorspiel of later days. Scheidt's last organ work was intended to meet the new requirements. Its title sufficiently explains its object: 'Tabulatur-buch 100 geistlicher Lieder u. Psalmen D. Martini Lutheri und anderer gottseliger Männer für die Herren Organisten mit der Christlichen Kirchen u. Gemeine auf der Orgel, desgleichen auch zu Hause zu spielen u. zu singen, auf alle Fest-u. Sonn-tage durchs ganze Jahr mit 4 Stimmen componirt ... Gedruckt zu Görlitz ... im. 1650 Jahr.'

This work is dedicated to the Magistrates and Town Council of Görlitz, and the composer seems to imply that it had been undertaken at their special desire. In this, as in his previous work, there is noticeable, as Ritter points out, the same undecided struggle in the composer's mind between attachment to the old and inclination to the new. Thus, while he strictly adheres to the original rhythms of the old melodies, he harmonizes according to the rules of modern musical accent, and thus the rhythm of the melody is not in agreement with the rhythm implied by the harmony. See for illustration his setting of 'Ein' feste Burg' in Ritter, 'Geschichte der Orgel-Musik,' p. 19, the first two bars of which may here be given :—

One chorale appears in this book for the first time, viz. 'O Jesulein süss, O Jesulein mild,' which has been adapted in later chorale books to the words 'O heiliger Geist, O heiliger Gott.' As harmonized by Scheidt it is given in Winterfeld 'Ev. K. G.,' ii. No. 218, and Schöberlein, 'Schatz des Chorgesangs,' ii. No. 457.

If it is his organ works that now entitle Scheidt to honourable remembrance and give him a distinct position of his own amongst composers, it was not his organ works, but his vocal compositions, that procured him the esteem of his contemporaries, and caused him to be ranked as one of the celebrated three S.'s. Of his vocal works, besides the 'Sacrae Cantiones' of 1620, mentioned above, there are mentioned 'Liebliche Kraft-Blümlein conzertweise mit 2 Stimmen und General-Basse,' Halle 1625; 'Geistliche Concerten mit 2 und 3 Stimmen, etc., 4 parts,' Leipzig, 1631. Another instrumental work should also be recorded, more for the clavier than the organ, 'Ludorum musicorum prima et secunda pars, 1623.'

It is natural to draw comparisons, as Ritter does in his 'History of Organ Music,' between Scheidt and Frescobaldi, whose lives covered nearly the same period of time, and who may both be regarded as the true founders of modern organ music, or rather, the Italian of clavier music generally, the German of specifically organ music. Of the two, Frescobaldi is the greater genius, showing greater force of imagination in the invention of new forms and the solution of difficult problems; Scheidt is more laborious and painstaking, showing greater study of the capabilities of his instrument, as, for instance, in the use of the pedal, and in registering generally, with neither of which did Frescobaldi concern himself. As Ritter points out, while Scheidt has thus greater command of all the resources of expression, Frescobaldi has more of real poetic expression in his music itself. For more detailed comparison of the two masters it will be sufficient to refer to Ritter's work. [J.R.M.]

SCHEIN, Johann Hermann, was born Jan. 29, 1586, at Grünhain in Meissen, where his father was the Lutheran pastor. Having lost his father at an early age, he was taken to Dresden and became a chorister in the Court Chapel there. His further education was received at the Gymnasium of Schulpforta and the University of Leipzig. Of his musical training further than what he received in the Court Chapel at Dresden we have no details. In 1613 he was invited to be Capellmeister at Weimar, but held this post for only two years. On the death of Seth Calvisius in 1615 he obtained the appointment of Cantor to the Thomas-Schule in Leipzig, which post he held till his death in 1630.

Schein is chiefly known to later times by his 'Cantional,' first published in 1627. Its original title is 'Cantional oder Gesangbuch Augspurgischer Confession, in welchem des Herrn D. Martini Lutheri und anderer frommen Christen, auch des Autoris eigne Lieder und Psalmen . . . So im Chur und Fürstenthümern Sachsen, insonderheit aber in beiden Kirchen und Gemeinen allhier zu Leipzig gebräuchlich, verfertiget und mit 4, 5, 6 Stimmen componirt . . .' A second enlarged edition appeared in 1645 after Schein's death. As the title shows, it consists of Choral-melodies, both old and new, harmonized for ordinary church use, mostly note against note. Schein himself appears in this book in three capacities, viz. as poet, melodist, and harmonist. Of the 200 and odd Choral-melodies in the book about 80 are Schein's own, a few of which have still held their ground in modern chorale books, though some appear to be attributed to him by mistake. Schein's book differs from Crüger's similar book of later date (1648) in retaining the old irregular rhythm of Choral-melodies, while Crüger has transformed their rhythms according to more modern ideas. But if Schein still retains the old rhythm in the melodies, in his harmonies he has almost entirely lost, as Winterfeld points out, the feeling for the peculiarities of the old church modes in which those melodies are written, though otherwise his harmonies are serious and dignified. With Michael Praetorius and Heinrich Schütz, and probably through their influence, Schein was one of the pioneers in Germany of the new movement in music proceeding from Italy at the beginning of the 17th century. Naturally his other works show this more plainly than the 'Cantional,' as many of them are avowedly written in imitation of Italian models. These other works are as follows:—

1. 'Venus-Kränzlein' ('Garland of Venus'), a set of 'weltliche Lieder' or secular songs, for 5 voices. Leipzig, 1609.

2. 'Geistliche Concerte' (Sacred Concertos) for 4 voices. 1612.

3. 'Cymbalum Sionium,' containing 31 settings of German and Latin sacred texts for 5, 6, 8, 10, and 12 voices. 1613.

4. 'Banchetto Musicale,' a collection of Pavanes, Gaillardes, etc., in 5 parts. 1617.

5. 'Opella Nova,' 1st part, containing 'Geistliche Concerte auf jetzo gebräuchliche Italienische invention componirt' (Sacred Concertos written in the new Italian style). 1618.

6. 'Musica boscareccia, Waldliederlein auf Italian-Villanellische Invention fingirt und componirt' (Hunting or Forest Songs, composed in the style of Italian villanellas).

7. 'Fontana d'Israel,' 'Israelis Brünnlein auserlesener Kraftsprüchlin altes und neuen Testaments, etc., auf ein sonderbare anmuthige Italian-Madrigalische Manier, etc., mit Fleiss componirt' (Israel's fountain of select passages of the Old and New Testament, carefully composed in the specially graceful style of the Italian Madrigal). 1623. In this work Schein gives up the basso continuo, and goes back to the more purely vocal style of the old madrigal, permitting himself however the bolder harmonic license of the new style of Monteverde and other Italians. Wherever the words seem to justify his doing so, the composer delights in using unprepared discords, and discords without resolution, with perhaps too much straining after passionate expression.

8. 'Opella Nova,' 2nd part, 1626, contents similar to the 1st part, both parts having basso continuo and instrumental accompaniment.

Over 30 numbers from Schein's 'Cantional' may be found in Schoeberlein's 'Schatz des Liturgischen und Chor-gesangs,' Göttingen, 1867–72. [J.R.M.]

SCHICHT, J. G. Last line but one, *add* probably *before the words* not by John Sebastian; and refer to BACH in Appendix.

SCHILLING, DR. G. Add date of death, 1880.

SCHIMON, ADOLF. Add date of death, June 21, 1887.

SCHINDLER, ANTON. Line 2 of article, *for* 1769 *read* 1796. Line 3, *for* Modl *read* Medl.

SCHIRA, FRANCESCO. Add date of death, Oct. 16, 1883.

SCHLESINGER. P. 254 *a*, l. 4, *for* in *read* Dec. 14.

SCHMIDT. See SMITH, FATHER.

SCHMITT. P. 254 *b*, l. 7 from bottom, *for* 1803 *read* 1796.

SCHNEIDER, F. J. C. A fuller list of his oratorios will be found in vol. ii. p. 555 *a*.

SCHNETZLER. See SNETZLER, and vol. ii. p. 597.

SCHOELCHER, VICTOR. P. 257 *b*, l. 13 from bottom, the sentence beginning 'Up to 1850' requires correction, as in 1827 'The Messiah' (with Latin words), the 'Ode on St. Cecilia's Day,' and 'Alexander's Feast,' had been given in Paris. P. 258 *a*, l. 4 from end of article, *read* the highly elaborated narrative.

SCHÖNE MINKA. The name by which a certain very popular Ruthenian or Little Russian song is generally known. (The music and original words are given by Pratsch, 'Sobranie russkikh narodnuikh pyesen,' end of vol. i., and the literal German version in Fink, 'Musikalischer Hausschatz,' No. 157.)

It is marked by perfect regularity of rhythm and absence of certain eccentricities noted in the article SONG, vol. iii. pp. 612, 613, as common in the Cossack and Little Russian songs; and the words are a dialogue in rhymed verse. It is an interesting instance of a Volkslied of one country becoming domesticated in the same capacity in another, and also of the extraordinary transformation which the song may undergo in the process. A very loose imitation of the words of this song, beginning 'Schöne Minka ich muss scheiden,' was published by the German poet Ch. A. Tiedge in 1808, and this, with the melody much altered, is now to be found in most collections of German Volkslieder without notice of the Slavonic source. J. N. Hummel has made this air (rather in its original than in the German form) the subject of 'Adagio, Variazionen und Rondo über ein russisches Thema' for PF., violin, and violoncello, op. 78, and Weber wrote a set of brilliant variations for pianoforte on the same theme. [R.M.]

SCHOOLS OF COMPOSITION. P. 280 *a*, l. 12 from bottom, *for* 1612–1618 *read* 1615–18. P. 285 *b*, as to the date of Purcell's 'Dido and Æneas,' see PURCELL in Appendix. P. 287 *a*, l. 7, *for* 1694 *read* 1695.

SCHOTT (B. SCHOTT'S SÖHNE). P. 315 *a*, l. 15 of article, *after* ADAM *add* (living afterwards as bandmaster in Canada and India, where he died). At end of first paragraph *add* Schott's sons have been music publishers to the Court since 1824. *After* Rink's organ-music *add* 'der Choralfreund,' in 9 volumes; 'École pratique de la modulation,' op. 99; 'Gesangstudien' (vocalises, méthode de chant, etc.) by Bordèse, Bordogni, Concone, Fétis, Gavaudé, Garcia, Lablache, Abbé Mainzer, Rossini, Rubini, Vaccai, etc.

SCHOTTISCHE. The last bar of lines 2 and 4 of the musical example should be identical. The right notes are F, G (appoggiatura), F, E, F.

SCHRIDER or SCHREIDER (possibly SCHRÖDER), organ builder. See vol. iii. p. 539 *b*, article FATHER SMITH.

SCHRÖDER-DEVRIENT, WILHELMINE. Line 3 of article, *for* December *read* Dec. 6.

SCHRÖTER, CORONA ELISABETH WILHELMINE, a celebrated singer of the Weimar court in its most brilliant days, was the daughter of a musician, Johann Friedrich Schröter. According to her latest biographer, Keil (Vor hundert Jahren, Leipzig, 1875), Corona was born Jan. 14, 1751, at Guben, whence the family shortly afterwards migrated to Warsaw and finally to Leipzig. Corona's voice was trained by her father, and she sang when she was but 14 at a Leipzig Grosses Concert (1765). From the following year until 1771 she was engaged at these concerts, Schmehling (La Mara) being retained as principal vocalist. Goethe had become acquainted with Schröter in 1766; ten years later he conveyed to her the offer of the post of Kammersängerin to the Dowager Duchess of Weimar. Here she made her first appearance Nov. 23, 1776, and soon became the idol of the place. Associated with Goethe himself in the production of his dramas, she created amongst others the part of Iphigenia, completely realizing the poet's ideal (see Auf Mieding's Tod). Her co-operation in 'Die Fischerin' included the composition of all the music. It was on July 22, 1782, that she was heard as Dortchen, and that 'Der Erlkönig,' with which the play opens, was sung for the first time. After 1786 Schröter sang little in public, but devoted herself to composition, painting, and a few dramatic pupils. Schiller heard her read Goethe's Iphigenia in 1787, and Charlotte von Schiller, a year or two later, found much to praise in the musical settings of 'Der Taucher' and 'Würde der Frauen,' and their expressive rendering by the famous artist. In the meantime Schröter's health had broken down, and her death, when aged 51, at Ilmenau, Aug. 23, 1802, was not unexpected.

Her songs were published in two books. They are melodious and simple settings of poems by Herder, Matthison, Klopstock, etc. Book I. (25 Lieder, Weimar, 1786) contains Goethe's 'Der neue Amadis' and 'Der Erlkönig.' The list of subscribers furnishes the names of many notabilities of the day connected with Weimar and other German Courts. The second collection of songs was published at Weimar, 1794.

Corona's brothers, Johann Samuel (vocalist) and Johann Heinrich Schröter (violinist) visited England; the former died here in 1788. Besides the life by Keil, Düntzer's 'Charlotte von Stein and Corona Schröter' may be consulted for details of her social and artistic successes. In 1778 Schröter handed to Goethe her MS. autobiography, which has never been made public, perhaps has not yet been discovered among his papers, although Goethe noted the receipt of it in his diary. [L.M.M.]

SCHROETER, LEONARD, born at Torgau towards the middle of the 16th century, became Cantor of the Cathedral of Magdeburg about 1564, in succession to Gallus Dressler, also a composer of some importance. Schroeter's chief work is 'Hymni Sacri,' Erfurt, 1587, and consists of 4- and 5-part settings of those Latin Church Hymns which had also been received into the worship of the Lutheran Church. Winterfeld says of these hymns, that they belong to the best musical works of the time; the harmony is rich, clear, and dignified, and shows an unmistakeable advance on the path of the older masters. They are in the same style as the Hymns of Palestrina and Vittoria, only the choral melody is mostly given to the upper voice. Some of these hymns, as well as some of the German psalms of Gallus Dressler, Schroeter's predecessor, are re-published in Schöberlein and Riegel's 'Schatz des liturgischen Chorgesangs,' Göttingen, 1868–72. Four Weihnachts-Liedlein of Schroeter's are received into the repertoire of the Berlin Dom-Chor, and are published in Schlesinger's 'Musica Sacra,' No. 11. A German Te Deum for double choir by Schroeter, previously existing only in manuscript, has been printed by Otto Kade in the Noten-beilagen to Ambros's 'Gesch. der Musik,' No. 28. [J.R.M.]

SCHUBERT, FRANZ PETER. P. 324 *a*, l. 15 from bottom of text, *omit the word* Schiller's. P. 331 *b*, add to first paragraph, also a fine overture in E minor published in Series II. of the complete edition. P. 333 *b* and elsewhere, *for* Gundelberg *read* Gundelhof. P. 334 *a*, l. 8, the hexameters are Kanne's. P. 339 *b*, l. 14 from bottom, *read* Count F. von Troyer. P. 380 *a*, 1822, Eitner ('Monatshefte,' etc., 1888, p. 33) mentions an autograph of 'Du liebst mich nicht' (op. 59, no. 1) in G♯ minor, and dated July 1822, but whether this is the original autograph or a duplicate by Schubert is not certain. P. 382 *a*, l. 1, *for* Köpfermann *read* Kopfermann.

A complete edition of Schubert's works in 22 classes was announced by Breitkopf & Härtel on 'Schubert's death-day, 1884.' Up to Feb. 1889, the following have been published:—Series I. 8 Symphonies in 2 vols. II. 10 Overtures, etc. VII. 5tets, 4tets, and Trios, 2 vols. VIII. 8 Rondos, Sonatas, etc., for PF. and one instrument. IX. PF. 4-hand compositions, 32 in all, in 3 vols. X. 15 Sonatas for PF. solo. XI. Miscellaneous PF. works. XIII. Masses, 7, in 2 vols. XIV. 21 small church works. XV. Dramatic music: (1) 'Teufels Lustschloss'; (2) 'Der vierjährige Posten'; 'Fernando'; 'Die Freunde von Salamanka'; (6) 'Fierrabras.'

The history of Schubert's music owes very much to MAX FRIEDLÄNDER, Dr. in Philosophy, who was born at Brieg in Silesia Oct. 12, 1852, and studied singing under Manuel Garcia in London and Julius Stockhausen in Frankfort. Friedländer has travelled much and is widely known as a baritone singer. He sang at the Crystal Palace on April 19, 1884, and elsewhere in London. He has taken up musical investigation, especially in connection with Schubert; and has edited the new edition of Peters' collection of Schubert's songs; with a supplement of variations; Schubert's duets; Schubert's quintet, 'Nur wer die Sehnsucht'; Gluck's Odes; Revised edition of the text to Schumann's songs; 100 Deutsche Volkslieder (not before published); Stockhausen's Gesangstechnik (with the author). He is understood to be devoting himself to the collection of materials for an exhaustive biography of Schubert, for which he is well qualified. [G.]

SCHÜTZ, HEINRICH. See vol. iv. p. 45, and add as follows:—His father and grandfather occupied a good social position at Weissenfels, whither his father removed with his family on the death of the grandfather in 1591. In his thirteenth year (1598) Heinrich was taken into the service of Landgraf Moritz of Hesse-Cassel, as narrated in the former article.

[1] 'Auf der Bruck. Der 25sten Julius, 1814.' See 'Poetisches Tagebuch,' p. 79; in Sämmtl. poet. Werke von Ernst Schulze. 8vo. Leipzig, 1822.

Add to vol. iv. p. 45 *a*, l. 9 from bottom:—The Landgraf, as a man of culture, interested in all new movements in literature and art, wished himself to gain a closer acquaintance with the new Italian style of music, and hoped through Heinrich Schütz to be able to transplant it to Germany and into his own Court chapel, and thus vivify German art by a new alliance with Italian. In Schütz he found the man for his purpose. Schütz accepted the Landgraf's offer and proceeded to Venice, where he remained under Gabrieli's tuition from 1609 until his master's death in 1612. Gabrieli showed his esteem for his pupil by sending to him from his death-bed a ring to wear to his memory, and Schütz on his part ever professed the highest veneration for his master. In 1612 he returned to Cassel, and was appointed organist to the Landgraf, but either uncertain himself as to his real vocation for music or induced by his friends, he had still some thoughts of taking up again the profession of law. Perhaps the Landgraf's chapel was too narrow a sphere for him to work in; it was fortunate therefore that in 1614 he received the invitation to undertake the entire direction of the capelle of the Elector Johann Georg of Saxony at Dresden, at a salary of 400 gulden. The Landgraf was unwilling to part with him, and would at first only allow him to accept this position temporarily. He recalled Schütz in 1616, but on the earnest petition of the Elector finally consented to his remaining permanently at Dresden. Schütz's first endeavour at Dresden was to reorganize the electoral music, and indeed, as he had been engaged to do, on the Italian model, for the purpose of introducing the new concerted style of music vocal and instrumental. He procured good Italian instruments and players, and sent qualified members of the capelle to Italy for a time, to perfect themselves in the new style of singing and playing.

To p. 45 *b*, l. 7 from bottom, add:—For his purpose Schütz uses the means of expression afforded by contrast of different choirs, or contrast of solo voices with full choir, or contrast of voices with instruments, either the simple Basso Continuo, *i.e.* for organ, lute, or theorbo, or strings with occasional trumpets, etc. The work on the subject of the Resurrection is entitled 'Historia der fröhlichen und Siegreichen Auferstehung unsers einigen Erlösers und Seligmachers Jesu Christi.' The occasion for the composition of this work would seem to have been the practice, still kept up at Dresden, Leipzig and other churches in Saxony, of singing the story of the Resurrection at Easter as that of the Passion in Holy Week. A 'Geistliches Gesangbuch' of 1612 informs us that 'Every year on Easter-day at Vespers, before the sermon, there is sung in our Christian congregations the Resurrection, so splendidly set by Antonius Scandellus.' This Antonius Scandellus, or Scandelli, had been one of Schütz's own predecessors at Dresden from 1568–80, and had written both a Passion and a Resurrection. His 'Resurrection' must have continued in use even

beyond Schütz's time, since it even appears in Vopelius' 'Leipziger Gesangbuch' of 1682. It may be seen in Schöberlein and Riegel's 'Schatz des liturgischen Chorgesangs' vol. ii. 619–647. (With regard to the authorship, compare O. Kade's remarks in the Vorwort to the Notenbeilagen to Ambros's Geschichte xlvi.). Schütz's Resurrection follows the line of Scandelli's, only whereas Scandelli's composition is purely vocal, that of Schütz is adapted to instrumental accompaniment. Both works begin with a setting (in Scandelli 5-part, in Schütz 6-part) of the words 'Die Auferstehung unsers Herrn Jesu Christi, wie uns die von den Evangelisten beschrieben wird,' and conclude with a setting (Scandelli 5-part, Schütz 8-part) of the words 'Gott sei Dank, der uns den Sieg gegeben hat,' etc. In Scandelli, the part of the Evangelist is altogether liturgical, but in Schütz, while it is mostly based on the liturgical melody, the more important passages have given to them a more characteristic and expressive form of declamation, which sometimes rises up to actual melody in the more modern sense of the term, and the Evangelist's part is accompanied throughout either by the organ or preferably by four Viole da Gamba, which are called upon at certain pauses in the narrative to execute appropriate runs or passages ('Zierliche und appropriirte Läufe oder passaggi machen'). The words of other personages are set for two or more voices, according to their number, as for instance, the words of the three Maries as a trio, of the two angels as a duet, of the eleven disciples as a 6-part chorus, only that usually for single personages two parts are employed (as in Scandelli), though Schütz permits one of these parts to be taken, as he expresses it, *instrumentaliter*. This work of Schütz's is altogether remarkable, as being a highly successful endeavour to unite dramatic expressiveness with reverence for ecclesiastical tradition. The same spirit is shown in another form in his next work of importance, Cantiones Sacrae, for four voices with bass accompaniment for organ. The endeavour here is to unite the older form of the Motet with the newer form of the Concerto, and the Diatonic Church Modes with the use of Chromatic harmonies. In 1627 Johann Georg I. of Saxony wished to signalize the occasion of the marriage of his daughter to the Landgraf of Hesse-Darmstadt by giving the first performance of opera in Germany. The opera had just sprung into life in connexion with the new musical movement in Italy, as a supposed revival of the antique music-drama. Schütz was commissioned to procure from Italy Peri's opera 'Dafne.' The poet Opitz was set to the task of translating the Italian text by Rinuccini into German, and as it was found that Peri's music would not quite fit the new German words, Schütz had to adapt them to new music of his own. The opera 'Dafne,' as thus set by Schütz, was performed at Torgau on the 13th of April, 1627. Unfortunately the music of this first German opera has not been preserved, and, no further account of it has been given. It is probable however that Schütz did little else on this occasion than re-arrange Peri's music and add something in exactly the same style. In any case the result was not such as to induce Schütz to make any further attempts in music for the theatre, if we except another occasional piece, a Ballet written in 1638, the music of which appears also to be lost. In 1628, Schütz having lost his wife, found some comfort in his sorrow, as he tells us, by occupying himself with the task of composing melodies with simple 4-part harmony to a rhymed version of the Psalms by Dr. Cornelius Becker. This version by Becker was meant to be a Lutheran rival to an earlier Calvinistic version by Lobwasser based on the French Psalter of Marot and Beza, and adapted to the same melodies. Later on, Johann Georg II., with a view to the introduction of the Becker Psalter in place of Lobwasser's in the schools and churches of Saxony, urged Schütz to complete his composition of melodies for the work. The task was hardly congenial to our composer, as he himself confesses in the preface to the complete work when it appeared in 1661. Two further editions however of this Psalter, with Schütz's melodies, appeared in 1676 and 1712. Some of these melodies passed into later Cantionals, though none have ever taken the same place in general use or esteem that similar work by less eminent composers has done.

Correct p. 46 *a*, l. 4, etc. by the following:— Partly to distract himself from his great sorrow, partly to familiarize himself with the still newer development of music in Italy, with which the name of Claudio Monteverde is chiefly associated, Schütz set out on a second visit to Italy in 1629. He found musical taste in Venice greatly changed since the time of his first visit (1612), 'modern ears were being regaled with a new kind of sensation' ('recenti titillatione'). The new style consisted in the greater prominence given to solo singing, and to intensity of expression in solo singing, the freer use of dissonances, and greater richness and variety in instrumental accompaniment. In a series of works entitled Symphoniae Sacrae, Schütz endeavoured to turn to account the new experiences he had gained, without however, like his new Italian models, turning his back upon his earlier polyphonic training. He never altogether forgot to unite the solidity of the old school with the piquancy of expression of the new. The first part of 'Symphoniae Sacrae' appeared at Venice in 1629, and consists of twenty settings of Latin texts, chiefly from the Psalms and the Song of Songs. A second part of Symphoniae Sacrae, with the sub-title 'Deutsche Concerten,' appeared at Dresden in 1657; a third part also at Dresden in 1650. The two later parts are settings of German Bible texts. They may be described as brief dramatic cantatas for various combinations of voices and instruments, and in virtue of them Schütz may be considered joint-founder with Carissimi of the Dramatic Oratorio. Winterfeld (Gabrieli, vol. iii. pp. 82, etc., also Evang. Kir. Gesang. ii. p. 315) singles out for special notice

from the first part, 'Fili, fili mi, Absalom' (David's lament over Absalom), written for bass solo with accompaniment of four trombones, and from the third part, 'Saul, Saul, was verfolgst du mich' (a cantata for the festival of the Conversion of St. Paul), and 'Mein Sohn warum hast du uns das gethan' (for the first Sunday after Epiphany).

In 1631 and following years Saxony became the scene of war, and one result was the complete disorganization of the Elector's capelle, means failing for the payment of musicians, and the attention of the Elector and his court being occupied with more serious matters than music. Schütz obtained leave in 1633 to accept an invitation to Copenhagen from King Christian IV. of Denmark. The years 1635–41 were spent in wanderings to and fro between different courts with occasional returns to Dresden, Schütz being still nominally in the service of the Elector. The chief works worthy of notice published during these years are two sets of Geistliche Concerte for 1 to 5 voices, with Basso Continuo (1636, 39), the second set being especially remarkable by the composer's frequent directions for the securing of proper expression in his music. (It is to be remembered that marks and terms of expression were not then in vogue.) In 1641 Schütz returned to Dresden to make an effort to reorganize the music, but from want of means his efforts were not crowned with anything like success till 1645 or 47. A work of importance was written and produced about 1645, though strangely enough it was never printed or published in Schütz's life-time, and only appeared in print for the first time in 1873, edited by Carl Riedel of Leipzig. It is a small Passion Oratorio on the Seven Words from the Cross. This work is of importance as contributing some new elements to the development of the later Passion Music. First, the part of the Evangelist is no longer based on the liturgical intonation, as in the 'Resurrection' oratorio of 1623, but takes the form of the new Arioso Recitative. For the sake of variety Schütz divides this part among different solo voices, and sets it twice in the form of a quartet. Next, the work is opened and concluded with a chorus (5-part with basso continuo) expressive of the feelings of Christians at the contemplation of our Lord upon the Cross. After the opening, and again before the concluding chorus, there occurs a short 5-part instrumental symphony, which has been aptly described as an ideal raising and dropping of the curtain before and after the action. The instruments to be used are not specified, but strings are probably more intended than anything else. The part of our Lord differs from the other parts in having a 3-part instrumental accompaniment. This probably originated out of the custom in previous 'Passions' (as followed in Scandelli's 'Resurrection' for instance), of setting the words of our Lord in 4 vocal parts. Schütz here improved upon the idea, first timidly suggested by himself in his 'Resurrection,' of giving the words of a single character to a single voice, for the sake of dramatic consistency, and assigning the accompanying parts to the instruments. The way in which this accompaniment is carried out deserves to be noticed. It is neither in the old style nor in the new, but a curious combination of both; the lower part is identical with the basso continuo for sustaining the harmony throughout: the other two parts are written in the polyphonic style with the voice, consisting of imitations either preceding or following the vocal phrase. It is well known how Bach in his 'Matthäus-Passion' developed this idea of a special accompaniment to the words of our Lord, surrounding Him as it were with a halo. Naturally there are no arias in the modern sense in Schütz's work, all is in the form of expressive recitative. A touching simplicity and tenderness distinguish the whole work. In 1648 appeared his 'Musicalia ad Chorum Sacrum,' a work in quite a different style from those last mentioned, and showing a reaction in Schütz's mind against the exclusive claims of the modern 'Manier.' It consists of 29 pieces to German words, for 5, 6, and 7 voices, in the old motet or strictly polyphonic style, in which the bassus generalis or continuus may be dispensed with (as the title says, 'Wobei der Bassus Generalis auf Gutachten und Begehren, nicht aber aus Nothwendigkeit zugleich auch zu befinden ist'). In the preface he expresses the opinion that no one will become a capable musician who has not first acquired skill in strict contrapuntal work without the use of the basso continuo. Personal reasons to some extent combined with artistic reasons to produce the reaction in favour of the older school of music as against the new, to which we have referred. From 1647 onwards, in spite of the many personal sacrifices he had made on behalf of the Elector's capelle, as for instance by paying or increasing out of his own salary the salaries of others of the musicians, he appears to have suffered so many annoyances in connection with it as caused him to have almost a disgust for the further cultivation of music at Dresden, and induced him to solicit over and over again in 1651–55 dismissal from the Elector's service. The new Italian element in the chapel was very different from the old, Schütz was getting involved in continual differences and squabbles with a new Italian colleague Bontempi. Italian art was losing its earlier seriousness of purpose, turning its back upon its older traditions, and aiming simply at the amusement of princes and their courts, and thus acquiring a popularity dangerous to higher ventures of art. The Elector however refused to accept the resignation of his Capellmeister, and after 1655 affairs improved somewhat, so far as Schütz was personally concerned, so that he continued quietly at his post for the remaining sixteen years of his life.

In 1657 he published 'Zwölf geistliche Gesänge' *a* 4 for small choirs, a work which we might call a German Communion and Evening Service, consisting, as it does, mainly of settings of the chief portions of the Liturgy in order, viz.

the Kyrie, Gloria, Nicene Creed, Words of Institution (usually appointed to be sung in early Lutheran liturgies), a Communion Psalm, Post Communion Thanksgiving, then a Magnificat and Litany, etc. From 1657–61 our composer would seem to have been occupied with the task enjoined on him by the new elector, that of composing additional melodies for Becker's Psalter, already mentioned; work which apparently gave him more trouble than it was worth, and hindered him from devoting himself to other more congenial work. In the preface to this Psalter, 1661, he says that 'to confess the truth, he would rather have spent the few remaining years of his life in revising and completing other works which he had begun, requiring more skill and invention' ('mehr sinnreichen Inventionen'). It is greatly to be regretted that the next work with which Schütz occupied himself has been preserved to us in so incomplete a form. It was a setting of the story of the Birth of our Lord, and as a Christmas oratorio would have been a fitting companion-work to his earlier 'Easter' oratorio and his later 'Passions-Musik.' Only the part of the Evangelist, in recitative with bass accompaniment, has been preserved to us; but the preface to this (1664) contains a specification of 10 so-called 'Concerte' for various voices and instruments which were to come in at different points of the narrative. The introduction, for instance, consisted of the title ('Die Geburt, etc.') set for 4 vocal and 5 instrumental parts; the message of the Angel was set for soprano solo with accompaniment of 2 violettas and 1 violone; the Chorus of Angels for 6 voices with violins and violas; the words of the Shepherds for 3 alto voices with 2 flutes and bassoon; of the Wise Men for 3 tenor voices with 2 violins and bassoon; of the High Priests for 4 bass voices and 2 trombones; and so on with the rest of the work. The loss of these concerted movements is the more to be regretted, as they would doubtless have shown Schütz's maturer views on instrumentation and the combination of voices and instruments. The last work of Schütz preserved to us, and perhaps his most famous work, is his setting of the story of the Passions, four settings in all, after the four Evangelists. This work was never published in his own life-time, and the only original copy extant is that of the St. John Passion, presented by the composer himself to the Duke of Wolfenbüttel, and now in the library at Wolfenbüttel. The only copy of the other settings is that made by a later hand in 1690, regarding which see below in list of Schütz's works. As we now have the work, it is for voices alone without instruments. It is, therefore, as if the composer here wished to denounce the mere external advantages of the newer concerted and dramatic style for the sake of showing how the spirit of it could be retained and applied to the purely vocal and older polyphonic style. For what specially distinguishes this Passions-Musik, is the series of brief choruses of surprising dramatic energy and truth of expression, yet never overstepping the bounds of devout reverence inspired by the subject. Otherwise the work is more purely liturgical than later Passions, not having arias and chorales to interrupt the narrative and give that variety of interest so needed for modern concert performance. Each Passion is opened according to old custom with a setting of the title ('the Passion etc') and closed with a devotional chorus in motet style, the text taken from some familiar Church hymn. The rest of the work is written in unaccompanied recitative, though parts of it may have been meant to be accompanied in the manner suggested by Schütz himself in his 'Resurrection.' In the 'St. Matthew' the recitative has more of melodic expressiveness than in the other Passions. The 'St. Mark' is peculiar in combining the greatest monotony of recitative with the richest dramatic character in the choruses. Dr. Spitta, the editor of the new complete edition of Schütz's works, is inclined, on this and other grounds, to have some doubts as to the authenticity of the 'St. Mark Passion' (see his preface pp. xx, xxi.) But the fact of its being joined with the other undoubtedly authentic Passions without anything to indicate its being by a different author, is sufficient to outweigh mere suspicions. These 'Passions,' compressed, and so far adapted to the requirements of modern performance, have been repeatedly produced with considerable success by the Riedelsche Verein of Leipzig.

To p. 46*b*, l. 6 from end, *add* In his later years Schütz's powers began to fail, especially his sense of hearing; and we are told, when he could no longer go out, he spent the most of his time in the reading of Holy Scripture and spiritual books. His last attempts at composition were settings of portions of the 119th Psalm; and no verse indeed of that psalm could have been more fittingly chosen as the motto of both his personal life and his art-work than that on which he was last engaged, but left unfinished: 'Thy statutes have been my songs in the house of my pilgrimage.' He is the true predecessor of Handel and Bach, not so much in the mere form of his work, as the spirit. If in the dramatized Biblical scenes of his 'Symphoniae Sacrae,' he is more especially Handel's predecessor, in his Passion Music he is Bach's. Both Handel and Bach simply brought to perfection what lay in germ in Heinrich Schütz. His great merit consists in this, that at a time when the new dramatic style was threatening the complete overthrow of the older polyphonic style, he saw how to retain the advantages of both, and laboured to engraft the one upon the other. It was thus he prepared the way for the greater work of Handel and Bach after him. The rather singular coincidence of Schütz's birth-year being exactly a hundred years earlier than the birth-year of Handel and Bach, brought about on the occasion of the keeping of the bicentenary of the two latter, in 1885, a great revival of interest in the work of their forerunner, which has had this practical result at least, the beginning of the publication of a monumental edition of

his works by Messrs. Breitkopf & Härtel of Leipzig.

The following is a list of Schütz's works, based on Eitner, Monatshefte für Musikgeschichte, xviii. pp. 47 ff.

I. WORKS PUBLISHED IN LIFETIME.

1. Il primo libro de Madrigali de Henrico Sagitario Alemanno. Venice, 1611. Dedicated to Landgraf Moritz of Hesse-Cassel. Contains 18 Madrigals *a* 5, and 1 Dialogo *a* 8. (This work is said in Langhans's 'Geschichte der Musik,' i. p. 115, to be lost, but Eitner says a complete copy exists in the Library at Cassel.)

2. 3 Pièces d'occasion, entitled 'Concerte,' published separately. Dresden, 1618.

3. Psalmen Davids sammt etlichen Moteten und Concerten mit acht und mehr Stimmen, nebenst andern zweien Capellen dass dero etliche auf drei und vier Chor nach Belliebung gebraucht werden können, wie auch mit beigefügten Basso Continuo vor die Orgel, Lauten, Chitaron, etc. Dresden, 1619. Contains 26 Psalms.

4. Psalm cxxxiii. for 8 voices with Basso Continuo, composed for his brother's wedding. Leipzig, 1619.

5. Syncharma Musicum tribus Choris adornatum, etc. A pièce d'occasion for the restoration of peace in Silesia. Vratislaw, 1621.

6. Historia der fröhlichen und siegreichen Auferstehung unsers einigen Erlösers und Seligmachers Jesu Christi. In fürstlichen Capellen oder Zimmern um die Osterliche zeit zu geistlicher Recreation füglichen zu gebrauchen. Dresden, 1623. An Oratorio on the 'Resurrection of Christ.' The title shows that it was intended as well for Chamber performance as for Church.

7. Elegy on the Death of 'Fürstin Frau Sophia, Herzogin zu Sachsen.' Melody with Basso Cont. Text by Schütz himself. Freiberg, 1623.

8. Cantiones Sacrae quatuor vocum, cum Basso ad Organum. Freiberg, 1625. Contains 41 pieces *a* 4 with Latin words.

9. De Vitae fugacitate, Aria quinque vocum supra Bassum Continuum. Freiberg, 1625. A pièce d'occasion.

10. Psalmen Davids, in Teutsche Reimen gebracht durch D. Cornelium Beckern ... nach gemeiner Contrapunctsart in 4 Stimmen gestellt ... Freiberg, 1628. Contains 92 new melodies by Schütz himself and 11 others harmonized by him. An edition, Güstrow, 1640, was published for use in Mecklenburgh-Schwerin. A later enlarged edition, with melodies for all the Psalms, appeared, Dresden, 1661.

11. Symphoniae Sacrae ... variis vocibus ac Instrumentis accomodatae *a* 3, 4, 5, 6. Opus ecclesiasticum secundum. Venice, 1629. Dedicated to the Elector of Saxony. Contains 20 settings of Latin texts.

12. 'Das ist je gewisslich wahr.' A motet for 6 voices in memory of Johann Hermann Schein, died 1631. Dedicated to Schein's widow and children. Dresden, 1631.

13. Erster Theil Kleiner geistlichen Concerten, mit 1, 2, 3, 4, und 5 Stimmen sammt beigefügten Basso Cont. Leipzig, 1636. Contains 17 pieces to German words.

14. Musicalische Exequien ... mit 6, 8, und mehr Stimmen zu gebrauchen. Dresden, 1636. Contains 3 funeral pieces.

15. Anderer Theil Kleiner geistlichen Concerten, mit 1, 2, 3, 4, und 5 Stimmen, sammt beigefügten Basso Continuo vor die Orgel. Dresden, 1639. Contains 31 pieces, texts German and Latin.

16. Symphoniarum Sacrarum Secunda Pars ... Deutsche Concerte mit 3, 4, 5 nämlich einer, zwo, dreien Vocal- und zweien Instrumental-Stimmen ... Opus Decimum. Dresden, 1647. Dedicated to Christian V. of Denmark. Contains 27 pieces. German words.

17. Musicalia ad Chorum sacrum. Geistliche Chor-Musik mit 5, 6, 7 Stimmen, beides Vocaliter und Instrumentaliter zu gebrauchen ... Opus Undecimum. Dresden, 1648. Dedicated to the Bürgermeister etc. of Leipzig out of respect for the Choir of the Thomas-Schule. Contains 29 Motets to German words.

18. Symphoniarum Sacrarum Tertia Pars. Deutsche Concerte mit 5, 6, 7, 8, nämlich 3, 4, 5, 6. Vocal und zweien Instrumental-Stimmen ... Opus Duodecimum. Dresden, 1650.

19. Canticum B. Simeonis. German text of Nunc Dimittis, 2 settings for 6 voices. (Not perfectly preserved.)

20. Zwölf Geistliche Gesänge *a* 4. Für Kleine Cantoreien. Opus Decimum Tertium. Dresden, 1657.

21. Historia der Freuden- und Gnaden-reichen Geburt Gottes und Marien Sohnes, Jesu Christi ... Vocaliter und Instrumentaliter in die Musik versetzt. Dresden, 1664. A Christmas Oratorio, but only imperfectly preserved.

II. WORKS UNPUBLISHED IN LIFETIME.

1. Die Sieben Worte unsers lieben Erlösers und Seligmachers Jesu Christi, so Er am Stamm des heiligen Kreuzes gesprochen, ganz beweglich gesetzt ... Parts in manuscript preserved in the Library at Cassel, discovered in 1855 by O. Kade, and first published in Score and adapted for modern performance by Carl Riedel. Leipzig, 1873.

2. Historia des Leidens und Sterbens unsers Herrens Jesu Christi. *a*. Nach dem Evangelisten St. Matthaeus. *b*. Nach St. Marcus. *c*. Nach St. Lucas. *d*. Nach St. Johannes. An older form of the Johannes Passion exists in MS. 1665. Of the four Passions together there exists only a copy made by J. Z. Grundig in 1690, now in the Leipzig Stadt Bibliothek.

3. Various single motets and concerted pieces, enumerated by Eitner, M.f.M.G., xviii. pp. 62, 67–70.

III. WORKS LOST.

1. 'Daphne.' Opera, performed 1627. German text by Opitz, after the original by Rinuccini.

2. A Ballet with Dialogue and Recitative, composed for the marriage of Johann Georg II. of Saxony, 1638. (Another Ballet, 'Von Zusammenkunft und Wirkung VII. Planeten,' existing in MS., is conjecturally ascribed to Schütz in Eitner's List, M. f. M. G. xviii. p. 69.)

All Schütz's MS. remains at Dresden were destroyed by fire, 1760. The same fate befel in 1794 what he may have left at Copenhagen.

IV. NEW EDITION IN SCORE.

Begun on the Tercentenary of the composer's Birthday, 1885.

Heinrich Schütz, Sämmtliche Werke, edited by Friedrich Chrysander and Philipp Spitta, and published by Messrs. Breitkopf & Härtel, Leipzig. Seven volumes have been issued up to the present time, of which the contents are as follows:—

Vol. 1 contains the 'Resurrection' Oratorio, the Passions-Musik after the four Evangelists, the Seven Words from the Cross, and in an Appendix the imperfect Christmas Oratorio, and the older form of the Johannes-Passion.

Vols. 2 and 3 contain the Psalms and Motets of 1619.

Vol. 4, Cantiones Sacrae, 1625.

Vol. 5, Symphoniae Sacrae, Part I. 1629.

Vol. 6, Geistliche Concerte of 1636 and 1639.

Vol. 7, Symphoniae Sacrae, Part II. 1647. [J.R.M.]

SCHULHOF, Julius. Correct name to Schulhoff.

SCHUMANN, Robert Alexander. P. 390 *b*, l. 11 from bottom, *for* Zuccamaglio *read* Zuccalmaglio. P. 404 *a*, l. 11, *for* now *read* afterwards. P. 409 *b*, l. 6, *for* poem *read* story. P. 413 *a*, in the first musical example the pause should be over the last note, not the last note but one. P. 413 *b*, l. 5, *for* trombones *read* trumpets. Add that a complete edition of the works of Schumann has been undertaken by the firm of Breitkopf & Härtel, who are also issuing a 'Volksausgabe' of the same at a very moderate price.

SCHUMANN, Clara Josephine. P. 423 *a*, l. 1, add that she came to England in 1885, 1886, 1887, and 1888. (Died May 20, 1896.)

SCHUND, Joachim, one of the oldest known organ builders, made the organ of St. Thomas's at Leipzig in 1356. [V. de P.]

SCHUPPANZIGH, Ignaz. In the musical example on p. 424 *b*, the time-signature should be 6-8, not 6-4. In the first bar of the fourth stave of the same, the treble clef should be restored before the word 'Wir.'

SCHWARBROOK, Thomas, a German, was in the employ of Renatus Harris, the organ builder. Early in the 18th century he left London to live at Warwick, and built many noble instruments. His masterpiece was the organ of St. Michael's, Coventry, built in 1733, which cost £1400. The latest mention of him is in 1752, when he improved the organ of Worcester Cathedral. See vol. ii. p. 596 *a*. [V. de P.]

SCORDATURA. In the second musical example it should be mentioned that the player reads the music as if the scordatura had not been introduced, so that the first phrase sounds in the key of A. Line 4 below the example, *for* (*a*) *read* (*c*).

SCOTISH MUSIC. P. 451 *b*, at the bottom of the column should be added a notice of the excellent set of twelve Scotish songs arranged by Max Bruch, and published by Leuckart of Breslau.

SCRIBE, EUGÈNE. In the list of librettos, correct date of 'La Fiancée' to 1829.

SECHTER. P. 455 *b*, l. 13 from bottom, *add* [See vol. iii. p. 353 *a*.].

SEE, THE CONQUERING HERO COMES. P. 457 *a*, l. 2, *for* 1747 *read* 1748.

SEGUIN. Add that Mrs. Seguin died in New York, in August 1888.

SEIDL, ANTON, born May 7, 1850, at Pesth, was entered as a pupil at the Leipzig Conservatorium in Oct. 1870. Early in 1872 he went to Bayreuth, and was there employed by Wagner to make the first copy of the score of the Nibelungen tetralogy. He also assisted at the festival in Aug. 1876. In 1879, through Wagner's recommendation, he obtained the post of conductor at the Leipzig Opera House, and retained it until 1882, when he went upon a long tour through Germany, Holland, England, Italy, etc. in the capacity of conductor of Angelo Neumann's 'Nibelungen' opera troupe. The performances were not altogether faultless: it is true that the vocalists were good, but the great music drama was reproduced in a sadly mutilated condition. Yet Seidl proved himself to be an energetic conductor, and was personally successful. In 1883 he became conductor at the Bremen Opera House. Early in 1885 he married the well-known soprano singer, Frl. Kraus, and in September of that year accepted the post of conductor at the New York German Opera House, which post he has now satisfactorily filled for three successive seasons. [C.A.]

SENNET. It should be added that the name is probably derived from Seven, and may indicate a flourish of seven notes, as suggested in Stainer and Barrett's 'Dictionary of Musical Terms.'

SENZA. Add that in the 'Sanctus' of Verdi's Requiem both the terms *senza misura* and *senza tempo* occur.

SERENADE. The Italian word Serenata is almost undoubtedly allied to *Sera*, evening, which gives a more satisfactory definition than that given in the Dictionary. P. 467 *a*, l. 19, *for* fenestra *read* finestra.

SEROFF, A. N. Line 9 from end of article, add day of death, Feb. 1.

SERVAIS. Add date of death of JOSEPH, Aug. 29, 1885.

SFORZANDO. Last line of article, *for* Variations, etc., *read* Variation 3.

SGAMBATI, G. Add that in May 1884 he was invited as representative of Italy to the international concerts at the Trocadéro in Paris, where he conducted his first symphony. In 1886 he was named one of the five corresponding members of the French Institut to fill the place vacated by the death of Liszt.

In 1887 he was invited to conduct his second symphony and to execute his first quintet at the great musical festival of the Tonkünstler-Versammlung, in Cologne.

To the list of works add the following:—

Op. 17. Quartet for strings in Db.
18. Four pieces for PF.: Preludio, Vecchio minuetto, Nenia, Toccata.
19. Four Italian Songs.
20. Three Nocturnes for PF.
Four songs without opus number.
The following are to be published shortly: Suite for PF. (op. 21), Prélude, Valse, Air, Intermezzo, Etude mélodique; a Cantata for one voice, with orchestral accompaniment; a Symphony for full orchestra, already performed in Rome, and at the festival of the Tonkünstler-Versammlung in Cologne.

[F.Rz.]

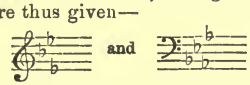
SHAKE. P. 480 *b*, last stave but one of music type, the first note should be a semiquaver. P. 483 *b*, second stave of music type, the last three notes should be E, not G. P. 484 *a*, example 43, it should be mentioned that Von Bülow, in his edition of Cramer's studies, interprets this passage in a precisely opposite sense to that given in the Dictionary, directing the shake to be performed as in example 44 of the article.

SHIELD, WILLIAM. P. 487 *a*, l. 19 from bottom, *for* 'Friar Bacon' *read* 'Harlequin Friar Bacon.' In the same list of works, under date 1793, add 'Sprigs of Laurel.' Under 1794 add 'Netley Abbey.' Under 1797, 'Wicklow Gold Mines,' and for 1798, 'The Farmer.' Add that he was appointed Master of the King's Music in 1817.

SHINNER, EMILY, born at Cheltenham, July 7, 1862, began the study of the violin at the age of seven. In 1874 she went to Berlin, and for two years studied under H. Jacobsen, a pupil of Joachim's, female violinists not being at that time admissible to the Hochschule. In 1876 this restriction was taken away, and Miss Shinner was among the first admitted. In October 1877 she became a pupil of Joachim's, and remained with him for three years. In Feb. 1881 she came to London, and after being heard at several private concerts (among others at one given by the Bach Choir), made her début at a concert given by Mr. H. R. Bird in the Kensington Town Hall, in Brahms's Sonata in G, etc. At the London Musical Society's concert of June 29, 1882, she played David's concerto in E minor with great success, and since that time has held a high position among English artists, her style being pure and refined, and her power of interpreting works of a high intellectual order being very remarkable. Early in 1889 she married Capt. A. F. Liddell. [M.]

SHIRREFF, JANE. Add date of death, Dec. 23, 1883.

SHORE. Line 3 from end of article, *for* 1750 *read* 1752.



SHUDI, JOSHUA, harpsichord maker and pupil of Burkat Shudi (vol. iii. p. 488), appears from his advertisement in the Gazetteer of Jan. 12, 1767, to have set up for himself about that time at the Golden Guitar, Silver Street, Golden Square, London. An advertisement of his widow, Mary Shudi, then of Berwick Street, St. James's, in the 'Public Advertiser' of Jan. 16, 1775, announces his death and her continuance of the business, and as there is a fine harpsichord still existing, said to have a

romantic history, and bearing the name and date of Joshua Shudi, 1779, it is evident that she continued to use her late husband's name, or dated instruments of his make when she sold them. [A.J.H.]

SIEGE OF ROCHELLE, THE. Omit the last sentence of the article, as the subject has nothing to do with that of 'Linda di Chamouni.'

SIEGFRIED. See under WALKÜRE, vol. iv. p. 376*b*.

SIGNATURE. P. 493, *add* in the original edition of Bach's Art of Fugue, as well as in many old publications and MSS., the signatures of B♭ and E♭ are thus given—

The true explanation of the omission of the last flat or sharp from the signature referred to on p. 493*b*, is probably to be found in the influence of the ancient modes.

SILAS, EDOUARD. Add that three Mythological Pieces for orchestra were played at the Philharmonic Concert of May 17, 1888.

SILVANA. See vol. iii. p. 533*b*.

SIMONE BOCCANEGRA. See vol. iii. p. 533*b*.

SINICO. See vol. iii. p. 534*a*.

SINGING. P. 510*b*, last line but one, *omit* Nicolino and. (Nicolini was a sopranist.)

SIREN. Last line but one of article, *for* TONOMETER *read* SCHEIBLER.

SIROE. See vol. iii. p. 534*a*.

SISTINE CHAPEL, ARCHIVES OF THE. For centuries past the jealousy with which these archives have been guarded by the Capellani Cantori Pontificii, their official custodians, has led to the circulation of many mysterious reports concerning them. All the trustworthy information we formerly possessed on the subject is contained in a few scattered notices in the works of Adami[1] and Baini;[2] and this amounted to little more than the certainty that they contained a priceless collection of works by the Ecclesiastical Composers of the 15th and 16th centuries. A large proportion of these treasures was, however, destroyed by fire, during the sack of Rome in 1527.[3] Again, between the years 1678 and 1688, further havoc was made, through the carelessness of the then 'protettore,' Cardinal Rospigliosi, after whose death, in 1688, it was found that numberless title-pages, and other portions of the finest MSS., had been stolen, for the sake of the miniatures and illuminations with which they were adorned.[4] Between the years 1721 and 1724, the greater number of volumes in the collection were rebound, and 'restored' by order of Pope Innocent XIII. Some volumes may possibly have been preserved by this process; but the operation was performed with such carelessness, that works, and parts of works, were bound together at random, only because they happened to correspond in size, while the edges were so ruthlessly cut down, that, in many cases, clefs, initial letters, and composers' names were completely cut away. Finally, during the occupation of Rome by the French revolutionary soldiers, in 1798, a certain 'citoyen' Mesplet, who was nominated 'Commissaire des Beaux Arts,' took possession of the keys, but was recalled before much harm had been done; and, though the volumes were soon afterwards removed to a room used for the breeding of poultry, and placed in the custody of the hen-wife, Baini found them, after the departure of the French, much less injured than could have been reasonably expected.[5]

Until within the last few years, this was all that we knew, in connection with the archives. But all doubts are now removed. By permission of Pope Leo XIII, Dom. Fr. Xav. Haberl, Director of the School of Church Music at Regensburg, began, in the year 1883, an exhaustive critical examination of the Archives, and, after continuous study, has published a complete bibliographical and thematic catalogue of the Collection,[6] containing a mine of information entirely new to the public.

From this most valuable work we learn that the collection contains 269 numbered volumes, and many others not numbered, mostly in large folio, written on vellum, or thick hand-made paper, bound in white or brown leather, with heavy clasps of steel or brass, and adorned with magnificent illustrations by the great masters of the 15th and 16th centuries. The MSS. date from the year 1458, to the end of the Polyphonic period; and the voice-parts are generally arranged on opposite pages, in the form called *Cantus lateralis*.[7] Of the numbered volumes, 224 are in MS. and 45 printed. In 26 volumes the music is Gregorian. Among the printed works, are six volumes published by Petrucci[8] (Nos. 235—238), the twelve volumes of Masses, and nearly a complete set of the other works, by Palestrina, published during his life-time and that of his son Igino. Compositions by Palestrina are also continued in 61 of the MS. volumes, which include 44 Masses, 104 Motets, Improperia, Lamentationes, Miserere, and Magnificat.

A few volumes in the collection are of special interest.

No. 22 contains the earliest copy of the Missa Papæ Marcelli in existence. When the three Masses written by Palestrina in 1565 were submitted for approval to the Commission of Cardinals, it was ordered that copies should be made of them, for preservation in the archives, and, that the Missa Papæ Marcelli should be

[1] 'Osservazioni per ben regolare il Coro dei Cantori della Cappella Pontificia,' per Ant. de' Rossi (Roma, 1711).
[2] Memorie storico-critiche della vita e delle opere di G. P. da Palestrina', da Guiseppe Baini (Roma, 1828).
[3] Baini, *in op. cit.* Tom. ii. p. 310, Note 634. [4] Ib. ii. 310, *note*.
[5] Baini, i. 278, *note* 379.
[6] 'Bibliographischer und thematischer Musik-katalog des Päpstlichen Kapellarchives im Vatican zu Rom. von Fr. Xav. Haberl (Leipzig, bei Breitkopf & Härtel, 1888).
[7] See PART-BOOKS, vol. iv. p. 739 *a*.
[8] See PART-BOOKS, vol. iv. p. 739 *b*.

transcribed in letters of extraordinary size.[1] The three masses are now bound together, in the volumes in question; but, when this was 'restored,' in 1724, some other works were bound up with them. The present contents of the volume are—

No 22. (a) Missa, En douleur et tristesse. Noel Baudouyn.
(b) Missa (dated 1568), Robledo.
(c) Missa, in Modes III and IV (now known as 'Illumina oculos meos'). Palestrina.
(d) Missa PAPAE MARCELLI. Palestrina.
(e) Missa, in Mode VII. Palestrina.
(f) Missa, Ultimi miei sospiri. Il Rosso.

Vols. 205–206[2] contain Palestrina's 'Improperia,' and 12 settings of the 'Miserere'; one, by an anonymous author, and the remainder by Dentice, Fr. Guerrero, Palestrina, Teofilo Gargaro, Fr. Anerio, Fel. Anerio, Giov. M. Nanini, Rugg. Giovanelli, and Gregorio Allegri — the last-named work being the famous composition sung, with so much effect, at Rome, during Holy Week.[3] The Miserere of Bai, sung, for many years, in alternation with that of Allegri, is continued in Nos. 203–204.[4]

The following is the list of Composers—many of them otherwise altogether unknown—whose works are contained in the MS. volumes.

N.B. Names without any distinguishing mark are attached to MSS. only; names marked †, to printed works only; names marked *, to both.

Agost. Agazzari; Alex. Agricola*; Greg. Allegri; Christ. Ameyden; Fel. Anerio; Fr. Anerio; Jo. Animuccia†; Arcadelt; Ch. d'Argentil; Tomm. Bai; Gius. Baini; Noel Baudouyn; Hotinet Barra; Ph. Basiron Jo. Beausseron; Ant. Bencini; Jo de Billhon; Jo. Biordi; Ant. Brumel*; Jo. Brumen; Jo. Brunet; Ant. Busnoys; Ginus Angelus Capponius; Firmin Caron; Carpentrasso* (= El. Genet); Ott. Catalani; Pet. Certon†; Jo. Certori†; Ant. Cifra†; Claudin*(=Cl. de Sermisy); Clemens non papa; Clibano; Loyset Compere; Jo. Consilium; Barth. del. Cort; J. P. Colonna†; Pet. Cotin†; Giov. (Some few modern Composers have also presented their works to the Library; among others, Adrien de la Fage, and Gaetano Donizetti.)

Besides the volumes of music, the archives contain a vast mass of documents relating to the history and management of the Papal Choirs, which are not noticed in Haberl's otherwise exhaustive catalogue. [W.S.R.]

SIVORI, CAMILLE C. See vol. iii. p. 534 *a*, where (line 2 of article), *for* June 6, 1817 *read* Oct. 25, 1815.

SLOPER, E. H. LINDSAY. Add date of death, July 3, 1887.

SMART. P. 538 *a*, l. 2, *for* Nov. 23 *read* Nov. 27.

SMETANA, F. Among his works mention should be made of the symphonic poems 'Wallensteins Lager,' 'Richard III,' and 'Hakon Jarl,' as well as of his successful 'Lustspiel-ouverture' brought out shortly before his death, which took place May 12, 1884.

SMITH, ALICE MARY. See WHITE, MRS. MEADOWS.

SMITH, JOHN. See VOWLES, in Appendix.

SMITH, JOHN. P. 540 *a*, l. 1 of article, *for* commonly styled Dr. Smith *read* Mus.D. Lines 8–11, *for sentence beginning* About 1826 *read* On July 7, 1827, the degree of Mus.D. was conferred upon him by the University of Dublin. (See vol. iv. p. 170 *b*, note 9.) Line 16, *for* about 1845 *read* in 1847.

SMITH, JOHN CHRISTOPHER. Line 5 from end of article, *for* Two *read* Three, as another collection of Handel's works in Smith's writing belonging to the Granville family, is now in the possession of Bevil Granville, Esq. of Wellesbourne Hall, Warwickshire. Omit the reference to HANDEL in Appendix.

SMITH, SYDNEY. Add date of death, March 3, 1889.

SOCIÉTÉ DES CONCERTS DU CONSERVATOIRE. For corrections and additions see ALTÈS and GARCIN in Appendix.

SOGGETTO (Ital. for a Subject or Theme). The true subject of an orthodox Fugue: as opposed to the Andamento, which is a Subject of abnormal length; and the Attacco, which is a mere Point of Imitation.

In its most regular form, the Soggetto consists of a single homogeneous section; as in No. 1 of 'Das wohltemperirte Clavier.'

Occasionally, however, its division into two sections is very clearly marked; as in No. 7 of the same.

Subjects of this last-named class frequently make a very near approach to the Andamento, from which they sometimes differ only in their less extended dimensions. [See ANDAMENTO and ATTACCO in Appendix.] [W.S.R.]

SONG. P. 604 *a*, in the song 'When I am laid,' the treble clef should be added to the voice part, and the treble and bass clef to the accom-

[1] Baini, Tom. i. p. 230. See also, vol. ii. p. 637 *a*.

[2] Baini's description of these two famous volumes differs materially from that given by Haberl. He describes them as Nos. 150–151; and, among other differences, mentions a 'Miserere' by C. Festa, and another, by Sante Naldini. There can, however, be no doubt that the volumes are the same. (See Baini's 'Memorie,' Tom. ii. pp. 194—197, *note* 577.)

[3] See also vol. ii. p. 336.

[4] Ib.

paniment throughout. On p. 608 *a*, among the English songs, Hatton's 'To Anthea' should be mentioned as one of the very best of its kind. Its omission was accidental. P. 608 *b*, l. 34, *for* Gattie *read* Gatty. P. 611, add to list of collections of national songs.

Finnish :—

'Valituita Suomalaisia Kansan-Lauluja,' harmonized by R. Logi, and published at Helsingfors.

P. 614 *a*, line 3 from bottom, *add* Worthy of mention, likewise, are the songs of J. Brzowski, Ig. F. Dobrzynski, J. Elsner, E. Jenike, E. Kania, V. Kazynski, Ig. Komorowski, M. Madeyski, F. Mireçki, J. Nowakowski, W. Prohazka, A. Sowinski, J. Stefani and K. Wysoçki.

In 1818 the poet Niemcewicz published his great work *Spiewny historyczne z muzykon* (Historical songs with music), and at his invitation the most popular composers of the day wrote or adapted melodies to them. From these songs, cherished as household words by all classes of the people, Polish patriotism has drawn both inspiration on the battle-field and consolation under misfortune and oppression. The collection includes some of the oldest national hymns, arranged in modern notation; among them, for instance, St. Adalbert's hymn to the Virgin (*Boga-Rodzięa*), a hymn of the 10th century which is engraved in plain-chant on its writer's tomb in the Cathedral of Gnesa, and still sung there as well as at Dombrowa on the Warka every Sunday. The characteristics of the old Polish historic chants, such as the Hymn of the Virgin of Czenstochowska and the Hymn of St. Casimir, are their simplicity and dignity.

P. 614 *b*, after last line in small print, *add*

'Pastoralki i Kolendy z melodyami,' by Abbé M. Mioduszewski. (The Kolendas or Noëls are peculiar to the Polish people; they are mostly quaint old popular airs of the 13th century, and are sung at Christmas in every house and street. Numerous collections of them exist.)

'Polish National Melodies,' by Jules Fontana.

'Chants du peuple de Gallicie,' by C. Lipinski.

'Chants polonais nationaux et populaires,' by S. Sowinski.

'Piesni ludu polskiejo,' by O. Kolberg. (This is a very valuable collection.)

'Daïnos oder Lithauische Volkslieder mit Musik,' by L. J. Rhésa.

'Polnische Liedergeschichte'; Eph. Oloff.

'Histoire de la musique en Pologne'; A. Jarzemski.

'Cent illustres Polonais'; S. Starowolski.

'Janociana'; D. Janoçki (treating of old Polish composers).

'La littérature musicale polonaise'; Ig. Potoçki.

'Les Musiciens polonais et slaves'; A. Sowinski.

See also the writings of Sikorski, Chodzko, Golembiowski, Grabowski, Woronicz and Elsner, for further information on Polish music.

P. 618 *a*, l. 11, before second musical example, *for* lesser *read* looser. P. 620 *a*, note 3, *for* Olt *read* Ott. [A.H.W.]

SONTAG, Henriette. Line 2 of article, correct date of birth to Jan. 3, 1806.

SOUNDS AND SIGNALS. P. 647 *b*, l. 7, *for* such *read* much; and add at end of article, that Messrs. Potter & Co. have recently published a 'Drum, Flute, and Bugle Duty Tutor.'

SPINET. *After title add* Fr. *Epinette, Clavicorde*; Ital. *Spinetta, Clavicordo*; Spanish *Clavicordio*. English *Spinet, Virginal*. P. 651 *a*, footnote, add:—and the upright spinet from the Correr collection, belonging to Mr. George Donaldson, which had also plectra of brass. It is therefore possible that the use of the quill superseded that of brass. P. 651 *b*, l. 36, Considerable light has been thrown upon the hitherto profoundly obscure invention of the keyboard instrument subsequently known as the Spinet, by that erudite searcher and scholar Mr. Edmond Vander Straeten, in 'La Musique aux Pays Bas,' vol. vii. (Les musiciens néerlandais en Espagne, 1re partie), Brussels, 1885. He quotes, p. 246, from a testamentary inventory of musical instruments which had belonged to Queen Isabella, at the Alcazar of Segovia, dated 1503. 'Dos Clavicinbanos viejos' that is to say, two old clavecins (spinets). One of her chamberlains, Sancho de Paredes (p. 248) owned in 1500 'Dos Clabiorganos'—two claviorgans or organized clavecins. In a previous inventory, dated 1480 (and earlier), the same chamberlain appears to have possessed a manicorde or clavichord with tangents. But Mr. Vander Straeten is enabled to give a positive date, 1387 (p. 40, et seq.), when John the First, King of Aragon, had heard and desired to possess an instrument called 'exaquir,' which was certainly a keyboard stringed-instrument. He describes it later on as resembling an organ but sounding with strings. The name 'exaquir' may be identified with 'l'eschuaqueil d'Angleterre,' which occurs in a poem entitled 'La Prise d'Alexandrie,' written by Guillaume de Machault, in the 14th century. Mr. Vander Straeten enquires if this appellation can be resolved by 'échiquier' (chequers) from the black and white arrangement of the keys? The name echiquier occurs in the romance 'Chevalier du cygne' and in the 'Chanson sur la journée de Guinegate,' a 15th century poem, in which the poet asks to be sounded

> Orgius, harpes, naquaires, challemelles,
> Bons echiquiers, guisternes, doucemelles.

The enquirer is referred to the continuance of Mr. Vander Straeten's notes on this interesting question, in the work above mentioned. It is here sufficient to be enabled to prove that a kind of organ sounding with strings was existing in 1387—and that clavecins were catalogued in 1503, that could be regarded as old; also that these dates synchronize with Ambros's earliest mention of the clavicymbalum, in a MS. of 1404. P. 652 *a*, l. 8, *add*:—In the Bologna Exhibition, 1888, Historical Section, was shown a spinet bearing the inscription 'Alessandro Pasi Modenese,' and a date, 1490. It was exhibited by Count L. Manzoni. It is a true Italian spinet in a bad state of repair. The date, which has been verified, does not invalidate the evidence adduced from Scaliger and Banchieri concerning the introduction of the spinet, but it places it farther back and before Scaliger, who was born in 1484, could have observed it. This Bologna Loan Collection contained, as well as the earliest dated spinet, the latest dated harpsichord (1802, Clementi)

known to the writer. Line 11, Miss Marie Decca owns a Rosso spinet dated 1550, and there is another by the same maker (signed Annibalis Mediolanesis) dated 1569, recently in the possession of Herr H. Kohl, Hamburg, who obtained it from the palace of the San Severino family, at Crema, in Lombardy. These spinets are usually made entirely of one wood, the soundboard as well as the case. The wood appears to be a kind of cedar, from its odour when planed or cut, at least in some instances that have come under the writer's notice. P. 654 *a*, l. 7, The spinet by Antonio of Padua of 1550 has $\frac{DO}{C}$ distinctly written on the lowest E key, the next being F, etc., but although the writing is very old, it does not follow that it was written when the instrument was made. P. 654 *b*, l. 13, Handel's clavichord from Maidstone, with cut sharps, showed by the tuning when examined in 1885, that the first diagram is to be accepted as right, namely, that the nearer divisions of the cut keys are the dominants, and the back divisions, the chromatics. L. 24 from bottom of text, *for* Mr. Amps *read* Dr. A. H. Mann. P. 654 *b* footnote: 1630, on Mr. W. Dale's spinet, is not a date; it is the maker's number. P. 655 *b* l. 5, *for* dated *read* numbered. The Haward spinet belonging to the Rev. L. K. Hilton, of Semley, Shaftesbury, is nearly like a Hitchcock, which proves that Howard did not remain with the model figured 655 A. Mr. Kendrick Pyne acquired a Haward spinet (now in Mr. Boddington's collection) dated or numbered 1687, that has sharps like the Hitchcocks, with a strip of the colour of the naturals let in, in this instance black. [A.J.H.]

SPITTA, J. A. P. P. 656 *b*, note 1, add that the translation of his 'J. S. Bach,' by Clara Bell and J. A. Fuller Maitland, was published in three volumes, by Novello & Co. in 1884–5. Add that the new edition of Schütz's works, published by Breitkopf & Härtel, is edited by Dr. Spitta. (Died Apr. 13, 1894.)

SPOFFORTH, Reginald. Line 2, *for* 1768 *read* 1770. Line 4 from bottom, *for* Kensington *read* Brompton.

SPOHR. Louis. Line 2, *for* April 25 *read* April 5. P. 661 *a*, l. 28 from bottom, *for* Oct. 16 *read* Oct. 22. P. 664 *a*, in the second column of the list of works, add that op. 97 *a*, 'Psalm 24,' has been published by Messrs. Novello & Co., in 'The Bach Choir Magazine.'

SPONTINI. P. 677 *a*, note 1, *for* 'Vénus n'avait pas tort' *read* 'Au bruit des lourds marteaux.'

STAINER, John, Mus. D. Add that in 1888 he was obliged to resign his post at St. Paul's owing to his failing sight. In the same year he received the honour of knighthood. Among his more important works should be added a sacred cantata, 'St. Mary Magdalen,' written for the Gloucester Festival of 1883, and an oratorio, 'The Crucifixion' (1887).

STANFORD, C. V. Line 10 of article, *for* was appointed *read* had been appointed two years previously. Add that he received the honorary degree of Mus. D. at Oxford in 1883; in 1885 he succeeded Mr. Goldschmidt as conductor of the Bach Choir, and in Dec. 1887 he was elected Professor of Music in the University of Cambridge, on the death of Sir G. A. Macfarren. P. 689 *b*, bottom line, *for* String Quartet *read* Quartet for PF. and Strings. To list of works add the following:—

Op.
18. Three 'Cavalier Songs' (Browning), for baritone and chorus.
19. Six Songs.
20. PF. Sonata, in D♭ (MS.).
21. Elegiac Ode (Walt Whitman), for soli and chorus. Norwich, 1884.
22. Oratorio, 'The Three Holy Children.' Birmingham Festival, 1885.
23. Incidental Music to the 'Eumenides.' Cambridge, 1885.
24. 'The Revenge' (Tennyson), choral ballad. Leeds Festival, 1886.
25. Quintet for PF. and Strings, in D minor.
26. Carmen Saeculare (Tennyson), for soprano solo, and chorus. Composed for Her Majesty's Jubilee, 1887.
27. Psalm cl. for soprano and chorus. Opening of Manchester Exhibition, 1887.
28. 'Irish' Symphony in F minor. Richter, 1887.
29. Incidental music to the 'Oedipus Tyrannus.' Cambridge, 1887.
30. Songs (unpublished, 1888).
31. Symphony in F (Berlin, Jan. 14, and Crystal Palace, Feb. 23, 1889).
32. Suite for violin and orchestra (Berlin, Jan. 14, 1889, and Philharmonic, March 28).
33. Overture, 'Queen of the Seas' (Armada Tercentenary).

Add that the opera 'Savonarola,' in three acts and a prologue, was produced at Hamburg, April 18, 1884, and at Covent Garden, July 9 of the same year. On April 28 of that year, his 'Canterbury Pilgrims,' in three acts (words by Gilbert A'Beckett), was produced by the Carl Rosa company at Drury Lane. Other works without opus-numbers are a Festival Overture, Gloucester, 1877; Elegiac Symphony, in D minor, Cambridge, and Gloucester Festival, 1883; Concertos for PF. and for violoncello, with orchestra. A collection of 'Fifty Irish Melodies' (Boosey), with accompaniments, etc., edited by him, and a 'Song Book for Schools' (National Society), may also be mentioned. (M.)

STARK, Ludwig. Add date of death, March 22, 1884. Add that Dr. S. Lebert died in Dec. 1884.

STEIN. P. 708 *b*, line 12 from bottom of text, add dates of J. A. Streicher, 1761–1833. P. 709 *a*, l. 11, *for* 1795 *read* 1796. Line 25, *for* Jan. 16, 1835, *read* Jan. 10, 1833. For correction of the next sentence (lines 26, 27) see Streicher in vol. iii. p. 739 *b*.

STEPHENS, John, Mus. D. Line 2 from end of article *for* Dec. 15 *read* Dec. 1.

STEVENS, R. J. S. Line 2 of article, *for* in *read* March 27.

STIEHL, H. Add that he died in May 1886.

STIGELLI, G. Add that he died at Monza, July 3, 1868.

STOCKFLÖTE. See Czakan.

STOCKHAUSEN, Julius. Add that his Method of Singing has lately been translated into English by Mme. Sophie Löwe (Novello & Co.).

STOKES, Charles. Line 8 from end of article, *for* now *read* then, and add date of death, April 14, 1839.

STONARD, WILLIAM, Mus. D. Add that an Evening Service by him is printed in the Motet Society's publications, vol. ii. p. 78.

STOPPING is the term used for the action of the fingers of the left hand in playing instruments with strings stretched over a fingerboard, in order to produce the intermediate sounds lying between the notes sounded by the 'open' strings. When a higher note than the fundamental sound of the string is required, the vibrating part of the string must be shortened by stopping the vibration at a certain point between nut and bridge, *i. e.* by using one of the fingers of the left hand as an artificial nut or stopping-point. The nearer this point is to the bridge, the shorter the vibrating part of the strings, and the higher in pitch therefore the sound produced. A correct intonation or playing in perfect tune obviously depends entirely on exactness of stopping. See also under DOUBLE STOPS and HARMONICS. [P.D.]

STRADELLA, ALESSANDRO. P. 723 *b*, l. 17 from bottom, add that internal evidence makes it very probable that Francesco Rossi was the composer of 'Pietà, Signore!' although the authorship is still doubtful. Line 5 from bottom of same column, *add* to references, vol. i. p. 654 *b*. P. 724 *a*, l. 6, *for* 1578 *read* 1678.

STRAKOSCH. Add date of death of MAURICE, Oct. 9, 1887.

STRAUS, LUDWIG. Line 12 of article, *for* Prince Czartoryski *read* Ober-Finanzrath Baron von Heintl. Line 9 from end of article, *for* settling after a time at Manchester, *read* dividing his time between London and Manchester. Line 7 from end *add* He now lives in London. Add that in the spring of 1888 he resigned his post as leader of Mr. Hallé's orchestra.

STRAUSS, JOHANN. Add to list of operas, 'Blindekuh' (1878), 'Das Spitzentuch der Königin' (1880), 'Eine Nacht in Venedig' (1883), 'Der Zigeunerbaron' (1885), 'Simplicius' (1887). Add that EDUARD STRAUSS brought his orchestra to the Inventions Exhibition in 1885, when the daily concerts created a furore in London.

STREICHER, J. A. Line 7 of article, *for* in *read* Dec. 13. Line 11 of article *for* in 1794 *read* Jan. 3, 1796. Line 12, *for* in 1832 *read* May 25, 1833. Line 15 *for* in *read* March 28.

STRING. Line 1 of article *for* Fr. Chord, *read* Fr. Corde.

STROHFIEDEL. Add that the instrument is more usually called by its other names, Xylophone or Gigelira. A fourth name for the instrument is Ligneum Psalterium.

STROHMEYER, CARL. Line 4 from end of article, *for* 1870 *read* 1780.

SUCHER. Add that Frau Sucher gained great renown by her singing of Isolde at Bayreuth in 1886. In 1887 her husband was appointed to the post of conductor at the Hofoper at Berlin, she remaining at Hamburg to fulfil her engagement.

SÜSSMAYER. See also MOZART in Appendix.

SULLIVAN. P. 762 *a*, l. 24, add that he conducted the Leeds Festivals of 1883 and 1886, composing for the latter 'The Golden Legend,' to words selected from Longfellow's poem. P. 764 in list of works, add among the dramatic works, 'Princess Ida,' 1884; 'The Mikado,' 1885; Ruddigore,' 1887; 'The Yeomen of the Guard,' 1888; all published by Chappell. Among the vocal works add the cantata 'The Golden Legend,' produced at the Leeds Festival of 1886, and published by Novello; and the trio 'Morn, happy morn,' for soprano, alto and tenor, with flute obbligato, written for the play of 'Olivia,' by W. G. Wills. Among the incidental music to plays *add* Overture and incidental music to Macbeth, produced Dec. 29, 1888.

SUNDERLAND, MRS., whose maiden name was SYKES, was born at Brighouse, Yorkshire, in 1819. It was as a member of the Halifax Choral Society that her voice first attracted attention, and she was taken in hand first by Luke Settle, a blacksmith of Brighouse, and then by Dan Sugden of Halifax, both renowned local musicians. Under their training she became a very prominent member of the old-fashioned quartet choirs, which then existed in Yorkshire churches. Her first appearance as a solo singer was on Feb. 19, 1838, at a concert given in the Exchange Rooms, Bradford. She at once became a local celebrity, was styled the 'Yorkshire Queen of Song,' and for more than a quarter of a century was the leading vocalist in the North of England. She was physically robust, and her voice was a high soprano of great force and volume, which she managed with much expression. Her repertoire was chiefly composed of the principal songs in the Messiah, Judas, and the Creation; but she had also some secular songs, mostly of a popular kind. Her first appearance in London was in the Messiah at Exeter Hall, Nov. 2, 1849, and she continued to sing first soprano for the Sacred Harmonic Society and other bodies in the Messiah, Creation, Elijah, etc., until 1856. The directors of the Antient Concerts esteemed her voice and expression so much that they offered to send her abroad for further tuition. Indeed had her early training equalled the quality of her voice and her natural feeling, there can be little doubt that she would have risen to very great general eminence. Her last appearance in public was in the Messiah, at Huddersfield, June 3, 1864. Mrs. Sunderland married at the age of 19, and now lives at Calder View, Brighouse. [G.]

SVENDSEN, J. S. Add that in 1888 he visited England, conducting his Symphony in D at the Philharmonic Concert of May 31, as well as the last concert of the season on June 16.

SVENDSEN, OLUF. Add date of death, May 15, 1888.

SWELL-ORGAN. The sentence in lines 5–8 of article is to be corrected, as the Venetian Swell was not named from the Venetian blind, but

the Venetian blind so called because it was worked on the same principle as the harpsichord swell.

SWEETLAND, W., established an organ factory at Bath, in 1847. The Church of St. Cuthbert (Wells, Somerset) and the Wesleyan Chapel in Cardiff contain instruments of his making. He also built a chamber organ in his own house, for which he has invented a mechanism whereby the Voix celeste, or tremulant, can be applied to, or withdrawn at pleasure from, a solo stop. [V. de P.]

SWINNERTON HEAP, C. Add to list of works a sonata for violin and pianoforte, and a cantata 'The Maid of Astolat.'

SYMPHONY. P. 29 *a*, l. 9 from bottom, *for* an Ambrosianischer Lobgesang *read* the Te Deum. P. 42 *b*, l. 17 from bottom, *for* Norwegian *read* Scandinavian.

SYMPHONY CONCERTS. For continuation see BOSTON in Appendix, and add that in the winter seasons from 1886 to 1889, Mr. Henschel organized a series of orchestral Symphony Concerts in St. James's Hall, on much the same footing as that of the concerts described in the Dictionary.

SYNCOPATION. The first note of the musical example should be E, not C (*i. e.* on the highest space of the treble stave).

T.

TACCHINARDI, N. Line 2, *for* Florence in September 1776, *read* Leghorn, Sept. 3, 1772. Last line of article, *for* in 1860 *read* at Florence, March 14, 1859.

TALLYS, T. P. 54 *a*, l. 25, *omit the words* sung upside down. P. 54 *c*, *under* 'Let the wicked' *add that* 'Calvert's list' refers to his anthem book, published 1844. P. 54 *d*, l. 4 omit the anthem 'O thou God Almighty' as it occurs again in its right place in the list. For further information see BYRD in Appendix.

TAMBERLIK. Add date of death, Mar. 13, 1889.

TANNHÄUSER. Line 4 of article, *for* Oct. 20 *read* Oct 19.

TANS'UR, W. Add that he was the son of Edward and Joan Tanzer of Dunchurch, and was baptized Nov. 6, 1706.

TARANTELLA. To the list of works on the bite of the tarantula given in vol. iv. p. 59 *b*, add J. Müller, De Tarentulâ et vi musicae in ejus curatione. Hafniae, 1679.

TAUSIG, CARL. P. 64 *b*, last line but one, add that his father, Aloys Tausig, died March 24, 1885.

TEDESCA, ALLA. P. 67 *a*, after the musical example, add that in one of the sketches for this movement (in B♭) it is inscribed 'Allemande Allegro.'

TE DEUM. P. 68 *b*, l. 21 from bottom, add that Berlioz's work was performed at the Crystal Palace, April 18, 1885, and by the Bach Choir, May 17, 1887. The latter body sang the work again, with several anthems, etc., in Westminster Abbey June 28, 1888, the Jubilee of Her Majesty's coronation.

TELFORD & TELFORD'S organ factory in Dublin was established in 1830 by William Telford. His first work was to add German pedals (till then unknown in Ireland) to the organ of Christ Church Cathedral, Dublin. Since then they have built organs for Limerick and Lismore Cathedrals, and many others in England, Ireland, and the colonies. [V. de P.]

TEMPERAMENT. P. 70 *b*, l. 7, *omit the words* see Appendix.

TEMPUS PERFECTUM, TEMPUS IMPERFECTUM. See articles MODE, NOTATION, PROLATION, TIME.

TENOR. Line 10 from end of article, *for* soprano clef *read* treble, or G clef.

TENOR VIOLIN. P. 91 *a*, l. 12 from bottom, *for* quintet *read* sextet.

TESTORE, a family of violin-makers at Milan in the first half of the 18th century, consisting of a father, CARLO GIUSEPPE (1690–1715), and two sons, CARLO ANTONIO and PAOLO ANTONIO (1715–1745). Carlo Giuseppe was the best of the three. His instruments have often passed for the work of his master, Giovanni Grancino. In 1884 the well-known violoncello called the 'Lindley Grancino' being under repair, the removal of its spurious Cremona label revealed the fact that it is the work of the old Testore, the original label, which was found well preserved, running thus: 'Carlo Giuseppe Testore allievo di Gio. Granzino in Contrada Larga di Milano, 1690.'[1] Sig. Bottesini's famous double-bass is another well-known specimen of the old Testore's work. His instruments are strongly made, and often irregular in design. The model is generally of medium height, and the finish varies considerably, many being left very rough, and extremely plain in appearance. The tone, however, is usually good, and in exceptional cases very powerful and telling. The varnish, a brownish-yellow, sparingly applied, adds little to the attractions of these instruments, and vigorous hands are necessary to develop their tone. The instruments of the sons are less esteemed: they are lighter in colour, and a tendency to imitate Joseph Guarnerius is observable. The Testores worked at the sign of the Eagle in the same narrow street where the Grancinos worked at the sign of the Crown. Alberti, Landolfi, Tanegia, Mantegazza, Giuseppe

[1] Communicated by Messrs. W. E. Hill and Sons.

Guadagnini, Mezzadri, Lavazza, and others, complete the group of Milanese makers who followed the Testores in general plainness of style, aiming at producing instruments rather useful and lasting than ornamental. [E.J.P.]

THALBERG, S. P. 96 *b*, at the top of the column, the story concerning Schumann and his wife occurs in Schumann's 'Gesammelte Schriften,' i. 199, where it is told, not as an actual occurrence, but as having happened to the imaginary characters Florestan and Zilia. It may or may not have had its foundation in fact.

THEATRES IN LONDON. See VAUDEVILLE THEATRE, vol. iv. p. 232 and the same heading in Appendix..

THESPIS. Line 4 of article, *for* Dec. 23 *read* Dec. 26.

THOMAS, ARTHUR GORING. Add that his four-act opera 'Nadeschda,' set to a libretto by Julian Sturgis, was produced by the Carl Rosa Company at Drury Lane, April 16, 1885. An orchestral 'Suite de ballet' was performed by the Cambridge University Musical Society on June 9, 1887. (Died Mar. 20, 1892.)

THOMAS, CHARLES AMBROISE. Correct the statement in l. 5-6 from end of article, by a reference to GOUNOD in Appendix.

THOMAS, HAROLD. Add date of death, July 29, 1885.

THOMAS, THEODORE. Add that the famous orchestra formed by him was disbanded in 1888.

THOMASSCHULE. See vol. ii. p. 114 *b*, and vol. iv. p. 198 *a*.

THOMSON, GEORGE. Line 2 of article, *for* Edinburgh *read* Dunfermline, and *omit the words* or 1759.

THORNDIKE, HERBERT ELLIOT. Was born April 7, 1851, at Liverpool, and educated at Woolwich Academy and Cambridge. As an undergraduate of the University he competed successfully at the Crystal Palace National Music meetings, and gained the first prize. He then went to Milan, to Francesco Lamperti, under whom he studied for four years. Since his return to England he has studied oratorio and English singing with Signor Randegger and Mr. Deacon. He made his first appearance in public March 26, 1878, at the Cambridge University Musical Society, and has since then been steadily rising in favour. His voice is a good full bass of unusual compass, and he sings with taste and intelligence. Mr. Thorndike has frequently sung at the concerts of the Bach Choir, the Popular Concerts, the Norwich Festival, etc. At these he has introduced for the first time in England Schubert's noble songs, 'Waldesnacht' and 'Wehmuth.' He appeared on the boards of Drury Lane in July 1887. [G.]

THOROUGHBASS. P. 108 *b*, add that the first use of a thoroughbass appears to be in a work by an English composer, Richard Dering, who published a set of 'Cantiones Sacrae' at Antwerp in 1597, in which a figured bass is employed. See DERING in Appendix, vol. iv. p. 612 *b*.

THREE CHOIRS. The following is a list of the new works produced at these festivals since the article was written :—

Worcester, 1884, Dr. J. F. Bridge's 'Hymn of St. Francis,' and Mr. C. H. Lloyd's 'Hero and Leander.'
Hereford, 1885, Dr. Joseph Smith's 'St. Kevin,' and Mr. Lloyd's 'Song of Balder.'
Gloucester, 1886, Mr. W. S. Rockstro's 'Good Shepherd,' and Mr. Lloyd's 'Andromeda.'
Worcester, 1887, Mr. Cowen's 'Ruth.'
Hereford, 1888. No new work of importance.

THREE-QUARTER FIDDLE. See VIOLINO PICCOLO.

TICHATSCHEK, J. A. Line 15 from end of article, *for* Hernando *read* Fernando. Add date of death, Jan. 18, 1886.

TOEPFER, GOTTLOB, was born in 1792 near Weimar, received a good education, and became organist of that city. He wrote two works on organ-building in 1833 and 1843 respectively. [V. de P.]

TONAL FUGUE. From a passage in Arthur Bedford's 'Great Abuse of Musick' (1711) it may be inferred that the invention of tonal fugue was commonly ascribed, though of course wrongly, to Purcell. He gives an example in his appendix of a 'Canon of four parts in one, according to Mr. Purcell's rule of Fuging, viz. that where the Treble and Tenor leaps a fourth, there the Counter and Bass leaps a fifth.' [M.]

TONIC. The name given in modern music to the KEY-NOTE, *i. e.* the note from which the key is named. The functions of the tonic are in all respects identical with those of the final of the ancient modes. The tonic harmony is the common chord or triad, major or minor as the case may be, which is built upon the key-note as its bass. The rule that every composition must end with this harmony in some shape or other is probably the only law of music which has remained in full force through all the changes from the ancient to the modern styles. Its application is so universal that only one exception occurs readily to the mind, that of a song by Liszt, in which the effect of the innovation is so unsatisfactory that it is extremely improbable that it will often be repeated. [M.]

TORRIAN, JEHAN, of Venice, lived at the end of the 15th century, and built in 1504 the organ of Notre Dame des Tables, Montpellier. A copy of the curious contract may be seen in Roret's 'Manuel des Facteurs d'Orgues' (Paris, 1849). [V. de P.]

TOSTI, F. P. Line 2 of article, *for* April 7, 1827, *read* April 9, 1846. P. 152 *a*, l. 11, *for* sine *read* sene.

TOWERS, JOHN. Line 8 from end of article, for Conell, read Charlton on Medlock.

TOY SYMPHONY (Ger. *Kindersinfonie*; Fr. *La Foire des Enfants*, or *Symphonie Burlesque*). The English name by which a certain work of Haydn's is known. A tradition which there is no reasonable cause for doubting says that the composer got seven toy instruments at

a fair at Berchtesgaden, and taking them to Esterház, summoned some of his orchestra to an important rehearsal. When they found that they were expected to play a new symphony upon these toys (the only real instruments in the score are two violins and a double bass) the most experienced musicians in the band failed to keep their time for laughing. The original parts are entitled 'Sinfonia Berchtolsgadensis'; the toy instruments employed are a 'cuckoo' playing E and G, a trumpet and drum in G, a whistle, a triangle, and a 'quail' in F. There are three movements, the last of which is played three times over, faster and faster each time. The symphony is in C major, and was written in 1788. [See Pohl's 'Haydn,' vol. ii. p. 226, etc.] Andreas Romberg wrote a symphony for much the same instruments, with the addition of a pianoforte duet, a rattle, and a bell. He attempts more elaborate modulations than Haydn ventures to use, but his symphony lacks the fun and freshness of the older master's work, although his slow movement, an Adagio lamentabile, is very humorous. Mendelssohn wrote two—the first for Christmas 1827, for the same orchestra as Haydn's, the second for Christmas 1828. Both seem to have vanished. [See vol. ii. p. 261.] Mr. Franklin Taylor has written one for piano and toys which is not infrequently played. [M.]

TRACTULUS. I. A kind of Neuma, used before the completion of the Stave. [See NEUMA].

II. The *Guidon*, or Sign, used at the end of a Stave, to indicate the note with which the next Stave begins. (In English it is called a Direct.) [W.S.R.]

TRACTUS (Deriv. *traho*, *traxi*, to bear; Eng. Tract). A form of Versicle sung, in the Roman Church, after the Gradual, between the Epistle and Gospel. The Graduale and Tractus owe their names to the primitive custom of singing the Epistle and Gospel from two Pulpits, or *Ambones*, placed on opposite sides of the Choir; the Epistle being sung on the south, and the Gospel on the north side—when the orientation of the Church was correct. The Graduale was so called, because it was sung while the Deacon was ascending the steps, on the Gospel-side. The Tractus owed its name to the ceremony of carrying the book from one side to the other. The Plain-Chaunt Melodies to both are of the highest antiquity. [W.S.R.]

TRANSCRIPTION. A term which in its strict meaning should be the exact equivalent of ARRANGEMENT, but which in practice implies a different, and in most cases a far less worthy production, since the transcriber rarely if ever fails to add something of his own to the work he selects for treatment. Among the earliest examples of the transcription in this sense are the versions of tunes, sacred and secular, contained in the VIRGINAL BOOKS, which no doubt were executed to order, or to show off the skill of some illustrious performer. It is curious to notice how constant fashion has been in its adherence to this form of music. William Babell's harpsichord lessons upon the favourite opera airs of Handel's time are of the same order, artistically speaking, as Thalberg's 'Home, sweet home,' or any other piece of the class in modern days. Earnest musicians seem always to have viewed these productions with the same disapproval. Burney's opinion of Babell is followed by a passage which may most profitably be studied in this connection (Hist. vol. iv. p. 648). Here and there, of course, are to be found transcriptions which consist of something besides unmeaning runs and brilliant passages, and which even help to elucidate the intention of the original composition. Among Liszt's versions of Schubert's songs, there are a few, such as the 'Erlkönig,' of which this may be said, but in spite of such brilliant exceptions as this the form cannot be regarded with unmixed satisfaction. [M.]

TRANSFORMATION OF THEMES. See METAMORPHOSIS in Appendix, vol. iv. p. 717.

TREE, ANNA MARIA, the elder sister of Mrs. Charles Kean (Ellen Tree), born 1802 in London, was taught singing by Lanza and Tom Cooke. She was first engaged at Bath, where she appeared as Polly in 'The Beggar's Opera,' Nov. 13, 1818. She made her début at Covent Garden as Rosina in 'The Barber of Seville.' Sept. 10, 1819; became a popular actress and ballad singer, and remained at that theatre, with the exception of her provincial engagements, until her retirement, June 15, 1825. She made a great success as Luciana, Dec. 11, 1819; Viola, Nov. 8, 1820; Julia, Nov. 29, 1821; Imogen, June 19, 1822; Rosalind, Dec. 10, 1824; in Reynolds and Bishop's musical adaptations of Shakespeare. Her principal new parts were Louison in 'Henri Quatre,' April 22, 1820; Zaide in the younger Colman's 'Law of Java,' May 11, 1822; Lady Matilda in Planché's 'Maid Marian,' adapted from Peacock's novel, Dec. 3, 1822; Clari the Maid of Milan, in Payne's operatic play, wherein she originally sang 'Home, sweet Home,' May 8, 1823; Mary Copp in Payne's 'Charles II.' May 27, 1824 (these last two she performed at her farewell benefit); the Baroness Matilda in 'The Frozen Lake,' a mutilated version of Auber's 'Neige,' Nov. 26, 1824, etc. She married Mr. James Bradshaw, afterwards member for Canterbury, Aug. 15, 1825, and died at her residence, Queen's Gate Terrace, Feb. 17, 1862. Chorley described her as a singer with a cordial, expressive mezzo-soprano voice, and much real feeling. [A.C.]

TRÉSOR MUSICAL. A collection of music edited by the learned M. Robert van Maldeghem, whose researches in the monasteries and libraries of the continent, including the Vatican, have yielded splendid results, and, with the encouragement of the Belgian Government have rescued from obscurity many works of the old Flemish and Belgian composers, under whom the golden age of counterpoint was reached. The biographical notices, sometimes accompanied with portraits, are of interest, but would gain in

value were more frequent reference made in them to the authorities consulted. Every year since 1865 has seen the publication, in a magnificent edition, by Musquardt, Brussels, of two books ('Musique religieuse, musique profane') of the series, which is not yet complete.[1] In the following index the more usual forms of certain composers' names are preserved to those given in Maldeghem's list.

WOLF. [See LUPUS.]

[L.M.M.]

TRIO. P. 172 *b*, l. 25 from bottom, *for* three *read* four, *and after* latest *read* but one.

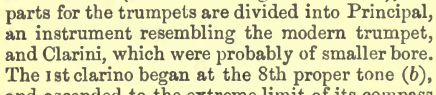
TRIPLET. For an addition concerning the performance of triplets in old music, see DOT in Appendix, vol. iv. p. 618*a*.

TRITONE. The interval of the augmented fourth, consisting of three whole tones, whence the name is derived. [See MI CONTRA FA.]

TROIS COULEURS, LES, is the title of one of the most popular of the political songs written after the French Revolution of 1830, celebrating the fall of the white flag and the return of the tricolor. It rivalled in popularity the Parisienne, and at one time, even the Marseillaise itself. It was written in one night by Adolphe Vogel, grandson of the author of 'Démophon,' who was born at Lille in 1805, and had just begun his studies at the Paris Conservatoire. The author, who is still living, was then 25 years of age, and 'Les Trois Couleurs,' together with the song 'L'Ange déchu,' have been the greatest successes of his career. The day after it was written all Paris was singing

Liberté sainte, après trente ans d'absence
Reviens, reviens, leur trône est renversé.
Ils ont voulu trop asservir la France,
Et dans leur main le sceptre s'est brisé.
Tu reverras cette noble bannière,
Qu'en cent climats portaient tes fils vainqueurs ;
Ils ont enfin secoué la poussière
Qui ternissait ses brillantes couleurs.

This popular song, composed to words by a certain Adolphe Blanc, was sung by Chollet at the Théâtre des Nouveautés (Place de la Bourse), where Vogel produced in the following year his first comic opera, 'Le Podestat,' which was moderately successful, and subsequently his grand oratorio, 'Le Jugement dernier,' represented with costumes and scenery. 'La Siège de Leyde,' a grand opera played at the Hague in 1847, 'La Moissonneuse,' another work of large extent, produced at the Lyrique in 1853, an operetta in three acts, 'La Filleule du Roi,' played in Brussels and afterwards in Paris, in 1875, numerous songs which have been popular in their day, several symphonies, quartets and quintets for strings, which gained the Prix Trémont at the Académie des Beaux-Arts, complete the list of this composer's chief works. He has always striven to attain a success equal to that which distinguished the opening of his career, nor does he yet despair of doing so, as he is now working upon a new opera, in spite of his eighty-three years. [A.J.]



TROMBONE. At end of article, *omit the words after* Symphony in C; as the passage in the 'Manfred' overture of Schumann is for trumpets, not trombones.

TROUBADOUR, THE. Grand opera in four acts; the words by Francis Hueffer, the music by A. C. Mackenzie. Produced by the Carl Rosa Company, at Drury Lane, June 8, 1886. [M.]

TRUMPET. Add the following supplementary notice:—

It is well known that the trumpet parts in the works of Bach and Handel are written very high and floridly; so high that they cannot be performed on the modern slide-trumpet. Praetorius (1618) gives for the trumpet in D, the higher range that should be produced (*a*), that is to say from the 17th to the 21st proper tones of the instrument. All these notes are beyond the highest limits of the modern trumpet. [See vol. iv. p. 181.] Bach wrote up to the 20th of these partial tones, and in his scores, as well as Handel's (see the Dettingen Te Deum), the parts for the trumpets are divided into Principal, an instrument resembling the modern trumpet, and Clarini, which were probably of smaller bore. The 1st clarino began at the 8th proper tone (*b*), and ascended to the extreme limit of its compass (*c*). The 2nd clarino, beginning at the 6th (*d*), very rarely went beyond the 12th (*e*). Each

required a special trumpeter, who had probably a particular mouthpiece. The clarini had disappeared before the time of Mozart, who had to change Handel's trumpet parts to suit the performance of the contemporary trumpeters.

It was the merit of Herr Kosleck of Berlin to introduce a high trumpet specially to perform Bach's trumpet parts in their integrity in the B minor Mass, which was produced under Joachim's direction at Eisenach on the occasion of the unveiling of the statue of J. S. Bach in September 1884. A performance of the same work, in which Herr Kosleck again took part, was given by the Bach Choir in the Albert Hall, London, March 21, 1885. His trumpet is not bent back but straight, and is corrected by two pistons for the 11th and 13th proper tones, which are naturally out of tune for our Diatonic scale. It is an A trumpet with post-horn bore and bell. Herr Kosleck's trumpet has been since improved by Mr. Walter Morrow, a well-known English trumpeter, who has altered the bore and bell to that of the real trumpet. Mr. Morrow's trumpet, which, like Herr Kosleck's, is straight and has two pistons, measures in length 58½ inches. It is also an A trumpet. With it he can reach the 20th, and at French pitch the 21st proper tone. The sacrifices, involving loss of engagements, to which Mr. Morrow has submitted in order to gain a command of the Bach trumpet, should not be passed over without a recognition of the artistic devotion which has impelled him to adopt and improve Herr Kosleck's invention. [A.J.H.]

TSCHAIKOWSKY. P. 183 *b*, to list of works add:—

Op. 58. Symphony, 'Nach Byron's Manfred.'
61. 'Mozartiana,' movements from Mozart arranged for orchestra.
62. Pezzo capriccioso for vcello. and orchestra.
Op. 64. Symphony, No. 5.
Operas and Ballets:—
9. Tscharodeika (The Charmer). Nov. 13. 1887.
Works without opus number:—
Die Tochter des Hauptmann.

Add that the composer visited England in 1888 and 1889, and appeared at the Philharmonic Concerts of both seasons.

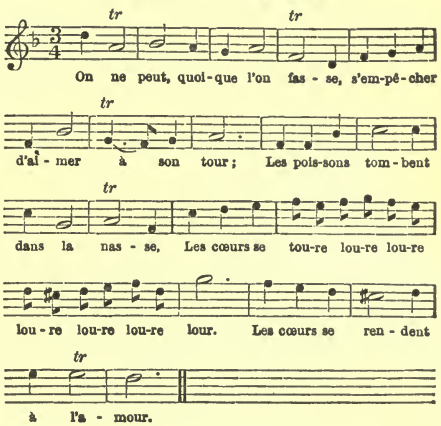
TUCKERMAN, S. P., Mus.D. Line 2, *for* Feb. 17 *read* Feb. 11. Add that he succeeded Dr. Hodges as Organist of Trinity Church, New York.

TUDWAY, T., Mus.D. Line 25 of article, add that the records of Pembroke College, Cambridge, state that Dr. Tudway was 'proved guilty of speaking words highly reflecting upon Her Majesty and her administration.'

TUNSTED, SIMON, the reputed author of the treatise 'De Quatuor Principalibus Musice,' though himself born at Norwich, derived his surname from Tunstead in Norfolk, of which place his father was a native. He became one of the Fratres Minores of the Order of St. Francis at Oxford, and it was there that he is said to have taken the degree of Doctor of Theology. He appears to have been well versed in all the seven liberal arts, but, like Walter Odington, especially in music and astronomy. The only literary works attributed to Tunsted, besides that above referred to, are a commentary on the 'Meteora' of Aristotle and additions to Richard Wallingford's 'Albion'; but the work by which his name has been, rightly or wrongly, handed down to posterity is the musical one. Of this there are two MSS. in the Bodleian Library, numbered Bodley 515 and Digby 90. Owing to the former MS. being described in the old

catalogue of 1697 as 'De Musica continua et discreta cum diagrammatibus,' many musical historians have believed that there are two distinct works by this author; but the only real difference is that the Bodley MS. contains the prologue beginning 'Quemadmodum inter triticum et zizania,' which the Digby MS. omits. The work itself contains warrant for both titles. From the colophon to each MS. we learn that the treatise was written in 1351, when Simon Tunsted was Regent of the Minorites at Oxford. He is said to have afterwards become Head of the English branch of his Order, and to have died in the nunnery of St. Clara, at Bruisyard, in Suffolk, in 1369. The 'De Quatuor Principalibus' treats of music in almost every form then known, from definitions of musical terms in the 'Primum Principale' down to an account of 'Musica Mensurabilis' in the 'Quartum Principale.' This latter part is perhaps the most important of the whole work. Tunsted quotes Philip de Vitry 'qui fuit flos totius mundi musicorum.' The whole treatise has been printed by de Coussemaker. In a MS. at the British Museum (Additional 10,336) there is an epitome of several chapters of the 'Secundum Principale,' written by a Fellow of New College, Oxford, early in the 16th century. [A.H.-H.]

TURCO, IN ITALIA, IL. At end of article, *for* 1820 *read* 1821.



TURE-LURE (soft *u*), or TOURE-LOURE, a very ancient lyrical burden or refrain, probably of Provençal origin. The old English form is 'tirra-lirra,' Shakspeare, 'The lark that tirra-lirra chants.' (Compare the French 'Turlut,' a titlark; 'Turlutaine,' a bird-organ.) In old French music it is also found as 'Tur-lu-tu-tu,' 'Tur-lu-ru' (in a popular air 'Io canto tur-lu-ru'), 'tur-lur-ibo,' etc. It often occurs in the old French burlesques. The following specimens, taken from 'Les Parodies du Nouveau Théâtre Italien,' 1731, will illustrate its use.

1. 'Ho! Ho! toure-louribo.'

2. Vaudeville in 'Les Cahos.'

The term still survives in English popular music in the forms 'tooral-looral-looral,' and 'tol-de-rol.' [E.J.P.]

TURLE, JAMES. Line 1 of article, *for* Taunton *read* Somerton. Line 10, add that from 1840 to 1843 he was part conductor of the Ancient Concerts.

TYE, CHRISTOPHER. Add that Tye was in orders, and held successively the rectories of Little Wilbraham, Newton, and Doddington-cum-March. By a brief relating to sequestrations of benefices it appears that he was at Wilbraham in 1564; on Sept. 12, 1567, John Walker was presented to the living on his resignation. On March 15, 1570, the rectory of Newton was conferred on George Bacon on Tye's resignation, and on March 15, 1572, Hugh Bellet was presented to the living of Doddington-cum-March on the death of Tye. His will has not been discovered. An Agnes Tye, who was possibly his daughter, was married at Little Wilbraham on Nov. 20, 1575, to John Horner, and the register contains several entries of their children's baptisms. (Coles's Transcript of Bishop Cox's Register, British Museum; Register of Little Wilbraham, kindly communicated by the Rev. F. C. Marshall.) [W.B.S.]

U.

UN ANNO ED UN GIORNO. Add that it was produced at the Lyceum Theatre in 1836, shortly after its production at Naples.

UNGER, CAROLINE. Add that the name is also spelt UNGHER.

UNITED STATES. For additional matter, see BOSTON, FOSTER, NEGRO MUSIC, etc., in Appendix.

UNIVERSITY MUSICAL SOCIETIES. To the list of important works given by the Cambridge Society add the following:

Bach, J. S. St. Matthew Passion; Ein' feste Burg.	in F.
Bridge, J. F. 'Rock of Ages.'	Schubert. Symphonies, Nos. 8 and 9; 'Song of Miriam.'
Cowen, F. H. *Symphony in F.	Schumann. 'Advent Hymn.'
Joachim, J. Hungarian Concerto.	Stanford, C. V. Elegiac Ode, op. 21; PF. Quartet in F; PF. Quintet in D minor; 'The Revenge.'
Macfarren. Violin Concerto.	
Mackenzie, A. C. Violin Concerto.	
Parry, C. H. H. Trio in B minor; PF. Quartet in Ab; String Quintet in Eb; *Symphony	Thomas, A. Goring. *Suite de Ballet.

The asterisks indicate first performance in England. [M.]

V.

VAISSEAU FANTÔME. P. 213 *a*, note 1, add date of death of P. L. P. DIETSCH, Feb. 20, 1865.

VALENTINO. Add that he came to London in 1839, and gave concerts at the Crown and Anchor Tavern. [See vol. iii. p. 40 *b*.]

VALLERIA. Add that she remained with the Carl Rosa company until 1886 inclusive, and created the principal parts on the production of 'Nadeschda' and 'The Troubadour.'

VALLOTTI, P. FRANCESCANTONIO, was a native of Piedmont, where he must have been born about the year 1700, since Dr. Burney, who saw him in 1770, says that he was then 'near seventy years of age.'[1] He had long before this time attained a high reputation as the best Organist, and one of the best Church Composers, in Italy. To his skill on the Organ he owed the appointment of Maestro di Cappella, at the Church of S. Antony, at Padua, which he held with honour until his death. His Compositions for the Church are very numerous. In 1770 he composed a Requiem for the funeral of Tartini; but his *magnum opus* was a theoretical work, entitled 'Della Scienza teorica, e pratica, della moderna musica.' The original plan of this treatise embraced four volumes: Vol. I., treating of the scientific or mathematical basis of Music; Vol. II., of the 'practical elements' of Music, including the Scale, Temperament, the Cadences, and the Modes, both ecclesiastical and modern; Vol. III., of Counterpoint; and Vol. IV., of the method of accompanying a Thorough-Bass. Vol. I. only was published, at Padua, in 1779; and its contents are valuable enough to make the loss of the remaining portions of the work a subject of deep regret. In this volume, the mathematical proportions of the consonant and dissonant Intervals are described with a clearness for which we seek in vain in most of the older treatises on the same subject—not excepting that of Tartini himself. To the contents of some of these treatises, and the views set forth in them, allusion is frequently made, during the course of the work. Chapter XXXII. contains a lucid refutation of the theory of the Minor Seventh propounded by Rameau, whom Vallotti characterizes as 'otherwise, a respectable and meritorious writer'; and, at the close of the introductory section, which consists of a series of definitions, given in the form of a Musical Dictionary, the reader is referred for farther information to the Dictionary of Rousseau, which he is told would be still more valuable than it is were it not adapted to Rameau's defective system. But the chief interest of the treatise lies in the fact that it belongs to a period at which the study of the Ecclesiastical Modes was combined with that of the modern scale, for the obvious reason that the more modern Tonality was not, and could not possibly be, antagonistic to the older one, since it was based, not upon the abolition of the Modes, but upon the employment of the Ionian and Æolian forms to the exclusion of all the others. We have shown elsewhere that the last great teacher who advocated this system of instruction was Haydn; and that Beethoven was the last great pupil to whom Haydn appears to have imparted it. It would be an interesting study to trace the influence of the system upon the work of these two great composers. The task, we believe, has never been attempted; but it is admitted, upon all hands, that the art of developing the resources of a given Key, within its natural limits, is a far higher and more difficult one than that of restlessly modulating from one Key to another—and this is the most prominent characteristic of the method in question. Vallotti's 'Treatise on Modulation,' which Dr. Burney saw in MS.[2] might perhaps have thrown some light upon the subject; but this unhappily has never been published.

[1] 'Present State of Music in France and Italy.' By Charles Burney, Mus. D., pp. 130—132. (London 1771.)

[2] Present State of Music in France and Italy, p. 131.

An attempt to complete Vallotti's great work was made after his death by his disciple and successor, P. Luigi Antonio Sabbatini;[1] and his system of teaching was continued by his talented, but somewhat eccentric pupil, the Abbé Vogler. [W.S.R.]

VAN BREE, J. B. Add that he wrote several masses and other works beside those mentioned in the article.

VAN DER EEDEN, G. See also vol. ii. p. 450 *b*, where the date of his death is given as June 29, 1782.

VAN OS, Albert, called 'Albert the Great,' is the earliest known organ-builder. He was a priest, and built the organ of St. Nicholas at Utrecht in 1120. [V. de P.]

VARNEY, Pierre Joseph Alphonse, born in Paris, Dec. 1, 1811, was educated at the Conservatoire as a violinist, and was a pupil of Reicha's for composition. He was successively conductor at the Théâtre historique, the Théâtre lyrique, at Ghent, the Hague, Rouen, the Bouffes Parisiens, and at Bordeaux (1865–78). Several short operas and operettas of slight construction by him were brought out at the various places where he worked. He is best known as having furnished the music for the celebrated Chant des Girondins, 'Mourir pour la Patrie,' the words of which were by Dumas, and which played so important a part in the revolution of 1848. Varney died in Paris Feb. 7, 1879. [M.]

VATERLÄNDISCHE KÜNSTLERVEREIN (Society of Artists of the Fatherland). A name which has become famous through Beethoven's op. 120. 'The Fatherland' here means Austria. Schindler (Life of Beethoven, ii. 34) says that in the winter of 1822–3, the publishing firm of Diabelli & Co. in Vienna formed a plan for issuing a collective set of variations for the pianoforte. No fewer than 51 composers, among whom were the first Viennese masters of the time,[2] consented to contribute to the collection, which was published in two large oblong books (No. 1380–81) under the title of 'Vaterländische Künstlerverein, Veränderungen über ein vorgelegtes Thema, componirt von den vorzüglichsten Tonsetzern und Virtuosen Wiens und der k. k. oesterreichischen Staaten.' ('Society of Artists of the Fatherland. Variations on a given theme, written by the most prominent composers and performers of Vienna and the Imperial States of Austria.') It is an indication of the position held by Beethoven among the musicians of Vienna, that the whole of the first book is taken up with his variations, 33 in number, while the other 50 composers are represented by a single variation each. Beethoven's composition has the separate title: '33 Veränderungen über einen Walzer für das Pianoforte componirt und der Frau Antonia von Brentano, gebornen Edlen von Birkenstock, hochachtungsvoll zugeeignet von Ludwig van Beethoven. 120 Werk. Wien bey Cappi und Diabelli.' The work was published in June 1823. On the 16th of the month the following notice appeared in the 'Oesterreichisch Kaiserliche priviligirte Wiener Zeitung':—'We offer to the world in this work no variations of the ordinary kind, but a great and important masterpiece, worthy of being ranked with the immortal creations of the classical composers of past times, and of a kind that could be produced by none but Beethoven, the greatest living representative of *true* art. The most original forms and ideas, the boldest passages and harmonies, are here exhausted, all such characteristic pianoforte effects as are founded upon a solid style are employed, and a further interest attaches to the work from the circumstance that it is founded upon a theme which would not have been supposed capable of such treatment as our great master, alone among our contemporaries, could give it. The splendid fugues, Nos. 24 and 32, will delight every lover of the grave style, while Nos. 6, 16, 17, 23, etc., will charm brilliant performers; in short all these variations, by the novelty of ideas, the skill of their workmanship, and the artistic beauty of their transitions, can claim a place beside Seb. Bach's well-known masterpiece in the same kind. We are proud of the opportunity of presenting this composition to the public, and have devoted the greatest care to combining elegance of printing with the utmost correctness.'

The original manuscript of op. 120 is in the possession of Herr C. A. Spina of Vienna. Interesting information concerning the sketches for the composition is given in Nottebohm's 'Zweite Beethoveniana,' Leipzig, 1887. Beethoven was fond of presenting copies of the printed work to his friends, and the writer possesses two such copies with autograph dedications.

The second book of the variations appeared in the latter half of 1823 or early in 1824. Anton Diabelli, the composer and publisher, had meanwhile dissolved partnership with Cappi, and the name of the firm was now 'A. Diabelli & Co.' As in the first book (Beethoven's portion) so here the theme by Diabelli precedes the variations. It consists of 32 bars, and, although of slight importance in itself, is well fitted for variation-writing. The waltz is followed by 50 variations, as follows:—(1) Ignatz Assmayer; (2) Carl Maria von Bocklet; (3) Leopold Eustache Czapek; (4) Carl Czerny; (5) Joseph Czerny; (6) Moritz Graf Dietrichstein; (7) Joseph Drechsler; (8) A. Emanuel Förster ('his last

[1] Sabbatini, P. Luigi Antonio, was a native of Padua, and a pupil of P. Martini, under whom he studied, for some time, at Bologna. He completed his musical education, however, in his native town under P. Vallotti, whom he succeeded, about the year 1780, as Maestro di Cappella at the Church of S. Antony at Padua; and whose system he endeavoured to perpetuate in a work entitled 'La vera Idea delle Musicali Numeriche Segnature' (Venice. 1799). He also wrote a 'Trattato sopra le Fughe Musicali,' in two vols. (Venice. 1802), illustrated by an exhaustive selection of Fugal Subjects and Devices culled from Vallotti's Compositions for the Church; and another theoretical work, entitled, 'Elementi teorici e pratici di Musica' (Roma. 1790). His best Composition was a Mass, written for the Funeral of Jommelli. He died at Padua in 1809. The editor is indebted to Dr. A. L. Peace, of Glasgow, for the use of a fine copy of the two first-named works, which are now very difficult to procure, and for that of the rare and perfect copy of Vallotti's work which forms the subject of the present notice.

[2] It is curious that the names of Seyfried and Weigl are not in the list.

composition'); (9) Jakob Freystaedtler; (10) Johann Gänsbacher; (11) Abbé Gelinek; (12) Anton Halm; (13) Joachim Hoffmann; (14) Johann Horzalka; (15) Joseph Hugelmann; (16) J. N. Hummel; (17) Anselm Hüttenbrenner; (18) Frederic Kalkbrenner ('written during his stay in Vienna'); (19) Friedrich August Kanne; (20) Joseph Kerzkowsky; (21) Conradin Kreutzer; (22) Eduard Baron von Lannoy; (23) M. J. Leidesdorf; (24) Franz Liszt ('a boy of eleven years old, born in Hungary'); (25) Joseph Mayseder; (26) Ignatz Moscheles; (27) Ignatz F. Edler von Mosel; (28) W. A. Mozart *fils*; (29) Joseph Panny; (30) Hieronymus Payer; (31) J. P. Pixis; (32) Wenzel Plachy; (33) Gottfried Rieger; (34) P. J. Riotte; (35) Franz Roser; (36) Johann Schenk; (37) Frank Schoberlechner; (38) Franz Schubert; (39) Simon Sechter ('Imitatio quasi Canon a tre voci'); (40) S. R. D.; (41) Abbé Stadler; (42) Joseph de Szalay; (43) Wenzel Tomaschek; (44) Michael Umlauff; (45) Fr. Dionysius Weber; (46) Franz Weber; (47) Ch. A. de Winkhler; (48) Franz Weiss; (49) Johann Wittassek; (50) J. H. Worzischek.

(The Graf Dietrichstein, mentioned under No. 6, was the leading aristocratic musician of the time. Schubert's 'Erlkönig' is dedicated to him. The initials S. R. D. under No. 40 probably indicate the name of some other aristocratic amateur). A long coda by Carl Czerny is appended to the variations. The MS. of Schubert's variation, No. 38, which is in the Imperial Library of Vienna, bears the date March 1821. According to this the later date given by Schindler for the inception of the plan must be incorrect. [M.F.]

VAUDEVILLE THEATRE. To list of London Theatres under this head add:—

Terry's Theatre; architect, Walter Emden; lessee, Edward Terry. Opened Oct. 17, 1887.

Court Theatre (re-erected on a site near the former theatre of that name); architect, W. Emden; lessees, Mrs. John Wood and Mr. Arthur Chudleigh. Opened Sept. 24, 1888.

Shaftesbury Theatre; architect, C. J. Phipps; proprietor, John Lancaster. Opened Oct. 20, 1888.

Grand Theatre, Islington. Burnt down Dec. 28, 1887. Rebuilt; architect, Frank Matcham; lessee, Charles Wilmot. Re-opened Dec. 1, 1888.

Lyric Theatre; architect, C. J. Phipps; proprietor, Henry J. Leslie. Opened Dec. 18, 1888.

VECCHI, Orazio. P. 235 *a*, l. 13, *for* Sept. *read* Feb.

VEILLONS AU SALUT DE L'EMPIRE, a political song written by Ad. S. Roy in 1791, and adapted by him to the popular air 'Vous qui d'amoureuse aventure,' from Dalayrac's 'Renaud d'Ast' (produced at the Comédie Italienne, July 19, 1787). The song, which bears the sub-title of 'Chant de Liberté,' was one of the first lyrical utterances suggested by the French Revolution, and it is a great error to suppose that it was adapted for use under the first Empire, for the democratic ideas expressed in Roy's verses were absolutely interdicted under the first Napoleon. The word 'Empire,' which has given rise to this widely-spread impression, refers here to the State, not to the imperial Government. The success of the song was enormous, and it required nothing less than the 'Marseillaise' to drive it out of popular favour. The first three verses alone are by Roy; the fourth was added in 1840, when the song was for a time rescued from the oblivion into which it had fallen. [A.J.]

VENI SANCTE SPIRITUS. A Prose, or Sequence, sung, in the Roman Church, on Whitsunday, and during the Octave of Pentecost, between the Epistle and Gospel. The text, in Trochaic Dimeter Catalectic, arranged in strophes of three verses, the two first of which rhyme together, while the third verse in every strophe ends in the syllable 'um,' was written in the tenth century, by King Robert of France, and, in graceful and touching simplicity, has never been surpassed. Whether or not King Robert also composed the old Ecclesiastical Melody—a very fine example of the use of Mode I.—it is impossible to say. It is, however, quite worthy of the text, both in sentiment and in graceful freedom of construction.

Veni Sancte Spiritus has not been so frequently treated by the Polyphonic Composers as some of the other Sequences. Palestrina has, however, treated it more than once, in settings of the highest order of excellence. [W.S.R.]

VENICE. The frequent and laudatory references made by foreigners to the Conservatorios of Venice abundantly prove the reputation which they enjoyed during the 17th and 18th centuries. The President de Brosses, in his 'Lettres Historiques' (Tom. i.), speaks in the highest terms of the pleasure he received from Venetian music generally. 'The passion of the nation for this art is,' he says, 'inconceivable'; but 'the music *par excellence* is the music of the Hospitals;... the girls sing like angels; they play the violin, the flute, the organ, the hautboy, the violoncello, the bassoon, in short no instrument is large enough to frighten them.... Nothing can be more delightful than to see a young and pretty novice dressed in white with a bunch of pomegranate flowers behind her ear, conducting an orchestra and beating the time.' Casotti (Lettere, July 29, 1713), assures us that at Vespers in the Incurabili they do not chant they enchant (non cantano ma incantano). Rousseau (Confessions, vii.) bears similar testimony to the charm of the singing in the Venetian Conservatoires; and readers of Dr. Burney's letters will not have forgotten his extreme delight at the music which he heard at the Incurabili under Galuppi's direction; 'I ran away,' he says, 'from the music at Santa Maria Maggiore, to the Incurabili, where Buranello and his nightingales ...

poured balm into my wounded ears.' Finally, at the close of the last century, Mancini wrote thus, 'I am of opinion that in all Italy there are no schools of music worthy the name, save the Conservatoires of Venice and Naples and the school conducted by Bartolommeo Nucci of Pescia.'

The Venetians were always a music-loving race. Not only did the people display a natural ability for the art in the popular music of the streets and the songs of the gondoliers, but the city long possessed schools of cultivated music in the choir of St. Mark's, in the theatres, and above all in the four great Scuole or Conservatoires, which were attached to the pious foundations of the Pietà, the Mendicanti, the Ospedaletto, and the Incurabili. So famous did these schools become that the greatest masters of Italy, and even of Europe, applied for the post of director, and were proud to write oratorios, motets, and cantatas for the pupils. The names of Lotti, Galuppi, Scarlatti, Hasse, Porpora, Jomelli, Cimarosa, to take a few only, must always shed a lustre upon the Conservatoires over which they presided; and there is a tradition that Mozart, when under contract to produce an opera for the Fenice, promised an oratorio for the Incurabili choir.

The four hospitals were not, in their origin, designed as schools of music. They were built and endowed by the munificence of private citizens, to receive the poor and infirm: their position as Conservatoires was only gradually developed. The Pietà at San Giovanni in Bragola, was founded in the year 1348, by Fra Pierazzo d'Assissi as a succursal to the Foundling Hospital at San Francesco della Vigna. After the death of Pierazzo both hospitals were united at San Giovanni, and placed under the Ducal supervision. The institution was supplied with wood and corn free of charge, and enjoyed a rental of nearly three hundred thousand ducats. The children of the hospital were taught singing, among other accomplishments, and the school of music gradually developed until it came to enjoy the highest reputation in Venice. At the time of de Brosses' visit the Pietà possessed the finest orchestra in the city. The Hospital of the Pietà was the only one of the Conservatoires which survived the downfall of the Republic and escaped the financial collapse which overtook so many pious foundations of Venice.

The Hospital of the Mendicanti was first founded in the 13th century, for the reception of lepers. In the year 1225 these unfortunates were all collected at SS. Gervasio e Protasio; and in 1262 they were removed to the island of San Lazaro in the lagoon. As the leprosy gradually disappeared from Venice, the institution and its funds were devoted to the assistance of mendicants and impotent persons. In the 17th century Bartolommeo Bontempelli and Domenico Biava, two wealthy citizens, built and endowed the Hospital at SS. Giovanni e Paolo.—The School of Music at the Mendicanti sprang up in the same way as the school at the Pietà had grown; and, towards the close of the 18th century, it had acquired a high repute. In the year 1775, on May 28, the Emperor Joseph II. was entertained at the Mendicanti, and a new oratorio was performed in his honour. The contemporary account of the visit describes how 'the whole party betook themselves to hear the new oratorio sung by the girls of the Mendicanti orphanage. The Emperor's suite occupied places reserved for them in the tribune opposite the grille which enclosed the choir where the girls sang. But the Emperor and his brother, the Grand Duke of Tuscany, attempted to enter the choir. They were not recognized at first by the lady guardians of that door, forbidden to all men without distinction of person, and admittance was refused. The Emperor, however, was presently recognized and admitted. He amused himself by turning over the leaves of the music, and by taking part in a full chorus with his own well modulated voice.' In the year 1777, owing to financial difficulties and mismanagement, the hospital of the Mendicanti was closed, though the choir continued to take part in concerts and oratorios for some time longer. The buildings of the Mendicanti now form part of the great Civic Hospital of Venice.

The Ospedaletto was founded in 1527, at SS. Giovanni e Paolo, as a poorhouse and orphanage. S. Girolamo Miani was among its early benefactors, and so too, by report, was Ignatius Loyola. The Conservatoire of the Ospedaletto seems to have been the least renowned of the four Venetian Schools, though Dr. Burney expresses himself much satisfied with the singing which he heard there, ranking it after the Incurabili.

The Incurabili, on the Zattere, an hospital for incurables, was founded in 1522, by two noble ladies, Maria Malipiero and Maria Grimani, under the inspiration of San Gaetano Thiene. The first building was of wood; but the new church was begun in 1566 and finished in 1600. The education of the girls who were admitted to the hospital was supervised by a committee of twelve noble ladies. Dr. Burney gives the palm to the orchestra and choir of the Incurabili. This Conservatoire was raised to its high position by the labours of the two famous masters Lotti and Galuppi. Galuppi, called Il Buranello, was the last maestro of the Incurabili choir, and wrote for it the last oratorio performed before the closing of the institution in 1776, the 'Moyses de Sinai revertens.' Six years later the concert-room of the Incurabili was opened once more for a performance of Galuppi's 'Tobias,' in honour of Pope Pius IV. The Procurator Manin, at his own charges, caused the hall to be painted with scenes from the life of Tobias, and decorated with mirrors. The oratorio was given by a picked choir and orchestra chosen from the four Conservatoires; and the performers were all dressed in black silk.

The girls who were admitted to the four great Conservatorios of Venice, were by rule required to prove poverty, ill-health, and Venetian birth.

This rule was sometimes relaxed in favour of exceptionally promising voices. The state dowered the girls either for marriage or for the convent. The pupils were divided into two classes, the novices and the *provette* or pupil teachers, whose duty it was to instruct the novices in the rudiments of music under the guidance of the maestro. The number of scholars in each Conservatoire varied from sixty to eighty. Every Saturday and Sunday evening the choirs performed full musical Vespers or a motet, usually written by their own maestro. The churches were crowded, and the town divided into factions which discussed, criticized, and supported this or that favourite singer. The opera-singers attended in large numbers to study the method of the more famous voices. On great festivals an oratorio was usually given. The words of the libretto were originally written in Italian; but for greater decorum Latin was subsequently adopted. The libretto was divided into two parts, and printed with a fancy border surrounding the title-page, which contained the names of the singers and sometimes a sonnet in their praise. The libretto was distributed gratis at the door of the church; and each of the audience was supplied with a wooden stool or chair. The choir sang behind a screen, and was invisible. Admission to the choir was forbidden to all men except the maestro; but Rousseau, by the help of M. le Blond, French Consul, succeeded in evading this rule, and was enabled to visit the choir of the Mendicanti and to make the acquaintance of the young singers whose voices had so delighted him. Special tribunes, called Coretti, were reserved for ambassadors and high state officials. Inside the church applause was forbidden, but the audience marked their approval by drawing in the breath and by shuffling their chairs on the ground.

VERDELOT, PHILIPP. Add that Antonio Gardano, the publisher, when introducing in 1541 a collection of six-part madrigals by Verdelot, describes them on the title-page as the most divine and most beautiful music ever heard ('la più divina e più bella musica che se udisse giammai'). It has long been the question who is the real creator of the madrigal as a musical form. Adrian Willaert has often been represented as the first composer of madrigals. But more recent investigation would seem to prove that Verdelot has a better claim than Willaert to this position. Besides the fact insisted on by Eitner ('Monatshefte für Musik-Geschichte,' xix. 85) that only a very few of Willaert's secular compositions are properly madrigals, the most of them being rather in the lighter style of vilanellas, his first composition of the kind appeared only in 1538, while as early as 1536 Willaert himself had arranged in lute tablature for solo voice and lute accompaniment twenty-two madrigals by Verdelot ('Intavolatura degli Madrigali di Verdelotto da cantare et sonare nel lauto ... per Messer Adriano,' Venice, 1536). Apart from the early mention of the name in the 14th century, the earliest known volume of musical pieces described as madrigals bears the date 1533, and Verdelot is the chief contributor. It is entitled 'Madrigali Novi de diversi excellentissimi Musici.' (See Eitner, 'Bibliographie der Sammelwerke,' p. 27.) If any one might dispute the claim of Verdelot to be the first real madrigalist, perhaps it is Costanzo Festa, who also appears as a contributor to this volume, and whose name otherwise as a composer appears earlier in print than that of Verdelot. (It should be mentioned that this first book of madrigals is not perfectly preserved, two part-books only existing in the Königl. Staatsbibliothek at Munich.) From 1537 onwards various collections of Verdelot's madrigals for four, five, and six voices were made by enterprising publishers, such as Scotto and Gardano, but always mixed up with the works of other composers. Eitner says that no independent collection of Verdelot's madrigals is known to exist. Out of the miscellaneous collections he reckons up about 100 as composed by Verdelot, although with regard to many of them some uncertainty prevails, from the carelessness of the publishers in affixing names, and perhaps also their wish to pass off inferior compositions as the work of the more celebrated masters. The feat of adding a fifth part to Jannequin's 'Bataille' first appeared in Tylman Susato's tenth 'Book of Chansons,' published at Antwerp in 1545, and has been reprinted in modern times by Commer. Besides madrigals, Verdelot appears as composer of motets in the various collections made by publishers from 1532 onwards. Forty are enumerated in Eitner's 'Bibliographie,' several of them imperfectly preserved. Of the complete works which Ambros examined, he praises the masterly construction, and the finely developed sense for beauty and pleasing harmony.—Only one Mass by Verdelot is known, one entitled 'Philomena,' in a volume of five Masses published by Scotto, Venice, in 1544. Fétis and Ambros say that several exist in manuscript in the archives of the Sistine Chapel at Rome; but Codex 38, to which Fétis refers, is shown by Haberl's Catalogue ('Katalog der Musik-werke im päpstlichen Archiv,' pp. 18 und 171, 2) to contain only three

motets by Verdelot. (See also Van der Straeten, 'Musique de Pays-Bas,' vi. 473.) [J.R.M.]

VERDONCK, Cornelius, born at Turnhout in Belgium in 1563, belongs to the later school of Flemish composers, influenced from Italy, as Italy had earlier been influenced from Flanders. He lived chiefly at Antwerp, in the service of private patrons, and died there Jnly 4, 1625. As a musician, he must have been highly appreciated by his contemporaries, as the following epitaph, inscribed to his memory in the Carmelite Church at Antwerp shows; a copy of which we owe to the obliging kindness of M. Goovaerts, keeper of the Public Archives at Brussels :—

DE CORDES.

His compositions consist chiefly of madrigals for four, six, and up to nine voices, many of which appear in the miscellaneous collections published at Antwerp by Hubert Waelrant and Peter Phalese between 1585 and 1610. For details, see Goovaerts' 'Histoire et Bibliographie de la Typographie Musicale dans les Pays-Bas'; also Eitner's 'Bibliographie der Sammelwerke.' One of his madrigals was received into Young's English collection entitled 'Musica Transalpina,' published in London, 1588. A few sacred compositions also appear among the published works of Verdonck. An Ave Maria of his for 4 voices is printed in the Ratisbon 'Musica Divina,' Annus, ii. Liber ii, 1874. [J.R.M.]

VEREENIGING, etc. The list of publications issued by this society is to be continued as follows :—

11. Const. Huygens, 'Pathodia Sacra et Profana' (ed. W. J. A. Jonckbloet and J. P. N. Land, 1883).
12. Six Psalms by Sweelinck, in 4 parts (ed. R. Eitner, 1884).
13. J. A. Reinken's 'Hortus Musicus' (ed. J. C. M. van Riemsdijk, 1886).
14. J. A. Reinken, 'Partite diverse sopra l'Aria: 'Schweiget mir von Welber nehmen' (1887). (Without No.) J. P. Sweelinck, 'O Sacrum Convivium,' 5-part motet.
15. J. P. Sweelinck, Cantio sacra, 'Hodie Christus natus est,' 5 parts.

The second volume of the society's 'Tijdschrift' was completed in 1887.

VERTICAL (or PERPENDICULAR) AND HORIZONTAL METHODS OF COMPOSITION. Two highly characteristic and expressive terms, used by modern critics for the purpose of distinguishing the method of writing cultivated by modern Composers from that practised by the older Polyphonists.

The modern Composer constructs his passages, for the most part, upon a succession of Fundamental or Inverted Chords, each of which is built perpendicularly upwards, from the bass note which forms its harmonic support, as in the example on p. 520 of the present Appendix.

The Polyphonic Composer, on the other hand, thinking but little of the Harmonies upon which his passages are based, forms them by weaving together, horizontally, two or more Melodies, arranged in contrapuntal form—that is to say, in obedience to a code of laws which simply provides for the simultaneous progression of the Parts, with the certainty that, if they are artistically woven together, the resulting Harmony cannot fail to be pure and correct; as in the example on pp. 580 and 581 of this Appendix. [W.S.R.]

VESQUE VON PÜTTLINGEN, Johann, born of a noble family of Belgian origin, July 23, 1803, at Opole, the residence of Prince Alexander Lubomirski. His parents went to live in Vienna in 1804, and at 12 years old he was sent to the Löwenbürgische Convict there for about a year. He began his musical studies in 1816, learning successively from Leidesdorf, Moscheles, and Worzischek. In 1822 he went to the University of Vienna in order to study for the civil service, which he entered in 1827. As early as 1830 he completed an opera, on the libretto of Rossini's 'Donna del Lago,' which was performed by amateurs in a private house. In 1833 he studied counterpoint, etc., with Sechter, and in Oct. 1838 a 2-act opera, 'Turandot,' was given with success at the Kärnthnerthor Theatre. In this and his other musical compositions he adopted the pseudonym of 'J. Hoven.' Two years later a third opera, 'Jeanne d'Arc,' in 3 acts, was given in Vienna. The work was considered worthy of being performed at Dresden in 1845, with Johanna Wagner in the principal part. His other operas are 'Der Liebeszauber,' 4 acts, 1845; 'Ein Abenteuer Carl des II,' 1 act, 1850; 'Burg Thayer,' 3 acts, apparently not performed; 'Der lustige Rath,' 2 acts, 1852, produced at Weimar by Liszt; 'Lips

Tullian,' 1 act, not performed. In 1872 he retired from the civil service, and in 1879 received the title of 'Geheimrath.' He died at Vienna, Oct. 29, 1883. He enjoyed the friendship of nearly all the musicians of his time; he corresponded with Mendelssohn, Schumann, Berlioz, Liszt, and many other distinguished men. His compositions of various kinds reach the opus-number 58, besides two masses, and other works unpublished. The above information is obtained from a sketch of his life published by Holder of Vienna, 1887, bearing no author's name. [M.]

VESTALE, LA. Line 3 of article, *for* Dec. 16 *read* Dec. 15. The date given by Clément, Riemann, etc., was the date at first announced for the performance.

VESTRIS, Mme. Add that during her engagements with Elliston, Charles Kemble, etc., with their permission, she re-appeared at the King's Theatre, and played in Rossini's operas on their production in England, viz. as Pippo (in 'La Gazza'), March 10, 1821; Malcolm Græme (in 'Donna del Lago'), Feb. 18, 1823; Zamira (in 'Ricardo e Zoraide'), June 5, 1823; Edoardo (in 'Matilde di Shabran'), July 3, 1823; Emma (in 'Zelmira'), at Mme. Colbran-Rossini's début, Jan. 24, 1824; and Arsace, with Pasta as Semiramide, July 15, 1824. She played there also in 1825, and as Pippo at Fanny Ayton's début in 1827. This last year she played in English at Covent Garden, George Brown in 'The White Maid' ('La Dame Blanche'), Jan. 2, a part played in Paris by the tenor Ponchard, and Blonde in 'The Seraglio,' a mutilated version of Mozart's 'Entführung,' Nov. 24. [A.C.]

VIADANA, Lodovico. Corrections as to his name and place of birth will be found in vol. iv. p. 314, note 2.

VIANESI, Auguste Charles Léonard François, born at Leghorn Nov. 2, 1837, naturalized a Frenchman in 1885, had been for many years the conductor of various Italian opera companies before finally becoming first conductor at the Opéra in Paris. He is the son of a musician, and was taught music by the advice of Pacini and Döhler, and became a chorus master in Italy. In 1857 he came to Paris furnished with a letter of introduction to Rossini from Pasta, and in Paris he completed his musical education. In 1859 he was called to London to conduct the orchestra at Drury Lane. He then went to New York, and was afterwards engaged at the Imperial Theatre at Moscow. He made a short stay in St. Petersburg, and then for twelve years conducted the Italian opera at Covent Garden. Besides this he has wielded his bâton in many other towns, as Vienna, Trieste, Barcelona, Madrid, Manchester, Liverpool, Glasgow, Dublin, Chicago, Philadelphia, etc. He has a talent for conducting those Italian opera companies which are got together for a month or six weeks, where the singers have neither time to rehearse nor to become acquainted with each other's methods. On July 1, 1887, M. Vianesi, who was naturalized just in time, was chosen by the directors of the Opéra to replace Altès [see Altès in Appendix] as conductor. He fills the post with much exuberance of gesture, but with scarcely more authority than his predecessor. [A.J.]

VIARD-LOUIS, Jenny. See vol. iv. p. 342, where, last line of article, *for* 1844 *read* 1884.

VICTIMÆ PASCHALI. A Prose, or Sequence, sung, in the Roman Church, on Easter Sunday and during its Octave, immediately after the Gradual, which intervenes between the Epistle and Gospel. The text, written in a very irregular metre, with unexpected rhymes marking the caesura and close of verses of constantly varying rhythm, is attributed, by Rambachius, to the 11th century. The old Ecclesiastical Melody, in Modes I. and II., is probably of equal antiquity, and may well have been composed by the author of the text, since it adapts itself, with never-failing facility, to the rhythmical change in the verse.

The Sequence was a great favourite with the Polyphonic Composers, most of whom have treated it with marked success. The finest examples are the well-known settings by Palestrina. [W.S.R.]

VIEUXTEMPS. The date of birth is probably to be corrected to Feb. 20, on the authority of Paloschi and Riemann.

VIOLETTA MARINA. Add that the instrument was invented by Castrucci.

VIOLIN-PLAYING. P. 287 *a*, l. 7 from bottom of text, *for* Cortigniano *read* Cortegiano. P. 289, in the table of violinists, the following corrections are to be made. In Group I the date of Leclair's birth should be given as 1687; that of De Beriot as 1802; that of Jos. Hellmesberger as 1828. Add date of death of Alard, 1888.[1] In Group II, *for* Jn. Linley *read* Th. Linley. In Group III, Kalliwoda's date is to be read 1800, and that of A. Stamitz as 1755. In Group IV, J. Becker's date should be 1833. In Group V the date of Baltzar's death is 1663. In Group VI, Barthelemon's date is 1741, and that of the death of Aubert le vieux, 1753. P. 290 *a*, l. 31, add that the Ciaccona here attributed to G. B. Vitali, is the composition of Antonio Vitali. The article on p. 313 *b*, of this volume refers to this latter composer, not to G. B. Vitali. P. 290 *b*, l. 7, *after the words* see that article, *add* in Appendix. P. 292 *a*, l. 27 from bottom, *for* about 1700 *read* 1676. VIOLINO PICCOLO (*Quart-geige, Halbgeige, Dreiviertel-geige, Three-quarter-fiddle*). A violin of small size, but of the ordinary parts and proportions, differing in this respect from the pochette or kit. It was usually tuned a minor third higher than the ordinary violin, its highest string having the same pitch as the highest string of the Quinton. Leopold Mozart says the Quart-geige is smaller than the ordinary violin, and is used by children. 'Some years ago,' he continues, 'Concertos were written for these little violins, called by the Italians Violino Piccolo: and as they have a much higher compass than the ordinary violin, they were frequently used in open-air serenades (*Nachtstücke*) with a flute, harp, and other similar instruments. Now, however [1756], the small violin can be dispensed with. Everything is played on the common violin in the higher positions.' ('Violinschule,' p. 2.) The 'Three-quarter Fiddle' is still used by children, but is always abandoned as early as possible. Whether the 'Violino piccolo' of Bach's first Cöthen Concerto was of different pitch from the ordinary violin is doubtful. The term here possibly designates a violin somewhat smaller, and strung with thinner strings, but of the ordinary pitch. [See VIOLONCELLO PICCOLO.] [E.J.P.]

VIOLONCELLO PICCOLO. A violoncello of the ordinary pitch, but of smaller size and having thinner strings. According to Quantz ('Flötenschule,' p. 212), it was generally used for solo-playing, the ordinary violoncello being employed for concerted music. Similarly, the Viola da Gamba used for solo-playing was of smaller size than the six-stringed 'concert-bass.' Bach introduces the Violoncello piccolo in the cantatas 'Jesu nun sei gepreiset,' and 'Ich geh' und suche mit Verlangen.' The parts have the usual violoncello compass. The well-known obbligato part to 'Mein gläubiges Herz' is entitled 'Violoncello Piccolo,' though it is probable from its construction that it was originally written for the Viola da Gamba. [E.J.P.]

VIRGINAL MUSIC. P. 306 *b*, note 2, *for* Cromwell *read* Cornwall. P. 310 *b*, l. 16 from bottom, correct the statement that the book has always been in the possession of Lord Abergavenny. It formerly belonged to Burney, and was sold at his sale for £11 0*s*. 6*d*. According to Rimbault, it was at one time in his (Rimbault's) library. [W.B.S.]

VISETTI, ALBERT ANTHONY, was born (of an English mother) at Spalato in Dalmatia, May 13, 1846, and studied composition under Alberto Mazzucato at the Conservatorio of Milan, where he gained two scholarships. His exercise for his degree was a cantata to words by his friend Arrigo Boïto. His first engagement was as conductor at Nice. He then went to Paris, where A. Dumas prepared specially for him a libretto for an opera from his 'Trois Mousquetaires.' The score was hardly completed when it was burnt in the siege of the Commune. Mr. Visetti then came to London, where he has since resided, and has devoted himself chiefly to teaching singing. He is Professor of Singing at the Royal College of Music, at the Guildhall School, the Watford School, and various other institutions. He is also director and conductor of the Bath Philharmonic Society, to which he has devoted an immensity of time, money, and ability. Mr. Visetti has published translations of Hullah's 'History of Modern Music,' of Dr. Hueffer's 'Musical Studies,' and of other works. The King of Italy in 1880 conferred on him unsolicited the order of the Corona d' Italia. [G.]

VOCAL CONCERTS. Line 12 from end of article, *for* 1821 *read* 1822.

VOGLER, ABT. . Line 12 from end of article, add that Prof. Schafhäutl has recently published a monograph on 'Abt Georg Joseph Vogler' (Augsburg, 1888), which supersedes all other works on the subject.

VOICES. P. 334 *b*, l. 15 from bottom, *for* 1773 *read* 1764.

VOLKMANN, F. R. Add date of death, Oct. 29–30, 1883.

VOPELIUS, GOTTFRIED, born at Herwigsdorf, near Zittau, in 1645, became cantor at St. Nicholas, Leipzig, and died at Leipzig in 1715. He wrote some original tunes to hymns previously set to other music, but is chiefly known as a harmonizer of older melodies in four voice-parts. He adopts the more modern form of regular rhythm (generally 3-2), and freely uses the subdominant and major dominant even in minor keys, and the accidental ♯ and ♮. He published in 1682 'Neu Leipziger Gesangbuch,' which contains besides other tunes 100 hymns from Schein's 'Cantional oder Gesangbuch' of 1627. [R.M.]

VORAUSNAHME. See ANTICIPATION.

VORHALT. See SUSPENSION.

VOSS, CHARLES. See vol. ii. p. 731 *b*, and add date of death, Aug. 29, 1882.

VOWLES, W. G., organ-builder in Bristol, is the present owner of the business established in 1814 by John Smith. The latter died in 1847, and was succeeded by his step-son Joseph Monday. On the death of Monday in 1857 he was succeeded by his son-in-law Vowles. Smith built the organ in Bath Abbey, and Vowles those of the Cathedral and St. Mary Redcliffe in Bristol. [V. de P.]

VUILLAUME. P. 341 *b*, l. 3 from bottom, *for* brother *read* father.

VULPIUS, MELCHIOR, born at Wasingen, in the Henneberg territory, about 1560, became cantor at Weimar in 1600, and held this position

till his death in 1616. He composed some chorales, notably 'Jesu Leiden, Pein und Tod,' 'Christus der ist mein Leben,' and 'Weltlich Ehr und zeitlich Gut,' the melodies of which are bold and charming; but accomplished much more in harmonizing tunes for many voices, in which he shows himself a sound contrapuntist. He is addicted to the old style in the use of the major and minor chords close together, even the dominant having often the minor third, and in the employment of chords without thirds. He uses syncopation so freely that it is often difficult to decide whether triple or quadruple rhythm is intended. His contrapuntal skill is exhibited in love of notes suspended as discords and afterwards resolved. In the free use of the first inversion of the common chord he is rather in advance of his age. His chief works are 'Cantiones Sacrae cum 6, 7, 8 vocibus,' Jena, 1602; 'Cantiones Sacrae 5, 6, et 8 vocum,' 2 pts., Jena, 1603-4; 'Kirchengesänge und geistliche Lieder D. Lutheri und Anderer mit 4 und 5 Stimmen,' Leipzig, 1604, of which the second enlarged edition bears the title 'Ein schön geistlich Gesangbuch,' Jena, 1609, and has the melody in the discant, whereas most of his settings have it in the tenor; 'Canticum B. V. Mariae 4, 5, 6 et pluribus vocibus,' Jena 1605; 'Opusculum novum,' 1610; and a Passion oratorio from the four Gospels, in which the narrator has a tenor voice. [R.M.]

WALLISER, CHRISTOPH THOMAS, born at Strasburg about 1568, died there 1648. His chief work is 'Ecclesiodae, das ist Kirchengesäng, nemblichen die gebräuchlichsten Psalmen Davids so nicht allein viva voce, sondern auch zu musikalischen Instrumenten christlich zu gebrauchen, mit 4, 5, 6, Stimmen componirt,' Strasburg 1614. It consists of 50 German psalms set in the old contrapuntal style on the melodies to which they were wont to be sung in the Protestant services in Strasburg. Two of these psalms are republished in Schöberlein and Riegel's 'Schatz des liturgischen Chorgesangs,' and one ('Ein' feste Burg,' Luther's verson of the 46th psalm) in Kade's Notenbeilagen to Ambros's 'Geschichte der Musik.' In 1625 Walliser published 'Ecclesiodae Novae, darin die Catechismusgesang, andere Schrift und geistliche Lieder samt dem Te Deum, und der Litania .... mit 4, 5, 6, 7 Stimmen gesetzt.' Winterfeld also mentions a setting by him of a chorus from the 'Clouds' of Aristophanes, and 3, 4, 5 to 10-part choruses to a drama on the subject of 'Elias,' and to a tragi-comedy 'Chariclea.' [J.R.M.]

WALMISLEY, T. A. Add that a tablet has recently (1888) been erected to his memory in Trinity College Chapel, Cambridge.

WALTHER, JOHANN JACOB, violinist and composer, was born in 1650 at Witterda, a village near Erfurt in Thuringia. The name of his teacher is unknown, but as he styles himself on the title of one of his works '*Italian* Secretary to the Elector of Mayence,' it appears probable that he had acquired his knowledge of the language in Italy, and therefore had some connection with the school of violin-players of that country. We find him first as a member of the band of the Elector of Saxony at Dresden, and later on attached to the court of the Elector of Mayence. The place and date of his death are unknown. Two sets of violin compositions of his have been preserved:

1. Scherzi da Violino solo, con il Basso Continuo per l'Organo ò Cimbalo, accompagnabile anche con una Viola ò Liuto, di Giovanni GiacomoWalther, Primo Violinista di Camera di sua Altezza Elettorale di Passonia MDCLXXVI.
2. Hortulus Chelicus, uni Violino, duabus, tribus et quatuor subinde chordis simul sonantibus harmonia modulanti. Studiosa varietate consitus a Johanne Jacobo Walthero, Eminentiss. Celsitud. Elector. Maguntin. Secretario Italico. Maguntiae, sumptibus Lud. Bourgeat. Academi. Bibliopol. 1688.

The musical interest of these compositions is but small. They consist chiefly of short preludes, pieces in dance-forms (gavottes, sarabandes, etc.), and sets of variations. In some respects they remind us of the works of FARINA (see that

article), who was his predecessor at Dresden. Like Farina he appears fond of realistic tone-pictures—he imitates the cuckoo, the nightingale, the crowing of the cock, and other sounds of nature. In a set of variations we meet with imitations of the guitar by pizzicatos, of pipes by passages going up to the sixth position on the first string, of the trumpet by fanfares on the fourth string; further on he introduces echo-effects, the lyre, the harp, and winds up with a 'Coro' in full chords. Besides these childish efforts, it is true, we find some more serious pieces, which, as far as invention, harmonic and metrical treatment go, are decidedly an advance on Farina's style. Still they are extremely clumsy and altogether inferior to the better productions of Walther's Italian contemporaries. Walther's importance for the history of the development of violin-playing consists exclusively in the advanced claims his writings make on execution. While the technique of the Italians of the same and even a later period was still very limited—even Corelli does not exceed the third position—some Germans, especially BIBER (see that article), and Walther—appear as pioneers of execution on the fingerboard. Walther ascends to the sixth position, frequently employs difficult double-stoppings, and uses a variety of bowing. [P.D.]

WALTZ, GUSTAVUS. Line 8 of article, *for* 1832 *read* 1732.

WALTZ. The paragraph (p. 385 *a*) beginning 'Crabb Robinson's account,' was inadvertently inserted by the editor in the wrong place. It should come in at p. 385 *b*, after l. 8 from bottom, and should read 'Crabb Robinson's account of the way in which he saw it danced at Frankfort in 1800 agrees with the descriptions of the dance when it found its way to England. The man, etc.' At the end of the article the minims should be dotted minims. [W.B.S.]

WANDERING MINSTRELS. An amateur orchestral society, founded in the year 1860. It is probably the only *purely amateur* full orchestra in existence in this or any other country. Capt. the Hon. Seymour J. G. Egerton, 1st Life Guards (now Earl of Wilton), was the first president and conductor, which post he held until 1873, when he was succeeded by Lord Gerald Fitzgerald, who in 1881 resigned in favour of Mr. Lionel Benson. The society has devoted its efforts chiefly to charitable objects in various parts of the country, a nett sum of nearly £15,000, the result of concerts, having been handed over to various charities up to the beginning of 1887. The meetings of the society for the first twenty years took place at Lord Gerald Fitzgerald's house, to which he added a concert room with orchestra for the exclusive use of the Society. The first 'smoking concerts' in London were instituted by the Wandering Minstrels. [M.]

WANHAL. Add that it seems, from the fact that some compositions of his were published at Cambridge, that he may have visited England. Further information concerning such a visit is not forthcoming.

WARNOTS, ELISABETH (ELLY), born at Liège, 1862, not 1857, made her début Sept. 9, 1879, as Anna (Dame Blanche). She remained there two years and upwards, and gained great applause both as a comedian and as a bravura singer. Among her parts were Catarina (Les Diamans), Giralda, Prascovia, Dénise (L'Épreuve Villageoise), etc. Her compass ranges from A below the line to F in alt. Miss Warnots is now or was lately at the Opéra Comique, Paris.

WARTEL, P. F. Add date of death, August 1882. Line 6 from end of article, *for* Patti *read* Piatti. Add that Mme. Wartel died Nov. 6, 1865.

WAYLETT, HARRIETT, whose maiden name was Cooke, born in 1797 at Bath, was taught singing by Loder. She married Mr. Waylett in 1819, and made her début at Drury Lane as Madge in 'Love in a Village,' Nov. 4, 1824, was well known as an actress and ballad singer at the 'patent' theatres, at the Strand, and elsewhere. She married a second time Alexander Lee the singer and composer, and died at Kennington, April 26, 1851. [A.C.]

WEBER, C. M. VON. P. 403 *a*, l. 12 from bottom, *for* 1881 *read* 1818. P. 427 in list of compositions, under No. 7 of the operas, 'Die Drei Pintos,' add that it has recently been completed by the composer's grandson, C. von Weber, and August Mahler, of Leipzig, and was produced at Leipzig, Jan. 20, 1888. The following certificate of Weber's death was among the papers of Sir Julius Benedict:—'On examining the body of Carl M. von Weber we found an ulcer on the left side of the larynx. The lungs almost universally diseased, filled with tubercles, of which many were in a state of suppuration, with two vomicae, one of them about the size of a common egg, the other smaller, which was a quite sufficient cause of death. (Signed) F. Tencken, M.D.; Chas. F. Forbes, M.D.; P. M. Kind, M.D.; Wm. Robinson, Surgeon. 91 Great Portland Street, June 5, 1826, 5 o'clock.'

WEBER, GOTTFRIED, Doctor of Laws and Philosophy, composer, theorist and practical musician, was born in 1779 at Freiesheim near Mannheim, and studied and travelled until, in 1802 he settled in Mannheim as a lawyer and holder of a Government appointment. It was here that his namesake, Carl Maria von Weber, sought a refuge after his banishment from Würtemberg (1810), that, in the house of Gottfried's father an asylum was found for old Franz Anton until his death in 1812, and that a lasting friendship was formed between Gottfried Weber, then aged 31, and Carl Maria, eight years his junior. A year previously the lawyer, proficient on the piano, flute, violoncello, and well versed in the scientific branches of musical knowledge, had founded, out of two existing societies, the 'Museum,' a band and chorus of amateurs who, under his able direction and with some professional

help, did excellent work. Gottfried's influence gained for the young composer a hearing in Mannheim, and the artists and amateurs, carried away by the spirit and fire of their conductor, did much towards establishing Carl Maria's fame in their city. For a lengthy account of the relations, both lively and severe, between these distinguished men, their influence on each other's work, their pleasant wanderings in company with other choice spirits, singing their newest songs to the guitar as serenades; their establishment of a so-called secret society (with high aims) of Composer-literati, in which Gottfried adopted the pseudonym of Giusto; and of their merry meetings at the 'Drei Könige' or at Gottfried's house—the reader may be referred to Max v. Weber's life of his father (Carl Maria). When circumstances had parted them, constant correspondence showed the strength and quality of their mutual sympathy. Some of Gottfried's best songs had been inspired by this intercourse, and were no doubt exquisitely interpreted by his (second) wife, *née* v. Dusch. Besides these songs, strophic in form and sometimes provided with guitar accompaniment, Weber's compositions include three Masses, other sacred music, sonatas, and concerted pieces for various instruments. In the intervals of founding the Mannheim Conservatoire, superintending the Court Church musical services, and doing occasional duty as conductor at Mainz, the genial lawyer laid the basis of his reputation by a profound study of the theory of music, the result of which appeared in the 'Versuch einer geordneten Theorie' (about 1815), of which translations have since appeared in French, Danish and English (Warner, Boston, 1846, and J. Bishop, London, 1851); 'Allgemeine Musiklehre'; and other volumes, and articles published in 'Caecilia,' the musical periodical published by Schott in Mainz, and edited by Gottfried Weber from its beginning in 1824 until his death, September 21, 1839.[1] [See vol. i. 294.] Weber's examination of musical theories led to his work on time-measurements and the 'tempo-interpreter' [see vol. ii. 319 *a*], and his study of acoustics to certain improvements or inventions in wind-instrument making. A full list of his writings and compositions is given in Mendel's Lexicon xi. 297. [L.M.M.]

WEBER'S LAST WALTZ. In the second bar of the musical example, the fourth note should be F, not D♭.

WEHLI, Karl. Add that he died Jan. 25, 1887.

WEINLIG, C. T. Line 8 of article, *for* he was followed by Hauptmann *read* he was followed by Pohlenz, who in September of the same year was succeeded by Hauptmann.

WEITZMANN, Karl Friedrich, a learned and excellent writer on musical subjects, born at Berlin, Aug. 10, 1808, was a pupil of Henning Klein, Spohr and Hauptmann. He rose by various posts and labours, till in 1848 he established himself as a teacher and writer in Berlin, where he resided till his death, Nov. 7, 1880. His publications are various:—'History of Harmony' (1849); 'The Diminished Seventh' (1854); 'History of the Chord of the Seventh' (do.) etc; but especially 'History of Clavierplaying and Literature' (1st ed. 1863, 2nd do. much enlarged, and with a history of the instrument itself, 1880), a very valuable and interesting work. For further details see Riemann's 'Musik Lexikon,' 1887. [G.]

WELCH, J. B. Add date of death, July 1, 1887.

WELSH MUSIC. P. 441 *a*, second musical example, the first bar-line should be between the second and third sets of triplets, not before the first set. P. 441 *b*, note 2, *for* Ottomaro Luscinio *read* Othmar Luscinius.

WENNERBERG, Gunnar, a Swedish poet and composer, born 1817, in Lidköping, and educated at the Upsala university. For several years past he has been a member of the Swedish legislature. As a musician he was entirely self-taught, and he published his first composition 'Frihetssänger' (Songs of Freedom), in 1847. This was followed by several works of which the best known is 'Gluntarne' (recollections of student life in Upsala). He subsequently wrote an oratorio entitled 'The Birth of Christ'; and set the 'Psalms of David' in a simple and melodious form for soli and chorus with accompaniment. These Psalms are universally popular in Sweden, and they are sung both in North Germany and Scotland. [A.H.W.]

WESLEY, Charles. Add that he wrote a hymn on the death of Dr. Boyce, beginning, 'Father of Heroes, farewell.' P. 446 *b*, in list of S. Wesley's compositions, *for* Antiphons *read* Motets, and add an asterisk (showing publication) to 'Omnia Vanitas.'

WESLEY, S. S., Mus. D. P. 447 *b*, l. 30, *for* in April *read* April 19. Line 33, *for* at Exeter *read* in the old cemetery at Exeter.

WHITE, or WHYTE, Robert. See vol. iv. p. 451. Add that he died at Westminster between Nov. 7 and Nov. 11, 1574. The family seem to have been probably visited by the plague, which raged with great severity that year. White made his will on Nov. 7, 1574. In it he is styled 'Bacheler of Musicke and Master of the Queristers of the Cathedrall Churche of St. Peter in the Cittie of Westminster.' He directs that he shall be buried at St. Margaret's, Westminster 'nere vnto my children.' Amongst the bequests is one to his daughter Margery White of 'six syluer spones and a mazer w^{ch} was her late graundmothers,' and to his father, Robert White 'the some of three poundes . . . and all such his household stufe and goodes w^{ch} he did bringe unto me at or before his cominge to me.' He also mentions two other daughters, Anne and Prudence White, and his wife, Ellen. He also mentions some

[1] It appears that vol. xx. of July 1839 was followed only in 1842 by vol. xxi., the first edited by Dehn.

property he possessed called Swallowfield, at Nuthurst, Sussex, and leaves 'to every of my skollers to eche of them iiii^{d}.' The registers of St. Margaret's show that White 'M^{r} of the singing children' was buried on Nov. 11, and the will was proved on Dec. 8, the widow having died in the meantime. Prudence White, the daughter, was buried on the day that her father's will was made, viz. Nov. 7. The will of Ellen White, the widow, was made on Nov. 21. In it she directs that she shall be buried in the churchyard of St. Margaret's, near her husband and children. The names mentioned by the testatrix are her mother, Katherine Tye (probably a relation of Dr. Christopher Tye), her aunt Anne Dingley, her sisters Susan Fulke and Mary Rowley, her daughters Margery and Anne (both minors), her brother-in-law, Thos. Hawkes, citizen and pewterer of London, Mr. Gravener 'my husband's deere freinde,' and Richard Granwall 'one of the gentlemen of the Queenes Chappell.' The list of debts owing to her and her husband includes 'xxxvi^{s} viii^{d}' from Edward Parston, Esq.; £6 from Gabriel Cawood, 'citizen and stacyoner of London,' and 'she hathe in pawne a jewell of golde.' Mrs. White was buried on Nov. 30, 1574, and the will was proved on Dec. 8 following. It has been suggested with great probability that the large sum owing to White from Gabriel Cawood the printer was in payment for some of his musical compositions. (Registers of St. Margaret's, Westminster; wills at Somerset House.) [W.B.S.]

WHYTHORNE, Thomas. At end of article, *for* Mr. Julian Marshall *read* Mr. W. H. Cummings.

WIDOR, C. M. Add that in 1888 he visited England and conducted his 'Music to a Walpurgis Night' at the Philharmonic Concert of April 19.

WILD, Franz. P. 456 *a*, l. 10 from bottom, *for* vol. iii. *read* vol. iv.

WILHELM, Carl. Line 4 of article, *for* Aug. 26, 1875, *read* Aug. 16, 1873.

WILHEM, G. L. B. P. 458 *b*, l. 12, *for* vol. ii. *read* vol. iii.

WILSON, John. The date of birth has been established by Mr. James Love, who has found an entry in the Canongate Records of Edinburgh, to the effect that the singer was the son of John Wilson, a coach-driver, and was born Dec. 25, 1800, and baptized Jan. 4, 1801. Line 12 of article, *for* Creselli *read* Crivelli.

WIND-BAND. P. 464 *b*, fourth stave of musical example, in the second bar a group of descending notes F, E, D, is to be inserted between the first and second groups of semiquavers and demisemiquavers, in order to complete the bar. P. 465 *a*, note 1, *for* p. 385 *read* 358.

WINGHAM, Thomas. Add that he has been Choirmaster at the Oratory, Brompton, since October 1882.

WINN, William. Add date of death, June 1, 1888.

WORKING-OUT. P. 489 *a*, l. 14, *read* or a figure extracted from a subject, to change, etc.

WÜLLNER, Franz. Add among his works, a Stabat Mater for chorus.

WYDOW, Robert, Mus.B. (also spelt Wedow, Widows, Wydewe, etc., and latinized into Viduus). According to Leland he was born at Thaxted, in Essex. He was educated by his step-father, the master and proprietor of a school at Thaxted, who ultimately sent him to Oxford to complete his studies. While there he distinguished himself in literature and the arts, especially in poetry and music, finally taking the degree of Bachelor of Music. After his step-father's death Robert Wydow succeeded him as master of the school, and is said to have turned out several illustrious pupils. Among his patrons, Wydow numbered Edward IV; and, as Edward had some connection with Thaxted, being lord of a third of the manor, it is not unreasonable to suppose that it was owing to that monarch's good offices that he obtained the presentation to the vicarage of Thaxted on Dec. 22, 1481. This living, which was then worth about £28, Wydow resigned on Oct. 1, 1489. It was probably at this period that he travelled in France and Italy for the purposes of study, and added to those stores of learning which gained him the appellation of 'Grammaticus'; and it was perhaps on his return from the Continent that he was made 'Penitentiarius' in St. Paul's Cathedral, if, as is generally believed, he really held that post. On Nov. 19, 1493, he was collated rector of Chalfont St. Giles, in Buckinghamshire, a place afterwards associated with the more illustrious names of John Milton and William Penn. After enjoying that living for rather more than three years, he was installed by proxy Canon and Confrater of Comba II. in Wells Cathedral, on March 27, 1497; and a few months later (Sept. 10) was appointed Succentor in the place of Henry Abyngdon [vol. i. p. 6]. On Sept. 21, 1499, he obtained the vicarage of Chew Magna, in Somersetshire, which he held till his death. In 1499–1500 he was made one of the residentiary canons, and on May 25 in the latter year was installed Sub-Dean and Prebendary of Holcombe Burnell, in Devonshire. About the same time Robert Wydow was made deputy for the transaction of affairs between the Pope and the Cathedral and Chapter of Wells; he was also granted the advowson of Wookey, in Somersetshire, the rectory and vicarage of which were together worth about £15. He also held about this time the offices of 'Scrutator Domorum' and Librarian in the Chapter House. On Sept. 21, 1502, Wydow was made Seneschal, and shortly after Auditor, of the Chapter House. On Oct. 1, 1503, he was presented to the perpetual vicarage of Buckland Newton, in Dorsetshire, which is the last event recorded in his life, for he died

Oct. 4, 1505. He was a man of some wealth, if we may judge from his benefactions to the Carthusian Priory of Henton, near Bath, which were so considerable that a Requiem was ordered to be sung for his soul in every house of the Order throughout the kingdom. Edward Lee, Archbishop of York, who in his younger days had met Wydow, called him 'facile princeps' among the poets of his day. Holinshed speaks of him as an 'excellent poet,' and classes him among the celebrities of Henry VII.'s reign. Wydow's chief poetical work was a rhythmical life of Edward the Black Prince, to which Leland refers in these words :—

> Contulit Hectoreis arguta voce triumphis
> Eduerdum Viduus doctissimus ille Nigellum
> Et facti pretium tulit immortale poeta.

This work is said to have been written by Wydow at the instigation of his royal patron. He also wrote a book of epigrams. No musical composition by this author is extant. [A.H.-H.]

WYNNE, Sarah Edith, born March 11, 1842, at Holywell, Flintshire, was taught singing by Mrs. Scarisbrick of Liverpool, and by Pinsuti, at the Royal Academy of Music, where she was Westmorland Scholar, 1863–64. She was subsequently taught by Romani and Vannuccini at Florence. She first sang in the provinces, and made her début in London (St. James's Hall), at Mr. John Thomas's Welsh concert, July 4, 1862. She sang with great success in the following year at Henry Leslie's Welsh concert, Feb. 4, at the Crystal Palace, April 25, at Mr. Thomas's concert in his cantata 'Llewellyn,' June 29, and as the heroine on the production of Macfarren's 'Jessy Lea,' at the Gallery of Illustration, Nov. 2. Chorley was one of the first to draw attention to her talent. She became a great favourite at the above concerts, at the Philharmonic, the Sacred Harmonic, the Popular, Ballad, and other concerts, and later at the Handel and provincial Festivals, etc. She sang in the United States with the Pateys, Cummings, and Santley, in 1871–2, and at the Boston Festival of 1874. She played a few times in English opera at the Crystal Palace in 1869–71 as Arline, Maritana, Lady Edith (in Randegger's 'Rival Beauties'): but she was chiefly noted for her singing of songs and ballads, and was remarkable alike for her passionate expression and the simplicity of her pathos. Since her marriage with Mr. Aviet Agabeg, at the Savoy Chapel, Nov. 16, 1875, she has sung less frequently in public, but has devoted herself principally to giving instruction to young professional singers in oratorio and ballad singing. [A.C.]

X, Y, Z.

XYLOPHONE. See Strohfiedel.

YANKEE DOODLE. P. 494 *a*, in bar 8 of musical example, the first note should be C, not E.

YEOMEN OF THE GUARD, THE: or, The Merryman and his Maid. Opera in two acts; the words by W. S. Gilbert, music by Sir Arthur Sullivan. Produced at the Savoy Theatre Oct. 3, 1888. [M.]

YONGE, Nicholas. Line 10 from end of article, *for* Bodenham *read* 'A. B.', since Mr. A. H. Bullen, in his recent re-issue of 'England's Helicon' (1887), proves conclusively that the 'A. B.' by whom the original work was edited cannot be Bodenham, as was formerly supposed.

ZAUBERFLÖTE, DIE. Last line but one of article, *for* 1883 *read* 1833.

ZULEHNER. See Mozart, in Appendix.

ZUR MÜHLEN, Raimund von, was born Nov. 10, 1854, on the property of his father in Livonia. He received his education in Germany, and in his twenty-first year began to learn singing at the Hochschule, Berlin, and continued the study under Stockhausen at Frankfort, and Bussine in Paris. His specialty is the German Lied, particularly the songs of Schubert and Schumann, of the latter of which he has made a special study with Madame Schumann. His voice is peculiar and sympathetic; but what gives Zur Mühlen's singing its chief charm is the remarkable clearness of his pronunciation, and the way in which he contrives to identify the feeling of the words with the music, to an extent which the writer has never heard equalled. He sang in London first in 1882, and has been a frequent visitor since. The writer regrets not to have heard him in a work of Beethoven. [G.]

FINAL ADDITIONS.

(The following were too late for insertion in the earlier sheets of this Appendix.)

ALARD, J. D. Add date of death, Feb. 22, 1888.

ALKAN, C. V. Add date of death, March 29, 1888.

BACH-GESELLSCHAFT. Add to the lists given under this heading, and KIRCHEN-CANTATEN, in Appendix, the following catalogue of the contents of two volumes published in 1889:—

Vol. XXXIV. 1884. Kammermusik fur Gesang.	Vol. XXXV. 1885. Church cantatas.
Serenata, 'Durchlauchster Leopold.'	171. Gott wie dein Name.
	172. Erschallet, ihr Lieder.
Cantata, 'Schwingt freudig euch empor,' and 'Die Freude regt sich.' (Two versions of the same work.)	173. Erhöhtes Fleisch und Blut.
	174. Ich liebe den Höchsten.
	175. Er rufet seinen Schafen.
	176. Es ist ein trotzig und verzagt Ding.
Dramma, (Die Wahl des Hercules) 'Lasst uns sorgen.'	177. Ich ruf' zu dir, Herr Jesu Christ.
Dramma, 'Tönet ihr Pauken.'	
Cantata gratulatoria, and 'Preise dein Glücke' (appx.)	178. Wo Gott der Herr nicht bei uns hält.
Dramma, 'Angenehmes Wiederau.'	179. Siehe zu, dass deine Gottesfurcht.
Dramma, 'Auf, schmetternde Töne.'	180. Schmücke dich, O liebe Seele.

BENOIT. Add that his 'Lucifer' was given for the first time in London at the Albert Hall, April 3, 1889.

BRAHMS. Add the following to the list of works, vol. iv. p. 562:—

Op. 103. Zigeunerlieder for 4 voices and PF. acct.	106. 5 Songs.
104. 5 Songs, a capella for mixed choir.	107. 5 Songs.
105. 5 Songs.	108. Sonata for violin and piano in D minor.

BREITKOPF & HÄRTEL. Add date of death of Raymund Härtel, Nov. 10, 1888.

BRIDGE, J. F. Add that his cantata 'Callirhoë,' to words by W. Barclay Squire, was produced at the Birmingham Festival of 1888.

BUCK, DUDLEY. Add that his 'Light of Asia' was given for the first time in England at Novello's Oratorio Concerts, March 19, 1889.

DAVIDOFF, CARL. Add date of death, Feb. 26, 1889.

DITSON, OLIVER & Co. (in Appendix). Add date of death of Oliver Ditson, Dec. 21, 1888.

DVOŘÁK. Add the following to the list of works vol. iv. p. 624:—

Op. 81. Quintet for PF. and strings.
82. 4 Songs.

ELLA, JOHN. Add date of death, Oct. 2, 1888.

FLORIMO (in Appendix). Add date of death, Dec. 18, 1888.

GOW. Add that the Christian name of the elder Gow should be spelt 'Niel' (on the authority of J. Cuthbert Hadden, Esq.).

GRIEG. Add to list of works in appendix, Op. 44, 6 Songs, and Op. 46 the 'Peer Gynt' music arranged for orchestra. Also that he and Mme. Grieg came to England again early in 1889, appearing at the Philharmonic, the Popular Concerts, and elsewhere.

GUNG'L. Add date of death of Josef Gung'l, Jan. 31, 1889.

HUEFFER (in Appendix). Add date of death, Jan. 19. 1889.

JÄHNS, F. W. Add date of death, Aug. 8, 1888.

JULLIEN, J. L. A. (in Appendix) Add to list of works his biography of Berlioz, the companion volume to his 'Richard Wagner,' 1888.

LIND, JENNY. Add the following to the corrections in Appendix:—Vol. ii. p. 140 *b*, l. 15 from bottom, *for* April 18 *read* April 22. P. 142 *a*, l. 15, *for* May 18, *read* May 10. Add that she sang in April and May, 1849, for Lumley, as farewell appearances, at one concert (Flauto Magico), and in six operatic performances, viz. April 26, Sonnambula; 28, Lucia; May 3, Figlia; 5, Sonnambula; 8, Lucia; 10, Roberto (her last appearance on the stage).

Lumley, in his book, mentions four, meaning perhaps four different parts, or possibly with

the idea of undervaluing her assistance, which, according to Nassau Senior, was gratuitously given to Lumley.

According to Léon Pillet and Arthur Pougin (Le Ménestrel, Nov. 20, 1887), the 'hearing' of Mlle. Lind (1842) by Meyerbeer, of which so much has been said and written, had no reference whatever to an engagement at the Opéra at Paris. It seems to have been altogether private, and unconnected with any question of the sort. [J.M.]

MACKENZIE, A. C. Add to list of works 'The Dream of Jubal,' cantata, performed by the Liverpool Philharmonic Society, Feb. 5, and at Novello's Oratorio Concert, Feb. 26, 1889.

MONK, W. H. Add date of death, March 1, 1889.

MURSKA, Ilma di. Correct date of birth to 1836, and add date of death, Jan. 14, 1889. She married (1) Dec. 29, 1875, Alfred Anderson, at Sydney; and (2) May 15, 1876, J. T. Hill at Otago.

MUSICAL PERIODICALS. Add that the Tonic Sol-fa Reporter was issued bi-monthly till 1878, and that it has been called 'The Musical Herald' since Jan. 1889.

OUSELEY, Sir F. A. G. Add date of death, April 6, 1889.

RHEINBERGER. Add to list of works in appendix a Singspiel, 'Das Zauberwort,' op. 153, and a twelfth organ sonata, op. 154.

ROSA, Carl. Add date of death, April 30, 1889, at Paris. To works mentioned, iv. 775*b*, *add* In 1888 'Robert the Devil,' 'The Puritan's Daughter,' 'The Star of the North,' and 'The Jewess' were produced; and on Jan. 12, 1889, Planquette's 'Paul Jones' at the Prince of Wales's Theatre, London.

STEINWAY & SONS. Add date of death of Theodore Steinway, March 25, 1889.

VIRGINAL MUSIC. Vol. iv. p. 307 *a*. The account of the younger Francis Tregian (based upon that given in Polwhele's Cornwall, iv. 88–90) is incorrect. He was educated at Eu, and entered Douay Sept. 29, 1586. On the occasion of the visit of the Bishop of Piacenza, Aug. 14, 1591, he was chosen to deliver a Latin address of welcome. He left Douay on July 11, 1592, and was afterwards for two years chamberlain to Cardinal Allen, upon whose death in 1594 he delivered a funeral oration in the church of the English College at Rome. In a list of the Cardinal's household drawn up after his death, which is preserved in the Archives of Simancas, Tregian is described as 'molto nobile, di 20 anni, secolare, di ingenio felicissimo, dotto in filosofia, in musica, et nella lingua latina.' He returned to England, bought back his father's lands, and in 1608–9 was convicted of recusancy and committed to the Fleet. He died there, probably in 1619, owing the Warden above £200 for 'meate, drinke and lodging.' In his rooms at the Fleet a contemporary record states there were many hundred books. If it were not for the date of 'Dr. Bull's Jewel,' it might be conjectured that the Fitzwilliam Virginal Book was written by the younger Tregian while a prisoner in the Fleet. If this is impossible, there can be but little doubt that it was written by some of his associates, possibly by one of his sisters, who were in England with him.

Morris, 'Troubles of our Catholic Forefathers,' first series; State Papers, Domestic, James I., xli. No. 116, cxvi. No. 12; 'The Oeconomy of the Fleete,' ed. Jessopp, Camden Soc., p. 140; Records of the English Catholics, vols. 1, 2. [W.B.S.]

This Dictionary was originally published between the dates 1877 *and* 1889, *and the Parts have since been reprinted from plates, with corrections as required.*

OXFORD: HORACE HART, PRINTER TO THE UNIVERSITY

PREFACE.

Lest a Dictionary of articles arranged in alphabetical order should be thought to require no Index, it is necessary to remind readers of the Dictionary of Music and Musicians, not only that it makes mention of very many persons and things to which no separate articles are devoted, but also that with regard to names and subjects which have their own articles further information and illustration are supplied in other articles. Articles also occasionally occur out of the order of strict alphabetical sequence. The object, therefore, of the present Index is to enable readers to find with ease all the information which the Dictionary affords upon any specific point of inquiry or study.

A few remarks explanatory of details in the arrangement of the Index will facilitate its use.

1. When a heading in the Index is immediately followed by a reference to volume and page (as Aaron, P., i. 1 *a*), the reader will understand that the heading has an article to itself in the Dictionary. Succeeding entries under the heading indicate other articles where it is spoken of; and "etc." appended to a reference signifies that the article contains further allusions to the heading. If, on the other hand, a heading is not immediately followed by a reference to volume and page (as Aalst, J. A. van; Hist. of Mus., iv. 674 *b*), the subject has no article of its own, but information about it may be gathered from the articles to which the entries point.

2. So many musicians have borne the same surnames, and there is so much uncertainty about their Christian names and initials that it is often impossible to identify them with precision, and thus perfect accuracy cannot be ensured in the indexing of names. But,—subject to the condition of invariably making the headings in the Index identical with headings of articles in all cases where there is a separate notice of a musician,—the rule observed in the present Index is to state Christian names or initials, whenever known, in the headings. In the entries Christian names and initials are not stated, except to avoid confusion when the same surname has been borne by more than one musician mentioned in the Dictionary. Where, however, one musician has been indisputably more eminent than all others of the same name, it has not been deemed necessary to insert his initials in the entries. Again, in cases where musicians are known under different names (as Genet, alias Il Carpentrasso), or their names are spelt in different

ways (as Escobedo and Scobedo), cross-references are given in the Index, but the entries will be found under the most usual form of the name,—subject, of course, to the above-mentioned condition of securing correspondence of headings in the Index with headings of articles. And this last observation equally applies to names with prefixes (as De Muris or Muris) and to double names (as Bourgault-Ducoudray).

3. With respect to the various Forms of music, it would be impossible to refer to all the composers who have employed them, without uselessly swelling the bulk of the Index. For instance, Beethoven wrote an Oratorio, but he made no special mark on the Oratorio form of music, and the article on Beethoven contains nothing of interest in regard to that form. Thus no good purpose would be served by a reference to Beethoven under the heading of Oratorio; but the names of Animuccia and Mendelssohn will be found under that heading, because the former wrote the first Oratorio, and in the article on the latter this form is instructively noticed. In short, as to Forms of music, references are only given in the Index to such articles as contain matter of interest respecting them.

4. It is hoped that the catalogue of articles contributed by the various writers will be of service.

To these explanatory remarks the undersigned would only add that she is very sensible of the imperfections of the Index, but ventures to hope that it may be of some use in rendering the valuable information contained in the Dictionary more readily and fully accessible to students of music.

ADELA H. WODEHOUSE.

June, 1890.
